Resilient Health Care-Professor Robert L Wears 2015-09-28 Properly performing health care systems require concepts and methods that match their complexity. Resilience engineering provides that capability. It focuses on a system's overall ability to sustain required operations under both expected and unexpected conditions rather than on individual features or qualities. This book contains contributions from international experts in health care, organisational

studies and patient safety, as well as resilience engineering. Whereas current safety approaches primarily aim to reduce the number of things that go wrong, Resilient Health Care aims to increase the number of things that go right.

Emergency Department Compliance Manual, 2016 Edition-Ginsberg, Martin, Kelley 2016 Emergency Department Compliance Manual, 2016 Edition provides everything you need to stay in compliance with complex emergency department regulations. The list of questions helps you quickly locate specific guidance on difficult legal areas such as: Complying with COBRA Dealing with psychiatric patients Negotiating consent requirements Obtaining reimbursement for ED services Avoiding employment law problems Emergency Department Compliance Manual also features first-hand advice from staff members at hospitals that have recently navigated a Joint Commission survey and includes frank and detailed information. Organized by topic, it allows you to readily compare the experiences of different hospitals. Because of the Joint Commission's hospital-wide, function-based approach to evaluating compliance, it's been difficult to know specifically what's expected of you in the ED. Emergency Department Compliance Manual includes a concise grid outlining the most recent Joint Commission standards which will help you learn what responsibilities you have for demonstrating compliance. Plus, Emergency Department Compliance Manual includes sample documentation that hospitals across the country have used to show compliance with legal requirements and Joint Commission standards: Age-related competencies Patient assessment policies and procedures Consent forms Advance directives Policies and protocols Roles and responsibilities of ED staff Quality improvement tools Conscious sedation policies and procedures Triage, referral, and discharge policies and procedures And much more!

Whispers at Willowbrook-Randall Wehler 2012-06 Roger Walters begins his career as a psychologist, fresh out of graduate school with a master's degree. His dream throughout college was to work at a state psychiatric hospital, applying newly learned skills to help treat the most severe cases of persons with mental illness. The year is 1973. Willowbrook State Hospital in the Upper Midwest of the U.S. welcomes him as a professional, entry-level, state employee. This large and respected psychiatric hospital dates back into the 1890s. As his early job progresses, he hears increasing rumors on campus. Sometimes, rather hushed speech and muted sounds come from the other side of closed doors. What is that "something" that is so strange in his contacts with certain hospital personnel? He tries to differentiate hunch from obvious reality and knows a decision must be made. Can he - or even should he - survive in this world of "patient care?" Randall Wehler received a master's degree in clinical psychology in 1973, beginning employment at a state psychiatric hospital where he provided a broad range of psychological services during his thirty-four years there. His hospital experience included working with mentally ill patients, chemically dependent persons, maladjusted adolescents, and a geriatric population. The career began when psychotropic medications had largely taken the place of older methods of treatment and patient management such as using straight-jackets, hydrotherapy, lobotomies, and electro-shock. The year 1973 was during an era of popularity in using behavior modification (learning theory-based) techniques, cognitive-based (rational) methods, and an assortment of therapies matched to patient need. During the first decade of his tenure at the state hospital, he became involved in psychological research studies and authored or co-authored seven papers published in professional journals. Retirement from state service occurred in late 2007. He continues as a licensed psychologist."
