Books in the Digital Age-John B. Thompson 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive 'logic' or dynamic of change, and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had, and continues to have, a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies, and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers, and to anyone interested in books and their future.

Higher Expectations-Derek Bok 2020-08-25 How our colleges and universities can respond to the changing hopes and needs of society In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful lives.

Esports in Higher Education-George S. McClellan 2020-06-03 This comprehensive resource examines the rapidly-growing esports phenomenon in higher education, bringing the perspectives of players, administrators, and scholars together in one volume to discuss the basics of esports, how to start and maintain successful esports programs, and issues and trends in the field. Esports are a global phenomenon with an estimated audience of 400 million people in 2018. Given their already strong base

and rising popularity on college campuses, esports have been referred to as the new college football. This book offers practical insights into how to develop and maintain an esports program that is consistent with institutional purposes and values. The book is helpful to all types of institutions (small to large, public and private, 2-year or 4-year). It draws on current scholarship and the professional experience of the authors, focused heavily on practical advice for higher education professionals. Among the challenges of esports in higher education the book addresses are competition structure, competition climate, child protection, cheating, gambling, lack of reliable relevant data to inform decisions, and the advent of an esports arms race. Some of the opportunities described in the book include student recruitment and success networks with high schools, and partnerships with the esports industry. Done correctly, esports can provide a structured way for all students (on campus, off campus, and online) to engage in both curricular and cocurricular programming that can provide measurable learning outcomes and have a positive impact on retention rates.

**Social Media in Higher Education: Case Studies, Reflections and Analysis**-Chris Rowell 2019-06-21 How does social media affect working life in Higher Education? How are universities harnessing its power to aid student learning? This innovative collection brings together academics and those working in professional services to examine these questions and more. The diverse and expert contributors analyse the many ways social media can be used to enhance teaching and learning, research, professional practice, leadership, networking and career development. The impact of social media is evaluated critically, with an eye both to the benefits and the problems of using these new forms of digital communication. This is the first volume to give such detailed attention to this area of high interest. Its innovative approach extends to its creation, with contributors found via their presence on Twitter. The short and impactful chapters are accessible while retaining an academic focus through their application of relevant learning theories and educational context. *Social Media and Higher Education* is essential reading for any professional working in higher education, including lecturers teaching education courses. It is also significant for researchers looking at more recent developments in the field and what it means to work in a modern higher education environment.

**Online Teaching and Learning in Higher Education**-Pedro Isaias

**Special Education in Contemporary Society**-Richard M. Gargiulo 2016-12-02 2015 Recipient of the Textbook Excellence Award from the Text and Academic Authors Association (TAA) The Sixth Edition of Richard Gargiulo's well-respected *Special Education in Contemporary Society: An Introduction to Exceptionality* offers a comprehensive, engaging, and easy-to-read introduction to special education. Grounded in research and updated to reflect the most current thinking and standards of the field, the book provides students with the skills and knowledge to become successful teachers. Richard Gargiulo and new co-author Emily Bouck encourage a deep awareness and understanding of the human side of special education. Their book provides students a rare look into the lives of exceptional students and their families, as well as the teachers that work with exceptional persons throughout their lives. The new edition maintains the broad context and research focus for which the book is known, while expanding on current trends and contemporary issues to better serve both pre-service and in-service teachers of exceptional individuals. The text is organized into two distinct parts to offer students a truly comprehensive and humane understanding of exceptionality. In Part I, readers are provided strong foundational perspective on broad topics that affect all individuals with an exceptionality. In Part II, the authors engage students with thorough examinations of individual exceptionalities, and discuss historical, personal, and educational details of each exceptionality as it affects a person across the lifespan.

**From Dissertation to Book, Second Edition**-William Germano 2014-02-27 When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables

for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

Racing Odysseus—Roger H. Martin 2008-09-02 The idea of reliving youth is a common fantasy, but who among us is actually courageous enough to try it? After surviving a deadly cancer against tremendous odds, college president Roger H. Martin did just that—he enrolled at St. John's College, the Great Books school in Annapolis, Maryland, as a sixty-one-year-old freshman. This engaging, often humorous memoir of his semester at St. John's tells of his journey of discovery as he falls in love again with Plato, Socrates, and Homer, improbably joins the college crew team, and negotiates friendships across generational divides. Along the way, Martin ponders one of the most pressing questions facing education today: do the liberal arts still have a role to play in a society that seems to value professional, vocational, and career training above all else? Elegantly weaving together the themes of the great works he reads with events that transpire on the water, in the coffee shop, and in the classroom, Martin finds that a liberal arts education may be more vital today than ever before. This is the moving story of a man who faces his fears, fully embraces his second chance, and in turn rediscovers the gifts of life and learning.

