Photographing Architecture-John Siskin 2011-12-01 Essential for professional commercial photographers but with appeal for anyone who enjoys architectural photography, this book explains how to build better light indoors while finding the optimal positions for capturing images. Beginning with advice on understanding angles, controlling perspective, and becoming familiar with the tools necessary for capturing interiors, this guidebook then progresses onto explanations of various types of light, methods for manipulating them, and circumstances under which different lights should be utilized. Also included throughout the book are example shots of homes, businesses, and public spaces followed from start to finish, illustrating the challenges of the shoot, how these problems were solved, and any work that required editing after the shoot.

Professional Interior Photography-Michael G. Harris 2003 This highly visual, full colour text is a must have purchase for all student and professional interior photographers, from residential to industrial. Michael Harris provides a complete guide through the vast choice of equipment and materials available, sharing his professional knowledge to help you improve your images. New coverage of digital photography is included in this third edition helping you decide on film versus digital for your capture medium. The pros and cons of both are evaluated through a close look at the practice of Ashley Morrison, an interior photographer working digitally. The theory of lighting and composition is combined with practical tips and suggestions for overcoming day-to-day problems, and advice is given on how best to present and store images so you can concentrate on taking the images. If you are just beginning a career in interior photography this book offers a good, comprehensive resource for ideas and techniques whilst encouraging individual interpretation. Illustrated with stunning colour pictures throughout, the text is written in an easy digestible style, making theory clear and simple to understand. The interviews with the masters of interior photography have been expanded and updated to include their views on digital, and now include senior English Heritage photographer Derek Kendall alongside Brian Harrison, Andreas von Einsiedel and Peter Aprahamian. *New information on the pros and cons of digital photography to keep you up to date *Practical advice on which equipment to use to achieve professional results *Inspirational colour photographs throughout, including images from top master photographers

Lighting for Interior Design-Malcolm Innes 2012-08-20 Without light, interior architecture cannot be fully designed and experienced. It is one of the key tools for an interior designer, but can be a dauntingly technical subject for students. Part One, Theory, looks at the physics and technology behind lighting. Part Two, Process and Practice, looks more specifically at the use of lighting in interior design and outlines the key design issues and principles. The book goes on to show the ways of representing lighting schemes using CAD and 3D models and how to implement and test these designs. Finally, the book explains how to deal with contractors, clients and other professionals. This book takes a detailed, practical look at lighting in interior design, giving students all the key information and skills they need to be able to tackle lighting successfully in their designs.

Photography for Real Estate Interiors-Nathan Cool 2017-09-14 From gear to editing, composition, lighting, settings, techniques and more, real estate photographer Nathan Cool provides a comprehensive guide for shooting high-quality interior real estate photography from start to finish. With over 70 color images showing real-world examples, screen shots and diagrams, you'll learn the principles that Nathan Cool and many other professional real estate photographers apply to their work. Far from being a dry academic tome, this book shows practical techniques that prove profitable for a real estate photography business. See how you can stand out from today's crowd of camera clickers and show clients you charge like a pro because you shoot like one.

Lighting Essentials-Don Giannatti 2012-04-01 The core goal of photography is representing subjects that have depth and texture in a medium that inherently lacks both those qualities, and this book shows the best way to rise to that challenge: through the careful application and capture of lighting. It demonstrates how to accentuate or minimize textures, add or subtract highlights, and create or combat shadows to showcase the subjects in the best way and create the illusion of a third dimension in the images. Exploring techniques for lighting portraits, still-life subjects, nature images, and architectural shots, both studio and location lighting are covered in detail. The book teaches photographers how to study their subjects with all of the textures, colors, shapes, and surfaces they have. Then visualize the image as a finished photograph before the photography actually begins. With chapters that thoroughly cover the science of lighting and visualization, photographers can apply that knowledge and successfully create artful images.

Interior Shots-Roger William Hicks 1995 Techniques for lighting all kinds of interior settings -- from an intimate cafe to a sports arena -- are demonstrated in this enlightening volume.

Interior Lighting for Designers-Gary Gordon 2015-01-28 This revised edition of the successful primer thoroughly covers fundamentals of lighting design, and also serves as a handy reference for professional designers. The Fifth Edition is more comprehensive than ever, with new information on LED, energy efficiency, and other current issues. In addition, it includes more information for drawing ceiling floor plans and the application of designs to specific types of interiors projects. Considered a "key reference" for the Lighting Certified exam, no other text combines both technical and creative aspects of lighting design for beginners and novice designers.

Marketing and Client Relations for Interior Designers-Mary V. Knackstedt 2008-04-18 "This step-by-step manual helps you design the marketing program that best fits your unique practice and provides helpful business forms to help keep you on target, including staff questionnaires, planning guides, and design services outlines."--BOOK JACKET.

