Making War and Building Peace-Michael W. Doyle 2011-04-22 Making War and Building Peace examines how well United Nations peacekeeping missions work after civil war. Statistically analyzing all civil wars since 1945, the book compares peace processes that had UN involvement to those that didn't. Michael Doyle and Nicholas Sambanis argue that each mission must be designed to fit the conflict, with the right authority and adequate resources. UN missions can be effective by supporting new actors committed to the peace, building governing institutions, and monitoring and policing implementation of peace settlements. But the UN is not good at intervening in ongoing wars. If the conflict is controlled by spoilers

or if the parties are not ready to make peace, the UN cannot play an effective enforcement role. It can, however, offer its technical expertise in multidimensional peacekeeping operations that follow enforcement missions undertaken by states or regional organizations such as NATO. Finding that UN missions are most effective in the first few years after the end of war, and that economic development is the best way to decrease the risk of new fighting in the long run, the authors also argue that the UN's role in launching development projects after civil war should be expanded.

Making Peace Last-Robert Ricigliano 2015-11-17 The international community invests billions annually in thousands of projects designed to overcome poverty, stop violence, spread human rights, fight terrorism and combat global warming. The hope is that these separate projects will 'add up' to lasting societal change in places like Afghanistan. In reality, these initiatives are not adding up to sustainable peace. Making Peace Last offers ways of improving the productivity of peacebuilding. This book defines the theory, analysis and practice needed to create peacebuilding approaches that are as dynamic and adaptive as the societies they are trying to affect. The book is based on a combination of field experience and research into peacebuilding and conflict resolution. This book can also be used as a textbook in courses on peace-building, security and development. Making Peace Last is a comprehensive approach to finding sustainable solutions to the world's most pressing social problems.

When War Ends-David J. Francis 2016-02-17 This volume critically examines what happens when war

formally ends, the difficult and complex challenges and opportunities for winning the peace and reconciling divided communities. By reviewing a case study of the West African state of Sierra Leone, potential lessons for other parts of the world can be gained. Sierra Leone has emerged as a 'successful' model of liberal peacebuilding that is now popularly advertised and promoted by the international community as a powerful example of a country that they finally got right. Concerns about how successful a model Sierra Leone actually is, are outlined in this project. As such this volume: -

At War's End-Roland Paris 2004-05-24 All fourteen major peacebuilding missions launched between 1989 and 1999 shared a common strategy for consolidating peace after internal conflicts: immediate democratization and marketization. Transforming war-shattered states into market democracies is basically sound, but pushing this process too quickly can have damaging and destabilizing effects. The process of liberalization is inherently tumultuous, and can undermine the prospects for stable peace. A more sensible approach to post-conflict peacebuilding would seek, first, to establish a system of domestic institutions that are capable of managing the destabilizing effects of democratization and marketization within peaceful bounds and only then phase in political and economic reforms slowly, as conditions warrant. Peacebuilders should establish the foundations of effective governmental institutions prior to launching wholesale liberalization programs. Avoiding the problems that marred many peacebuilding operations in the 1990s will require longer-lasting and, ultimately, more intrusive forms of intervention in the domestic affairs of these states. This book was first published in 2004.

Ending War, Building Peace-Lynda-Ann Blanchard 2009 The US-led invasion and occupation of Iraq led to more than a million people being killed, displaced five million from their homes and shattered countless more lives. It was a colossal, premeditated war crime. Leaders of governments in the countries responsible for this enormity seek to minimise and forget about it: to 'move on'. We must not let them, because they want to retain the option of making the same political decisions, condemning more innocent people to death, somewhere else in the future. Contributors to this book are united in saying: Never Again. They

examine how and why this unmitigated disaster for humanity was allowed to happen, and how we can prevent it being repeated. And they imagine more peaceful ways to engage with conflicts and crises in times to come. It raises a question: what will you do to help end war and build peace?