Off to College—Roger H. Martin 2015-08-04 What should parents expect during their child's first year of college? Roger Martin, double president emeritus of two colleges, spent a year visiting five diverse colleges—public and private, large and small, elite and non-elite—in order to offer the parents of college-bound seniors a comprehensive overview of the first-year college experience. In addition to a stint with dorm life and time with students and professors, Martin draws from conversations with a wide variety of campus administrators and staff members in financial aid, campus police, sports, health care, and disabilities accommodations. We join Martin, for example, as he and a campus safety officer walk around campus on a busy Saturday night. While *Off to College* deals with more traditional topics such as the financial challenges of college, homesickness, and time management, it also tackles more complex, contemporary issues that college freshman may encounter. There are sections devoted to date rape, drinking, campus shootings, and depression, as well as chapters targeted at athletes, minorities, and first generation students. We can boast in this book not only a most appropriate and uniquely positioned author, but also one full of information and good advice from campus sources. *Off to College* promises to be an encouraging and extremely well-informed guide for any parent sending their child off to a four-year residential college.

Academic Leadership and Governance of Higher Education—Robert M. Hendrickson 2013-04-29 To meet the new and rapidly changing demands facing today's higher education managers and leaders - from department chairs to trustees - this book offers guidance on how to effectively discharge their responsibilities and how to develop their skills for managing their relationships with internal and external stakeholders. It also provides a broad understanding of the structure and functions of their institution and of the appropriate loci of decision-making. The authors go beyond the “positions” of leadership to emphasize the qualities of creativity, commitment, collaboration, delegation and courage that are essential to steer a unit, college or university through successful and enduring change. Recognizing that the hallmark of higher education in the United States is a diversity of institutional types, this book enables the reader to relate issues of environment, organization and management to his or her specific institution, from not only the presidential perspective, but from the vantage point of trustees, provosts, vice presidents, deans, and department heads. By covering all these functions—as well as the role of external stakeholders—in a single volume, this book offers readers a comprehensive view of how institutions respond to external forces and internal issues, and how these impact organizational structure, functions and decision-making in their roles, and the institution at large. The book is informed by these three essential principles: • Sound institutional decisions must be based on a clearly articulated mission and set of core values; • Successful institutional adaptation to a changed environment must be grounded and aligned with the fundamental mission and core values; and • Successful academic leaders must be able to create and foster partnerships, bringing diverse individuals and interests together around a shared vision and mission grounded in common values. This handbook is divided into five units. The first introduces the reader to the scholarly field of higher education and establishes the contextual framework for the rest of the book. The second investigates the multifaceted and often complex relationships that exist between

institutions of higher learning and the external constituencies. The third focuses how college and university presidents and their board of trustees keep an institutional mission focused while adapting to changes in the environment, while the fourth analyzes how colleges and universities fulfill their core mission through shared democratic partnerships. The concluding unit concerns how effective academic leaders implement their institution's academic mission. Both scholarly and accessible, this book is intended to be of interest to a broad audience, ranging from graduate students in higher education administration programs to members of institutional governing boards, and everyone in leadership positions in between. All of the authors have completed graduate work in a higher education administration program, and collectively have had experience with academic administration at every level through to the university presidency. Two of the authors are currently faculty in leading higher programs teaching classes in administration and organizational theory and have published widely in the scholarly field. One has been a member of a governing board. Study questions suitable for leadership training and graduate courses are provided online. See hot link at top right of this page.

College (Un)Bound-Jeffrey J. Selingo 2013 Discusses the problems facing four-year colleges in the wake of the 2008 recession that left graduates with enormous debts and slim job prospects in a tough economy and describes institutions that are innovating to better prepare students in the future.30,000 first printing.