Shooting in Sh*tty Light-Lindsay Adler 2012-10-04 Sometimes photographers have to shoot in less than ideal lighting situations. Maybe the wedding is mid-day in the middle of a field, or perhaps the event is in a florescent-lit room. These scenarios can be particularly intimidating for beginning photographers who don't know how to handle the many undesirable lighting situations they may encounter. In Shooting in Sh*tty Light, professional photographers Lindsay Adler and Erik Valind cover the top ten worst lighting situations and provide a variety of solutions for each. They explain which solutions are most practical and why one option might be preferable over another, examining such problems as extremely low lighting when no flash is allowed, strong backlight, and the light on an overcast day. Unlike other books that focus on natural light or lighting in general, this book addresses a very real need of beginning photographers, answering the question, "What do I do when the lighting is terrible?" Lindsay and Erik candidly show you the tools at your disposal, demonstrating the techniques essential to getting the job done with minimal fuss. Shows how to deal with ten of the worst lighting situations, such as harsh midday light, extremely low light, and mixed light. Offers real-life examples and practical solutions for handling poor light, such as identifying natural reflectors, bouncing light off a wall, or utilizing flash gels. Features a fun, conversational style to help you conquer the fear of poor lighting and approach any lighting situation with confidence!

Sustainable Commercial Interiors-Penny Bonda 2006-11-03

The Lives of Others-Simon Watson 2020-09-08 A privileged invitation into a world of beauty--from a seventeenth-century Italian palace and retreats in the Swiss Alps and Morocco to artists' studios and noble residences in Austria and Spain. Simon Watson takes the reader into highly personal environments that reveal the creativity and personality of their esteemed inhabitants. Since the 1990s, Watson has been one of the most prolific chroniclers of remarkable interiors and portraits, gracing the pages of W magazine, Vanity Fair, AD, and T Magazine. From hard-edged modernity and historical exoticism to pure classicism, the photographer has documented rooms of note in cities, atop mountains, and by the sea. Complementing his masterful images, Watson gives an intimate description of each location. On this journey with the photographer, one experiences the Duchess of Alba's Palacio Liria in Madrid, filled with sixteenth- and seventeenth-century masterpieces; interior designer Roberto Peregalli's splendid riad in Tangier; the magnificent and vast Castello Gardena in the Italian Alps owned by the Franchetti clan; Guinness heir Garech de Brun's hillside retreat in County Wicklow, Ireland; the Renaissance Palazzo Massimo alle Colonne in Rome, designed by Baldassarre Peruzzi in the sixteenth century; shoe designer Christian Louboutin's fanciful Parisian apartment; and many other splendid places around the world.

The Complete Guide to Light & Lighting in Digital Photography-Michael Freeman 2007 A comprehensive guide to lighting techniques in digital photography covering topics including working with artificial light and daylight.

The Fundamentals of Interior Design-Simon Dodsworth 2015-01-29 The second edition of The Fundamentals of Interior Design provides a thorough introduction to the key elements of interior design and the ideas that underpin them. The book describes the entirety of the creative process, from researching initial ideas to realizing them in three-dimensional form. Throughout the text, guidelines are given to provide structure to the interior design process and the reader is encouraged to adapt and initiate methodologies to suit individual project needs. This approach is intended to give designers a belief in their own abilities, and the confidence to tackle different projects with the unique challenges that each one brings. The book features a variety of diagrams and talking points to encourage students and practitioners to think about key issues such as understanding spatial relationships and the use of sustainable materials. This second edition includes new case studies focusing on well-known international interior design studios, such as Conran and Partners, UK, Slade Architecture, US, Gensler, US and award winning architects Chae-Pereira in South Korea. The introduction of interviews with contemporary interior designers allows readers an insight in to the working world of interior design. The new projects allow students to explore what they have learned in each chapter through experimentation and these activities encourage creativity and further learning.

Lighting for Cinematography-David Landau 2014-06-19 We can't shoot good pictures without good lighting, no matter how good the newest cameras are. Shooting under available light gives exposure, but lacks depth, contrast, contour, atmosphere and often separation. The story could be the greatest in the world, but if the lighting is poor viewers will assume it's amateurish and not take it seriously. Feature films and TV shows, commercials and industrial videos, reality TV and documentaries, even event and wedding videos tell stories. Good lighting can make them look real, while real lighting often makes them look fake. Lighting for Cinematography, the first volume in the new CineTech Guides to the Film Crafts series, is the indispensable guide for film and video lighting. Written by veteran gaffer and cinematographer David Landau, the book helps the reader create lighting that supports the emotional moment of the scene, contributes to the atmosphere of the story and augments an artistic style. Structured to mimic a 14 week semester, the chapters cover such things as lighting for movement, working with windows, night lighting, lighting the three plains of action and non-fiction lighting. Every chapter includes stills, lighting diagrams and key advice from professionals in the field, as well as lighting exercises to help the reader put into practice what was covered. www.lightingforcinematography.com