Sustainable Peace-Philip G. Roeder 2005 How can leaders craft political institutions that will sustain the peace and foster democracy in ethnically divided societies after conflicts as destructive as civil wars? This volume compares power-dividing and power-sharing solutions. --John McGarry, Queen's University

The Role of Women in Making and Building Peace in Liberia-Anne 2014-04-15 In the early 2000s, Liberian women wearing wrap skirts and white T-shirts, shouting: 'We want peace, no more war', attracted international attention. After almost fifteen years of civil war, the enduring active, multifaceted, and non-violent campaigning for peace by women's organisations contributed to the end of the fighting and the signing of a peace agreement between the warring factions. Although it is widely assumed that women's inclusion in peace processes yields greater attention to women's issues and needs in the aftermath of a conflict, this is only partly the case in Liberia. Thus, this analysis looks beyond the extraordinary commitment by women in Liberia and deals with the questions to what extent their role in the peace process has contributed to gender-sensitive outcomes in post-conflict Liberian society and why greater gender sensitivity was not achieved. By focusing on manifestations of patterns of masculinity in the public and private spheres, Anne Theobald identifies factors at different levels of analysis within different time frames that elucidate the unexpected outcome. Not only does this provide for a more encompassing understanding of dynamics of gender relations and context-specific variables impeding gender sensitivity in post-conflict settings, but it also helps to refine prevailing theoretical approaches on gender in peacemaking and peacebuilding and to develop more holistic, context-specific, and efficient policy approaches, which can effectively lead to gender-sensitive peace.

Making War to Keep Peace LP-Jeane J. Kirkpatrick 2007-06-26 An analysis of America's overseas conflicts since the end of the Cold War provides a revisionist survey of American foreign policy that evaluates the

nation's increasingly fractured relationship with the U.N., the results of the U.S.'s use of force throughout the world, and the agendas of the Bush senior and Clinton administrations. (Political Science)

Why Peace Fails-Charles T. Call 2012-04-03 Why does peace fail? More precisely, why do some countries that show every sign of having successfully emerged from civil war fall once again into armed conflict? What explains why peace "sticks" after some wars but not others? In this illuminating study, Charles T. Call examines the factors behind fifteen cases of civil war recurrence in Africa, Asia, the Caucasus, and Latin America. He argues that widely touted explanations of civil war—such as poverty, conflict over natural resources, and weak states—are far less important than political exclusion. Call's study shows that inclusion of former opponents in postwar governance plays a decisive role in sustained peace. Why Peace Fails ultimately suggests that the international community should resist the temptation to prematurely withdraw resources and peacekeepers after a transition from war. Instead, international actors must remain fully engaged with postwar elected governments, ensuring that they make room for former enemies.

Building Peace After War-Mats Berdal 2017-10-03 The widespread practice of intervention by outside actors aimed at building ?sustainable peace? within societies ravaged by war has been a striking feature of the post-Cold War era. But, at a time when more peacekeepers are deployed around the world than at any other point in history, is the international will to intervene beginning to wane? And how capable are the systems that exist for planning and deploying ?peacebuilding? missions of fulfilling the increasingly complex tasks set for them? In Building Peace After War, Mats Berdal addresses these and other crucial questions, examining the record of interventions from Cambodia in the early 1990s to contemporary efforts in Afghanistan and the Democratic Republic of the Congo. The book analyses the nature of the modern peacebuilding environment, in particular the historical and psychological conditions that shape it, and addresses the key tasks faced by outside forces in the early and critical ?post-conflict? phase of an intervention. In doing so, it asks searching questions about the role of military force in support of

peacebuilding, and the vital importance of legitimacy to any intervention. Berdal also looks critically at the ways in which governments and international organisations, particularly the UN, have responded to these many challenges. He highlights the pivotal role of politics in planning peacebuilding operations, and offers some sober reflections on the future prospects for post-conflict intervention.

Building a peace economy?-Jenny H. Peterson 2015-11-01 This book critically examines the range of policies and programmes that attempt to manage economic activity that contributes to political violence. It offers a new framework for understanding both the problem of economic activity in conflict zones as well as programmes aimed at managing these and transforming them into more peaceful economic and political relationships. Through this examination, both the problems of liberal modes of peacebuilding, implemented by the development-security industry, and opportunities for policy innovation are explored. Useful charts and frameworks throughout the book provide the reader with a range of analytical tools that can be easily used to explore war economies and related policies in a range of contexts, making this book an essential read for students, policy makers and aid practitioners working in a range of disciplines and conflict-affected areas.

