Geography of the Gaze-Renzo Dubbini 2002-04-15 Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the "view," explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes; how the "picturesque" system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, Geography of the Gaze will interest everyone from scientists to artists.

Dictionary of Civil Engineering-Jean-Paul Kurtz 2004-09-14 I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Braxton Bragg-Earl J. Hess 2016-09-02 As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army—including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

Managing with Dual Strategies-Derek F. Abell 2010-06-15 Rarely, if ever, do companies clearly distinguish between or balance the management of today's business and planning for the future. Derek Abell, internationally renowned for his pioneering work on strategic market planning, once again breaks sharply with conventional wisdom to demonstrate how a company can develop analytic marketing modes for not one but two distinct planning horizons. Managing with dual strategies, Abell argues, calls for new approaches not only to planning, but to organizational structure and management control. He makes specific recommendations on how current operating practices need to be adapted, and shows how leading firms are recognizing the dual nature of management as a new way of organizational life. Planning for the present, Abell shows, requires a vision of how the firm must operate now given its unique competencies and resources. By involving each level within the management team from the CEO to financial planners, to line managers, Abell details how firms can pinpoint market opportunities through careful segmentation and identification of key success factors to "connect" with customers. At the same time, he distinguishes the importance of horizontal relationships for defining and focusing on internal strategies, and vertical relationships for being attuned to changing market realities. Success today, he warns, does not ensure success tomorrow. Abell describes how world-class leaders such as Nestlé, Caterpillar, and Heineken monitor both internal and external forces for market change, successfully mastering the present, and preempting the future. Preparing for the future requires understanding the full range of activities industry-wide, and anticipating changes in technology, buyer/seller behavior, and product life cycles. Abell explains how companies can develop and implement these co-existing visions and address the real forms of change that vitally affect their future -- today and tomorrow.

Search the Dark-Marta Perry 2013-10-01 Sometimes the past is best left buried Meredith King longs for escape. Life in Deer Run is stifling, the Amish town too small for a modern woman staying just to care for her ailing mother. When a friend enlists her help in clearing the name of an Amish boy whose decades-old death is still shrouded in mystery, she welcomes the distraction. But when a ghost from her own past reappears, there is suddenly a lot more at stake. Zach Randal was always a bad boy, and their romance never had a chance. As charming as ever, he returns to town on the heels of a deadly new threat. Is Zach as dangerous as Meredith was always led to believe? Or is the attraction they both feel the only thing that can save them from harm?

The Encyclopedia of the Motorcycle-Peter Henshaw 2008 Motorcycles, the open road, cruising; all things associated with this powerful locomotive are detailed in this marvelous history of a stunning vehicle. Humanity is capable of many wonderful things, but the art of making motorcycles is arguably not its greatest achievement. Throughout history there have been far more pressing needs than the desire to get from A to B more quickly and more pleasurably than anyone else. And yet, thousands of entrepreneurs have gravitated to the motorcycle industry: scratch any of them, and one will most likely find an enthusiast beneath the skin. Why else would anyone be willing to risk time and money in a business notorious for its glorious failures?

Kingsport, Tennessee-Margaret Ripley Wolfe 1987-01-01 "This first full-length biography of Kingsport challenges interpretations of regional history that promote the colonial and poverty models. It will interest scholars of urbanization, city planning, and industrialization as well as local history enthusiasts."

Home by Dark-Marta Perry 2013-01-01 Rachel Weaver Mason is finally going home to Deer Run, the Amish community she left behind so many years ago. Recently widowed, she wants desperately to create a haven for herself and her young daughter. But the community, including Rachel's family, is anything but welcom ing. The only person happy to see her is her teenage brother, Benjamin, and he's protecting a dark secret that endangers them all. Determined to keep Benjamin safe from a suspected killer, Rachel has no choice but to turn to the one man she wanted to get as far away from as possible. Colin McDonald was her late husband's friend, and the man who came between them. He's never forgotten her and would do anything to keep her and her family safe. Rachel doesn't know if she can trust Colin, or her growing feelings for him. But as they hunt for the killer, the tension between them builds and soon both their lives, and their hearts, are on the line.

Science in History-J. D. Bernal 2012-10-04 J. D. Bernal's monumental work, Science in History, was the first full attempt to analyse the reciprocal relations of science and society throughout history, from the perfection of the flint hand-axe to the hydrogen bomb. In this remarkable study he illustrates the impetus given to (and the limitations placed upon) discovery and invention by pastoral, agricultural, feudal, capitalist, and socialist systems, and conversely the ways in which science has altered economic, social, and political beliefs and practices. In this first volume Bernal discusses the nature and method of science before describing its emergence in the Stone Age, its full formation by the Greeks and its continuing growth (probably influenced from China) under Christendom and Islam in the Middle Ages. Andrew Brown, Bernal's biographer, with a nice sense of paradox, has said of him, he 'was steeped in history, in part because he was always thinking about the future.' He goes on to say, 'Science in History is an encyclopaedic, yet individual and colourful account of the emergence of science from pre-historic times. There is detailed coverage of the scientific revolution of the Enlightenment, the Industrial Age and the first two-thirds of the twentieth century. . . The writing flows and is devoid of the tortured idioms that mar so many academic

histories of science. After reading it, it is easy to agree with C. P. Snow's rotund observation that Bernal was the last man to know science. Faber Finds are reissuing the illustrated four volume edition first published by Penguin in 1969. The four volumes are: Volume 1: The Emergence of Science, Volume 2: The Scientific and Industrial Revolutions, Volume 3: The Natural Sciences in Our Time, Volume 4: The Social Sciences: Conclusion. 'This stupendous work . . . is a magnificent synoptic view of the rise of science and its impact on society which leaves the reader awe-struck by Professor Bernal's encyclopaedic knowledge and historical sweep.' Times Literary Supplement Scooterboys-Martin 'Sticky' Round 2019-04-28 Scooterboys are the lost tribe of British youth culture. Unrecognised, uncelebrated and unwanted; misunderstood by a general public who mistook us for Mods. We weren't Mods though. By the 1980s myself and tens of thousands of scooter riders collectively rejected that label. Instead, we took the roadmap of British youth disaffection and carved a new bypass. This route took us beyond the UK's faded seaside resorts, allowing us to spread our creed across the continents. Tuned and customised Vespa and Lambretta scooters gave us freedom to roam; transport to live for the weekend. Shared experiences of riots, local hostility and police harassment built strong fraternal bonds that endure to this day. Despite decades of two-wheeled rebellion our threat level was never high enough to put us on the national security radar. This low profile has its benefits. We aren't doomed to follow the same cycle as Mods. First feared, then pilloried, accepted and finally adopted as part of UK's rich culture. As British as a vindaloo. The cult of Scooterboy has escaped death-by-public-acceptance, simply by remaining too underground. Too difficult to distinguish from what came before. And that's just perfect. You'll never see Scooterboys parodied in TV insurance adverts or low budget fly-on-the-walls. The poorly-rendered caricature is always some cliché Mod on a 'Christmas Tree' scooter. If you rode to rallies in the 80s and 90s then this book will mirror your experiences. If you've never had a scooter then it offers a rare glimpse of life inside the lost tribe of two-stroke terrorists.