Interior Lighting-Darren Du 2011 Lighting is the most effective creator of ambience in the interior. Since lighting was introduced into homes, it has played the most important role in our daily life. Lighting has become an integral part of interior design. It enriches our spaces and affects our visual and psychological experience-even our working efficiency. Moreover, lighting can change our perception of a space. Appropriate lighting design can personalize your space and establish a charm of your own. In this book, lighting design is approached from three perspectives: lighting of interior spaces, lighting as interior decoration, and lighting as interior atmosphere. With an abundance of pictures and detailed introductions, you can see the role that lighting plays in interior design and the effects it can bring. The book will be an inspiring reference for interior designers and other readers alike.

Architectural Photography the Digital Way-Gerry Kopelow 2013-07-02 Architectural Photography the Digital Way teaches the reader how to take first-rate photographs of buildings, inside and out. Step-by-step instructions help you learn how to choose the right kind of camera, to use it effectively, and to enhance and manipulate your images. This complete course begins with an introduction to the world of digital imagery and its unique aesthetic considerations. Included are detailed instructions on how to photograph building exteriors and interiors of every scale and in any lighting condition. Advanced chapters cover areas such as perspective correction and other features made possible by image-editing software. Illustrated with a wealth of color photographs and diagrams, this clearly written, easy-to-use handbook will be your indispensable guide whenever you pick up the camera.

The Low Light Photography Field Guide-Michael Freeman 2014-04-29 In bright light, it is easier to take a beautiful photograph with your DSLR. When the sun starts to go down or you are shooting indoors, a whole new skill set is needed. This new addition to the successful Field Guide Series will help you shoot what potentially could be the most lovely image without the help of natural light. No more harsh flash photographs with dreary backgrounds and no more blurry night shots that were exposed too long. Opening with a section on the qualities of different kinds of low light, the book then deals with ways of overcoming gloomy situations, whether you are shooting hand-held or on a tripod. Post-production fixes are also covered, allowing you to turn difficult shots into real works of art.

Interior Lighting for Environmental Designers-James L. Nuckolls 1983-11-11 An illustrated book on the principles and practice of architectural lighting of interior space. Discusses the capacities for expanding or minimizing space, the effects on colors and textures, and the atmospheric potential of lighting design. Describes the esthetic as well as the scientific procedures inherent to lighting design.

Lighting Design-Christopher Cuttle 2015-03-05 By reading this book, you will develop the skills to perceive a space and its contents in light, and be able to devise a layout of luminaires that will provide that lit appearance. Written by renowned lighting expert Christopher (Kit) Cuttle, the book: explains the difference between vision and perception, which is the distinction between providing lighting to make things visible, and providing it to influence the appearance of everything that is visible; demonstrates how lighting patterns generated by three-dimensional objects interacting with directional lighting are strongly influential upon how the visual perception process enables us to recognize object attributes, such as lightness, colourfulness, texture and gloss; reveals how a designer who understands the role of these lighting patterns in the perceptual process may employ them either to reveal, or to subdue, or to enhance the appearance of selected object attributes by creating appropriate spatial distributions of light; carefully explains calculational techniques and provides easy-to-use spreadsheets, so that layouts of lamps and luminaires are derived that can be relied upon to achieve the required illumination distributions. Practical lighting design involves devising three-dimensional light fields that create luminous hierarchies related to the visual significance of each element within a scene. By providing you with everything you need to develop a design concept - from the understanding of how lighting influences human perceptions of surroundings, through to engineering efficient and effective lighting solutions - Kit Cuttle instills in his readers a new-found confidence in lighting design.