Making Peace with Faith-Michelle Garred 2018-01-15 Although religion is almost never a root cause, it often gets pulled into conflict as a powerful element, especially where conflicting parties have different religious identities. Every faith tradition offers resources for peace, and secular policy makers are more and more acknowledging the influence of faith-based actors, even though there remains a tendency to associate religion more with conflict than peace. In this text, practitioners from different faiths relate and explore the many challenges they face in their peacebuilding work, which their secular partners may be unaware of. The contributors are all practitioners whose faith or religious experience motivates their work for peace and justice in such a way that it influences their actions. Their roles are diverse, as some work for faith-based institutions, while others engage in secular contexts. The multiple perspectives featured represent multiple faiths (Muslim, Christian, Hindu, Buddhist, Jewish), diverse scopes of practice,

different geographic regions. Each chapter follows a similar template to address specific challenges, such as dealing with extremist views, addressing negative stereotypes about one's faith, endorsing violence, developing relations with other faith-based or secular groups, confronting gender-based violence, and working with people who hold different beliefs. In this text, practitioners from different faiths relate and explore the many challenges they face in their peacebuilding work, which their secular partners may be unaware of. They provide a comprehensive view of the practice of peacebuilding in its many challenging aspects, for both professionals and those studying religion and peacebuilding alike.

International Conflict Resolution After the Cold War-National Research Council 2000-11-07 The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

Making It Right-Marilee Peters 2016-09-13 What if there were no prisons? Alternative approaches to dealing with crime are underway around the world to explore how victims, offenders, and communities

can heal rifts and repair damage. It is often called restorative justice. It is a way to think about the deeper reasons behind crimes, and suggests that by building more caring communities, it is possible to change our societies and ourselves. "Making It Right" relates true stories of young people who are working in innovative ways to further peaceful resolution of conflict and to heal past wounds. The book begins with individual injustices, such as bullying, and works up to collective ones, like wars. Each chapter begins with a dramatic fictional account, making the topic engaging and relevant for kids. Restorative justice isn't going to change the world overnight, nor will it end all crime or prevent all wars. But it is a powerful way to get teens thinking about how they can participate in building a more peaceful society. "

Women Building Peace-Sanam Naraghi Anderlini 2007 How and why do women's contributions matter in peace and security processes? Why should women's activities in this sphere be explored separately from peacebuilding efforts in general? Decisively answering these questions, Sanam Anderlini offers a comprehensive, cross-regional analysis of women's peacebuilding initiatives around the world. and highlights the endemic problems that stunt progress. Her astute analysis, based on extensive research and field experience, demonstrates how gender sensitivity in programming can be a catalytic component in the complex task of building sustainable peace and provides concrete examples of how to draw on women's untapped potential.

The Making of Peace-Williamson Murray 2009-01-12 The Making of Peace represents a fascinating contribution to the study of war: namely, the difficulties that statesmen have confronted in attempting to put back together the pieces after a major conflict. These essays examine how Western belligerents have addressed - or failed to address - the making of peace across a span of two and a half millennia and in contests reflecting a broad range of prompting disputes. Some efforts produced at best a momentary suspension of hostilities. Others transformed the very context of international relations. Defined more modestly, however, as the control and moderation of violence, some peacemaking efforts were notably more successful than others. This study also serves as a first draft of a guide for those who will confront

the equally difficult task of maintaining the peace, once achieved. It contains path-breaking essays by leading historians of the United States and the United Kingdom.

Building Peace in Northern Ireland-Maria Power 2011-11-23 Since the onset of the troubles in the late 1960s, people in Northern Ireland have been working together to bring about a peaceful, non-violent end to the conflict. In doing so, they have used their efforts as a means to support the transition to a post-conflict society in the wake of the ceasefires and the Good Friday Agreement. This collection is the first to examine the different forms of peace and reconciliation work that have taken place. It brings together an international group of scholars to examine initiatives such as integrated education, faith-based peace building, cross-border co-operation and womens activism as well as the impact that government policy and European funding have had upon the development of peace and reconciliation organisations. This unique collection of essays demonstrates the contribution that such schemes have made to the peace process and the part that they can play in Northern Irelands future.

