Science in the Kitchen and the Art of Eating Well-Pellegrino Artusi 2003-12-27 First published in 1891, Pellegrino Artusi's La scienza in cucina e l'arte di mangiar bene has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor ? humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

Sustainable Agriculture Reviews-Eric Lichtfouse 2015-08-14 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children. Sustainable agriculture is a discipline that addresses current issues such as climate change, increasing food and fuel prices, poor-nation starvation, rich-nation obesity, water pollution, soil erosion, fertility loss, pest control and biodiversity depletion. Novel, environmentally-friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy, soil science, molecular biology, chemistry, toxicology, ecology, economy and social sciences. Indeed, sustainable agriculture decipher mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries. For that, scientists use the system approach that involves studying components and interactions of a whole system to address scientific, economic and social issues. In that respect, sustainable agriculture is not a classical, narrow science. Instead of solving problems using the classical painkiller approach that treats only negative impacts, sustainable agriculture treats problem sources. Because most actual society issues are now intertwined, global and fast-developing, sustainable agriculture will bring solutions to build a safer world.

King Solomon's Ring-Konrad Lorenz 2003-08-27 Solomon, the legend goes, had a magic ring which enabled him to speak to the animals in their own language. Konrad Lorenz was gifted with a similar power of understanding the animal world. He was that rare beast, a brilliant scientist who could write (and indeed draw) beautifully. He did more than any other person to establish and popularize the study of how animals behave, receiving a Nobel Prize for his work. King Solomon's Ring, the book which brought him worldwide recognition, is a delightful treasury of observations and insights into the lives of all sorts of creatures, from jackdaws and water-shrews to dogs, cats and even wolves. Charmingly illustrated by Lorenz himself, this book is a wonderfully written introduction to the world of our furred and feathered friends, a world which often provides an uncanny resemblance to our own. A must for any animal-lover!

Hemoparasites of the Reptilia-Sam R. Telford, Jr. 2016-04-19 Every researcher or diagnostician working with reptiles has faced the challenge of identifying reptile hemoparasites and then determining whether they are of importance or merely incidental. Another challenge is how to easily find the information required to make the proper identification. A distillation of knowledge from world-renowned expert Sam R. Telford, Jr, Hemoparasites of the Reptilia: Color Atlas and Text provides a comprehensive compilation of information on how to differentiate between the myriad species of reptile hemoparasites. The atlas provides diagnoses for 262 species of plasmodiids, hemogregarines, hemococcidians, trypanosomes, and leishmanias, including descriptions of eight new species or new taxonomic designations. It also discusses lesser known groups, such as piroplasms, rickettsiae, chlamydia, and erythrocytic viruses. Each genus and many species are represented among the 166 taxa illustrated in color. The species accounts contain host and geographic distribution, with precise localities when possible, prevalence, life cycles and vectors when known, effects upon the host, and ecology of the host-parasite relationship, morphological variation, and an exhaustive bibliography. The book also includes an illustrated key showing diagnostic characters. Telford draws on his 45 years of experience and his personal collection, considered the world's most complete, to provide information on the morphology of the unicellular parasites of reptilian blood. He includes information from hard-to-find original papers and articles from sources throughout the world. The illustrated key and photomicrographs from Telford's collection make identifying species quicker and easier.

The Iguana-Anna Maria Ortese 1987 In this magical novel a count from Milan stumbles upon a desolate community of lost noblemen on an uncharted island off the coast of Portugal. When he discovers, to his astonishment, that their ill-treated servant is in fact a maiden iguana, and then proceeds to fall in love with her, the reader is given a fantastic tale of tragic love and delusion that ranks among the most affecting in contemporary literature. "The reptilian servant is only the first in a series of fantastic touches that transform the narrative into a satiric fable dense with the echoes of Shakespeare's 'Tempest' and Kafka's 'Metamorphosis.' . . . The Iguana is a superb performance." "€"New York Times Book Review

Mongrels-Stephen Graham Jones 2016-05-10 A spellbinding and darkly humorous coming-of-age story about an unusual boy, whose family lives on the fringe of society and struggles to survive in a hostile world that shuns and fears them. He was born an outsider, like the rest of his family. Poor yet resilient, he lives in the shadows with his aunt Libby and uncle Darren, folk who stubbornly make their way in a society that does not understand or want them. They are mongrels, mixed blood, neither this nor that. The boy at the center of Mongrels must decide if he belongs on the road with his aunt and uncle, or if he fits with the people on the other side of the tracks. For ten years, he and his family have lived a life of late-night exits and narrow escapes—always on the move across the South to stay one step ahead of the law. But the time is drawing near when Darren and Libby will finally know if their nephew is like them or not. And the close calls they've been running from for so long are catching up fast now. Everything is about to change. A compelling and fascinating journey, Mongrels alternates between past and present to create an unforgettable portrait of a boy trying to understand his family and his place in a complex and unforgiving world. A smart and innovative story— funny, bloody, raw, and real—told in a rhythmic voice full of heart, Mongrels is a deeply moving, sometimes grisly, novel that illuminates the challenges and tender joys of a life beyond the ordinary in a bold and imaginative new way.

Securing Livelihoods-Isabelle Hillenkamp 2013-10 The high level of vulnerabilities, multiple kinds of processes contributing to insecurity, and the constant reinvention of systems of protection and solidarity within the informal economy shape the accumulation process in a non-capitalist way. It is necessary to recognize the capacity of popular actors to perceive the world and development projects in terms of their cultural identity, their history and the place where they live, and not as a universal matrix suggested by the dominant actors. Bottom-up approaches and innovative institutional frameworks for better responding to peoples' needs should be core components of the debate on formalization and poverty reduction. The book points out the need to reformulate questions relating to policy intervention based on a more thorough understanding of the perspective of informal economy actors.