The Golden Lands-Vikram Lall 2014-08-26 A groundbreaking survey of the Buddhist architecture of Southeast Asia, abundantly illustrated with new color photography and 3-D renderings Over the course of its 2,500-year history, Buddhism has found expression in countless architectural forms, from the great monastic complexes of ancient India to the fortified dzongs of Bhutan, the rock-carved temple grottoes of China, the wooden shrines of Japan, and the colorful wats of Cambodia, Laos, and Thailand. Architecture of the Buddhist World, a projected six-volume series by the noted architect and scholar Vikram Lall, represents a new multidisciplinary approach to this fascinating subject, showing how Buddhist thought and ritual have interacted with local traditions across the Asian continent to produce masterpieces of religious architecture. The first volume in the series, The Golden Lands, is devoted to Southeast Asia, home to many of the most spectacular Buddhist monuments. Following a general introduction to the early history of Buddhism and its most characteristic architectural forms (the stupa, the temple, and the monastery), Lall examines the Buddhist architecture of Myanmar, Vietnam, Indonesia, Cambodia, Thailand, and Laos in turn. For each country, he provides both a historical overview and case studies of noteworthy structures. Lall's concise and accessible text is illustrated throughout with new color photography, as well as 3-D architectural renderings that make even the most complex structures easily comprehensible. The monuments that Lall considers in The Golden Lands range from the modest Bupaya stupa, constructed in Bagan, Myanmar, in the third century AD, to the vast complex of Borobudur in Central Java, the world's largest Buddhist monument; his achievement is to place them all within a single panorama of history, religion, and artistic innovation. Designing With Light-Jason Livingston 2014-09-15 A comprehensive introduction to the theory and practice of lighting design Designing With Light: The Art, Science, and Practice of Architectural Lighting Design is a comprehensive

introduction to the intelligent use of lighting to define and enhance a space. The book explores all aspects of the process, including aesthetics, technology, and practicalities, in a clear, concise manner designed to provide the reader with a full working knowledge of lighting design. Color illustrations throughout demonstrate the real-world effects of the concepts presented, and the companion website offers video animations and exercises to better illuminate the art and science of lighting. The book addresses the considerations that should be a part of any designer's process, and provides thorough guidance on meeting the various demands with smarter design. Lighting is an essential element of interior design, and despite its ubiquity, is difficult to truly master. A designer with a fundamental and conceptual understanding of light is empowered to create simple, typical spaces, or work intelligently with lighting consultants on more complex projects. Designing With Light contains special discussions on color, light, and health, as well as the latest information on energy efficient lighting, control systems, and other technologies. Topics include: Physics, psychology, and perception of light Current and future lighting technology Communication, documentation, and the design process Sustainability, daylighting, and energy efficiency The book also contains an entire chapter on building and energy codes, as well as practical guidance on photometrics and calculations. Lighting can make or break an otherwise well-designed space, so designers need the background to be able to think intelligently about illumination factors during all stages of the process. With comprehensive coverage and thorough explanation, Designing With Light is a complete resource for students and professionals alike.

How to Photograph Buildings and Interiors-Gerry Kopelow 2002-07 "Architectural photographer Gerry Kopelow created this guide on how to take high-quality photographs for architects, interior designers, engineers, heritage preservers, professional photographers, and anyone interested in shooting buildings. The book starts with the basics, discussing topics such as buying equipment and supplies, technical considerations involving cameras, films, and lighting, and preparing materials for publication. More advanced topics include medium- and large-format cameras, working on location and the architectural photographer's darkroom. The third updated and expanded edition contains three new chapters that focus on the world of digital photography. They explain everything that you need to know from how digital imagery works, to available digital cameras, to scanning, printing, and digital image enhancement, to electronic marketing on the Internet. This practical how-to book includes hundreds of color and black-and-white photographic examples and is the definitive title on the subject." - back cover.

The Architecture of Cinematic Spaces-Mehrus Jon Ahi 2020-02-25 The Architecture of Cinematic Spaces by Interiors is a graphic exploration of architectural spaces in cinema that provides a new perspective on the relationship between architecture and film. Combining critical essays with original architectural floor plan drawings, the book discusses production design in key films from the twentieth and twenty-first centuries, including The Cabinet of Dr. Caligari, Rope, Le mépris, Playtime, 2001: A Space Odyssey, Home Alone, Panic Room, A Single Man, Her and Columbus. Each chapter is accompanied by an original floor plan of a key scene, bridging the gap between film criticism and architectural practice. The book, written by the editors of the critically acclaimed online journal Interiors, will appeal to both film and architecture communities, and everyone in between. A must-read for fans and scholars alike, this volume prompts us to reconsider the spaces our favourite characters occupy and to listen to the stories those spaces can tell.

Live Beautiful-Athena Calderone 2020-03-03 From celebrated design expert and interior designer Athena Calderone, a look into how creatives decorate their spaces Beautiful design isn't just pleasant to look at; it improves the quality of our lives. In Live Beautiful, the highly anticipated design book by Athena Calderone, the EyeSwoon creator taps into her international network of interior decorators, fashion designers, and tastemakers to reveal how carefully crafted interiors come together. She also opens the doors to two of her own residences. With each homeowner, Calderone explores the initial spark of inspiration that incited their design journey. She then breaks down the details of the rooms—like layered textures and patterns, collected pieces, and customized vignettes—and offers helpful tips on how to bring these elevated elements into your own space. Filled with gorgeous photography by Nicole Franzen, Live Beautiful is both a showpiece of exquisite design and a guide to creating a home that's thoughtfully put together.