Mediation and Liberal Peacebuilding-Mikael Eriksson 2013 Despite the wealth of research on external interventions and practices of Western peacebuilding, many scholars tend to rely on findings in the so-called 'post-agreement' phase of interventions. As a result, most mainstream peacebuilding literature pays limited or no attention to the linkages that exist between mediation practices in the negotiation phase and processes in the post-peace agreement phase of intervention. By linking the motives and practices of interveners during negotiation and implementation phases into a more integrated theoretical framework, this book makes a unique contribution to the on-going debate on the so-called Western 'liberal' models of peacebuilding. Drawing upon in-depth case-studies this innovative volume examines a variety of political motives behind third party interventions, thus challenging the very founding concept of mediation literature. ... Understanding Quality Peace-Madhav Joshi 2018-01-29 This book provides an analytical framework for understanding how the concept of quality peace can be used to evaluate post-conflict peacebuilding, using

social science, statistics, and case studies. Including contributions from more than 20 researchers and practitioners, it argues that the quality of the peace in a post-conflict state relates to the extent to which peace accords are implemented, the agreed-upon mechanism for the non-violent resolution of the conflict, and the available social space for civil and political actors. To arrive at the concept of 'quality peace', the authors evaluate the existing literature and identify a lack of a satisfactory means of measuring outcomes, and consequently how these might be researched comparatively. The volume problematizes the 'quality peace' concept as a way to understand the origins of armed conflict as well as problems deriving from the conflict dynamics and the need for social, political, and economic changes in the post-conflict periods. The book emphasizes five dimensions as crucial for quality peace in a post-accord society. Negotiations and agreements not only aim at avoiding the return of war but also seek to: (1) promote reconciliation, (2) develop mechanisms for resolving future disputes, (3) provide for reliable security, (4) open economic opportunities for marginalized segments of the population, and (5) generate space for civil society. These five dimensions together provide for quality peace after war. They are studied in the context of internal armed conflicts in which multiple parties have signed a peace agreement. This book will be of great interest to students of peace and conflict studies, civil wars, global governance, security studies, and International Relations in general.

Making Peace in Drug Wars-Benjamin Lessing 2017-12-07 State crackdowns on drug cartels often backfire, producing entrenched 'cartel-state conflict'; deterrence approaches have curbed violence but proven fragile. This book explains why.

Fighting for Peace in Somalia-Paul D. Williams 2018-06-20 Fighting for Peace in Somalia provides the first comprehensive analysis of the African Union Mission in Somalia (AMISOM), an operation deployed in 2007 to stabilize the country and defend its fledgling government from one of the world's deadliest militant organizations, Harakat al-Shabaab. The book's two parts provide a history of the mission from its genesis in an earlier, failed regional initiative in 2005 up to mid-2017, as well as an analysis of the

mission's six most challenges, namely, logistics, security sector reform, civilian protection, strategic communications, stabilization, and developing a successful exit strategy. These issues are all central to the broader debates about how to design effective peace operations in Africa and beyond. AMISOM was remarkable in several respects: it would become the African Union's (AU) largest peace operation by a considerable margin deploying over 22,000 soldiers; it became the longest running mission under AU command and control, outlasting the nearest contender by over seven years; it also became the AU's most expensive operation, at its peak costing approximately US\$1 billion per year; and, sadly, AMISOM became the AU's deadliest mission. Although often referred to as a peacekeeping operation, AMISOM's troops were given a range of daunting tasks that went well beyond the realm of peacekeeping, including VIP protection, war-fighting, counterinsurgency, stabilization, and state-building as well as supporting electoral processes and facilitating humanitarian assistance. Peace-Building by, between, and beyond Muslims and Evangelical Christians-Mohammed Abu-Nimer 2009-02-16 This timely work addresses sensitive issues and relations between Muslims and Christians around the world. The book uniquely captures the opportunity for Christians and Muslims to come together and discuss pertinent issues such as pluralism, governance, preaching, Christian missionary efforts, and general misperceptions of Muslim and Christian communities. Joint authorship and discussion within the book is used to offer dialogue and responses between different contributors. This dialogue reveals that Christians and Muslims hold many things in common while having meaningful differences. It also shows the value of honestly sharing convictions while respecting and hearing the beliefs of another. The Moral Imagination-John Paul Lederach 2010 Originally published in hardcover in 2005.

Making Peace Work-T. Addison 2008-11-20 This book provides an insight into some of the main issues that arise in post-conflict economic and social reconstruction, and offers examples of what works, and what does not. It will be of interest to all working on economic and social reconstruction in post-conflict countries, as well as those working on peace and development.