Islamophobia in Higher Education-Shafiqa Ahmadi 2020-08-10 While Islamophobia was present in our society before 9/11, it has become more pervasive in recent years. This is evidenced by the current social and political climate, hate speech and hate crimes directed at Muslims, and the Supreme Court's upholding of Presidential Proclamation 645 that effectively bans Muslim immigration from coming to the U.S. What does this mean for Muslim students in college, and indeed for institutions of higher education as they navigate law and policy on the one hand and adhere to their mission of achieving inclusive and equitable educational environments on the other? Two thirds of Muslims in the U.S. are vexed with current policy, and there has been an alarming increase in reports of bigotry and discrimination against them since the 2016 presidential elections. The fear of Islam, in general, and Muslims, specifically, not only compels non-Muslims to differentially treat Muslims, but also trade some of their own civil rights and civil liberties under the guise of national security. To address these issues, institutions require a nuanced understanding of laws and policies that institutionalize Islamophobia, and a greater understanding of the diverse college students that identify as Muslim. This book fills what has been a dearth of research that explores the experiences and navigation of Muslim students in colleges and universities, and addresses the even less studied domain of the experiences of Muslim students who hold multiple marginalized identities -- such as race, ethnicity, and LGBTQ status - as well as the intersection of those identities that may create multiple burdens of oppression and discrimination. This book begins by critically engaging with how current laws and policies institutionalize Islamophobia and affect the intersectionality and diversity within the Muslim community. It includes multidisciplinary voices, such as an international human rights attorney, a civil rights attorney, a criminal law attorney, student affairs practitioners, and research faculty whose work on this marginalized student population are traditionally not recognized within academic settings; and brings the voices of female Muslim scholars to the fore. Each chapter includes a critical analysis of the literature, a legal analysis when appropriate, a set of recommendations for policy and practice, and discussion questions.

Reconstructing Democracy-Charles Taylor 2020-03-17 "An urgent manifesto for the reconstruction of democratic belonging in our troubled times." —Davide Panagia Across the world, democracies are suffering from a disconnect between the people and political elites. In communities where jobs and industry are scarce, many feel the government is incapable of understanding their needs or addressing their problems. The resulting frustration has fueled the success of destabilizing demagogues. To reverse this pattern and restore responsible government, we need to reinvigorate democracy at the local level. But what does that mean? Drawing on examples of successful community building in cities large and small, from a shrinking village in rural Austria to a neglected section of San Diego, Reconstructing Democracy makes a powerful case for re-engaging citizens. It highlights innovative grassroots projects and shows how local activists can form alliances and discover their own power to solve problems.

Online Learning and Assessment in Higher Education-Robyn Benson 2010-07-15 The use of e-learning strategies in teaching is becoming increasingly popular, particularly in higher education. Online Learning and Assessment in Higher Education recognises the key decisions that need to be made by lecturers in order to introduce e-learning into their teaching. An overview of the tools for e-learning is provided, including the use of Web 2.0 and the issues surrounding the use of e-learning tools such as resources and

support and institutional policy. The second part of the book focuses on e-assessment; design principles, different forms of online assessment and the benefits and limitations of e-assessment. Provides an accessible introduction to teaching with technology Addresses the basic aspects of decision-making for successful introduction of e-learning, drawing on relevant pedagogical principles from contemporary learning theories Crosses boundaries between the fields of higher education and educational technology (within the discipline of education), drawing on discourse from both areas

Flipped Learning-Robert Talbert 2017-04-30 Flipped learning is an approach to the design and instruction of classes through which, with appropriate guidance, students gain their first exposure to new concepts and material prior to class, thus freeing up time during class for the activities where students typically need the most help, such as applications of the basic material and engaging in deeper discussions and creative work with it. While flipped learning has generated a great deal of excitement, given the evidence demonstrating its potential to transform students' learning, engagement and metacognitive skills, there has up to now been no comprehensive guide to using this teaching approach in higher education. Robert Talbert, who has close to a decade's experience using flipped learning for majors in his discipline, in general education courses, in large and small sections, as well as online courses - and is a frequent workshop presenter and speaker on the topic - offers faculty a practical, step-by-step, "how-to" to this powerful teaching method. He addresses readers who want to explore this approach to teaching, those who have recently embarked on it, as well as experienced practitioners, balancing an account of research on flipped learning and its theoretical bases, with course design concepts to guide them set up courses to use flipped learning effectively, tips and case studies of actual classes across various disciplines, and practical considerations such as obtaining buy-in from students, and getting students to do the pre-class activities. This book is for anyone seeking ways to get students to better learn the content of their course, take more responsibility for their work, become more self-regulated as learners, work harder and smarter during class time, and engage positively with course material. As a teaching method, flipped learning becomes demonstrably more powerful when adopted across departments. It is an idea that offers the promise of transforming teaching in higher education.

