The United States at War-John C. Super 2005-05-01 The United States at War addresses its theme by offering compact surveys of the most important military conflicts in which the United States has been involved-from the Revolutionary War through the Iraq War of 2003. The two-volume set examines these conflicts from a variety of perspectives, ranging from detailed discussions of individual battles to overviews of the broader ramifications of the conflicts.

The Brain-Shaped Mind-Naomi Goldblum 2001-08-23 Will brain scientists ever be able to read our minds? Why are some things harder to remember than others? Based on recent brain research and neural network modelling, The Brain-Shaped Mind addresses these, and other, questions, and provides a clear account of how the structure of the brain influences the workings of the mind. Neuroscientists are now learning about our minds by examining how the neurones in the brain are connected with one another and the surrounding environment. This book explores how neural networks enable us to recognise objects and learn new things, and what happens when things go wrong. The reader is taken on a fascinating journey into what is arguably one of the most complicated and remarkable aspects of our lives.

Engine Coolant Technologies-William N. Matulewicz 2008 This volume consists of 14 manuscripts from the Fifth International Symposium on Engine Coolant Technology sponsored by the American Society for Testing and Materials Committee D15 on Engine Coolants, held in Toronto, Canada, in May 2006. Papers cover advances in system components, experimental testing, uses, and users' experience of automotive and heavy-duty applications. They focus on international coolant development, field testing of additives, recycling, additive compatibility, alternate coolant base technology, extended life oxidation and thermal stability, and new testing methods of cavitation, erosion, and localized corrosion. Contributors are international technical representatives from OEM and engine coolant producers. There is no index.

Diesel Engine Management-Konrad Reif 2014-07-18 This reference book provides a comprehensive insight into today's diesel injection systems and electronic control. It focusses on minimizing emissions and exhaust-gas treatment. Innovations by Bosch in the field of diesel-injection technology have made a significant contribution to the diesel boom. Calls for lower fuel consumption, reduced exhaust-gas emissions and quiet engines are making greater demands on the engine and fuel-injection systems.

Buehler's Backyard Boatbuilding-George Buehler 1991-01-05 Everybody has the dream: Build a boat in the backyard and sail off to join the happy campers off Pogo Pogo, right? But how? Assuming you aren't independently wealthy, if you want a boat that's really you, you gotta build it yourself. Backyard boatbuilding has its problems. Building in fiberglass is itchy, smelly, and yields a product that yachting maven L. Francis Herreshoff once called "frozen snot." Ferrocement, once all the rage, has pretty much sunk from favor, if you catch the drift. But there's still wood, right? Ah, wood. Nature's perfect material. You can build in the time-honored traditions of the Golden Age of Yachting, loving crafting intricate joints in rare tropical hardwoods, steaming swamp oak butts to sinuous shapes, holding the whole thing together with nonferrous fastenings that cost a buck or better each. Does that sound like boatbuilding for everyperson? What about the

currently fashionable wood/epoxy boatbuilding? You butter regular old wood with Miracle Whip, stick it together in the shape of a boat, and off you go, right? Epoxy works, but They don't exactly give it away; nor is it exactly a benign substance. Sailing up like Homer Simpson heading for a fun-filled day at the nuclear power plant isn't exactly the aesthetic boatbuilding experience many of us are looking for. Where does that leave us? In the capable hands of George Buehler, who honors the timeless traditions of the sea all right, but those from the other side of the boatyard tracks. Buehler draws his inspiration from centuries of workboat construction, where semiskilled fishermen built rugged, economical boats from everyday materials in their own backyards, and went to sea in them in all kinds of weather, not just when it was pleasant. Buehler's boats sail on every ocean and perform every task, from long-term liveaboards in Norwegian fjords to a traveling doctor's office in Alaska. This book contains complete plans for seven cruising boats--from a 28-foot sailboat to a 55-foot power cruiser. All the information you need is here, including step-by-step instructions honed by nearly 20 years of supplying boat plans to backyard builders--and helping them out when they get into trouble. Buehler is anarchic, heretical, and occasionally profane; his book is West Coast counterculture meets traditional hardchine workboat construction, leavened with hardnosed common sense and penny-pinching economy. This book is for those who look around them and see that much of what is done in the world today--whether in yachting or politics or economics or interpersonal relationships--is based not on logic but on conforming and meeting other people's expectations. This book is most definitely NOT about either. It is about the realization of dreams. If you believe that everyone who wants a cruising boat can have one . . . If you see beauty beneath the fish scales and work scars of a commercial fishing boat . . . If you want to build a simple, rugged, economical, good-looking cruising boat--power or sail--using everyday lumberyard materials and few skills other than perseverance, this is the book for you. Buehler's Backyard Boatbuilding tells you how to build extraordinary boats using the most ordinary skills and materials, with complete plans, instructions, and specifications for seven real cruising boats ranging from a 28-foot sailboat to a 55-foot power cruiser. "Build wooden boats the Buehler way, which is to say inexpensively, yet like the proverbial brick outhouse."--WoodenBoat Richly flavored with personal advice and anecdotes as well as a wealth of valuable information."--American Sailing Association "Everyone will revere this book."--The Ensign