Merchants of War and Peace-Song-Chuan Chen 2017-01-01

Peacebuilding-Luc Reychler 2001 "We genuinely believe that any action in or around existing or potential conflict areas has an influence on war and peace. Building sustainable peace is not just a matter of direct intervention through mediation. It also requires indirect intervention through development and relief aid, media coverage, or any other activity relating to existing or potential violent conflicts. Peacebuilding: A Field Guide therefore aims at making the reader aware of the bigger picture involved in the building of sustainable peace, while also providing some real guidelines on how to maximize all contributions to peacebuilding."--Preface.

Peacebuilding and Spatial Transformation-Annika Bjorkdahl 2017-05-18 This book investigates peacebuilding in post-conflict scenarios by analysing the link between peace, space and place. By focusing on the case studies of Cyprus, Kosovo, Bosnia-Herzegovina, Northern Ireland and South Africa, the book provides a spatial reading of agency in peacebuilding contexts. It conceptualises peacebuilding agency in post-conflict landscapes as situated between place (material locality) and space (the imaginary counterpart of place), analysing the ways in which peacebuilding agency can be read as a spatial practice. Investigating a number of post-conflict cases, this book outlines infrastructures of power and agency as they are manifested in spatial practice. It demonstrates how spatial agency can take the form of conflict and exclusion on the one hand, but also of transformation towards peace over time on the other hand. Against this background, the book argues that agency drives place-making and space-making processes. Therefore, transformative processes in post-conflict societies can be understood as materialising through the active use and transformation of space and place. This book will be of interest to students of

peacebuilding, peace and conflict studies, human geography and IR in general.

Understanding the imaginary war-Matthew Grant 2016-09-01 This collection offers a fresh interpretation of the Cold War as an imaginary war, a conflict that had imaginations of nuclear devastation as one of its main battlegrounds. The book includes survey chapters and case studies on Western Europe, the USSR, Japan and the USA. Looking at various strands of intellectual debate and at different media, from documentary film to fiction, the chapters demonstrate the difficulties to make the unthinkable and unimaginable - nuclear apocalypse - imaginable. The book will be required reading for everyone who wants to understand the cultural dynamics of the Cold War through the angle of its core ingredient, nuclear weapons.

Peace Works-Frederick D. Barton 2018-04-20 American military interventions have cost thousands of lives and billions of dollars, yet we rarely manage to enact positive and sustainable change. In Peace Works, ambassador and global conflict leader Rick Barton uses a mix of stories, history, and analysis for a transformative approach to foreign affairs and offers concrete and attainable solutions for the future.

The Business Plan for Peace-Scilla Elworthy 2018 "Many people feel powerless in the face of what they see on TV or read in the news -- a world in crisis, with wars and violence taking place across the globe. Scilla Elworthy has written a book for all those who want to step out of helplessness and apply their own personal skills to do something about the challenges now facing us."--Back cover.

Encyclopedia of Violence, Peace, and Conflict- 1999-08-16 The Encyclopedia of Violence, Peace, and Conflict, a three-volume set written by more than 200 eminent contributors from around the world, takes advantage of increasing, worldwide awareness in the public, private, commercial, and academic sectors about manifestations of violence in all segments of society. While the contributors do not use these volumes to make specific arguments, they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace. Our reviewers consistently note that while many in-depth studies of war, peace, and aggression exist, the attendant specialization keeps

scholars from learning about related fields. No publication competing with the Encyclopedia of Violence, Peace, and Conflict can satisfy their need for a vast introductory work to such a diverse and socially-important field. This major work includes more than 190 multidisciplinary articles with over 1,000 cross-references and more than 2,000 bibliography entries for further reading which are arranged alphabetically for easy access. The Dilemmas of Statebuilding-Roland Paris 2009-01-13 This book explores the contradictions that emerge in international statebuilding efforts in war-torn societies. Since the end of the Cold War, more than 20 major peace operations have been deployed to countries emerging from internal conflicts. This book argues that international efforts to construct effective, legitimate governmental structures in these countries are necessary but fraught with contradictions and vexing dilemmas.. Drawing on the latest scholarly research on postwar peace operations, the volume: addresses cutting-edge issues of statebuilding including coordination, local ownership, security, elections, constitution making, and delivery of development aid features contributions by leading and up-and-coming scholars provides empirical case studies including Afghanistan, Cambodia, Croatia, Kosovo, Liberia, Sierra Leone, South Africa, and others presents policy-relevant findings of use to students and policymakers alike The Dilemmas of Statebuilding will be vital reading for students and scholars of international relations and political science. Bringing new insights to security studies, international development, and peace and conflict research, it will also interest a range of policy makers.