Transparent Design in Higher Education Teaching and Leadership-Mary-Ann Winkelmes 2019-04-18 This book offers a comprehensive guide to the Transparency in Learning and Teaching (TILT) framework that has convincingly demonstrated that implementation increases retention and improved outcomes for all students. Its premise is simple: to make learning processes explicit and equitably accessible for all students. Transparent instruction involves faculty/student discussion about several important aspects of academic work before students undertake that work, making explicit the purpose of the work, the knowledge that will be gained and its utility in students' lives beyond college; explaining the tasks involved, the expected criteria, and providing multiple examples of real-world work application of the specific academic discipline. The simple change of making objective and methods explicit - that faculty recognize as consistent with their teaching goals - creates substantial benefits for students and demonstrably increases such predictors of college students' success as academic confidence, sense of belonging in college, self-awareness of skill development, and persistence. This guide presents a brief history of TILT, summarizes both past and current research on its impact on learning, and describes the three-part Transparency Framework (of purposes, tasks and criteria). The three sections of the book in turn demonstrate why and how transparent instruction works suggesting strategies for instructors who wish to adopt it; describing how educational developers and teaching centers have adopted the Framework; and concluding with examples of how several institutions have used the Framework to connect the daily work of faculty with the learning goals that departments, programs and institutions aim to demonstrate.

A Global Perspective on Private Higher Education-Mahsood Shah 2016-03-21 A Global Perspective on Private Higher Education provides a timely review of the significant growth of private higher education in many parts of the world during the last decade. The book is concurrent with significant changes in the external operating environment of private higher education, including government policy and its impact on the ongoing growth of the sector. The title brings together the trends relating to the growth and the decline of private higher education providers, also including the key contributing factors of the changes from 17 countries. Provides a timely review of the significant growth of private higher education in many parts of the world during the last decade Presents the significant changes in the external operating environment of private higher education Brings together the trends relating to the growth and the decline of private higher education providers

Digital Leadership in Higher Education-Josie Ahlquist 2020-09-18 "Effective leadership means we must

bring our values and mission - not just soundbites - to our activity in the digital sphere. And it's not as hard as you may think, thanks to the very practical examples and exercises Josie Ahlquist has given us in this book." Brandon Busted, President - University Partners, Kaplan, Inc. "Often, higher education leaders see social media as a burden. Digital Leadership In Higher Education should be required reading in any leadership program because it clearly demonstrates how social media can and should extend leadership rather than be a burden for it." Russell Lowery-Hart, President - Amarillo College In this groundbreaking book, Josie Ahlquist provides readers with the tools they need to take a strong, values-based approach to leadership in the various digital spaces vital to the world of higher education today. Filled with real-world examples and tools to negotiate this ever changing digital landscape, the book fills an important niche in the literature: A user manual for your digital leadership journey. Each chapter includes tools and tactics, as well as stories that bridge the gap between technology and connection with community. This book doesn't have a recipe for cooking up the next viral video, it offers lots of ways to stay true to individual and organizational values while engaging online. Whether a college president, dean of students, associate professor, or a program coordinator, there is a need for leaders who aren't just early adopters and social media enthusiasts, but authentic individuals who back up their technology use with a purposeful philosophy and a values-based approach to their role.

Educational Administration: Concepts and Practices-Fred C. Lunenburg 2011-02-17 Highly respected and now in its Sixth Edition, EDUCATIONAL ADMINISTRATION: CONCEPTS AND PRACTICES is the best-selling and most comprehensive text of its kind. The authors discuss all topics necessary for a complete understanding of educational administration, balancing theory and research with practical coverage of culture, change, curriculum, human resources administration, diversity, effective teaching strategies, and supervision of instruction. A variety of in-text features help students learn, comprehend, and apply the material. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

