Out Of This Furnace-Thomas Bell 1941-03-15 Out of This Furnace is Thomas Bell's most compelling achievement. Its story of three generations of an immigrant Slovak family -- the Dobrejcaks -- still stands as a fresh and extraordinary accomplishment. The novel begins in the mid-1880s with the naive blundering career of Djuro Kracha. It tracks his arrival from the old country as he walked from New York to White Haven, his later migration to the steel mills of Braddock, Pennsylvania, and his eventual downfall through foolish financial speculations and an extramarital affair. The second generation is represented by Kracha's daughter, Mary, who married Mike Dobrejcak, a steel worker. Their decent lives, made desperate by the inhuman working conditions of the mills, were held together by the warm bonds of their family life, and Mike's political idealism set an example for the children. Dobie Dobrejcak, the third generation, came of age in the 1920s determined not to be sacrificed to the mills. His involvement in the successful unionization of the steel industry climaxed a half-century struggle to establish economic justice for the workers. Out of This Furnace is a document of ethnic heritage and of a violent and cruel period in our history, but it is also a superb story. The writing is strong and forthright, and the novel builds constantly to its triumphantly human conclusion.

Mastering Iron-Anne Kelly Knowles 2013-01-15 Veins of iron run deep in the history of America. Iron making began almost as soon as European settlement, with the establishment of the first ironworks in colonial Massachusetts. Yet it was Great Britain that became the Atlantic world's dominant low-cost, high-volume producer of iron, a position it retained throughout the nineteenth century. It was not until after the Civil War that American iron producers began to match the scale and efficiency of the British iron industry. In Mastering Iron, Anne Kelly Knowles argues that the prolonged development of the US iron industry was largely due to geographical problems the British did not face. Pairing exhaustive manuscript research with analysis of a detailed geospatial database that she built of the industry, Knowles reconstructs the American iron industry in unprecedented depth, from locating hundreds of iron companies in their social and environmental contexts to explaining workplace culture and social relations between workers and managers. She demonstrates how ironworks in Alabama, Maryland, Pennsylvania, and Virginia struggled to replicate British technologies but, in the attempt, brought about changes in the American industry that set the stage for the subsequent age of steel. Richly illustrated with dozens of original maps and period art work, all in full color, Mastering Iron sheds new light on American ambitions and highlights the challenges a young nation faced as it grappled with its geographic conditions.

Ironworker (reinforcing).- 2010 The National Occupational Analysis (NOA) has the following objectives: to describe and group the tasks performed by skilled workers; to identify which tasks are performed in every province and territory; to develop instruments for use in the preparation of interprovincial Red Seal examinations and curricula for training leading to the certification of skilled workers; to facilitate the mobility of apprentices and skilled workers in Canada; and, to supply employers, employees, associations, industries, training institutions and governments with analyses of occupations. This analysis covers tasks performed by ironworkers (reinforcing), defined as workers who cut, bend, lay out, place and weld reinforcing steel rods, welded wire fabric and composite materials in a wide variety of poured concrete products and structures such as buildings, highways, bridges, stadiums and towers.--Includes text from document.

Propaganda-Edward L. Bernays 1928 With politics taking centre stage due to the US presidential election, the time is perfect for a reprint of this classic work from Edward Bernays, the father of public relations and political spin and the man who designed the ad campaign that got the United States involved in World War I. Written in 1928, this was the first book to discuss the manipulation of the masses and democracy by government spin and propaganda.

Ironworker- 1932

Callings-Dave Isay 2017 Stories of passion, courage, and commitment, following individuals as they pursue the work they were born to do, from StoryCorps founder Dave Isay In Callings, StoryCorps founder Dave Isay presents unforgettable stories from people doing what they love. Some found their paths at a very young age, others later in life; some overcame great odds or upturned their lives in order to pursue what matters to them. Many of their stories have never been broadcast or published by StoryCorps until now. We meet a man from the barrios of Texas whose harrowing experiences in a family of migrant farmers inspired him to become a public defender. We meet a longtime waitress who takes pride in making regulars and newcomers alike feel at home in her Nashville diner. We meet a young man on the South Side of Chicago who became a teacher in order to help at-risk teenagers like the ones who killed his father get on the right track. We meet a woman from Little Rock who helps former inmates gain the skills and confidence they need to rejoin the workforce. Together they demonstrate how work can be about much more than just making a living, that chasing dreams and finding inspiration in unexpected places can transform a vocation into a calling. Their shared sense of passion, honor, and commitment brings deeper meaning and satisfaction to every aspect of their lives. An essential contribution to the beloved StoryCorps collection, Callings is an inspiring tribute to rewarding work and the American pursuit of happiness. From the Hardcover edition.
