Snow Goose-Paul Gallico 2011-03-30 The moving wartime story of friendship and heroism, set against the dramatic backdrop of the World War II Battle of Dunkirk In the marshes of Essex, one of the last wild places left in England, a disfigured artist lives alone in an abandoned lighthouse. Shunned by society, he spends his days painting scenes of the coast and the birds that migrate to the meadowlands every winter. His days are solitary until one November afternoon, a young girl from a nearby village comes to his door carrying a wounded snow goose in her arms. The unlikely pair develop a friendship that deepens over the ensuing years, waiting together for the arrival of the birds every autumn. In 1940, with England at war, the birds depart early from the shores. The man, too, is called away by his duty as an Englishman to help evacuate the soldiers stranded on the beaches of Dunkirk. A moving tale of love, war, bravery, and sacrifice.

Although each of the five volumes contains many deep results, the average depth in this volume is possibly greater than in the first four. Feynman's Lost Lecture-David Goodstein 2009-11-06 "Glorious,"—Wall Street Journal Rescued from obscurity, Feynman's Lost Lecture is a blessing for all Feynman followers. Most know Richard Feynman for the hilarious anecdotes and exploits in his best-selling books "Surely You're Joking, Mr. Feynman!" and "What Do You Care What Other People Think?" But not always obvious in those stories was his brilliance as a pure scientist—one of the century's greatest physicists. With this book and CD, we hear the voice of the great Feynman in all his ingenuity, insight, and acumen for argument. This breathtaking lecture—"The Motion of the Planets Around the Sun"—uses nothing more advanced than high-school geometry to explain why the planets orbit the sun elliptically rather than in perfect circles, and conclusively demonstrates the astonishing fact that has mystified and intrigued thinkers since Newton: Nature obeys mathematics. David and Judith Goodstein give us a beautifully written short memoir of life with Feynman, provide meticulous commentary on the lecture itself, and relate the exciting story of their effort to chase down one of Feynman's most original and scintillating lectures.