What Tech Calls Thinking-Adrian Daub 2020-10-13 From FSGO x Logic: a Stanford professor's spirited dismantling of Silicon Valley's intellectual origins Adrian Daub's What Tech Calls Thinking is a lively dismantling of the ideas that form the intellectual bedrock of Silicon Valley. Equally important to Silicon Valley's world-altering innovation are the language and ideas it uses to explain and justify itself. And often, those fancy new ideas are simply old motifs playing dress-up in a hoodie. From the myth of dropping out to the war cry of "disruption," Daub locates the Valley's supposedly original, radical thinking in the ideas of Heidegger and Ayn Rand, the New Age Esalen Foundation in Big Sur, and American traditions from the tent revival to predestination. Written with verve and imagination, What Tech Calls Thinking is an intellectual refutation of Silicon Valley's ethos, pulling back the curtain on the self-aggrandizing myths the Valley tells about itself. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech's reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

Stylish Academic Writing-Helen Sword 2012-04-16 Elegant ideas deserve elegant expression. Sword dispels the myth that you can't get published without writing wordy, impersonal prose. For scholars frustrated with disciplinary conventions or eager to write for a larger audience, here are imaginative, practical, witty pointers that show how to make articles and books enjoyable to read—and to write.

Academic E-Books-Suzanne M. Ward 2015-11-15 E-Books in Academic Libraries: Stepping Up to the Challenge provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See

what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Perspectives on Women's Higher Education Leadership from around the World-Karen Jones 2018-10-30  
This book is a printed edition of the Special Issue "Perspectives on Women's Higher Education Leadership from around the World" that was published in Administrative Sciences

Grant Seeking in Higher Education-Mary M. Licklider 2012-08-28 Grant funding has become increasingly crucial to universities and university faculty, even as government and private funding reductions and increased application pools result in a more and more competitive environment. Securing the funding which is available is not a simple process, and institutional support for faculty who seek grants is uneven, where it exists at all. Faculty members are often left to navigate their own ways through the shifting landscape of the grants maze. When added on top of teaching and service loads, it is no surprise that many faculty members either avoid seeking grants altogether or produce grant proposals which have little or no chance of being funded. Faculty need a guide, and this book is that guide. Written by a team of successful grant writers, Grant Seeking in Higher Education orients faculty to the grants culture and walks readers step-by-step through the entire grant-seeking process, from identifying sources to preparing a successful application to administering the funds after the grant is awarded. The grant-seeking toolkit which is free online to purchasers of the book for you to download or print and use in your work includes standard forms, templates, and timelines for proposal development so any faculty member, from the scientist to the humanities scholar, can be sure not to miss out on the funding they deserve.

Markets from Culture-Patricia H. Thornton 2004 Institutional logics, the underlying governing principles of societal sectors, strongly influence organizational decision making. Any shift in institutional logics results in a similar shift in attention to alternative problems and solutions and in new determinants for executive decisions. Examining changes in institutional logics in higher-education publishing, this book links cultural analysis with organizational decision making to develop a theory of attention and explain how executives concentrate on certain market characteristics to the exclusion of others. Analyzing both qualitative and quantitative data from the 1950s to the 1990s, the author shows how higher education publishing moved from a culture of independent domestic publishers focused on creating markets for books based on personal, relational networks to a culture of international conglomerates that create markets from corporate hierarchies. This book offers broader lessons beyond publishing--its theory is applicable to explaining institutional changes in organizational leadership, strategy, and structure occurring in all professional services industries.

Open Education-Patrick Blessinger 2016-12-19 This insightful collection of essays explores the ways in which open education can democratise access to education for all. It is a rich resource that offers both research and case studies to relate the application of open technologies and approaches in education settings around the world. A must-read for practitioners, policy-makers, scholars and students in the field of education.

Cracks in the Ivory Tower-Jason Brennan 2019-04-01 Academics extol high-minded ideals, such as serving the common good and promoting social justice. Universities aim to be centers of learning that find the best and brightest students, treat them fairly, and equip them with the knowledge they need to lead better lives. But as Jason Brennan and Phillip Magness show in Cracks in the Ivory Tower, American universities fall far short of this ideal. At almost every level, they find that students, professors, and administrators are guided by self-interest rather than ethical concerns. College bureaucratic structures also often incentivize and reward bad behavior, while disincentivizing and even punishing good behavior. Most students, faculty, and administrators are out to serve themselves and pass their costs onto others. The problems are deep and pervasive: most academic marketing and advertising is semi-fraudulent. To justify their own pay raises and higher budgets, administrators hire expensive and unnecessary staff. Faculty exploit students for tuition dollars through gen-ed requirements. Students hardly learn anything and cheating is pervasive. At every level, academics disguise their pursuit of self-interest with high-faluting moral language.

