Sit 'n Go Strategy-Collin Moshman 2007-07 Sit 'n go poker tournaments are one table events starting with nine or ten players that usually pay the top three places. They have become very popular on the Internet and are now being spread in brick and mortar cardrooms as well. Meaningful-Bernadette Jiwa 2015-10-09 "The most important book for your boss to read this year." -SETH GODIN "Empathy, relevance, and affinity-three great concepts to help you make a dent in the universe. Jiwa explains a whole new way to innovate and change the world." -GUY KAWASAKI "A must read for any entrepreneur or marketer. It's full of lots of "aha" moments with a concrete tool that you can implement immediately. This book should be added to every marketer's toolkit!" -DIANE DIAZ, Instructor Digital Storytelling & Branding, FULL SAIL UNIVERSITY "This book and the Story Strategy Blueprint inside are invaluable for anyone who wants to disrupt their industry and to know and genuinely matter to their customers. Bernadette's unique views and teachings will give you the most important, empathetic tools to know the consumer and be a successful storyteller." -ANTONIO ZEA, Global Director, Football Footwear, UNDER ARMOUR "As marketers our future value and success relies on using our customers as our compass. Through inspiring case studies, learn about the Innovation Trifecta and how affinity that is earned, rather than attention that is bought can power your business growth. Bernadette digs deep to explain why brands that give a damn make a difference and win in terms of profits, people and the planet." -LEE TONITTO, CEO, AUSTRALIAN MARKETING INSTITUTE One of Inc Magazine's Top Business Books of 2015. Our new digital landscape has spawned an entrepreneurial culture and the belief that anyone with a laptop and an Internet connection has the power to change the world-to create an idea that flies. But for every groundbreaking business that started this way, a thousand others have stalled or failed. Why? What's the secret to success? What do Khan Academy, the GoPro camera, the Dyson vacuum cleaner and Kickstarter have in common? After years of consulting with hundreds of innovators, creatives, entrepreneurs and business leaders to help them tell the stories of their ideas, I have discovered something: every business that flies starts not with the best idea, the biggest budget or better marketing, but with the story of someone who wants to do something-and can't. We don't change the world by

starting with our brilliant ideas, our dreams; we change the world by helping others to live their dreams. The story of ideas that fly is the story of the people who embrace them, love them, adopt them, care about them and share them. Successful ideas are the ones that become meaningful to others—helping them to see what's possible for them. Our ideas fly when we show others their wings.

Badass: Making Users Awesome-Kathy Sierra 2015-01-29 Note for ebook customers: The design and layout of this book play a key role in conveying the author's message. When creating the ebooks, we've tried to keep the look and feel of the print edition, but this means that not all e-reading devices will support the files. The EPUB format is optimized for iPad. The Mobi files are optimized for Kindle Fire tablets and phones and for Kindle reading apps. Imagine you're in a game with one objective: a bestselling product or service. The rules? No marketing budget, no PR stunts, and it must be sustainably successful. No short-term fads. This is not a game of chance. It is a game of skill and strategy. And it begins with a single question: given competing products of equal pricing, promotion, and perceived quality, why does one outsell the others? The answer doesn't live in the sustainably successful products or services. The answer lives in those who use them. Our goal is to craft a strategy for creating successful users. And that strategy is full of surprising, counter-intuitive, and astonishingly simple techniques that don't depend on a massive marketing or development budget. Techniques typically overlooked by even the most well-funded, well-staffed product teams. Every role is a key player in this game. Product development, engineering, marketing, user experience, support—everyone on the team. Even if that team is a start-up of one. Armed with a surprisingly overlooked science and a unique POV, we can reduce the role of luck. We can build sustainably successful products and services that rely not on unethical persuasive marketing tricks but on helping our users have deeper, richer experiences. Not just in the moments while they're using our product but, more importantly, in the moments when they aren't.
