For the Love of Physics-Walter Lewin 2011-05-03 "YOU HAVE CHANGED MY LIFE" is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. "I walk with a new spring in my step and I look at life through physics-colored eyes," wrote one such fan. When Lewin's lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, "Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube's greatest hits." For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in For the Love of Physics, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. "I introduce people to their own world," writes Lewin, "the world they live in and are familiar with but don't approach like a physicist—yet." Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the

extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

Guinness World Records: Science & Stuff-Guinness World Records 2018-01-09 Guinness World Records: Science & Stuff is a whirlwind tour through the astounding, record-breaking world (and universe) around us, with an intro from TV science educator and author Science Bob. Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science & Stuff celebrates the simple joy in finding things out. It tackles the big questions that keep people up at night, such as: • Can you belch in space? • What does woolly mammoth taste like? • How much would the Death Star cost? • Is the answer to this question no? Join us as we rise from the depths of the ocean, home to vampire squids from hell, to the dizzy heights of the International Space Station, where scientists unravel the secrets of (pooping in) zero-g. On the way we stop to talk with some of the men and women who are out in the world finding answers and making stuff. Ever wanted to know what it's like to ride a motorized toilet at highway speeds, command a swarm of tiny robots or spend a year in space? Well, you'll find your answers in here. And that's not all - have a

go at ten record-breaking science experiments in the special Make & Break section. Our very own mad professor, Burnaby Q Orbox, and his trusty lab assistant Sweet Pepper Klopek, guide you through at-home challenges, from the greatest height to drop an egg without it breaking to the farthest distance by a Mentos and soda car. It's gonna get messy! Guinness World Records: Science & Stuff - the grossest, smelliest, weirdest and noisiest guide to, well, science... and stuff.
