Matrix Groups for Undergraduates-Kristopher Tapp 2016-04-07 Matrix groups touch an enormous spectrum of the mathematical arena. This textbook brings them into the undergraduate curriculum. It makes an excellent one-semester course for students familiar with linear and abstract algebra and prepares them for a graduate course on Lie groups. Matrix Groups for Undergraduates is concrete and example-driven, with geometric motivation and rigorous proofs.

The story begins and ends with the rotations of a globe. In between, the author combines rigor and intuition to describe the basic objects of Lie theory: Lie algebras, matrix exponentiation, Lie brackets, maximal tori, homogeneous spaces, and roots. This second edition includes two new chapters that allow for an easier transition to the general theory of Lie groups.

Howling at the Moon-Walter Yetnikoff 2004-03-02 Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In Howling at the Moon, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing Thriller (and how, after it won seven

Grammies, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, Howling at the Moon is a blistering You'll Never Eat Lunch in this Town Again of the music industry.

Federalism in Asia-Baogang He 2009-01-01 This book is a collection of 13 articles which grew out of a workshop on federalism and democratisation in Asia. But, unlike a great many of the publications which have their origins in conferences, this volume has a clear theme running through its contributions, almost all of which are excellent. . . The individual country studies. . . are highly informative, most making imaginative use of the country's history and current politics to illustrate the theme of the tension between nationalising centralisation and pressures for regional decentralisation. Many of these chapters have innovative conclusions about ways in which this tension can be understood. . . this is a serious book, very well produced and indexed. Its chapters are well written with useful notes and lists of references. The volume will be of great interest to specialists on the countries concerned, and has much to offer for anyone with an interest in federalism and the relationship between regionalism and democratisation. Campbell Sharman, The Australian Journal of Public Administration Federalism in Asia provides a valuable resource, both for scholars of Asia in general and for political theorists of federalism. In an academic climate where edited volumes are often assumed to be a lightweight option, Federalism in Asia demonstrates how rewarding this form of publication can be. Graham K. Brown, Political Studies Review Until now there have been few attempts to examine the different models of federalism appropriate in Asia, let alone to trace the extent to which these different perspectives are compatible, converging, or mutually influencing each other. This book redresses the balance by demonstrating the varieties of Asian federalism. Federalism in Asia explores the range of theoretical perspectives that shape debates over federalism in general, and over territorial, multinational, hybrid, and asymmetric federalism in particular relation to Asia. The contributors share their understanding of how federal or quasi-federal institutions manage ethnic conflicts and accommodate differences, how democratization facilitates the development of federalism and how federalism facilitates or inhibits democratization in Asia. Their conclusion is that hybrid federalism or quasi-federalism is more prevalent in some Asian countries than others; and the need and potential for greater federalism in more Asian countries makes this sortie into this area worthwhile. While federalism is relevant to Asia, the working pattern of Asian federalism does not necessarily follow a Western style. Hybrid federal institutional design can be seen as an Asian strategy of managing ethnic conflicts through federal arrangements. This unique book will be of great interest to a wide range of scholars and researchers who work on issues of federalism, political economy, public policy, ethnic relations, cultural diversity and democratization in the Asian region. Policymakers and activists dealing with issues of minority rights and ethnic conflict in the region, government officials and NGOs within Asia, and officials in international agencies and organizations will also find much to engage them.

Mind Games-William Chandon 2020-01-08 Most of us know that we can perform athletically at higher levels. We know we can be better. We notice that we seem to be stuck in patterns of similar mistakes. Many of us are on an endless search for changes in technique and technology, searching for the missing key ingredients to success. If we're paying close attention to how we train and compete, we notice that we sabotage and limit ourselves. We may also suspect that we unconsciously sabotage ourselves because we find ourselves doing things that we know are counterproductive, but can't seem to get out of our own way. We also can't usually figure out why we undercut our ability. The most significant challenges we usually face are the mental ones and not the physical ones. The key problem that many of us have is that we don't know how to stop sabotaging ourselves. Even if we recognize how we are sabotaging ourselves, we may not be able to stop. Intellectual knowledge is helpful, but it isn't sufficient to make deep and powerful changes. We've tried everything we know and it isn't enough. We need something deeper and more powerful. There's a deeper way of knowing and a deeper self-knowledge that we find when we develop a meditation practice. We find our center where we are in touch with our deep wisdom and passion. When we live, train, and compete from our center, we find more clarity about our strengths and weaknesses. We learn that the barriers that appear to be holding us back are actually invitations to develop, change, improve, and tap into the deep strength that we find inside in order to follow through on what will help us more forward as athletes and people. This book of daily meditations for athletes has 366 meditations, one for each day of the calendar year. Each month has a different theme. Each meditation has some thoughts for your reflection and has a unique affirmation at the end, which you use for your meditation. You mindfully read the reflection and then meditate on the affirmation. You'll learn straightforward and powerful methods for meditating on the right things in the right ways. The Second Edition is simpler to use and more powerful to practice. It has an updated Introduction, including an assessment to help athletes figure out what parts of their mental game need work. A number of the meditations have been updated for clarity and simplicity. The affirmations are simpler, which makes meditation easier. There is new a chapter on confidence and a new chapter on being a powerful athlete. The meditation techniques in the Introduction and the Meditation Scripts chapter are updated. The sanctuary meditation technique is more integrated throughout the book. The language in the book is more conversational. The essence of a strong mental approach to high performance is the ability to manage our thinking, emotions, and physical states in order to perform at our highest levels. We learn to manage our thinking, emotions, and physical states by practicing the right kinds of meditation. All athletes want to perform "in the zone" more than they do currently. Performing in the zone is a meditative state. To learn to perform in the zone more often, athletes can learn to meditate on the right things in the right ways. Now you can develop your mental game in as little as 15 minutes per day.