The United Nations and Global Security-R. Price 2004-03-17 Many have proclaimed the fundamentals of global security were altered by the September 11 terrorist attacks. Do these changes undercut or enhance the role of the United Nations? What do events like the role of the UN in the crisis over Iraq tell us? Here

top scholars examine the role of the UN in preventing international and civil violence, arms control, deterring and reversing aggression, and addressing humanitarian crises. The chapters are concise while providing depth of understanding of the issues, positions and problems facing the United Nations and its member states in grappling with increased opportunities and threats. Their lively presentations of the drama of UN debates establish the contributions and shortcomings of global multilateralism in an era of U.S. hegemony and unilateralism.

Just Peacemaking-Glen H Stassen 2008-01-01 "Just Peacemaking: The New Paradigm for the Ethics of Peace and War" is the product of twenty-three scholars across various denominations who have collaborated annually since 1992 to specify the ten practical steps and develop the undergirding principles of this critical approach: 1. Support nonviolent direct action 2. Take independent initiatives to reduce threat 3. Use cooperative conflict resolution 4. Acknowledge responsibility for conflict and injustice and seek repentance and forgiveness 5. Advanced democracy, human rights, and religious liberty 6. Foster just and sustainable economic development 7. Work with emerging cooperative forces in the international system 8. Strengthen the United Nations and international efforts for cooperation and human rights 9. Reduce offensive weapons and weapons trade 10. Encourage grassroots peacemaking groups and voluntary associations

Why Peace Processes Fail-Jasmine-Kim Westendorf 2015 ∫A stimulating read.... Ambitious in scope and with much original insight, this work is an important contribution to an important debate.∫ ∫Carrie Manning, Georgia State University ∫Westendorf offers an important framework for analyzing prospects for state building by the international community.∫ ∫Desha M. Girod, Georgetown University Why do so many post∫civil war societies continue to be characterized by widespread violence and political instability? Or, more succinctly, why do peace processes so often fail to consolidate peace? Addressing this question, Jasmine-Kim Westendorf explores how the international community engages in resolving civil wars∫and clarifies why, despite the best of intentions and the investment of significant resources, external actors fail

in their reconstruction efforts and even contribute to perpetuating the very conditions of insecurity and conflict that they are trying to alleviate. Jasmine-Kim Westendorf is lecturer in international relations at La Trobe University.

Cultures of Peace-Elise Boulding 2000-05-01 Sociologist Elise Boulding offers a collection of essays that emphasize her study of civil society during the second half of the 20th century. She revisits her theme of connection among family, community and government, offering perspectives and advice on how to fuel the process of peace.

How Peace Operations Work-Jeni Whalan 2013-12-12 This book proposes a new approach to studying the effectiveness of peace operations. It asks not whether peace operations work or why, but how: when a peace operation achieves its goals, what causal processes are at work? By discovering how peace operations work, this new approach offers five distinctive contributions. First, it studies peace operations through a local lens, examining their interactions with actors in host societies rather than their genesis in the politics and institutions of the international realm. In doing so, it highlights the centrality of local compliance and cooperation to a peace operation's effectiveness. Second, the book structures a framework for explaining how peace operations can shape the behaviour of local actors in order to obtain greater cooperation. That framework distinguishes three dimensions of a peace operation's power-coercion, inducement, and legitimacy—and illuminates their effects. The third contribution is to highlight the contribution of local legitimacy to a peace operation's effectiveness and identify the means by which an operation can be locally legitimized. Fourth, the new power-legitimacy framework is applied to study two peace operations in depth: the United Nations Transitional Authority in Cambodia (UNTAC), and the Regional Assistance Mission to Solomon Islands (RAMSI). Finally, the book concludes by examining the implications of this new approach for practice and identifying a set of policy reforms to help peace operations work better. The book argues that peace operations work by influencing the decisions and behaviour of diverse local actors in host societies. Peace operations work better—that is, achieve more of

their objectives at lower cost—when they receive high quality local cooperation. It concludes that peace operations are more likely to attain such cooperation when they are perceived locally to be legitimate.