Marshaling an array of data, Brennan and Magness expose many of the ethical failings of academia and in turn reshape our understanding of how such high power institutions run their business. Everyone knows academia is dysfunctional. Brennan and Magness show the problems are worse than anyone realized. Academics have only themselves to blame.

On the Judgment of History-Joan Wallach Scott 2020-09-22 In the face of conflict and despair, we often console ourselves by saying that history will be the judge. Today's oppressors may escape being held

responsible for their crimes, but the future will condemn them. Those who stand up for progressive values are on the right side of history. As ideas once condemned to the dustbin of history—white supremacy, hypernationalism, even fascism—return to the world, threatening democratic institutions and values, can we still hold out hope that history will render its verdict? Joan Wallach Scott critically examines the belief that history will redeem us, revealing the implicit politics of appeals to the judgment of history. She argues that the notion of a linear, ever-improving direction of history hides the persistence of power structures and hinders the pursuit of alternative futures. This vision of necessary progress perpetuates the assumption that the nation-state is the culmination of history and the ultimate source for rectifying injustice. Scott considers the Nuremberg Tribunal and South Africa's Truth and Reconciliation Commission, which claimed to carry out history's judgment on Nazism and apartheid, and contrasts them with the movement for reparations for slavery in the United States. Advocates for reparations call into question a national history that has long ignored enslavement and its racist legacies. Only by this kind of critical questioning of the place of the nation-state as the final source of history's judgment, this book shows, can we open up room for radically different conceptions of justice.

Social Media in Higher Education-Monica Patrut 2013-01-01 "This book provides research on the pedagogical challenges faced in recent years to improve the understanding of social media in the educational systems"--Provided by publisher.

Ambitious and Anxious-Yingyi Ma 2020-02-18 Over the past decade, a wave of Chinese international undergraduate students—mostly self-funded—has swept across American higher education. From 2005 to 2015, undergraduate enrollment from China rose from under 10,000 to over 135,000. This privileged yet diverse group of young people from a changing China must navigate the complications and confusions of their formative years while bridging the two most powerful countries in the world. How do these students come to study in the United States? What does this experience mean to them? What does American higher education need to know and do in order to continue attracting these students and to provide sufficient support for them? In *Ambitious and Anxious*, the sociologist Yingyi Ma offers a multifaceted analysis of this new wave of Chinese students based on research in both Chinese high schools and American higher-education institutions. Ma argues that these students' experiences embody the duality of ambition and anxiety that arises from transformative social changes in China. These students and their families have the ambition to navigate two very different educational systems and societies. Yet the intricacy and pressure of these systems generate a great deal of anxiety, from applying to colleges before arriving, to studying and socializing on campus, and to looking ahead upon graduation. *Ambitious and Anxious* also considers policy implications for American colleges and universities, including recruitment, student experiences, faculty support, and career services.

Connected Teaching-Harriet L. Schwartz 2019-06-30 At a time when many aspects of the faculty role are in question, Harriet Schwartz, the author of *Connected Teaching*, argues that the role of teachers is as important as ever and is evolving profoundly. She believes the relationships faculty have with individual students and with classes and cohorts are the essential driver of teaching and learning. This book explores teaching as a relational practice - a practice wherein connection and disconnection with students, power, identity, and emotion shape the teaching and learning endeavor. The author describes moments of energetic deep learning and what makes these powerful moments happen. She calls on readers to be open to and seek relationship, understand their own socio-cultural identity (and how this shapes internal experience and the ways in which they are met in the world), and vigilantly explore and recognize emotion in the teaching endeavor. *Connected Teaching* is informed and inspired by Relational Cultural Theory (RCT). The premise of RCT is that the experience of engaging in growth-fostering interactions and relationships is essential to human development. RCT's founding scholars believed the theory would be relevant in many different settings, but this is the first book to apply them to teaching and learning in higher education. In this book, the author shows that RCT has much to offer those devoted to student learning and development, providing a foundation from which to understand the transformative potential of teaching as a relational practice.

