Geospatial Technologies and Geography Education in a Changing World-Osvaldo Muñiz Solari 2015-08-31 This book is an initiative presented by the Commission on Geographical Education of the International Geographical Union. It focuses particularly on what has been learned from geospatial projects and research from the past decades of implementing geospatial technologies (GST) in formal and informal education. The objective of this publication is to inform an international audience of teachers, professionals, scholars, and policymakers about the state of the art and prospects of geospatial practices (GPs) as organized activities that use GST and lessons learned in relation to geographical education. GST make up an advanced body of knowledge developed by practitioners of geographic information systems (GIS), remote sensing (RS), global positioning systems, (GPS), and digital cartography (DC). GST have long been applied in many different sectors; however, their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s. Starting with GIS and RS, it evolved into a much broader context, as GST expanded to include GPS and DC with new communication technologies and Internet applications. GST have been used around the world as a combination of tools and special techniques to make research, teaching, and learning more effective.

(Re)Constructing Memory: Textbooks, Identity, Nation, and State-James H. Williams 2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts - some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about "who we are" not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in increasingly larger and more inclusive contexts.

Teaching Geography, Second Edition-Phil Gersmehl 2008-08-08 This book and accompanying CD-ROM present a complete conceptual framework and many hands-on ideas for effective K-12 geography instruction. The focus is on planning instruction that helps students develop spatial-thinking skills while learning about the land, climate, economy, and culture of places around the world. Nearly 100 engaging activities are provided in reproducible transparency masters and on the CD-ROM. Grounded in national and state standards, this is an ideal preservice text or professional development resource.

The "War on Terror" Narrative-Adam Hodges 2011-04-15 The War on Terror Narrative provides a longitudinal and holistic study of the formation, circulation, and contestation of the Bush administration's narrative about the "war on terror."

Other People's Children-Lisa D. Delpit 2006 An updated edition of the award-winning analysis of the role of race in the classroom features a new author introduction and framing essays by Herbert Kohl and Charles Payne, in an account that shares ideas about how teachers can function as "cultural transmitters" in contemporary schools and communicate more effectively to overcome race-related academic challenges. Original.

English A Language and Literature-Rob Allison 2011-05-12 Developed with the IB for the new 2011 English A syllabus, this fully comprehensive course book is already used and loved in hundreds of schools worldwide. Containing unparalleled insight into IB assessment and fully covering language in cultural contexts, it will concretely equip your students to tackle the course and assessments.

Reorganize for Resilience-Ranjay Gulati 2010-01-19 In an era of raging commoditization and eroding profit margins, survival depends on resilience: staying one step ahead of your customers. Sure, most companies say they're "customer-focused," but they don't deliver solutions to customers' thorniest problems. Why? Because they're stymied by the rigid "silos" they're organized around. In Reorganize for Resilience, Ranjay Gulati reveals how resilient companies prosper both in good times and bad, driving growth and increasing profitability by immersing themselves in the lives of their customers. This book shows how resilient organizations cut through internal barriers that impede action, build bridges between warring divisions, and transform former competitors into collaborators. Based on more than a decade of research in a variety of industries, and filled with examples from companies including Cisco Systems, La Farge, Starbucks, Best Buy, and Jones Lang LaSalle, Gulati explores the five levers of resilience: · Coordination: Connect, eradicate, or restructure silos to enable swift responses. · Cooperation: Foster a culture that aligns all employees around the shared goals of customer solutions. · Clout: Redistribute power to "bridge builders" and customer champions. · Capability: Develop employees' skills at tackling changing customer needs. · Connection: Blend partners' offerings with yours to provide unique customer solutions.

The Psychosocial Implications of Disney Movies-Lauren Dundes 2019-07-11 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Heroes, Gods and Monsters of the Greek Myths-Bernard Evslin 2012-10-30 The bestselling compendium of ancient Greece's timeless tales and towering figures of mythology from a classics expert. The world of Greek mythology contains some of the most exciting and imaginative stories ever told. In Heroes, Gods and Monsters of the Greek Myths, bestselling author Bernard Evslin shares his passion for these fabulous tales and the eternal themes they so beautifully express. In this accessible overview, you'll get to know the iconic gods, heroes, and tragic figures: Zeus, the all-powerful king of the gods; Hera, his cunning and jealous wife; King Midas, whose touch could turn anything into gold; the sculptor Pygmalion, who falls in love with his own creation; and many more. With each story, Evslin brings new life to these legendary characters and the magical world they inhabit. Translated into multiple languages, and with more than ten million copies sold, this invaluable resource has become a classic in itself.

Catalog of Copyright Entries, Third Series-Library of Congress. Copyright Office 1952

The Fingerprint-U.S. Department of Justice 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.
