Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation-Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Nuclear Apartheid-Shane J. Maddock 2010-03-15 After World War II, an atomic hierarchy emerged in the noncommunist world. Washington was at the top, followed over time by its NATO allies and then Israel, with the postcolonial world completely shut out. An Indian diplomat called the system "nuclear apartheid." Drawing on recently declassified sources from U.S. and international archives, Shane Maddock offers the first full-length study of nuclear apartheid, casting a spotlight on an ideological outlook that nurtured atomic inequality and established the United States--in its own mind--as the most legitimate nuclear power. Beginning with the discovery of fission in 1939 and ending with George W. Bush's nuclear policy and his preoccupation with the "axis of evil," Maddock uncovers the deeply ideological underpinnings of U.S. nuclear policy--an ideology based on American exceptionalism, irrational faith in the power of technology, and racial and gender stereotypes. The unintended result of the nuclear exclusion of nations such as North Korea, Pakistan, and Iran is, increasingly, rebellion. Here is an illuminating look at how an American nuclear policy based on misguided ideological beliefs has unintentionally paved the way for an international "wild west" of nuclear development, dramatically undercutting the goal of nuclear containment and diminishing U.S. influence in the world.

Communicating Effectively with the Chinese-Ge Gao 1998-06-10 Utilizing the `self-OTHER' perspective as a conceptual foundation, the authors portray and interpret some of the distinctive communication practices in Chinese culture. They examine how self-conception, role and hierarchy, relational dynamics and face affect ways of conducting everyday talk in Chinese culture. They explain why miscommunication between Chinese and North Americans takes place and suggest ways to improve communication. By incorporating instances of everyday talk, the authors offer a realistic and clear illustration of the specific characteristics and functions of Chinese communication, as well as problematic areas of Chinese//North American encounters.

The Changing Wealth of Nations 2018-Glenn-Marie Lange 2018-01-30 Countries regularly track gross domestic product (GDP) as an indicator of their economic progress, but not wealth—the assets such as infrastructure, forests, minerals, and human capital that produce GDP. In contrast, corporations routinely report on both their income and assets to assess their economic health and prospects for the future. Wealth accounts allow countries to take stock of their assets to monitor the sustainability of development, an urgent concern today for all countries. The Changing Wealth of Nations 2018: Building a Sustainable Future covers national wealth for 141 countries over 20 years (1995†“2014) as the sum of produced capital, 19 types of natural capital, net foreign assets, and human capital overall as well as by gender and type of employment. Great progress has been made in estimating wealth since the fi rst volume, Where Is the Wealth of Nations? Measuring Capital for the 21st Century, was published in 2006. New data substantially improve estimates of natural capital, and, for the fi rst time, human capital is measured by using household surveys to estimate lifetime earnings. The Changing Wealth of Nations 2018 begins with a review of global and regional trends in wealth over the past two decades and provides examples of how wealth accounts can be used for the analysis of development patterns. Several chapters discuss the new work on human capital and its application in development policy. The book then tackles elements of natural capital that are not yet fully incorporated in the wealth accounts: air pollution, marine fi sheries, and ecosystems. This book targets policy makers but will engage anyone committed to building a sustainable future for the planet.

The Production of Space-Henri Lefebvre 1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. The Production of Space is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Teaching and Learning Chinese as a Foreign Language-Janet Zhiqun Xing 2006-01-01 This book provides a research-based account of how to teach and learn Chinese as a foreign language. In addition to the discussion of relevant second/foreign language research, this volume gives detailed information on ways to develop a pedagogical model that is uniquely suited to teaching Chinese in five key areas: pronunciation (tones and pinyin), characters and words, sentences (when and why different sentence structures are used), discourse and pragmatic competence (coherence and genre), and cultural competence. Specially written for Chinese language teachers, student teachers and applied linguists, this is the first book written in English that systematically addresses all major aspects involved in teaching and learning Chinese as a foreign language. This book covers all the fundamental grammar elements in Chinese, explains their functions in discourse and communication, and explores different strategies for teaching and engaging students in learning the language.

Chinese Link-Sue-mei Wu 2010-03-12 Chinese Link, 2e provides a practical, learner-centered and enjoyable language and cultural learning experience for beginning students of Chinese, as well as an efficient and comprehensive teaching resource for instructors. This best-selling text takes care to introduce and explain grammar points clearly and systematically, yet not in a fashion that would be overwhelming to beginners. In keeping with the communicative focus of the text, grammar points are related to communicative task-oriented content. The textbook presents both traditional (complex) and simplified versions of Chinese characters, since learners will encounter both forms during their course of study or in travel abroad. Photographs and drawings make the text vivid and eye-catching, and to provide visual cues to aid in communicative exercises and activities. And the Video Program to accompany the "Language in Use" sections enhances the in-text dialogues by presenting them in authentic settings. This Books á la Carte Edition is an unbound, three-hole punched version of the textbook and provides students the opportunity to personalize their book by incorporating their own notes and taking only the portion of the book they need to class - all at an affordable price.

Elementary Turkish-Kurtuluş Öztopçu 2009 Elementary Turkish is designed to provide beginning students with sufficient Turkish to meet most of their everyday needs. Once students complete the two volumes, they should be able to speak, understand, read, and write Turkish at the mid-intermediate level. The variety of Turkish presented in this textbook corresponds to standard Turkish, the official language of the Republic of Turkey and the language spoken by educated Turkish speakers. Both volumes can be used in a classroom setting or as self-study aids.

Beyond Brexit-Vernon Bogdanor 2019-02-07 Brexit means exit, but what exactly will we be leaving behind? Entry into the European Community in 1973 was a momentous event - one which had seismic effects on the politics and constitution of Britain. Brexit, while equally as momentous, has almost wholly been confined to discussions of economic consequence. But what will happen to the constitution? Beyond Brexit looks for the first time at the impact of Brexit and the constitutional consequences of Britain's EU membership, raising the question of just how the United Kingdom is to be preserved. In this book, Vernon Bogdanor explores the ever-changing relationship between Britain and the

European Union from the original concept of European unity to 21st century Euroscepticism, the fundamental problems confronting Britain on its exit from the European Union, and argues that Brexit is the start of new beginnings - heralding a peaceful constitutional moment.