Higher Education in a Global Society-Donald Bruce Johnstone 2010-01-01 *Higher Education in a Global Society* delves deeply into the compelling challenges and opportunities facing higher education in cultivating world citizens. An exceptional range of scholars offers insights providing direction and guidance for colleges ready to respond to globalization from institutions crossing borders to creating international experiences at home, from students studying abroad to international students journeying to the United States, and from the critical demands on administrators to the vital contributions of faculty. J. Michael Adams, Fairleigh Dickinson University and International Association of University Presidents, US

Higher Education in a Global Society should be of tremendous practical value to deans and provosts contemplating an international partnership or program. Written in a most accessible style by a combination of higher education scholars and veteran academic administrators, it provides a nuanced understanding of both the pitfalls and unanticipated benefits from such programs. Charles T. Clotfelter, Duke University, US Preparing students for the 21st century labor force requires exposure to other cultures and societies. This volume discusses ways to build richer campus experiences for achieving this requirement. Different chapters explore research connections, international visitors and students, campuses abroad, study abroad programs, and curriculum changes. By presenting case studies from different types of institutions, the editors and authors offer ideas that can be useful throughout higher education. Teresa A. Sullivan, President, University of Virginia, US This book is a very positive contribution to the literature on higher education internationalization. Written from a distinctly US perspective, it examines topics such as worldwide demographic and educational attainment trends; university R&D investments abroad and technology transfer issues; the interrelated dynamics of national policies regarding international education, migration and nation-human capacity building; and strategies to embed internationalization on campus. Debra W. Stewart, Council of Graduate Schools Higher education functions in a global environment of consumers, employees, competitors, and partners. It has been a force for globalization and a model for adaptation, but nonetheless faces challenges. This volume of essays examines emerging issues and opportunities for advancing education across borders. The demands upon and need for higher education have never been greater at both the individual and societal levels, and the avenues for pursuing the mission of higher education have greatly expanded due to globalization. This volume examines how strategically minded institutions can better fulfill their mission in a global environment while promoting international collaboration and strengthening the world economy. Chapter authors include prominent senior administrators from higher education and leading researchers on higher education and globalization. They provide new and actionable information to enhance decision making and inform strategic planning as well as a contemporary examination of the business of higher education and areas of potential new research. This book is an excellent resource for academic administrators, as well as for researchers and students in business, management, economics, education, and public sector economics.

Media and Information Literacy in Higher Education-Dianne Oberg 2016-11-18 Media and Information Literacy in Higher Education: Educating the Educators is written for librarians and educators working in universities and university colleges, providing them with the information they need to teach media and information literacy to students at levels ranging from bachelor to doctoral studies. In order to do so, they need to be familiar with students' strengths and weaknesses regarding MIL. This book investigates what university and college students need to know about searching for, and evaluating, information, and how teaching and learning can be planned and carried out to improve MIL skills. The discussions focus on the use of process-based inquiry approaches for developing media and information literacy competence, involving students in active learning and open-ended investigations and emphasizing their personal learning process. It embraces face-to-face teaching, and newer forms of online education. Examines the intersecting roles of academic librarians, teacher educators, and library educators in preparing library students and teacher education students to use the library Brings new perspectives from both teacher educator and library educator, and draws connections between higher and secondary education (K12) Draws on a number of competences, skills, knowledge, experiences, and reflections from a variety of perspectives, and focuses on libraries as efficient tools in all kinds of education and learning activities Written by an international group of authors with firsthand experience of teaching MIL Looks at how libraries can contribute to the promotion of civic literacy within higher education institutions and in society more widely

Learning and Teaching in Higher Education-Kathy Daniels 2019 There is often little guidance available on how to teach in universities, despite there being increasing pressure to raise teaching standards, as well as no official requirement for academics to have any specific teaching qualification in many countries. This invaluable book comprehensively addresses this issue, providing an overview of teaching in a business school that covers all stages of student learning. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

DIY U-Anya Kamenetz 2010-04-01 The price of college tuition has increased more than any other major good or service for the last twenty years. Nine out of ten American high school seniors aspire to go to college, yet the United States has fallen from world leader to only the tenth most educated nation. Almost half of college students don't graduate; those who do have unprecedented levels of federal and private

student loan debt, which constitutes a credit bubble similar to the mortgage crisis. The system particularly fails the first-generation, the low-income, and students of color who predominate in coming generations. What we need to know is changing more quickly than ever, and a rising tide of information threatens to swamp knowledge and wisdom. America cannot regain its economic and cultural leadership with an increasingly ignorant population. Our choice is clear: Radically change the way higher education is delivered, or resign ourselves to never having enough of it. The roots of the words "university" and "college" both mean community. In the age of constant connectedness and social media, it's time for the monolithic, millennium-old, ivy-covered walls to undergo a phase change into something much lighter, more permeable, and fluid. The future lies in personal learning networks and paths, learning that blends experiential and digital approaches, and free and open-source educational models. Increasingly, you will decide what, when, where, and with whom you want to learn, and you will learn by doing. The university is the cathedral of modernity and rationality, and with our whole civilization in crisis, we are poised on the brink of Reformation.

The Role of Higher Education in the Professionalisation of Adult Educators-Maria N. Gravani 2019-11-08

This collection of essays focuses on the important, but under-discussed, role of higher education institutions in both delivering academic programmes that provide relevant cognitive and professional skills and competences to future adult educators, and in being more actively involved in the current dialogue with regard to the professionalization paths of adult educators and trainers. The topics discussed here vary from the initial education and training of adult educators in higher education environments, to the role of universities as validating agencies of existing psycho-pedagogical competences for in-service adult educators. Particular attention is also drawn to the ways in which adult education policies and initial education and training opportunities for prospective adult educators affect the role of higher education institutions in terms of academic orientation and programme delivery.

Shadow Libraries-Joe Karaganis 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, Shadow Libraries explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several "open" publication models that have emerged in the higher education sector. From the bottom up, Shadow Libraries explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. Shadow Libraries is a study of that tension in the digital era. The Graduate School Mess-Leonard Cassuto 2015-09-14 American graduate education is in disarray.

Graduate study in the humanities takes too long and those who succeed face a dismal academic job market. Leonard Cassuto gives practical advice about how faculty can teach and advise students so that they are prepared for the demands of the working worlds they will join, inside and outside the academy.

Words Onscreen-Naomi S. Baron 2015-01-09 People have been reading on computer screens for several decades now, predating popularization of personal computers and widespread use of the internet. But it was the rise of eReaders and tablets that caused digital reading to explode. In 2007, Amazon introduced its first Kindle. Three years later, Apple debuted the iPad. Meanwhile, as mobile phone technology improved and smartphones proliferated, the phone became another vital reading platform. In Words Onscreen, Naomi Baron, an expert on language and technology, explores how technology is reshaping our understanding of what it means to read. Digital reading is increasingly popular. Reading onscreen has many virtues, including convenience, potential cost-savings, and the opportunity to bring free access to

books and other written materials to people around the world. Yet, Baron argues, the virtues of eReading are matched with drawbacks. Users are easily distracted by other temptations on their devices, multitasking is rampant, and screens coax us to skim rather than read in-depth. What is more, if the way we read is changing, so is the way we write. In response to changing reading habits, many authors and publishers are producing shorter works and ones that don't require reflection or close reading. In her tour through the new world of eReading, Baron weighs the value of reading physical print versus online text, including the question of what long-standing benefits of reading might be lost if we go overwhelmingly digital. She also probes how the internet is shifting reading from being a solitary experience to a social one, and the reasons why eReading has taken off in some countries, especially the United States and United Kingdom, but not others, like France and Japan. Reaching past the hype on both sides of the discussion, Baron draws upon her own cross-cultural studies to offer a clear-eyed and balanced analysis of the ways technology is affecting the ways we read today--and what the future might bring.

Handbook of Research on Diversity and Social Justice in Higher Education-Keengwe, Jared 2020-05-22  
There is growing pressure on teachers and faculty to understand and adopt best practices to work with diverse races, cultures, and languages in modern classrooms. Establishing sound pedagogy is also critical given that racial, cultural, and linguistic integration has the potential to increase academic success for all learners. To that end, there is also a need for educators to prepare graduates who will better meet the needs of culturally diverse learners and help their learners to become successful global citizens. The Handbook of Research on Diversity and Social Justice in Higher Education is a cutting-edge research book that examines cross-cultural perspectives, challenges, and opportunities pertaining to advancing diversity and social justice in higher education. Furthermore, the book explores multiple concepts of building a bridge from a monocultural pedagogical framework to cross-cultural knowledge through appropriate diversity education models as well as effective social justice practices. Highlighting a range of topics such as cultural taxation, intercultural engagement, and teacher preparation, this book is essential for teachers, faculty, academicians, researchers, administrators, policymakers, and students.
