Implementing Sustainability in the Curriculum of Universities-Walter Leal Filho 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff. It has been prepared against this background, to identify ways to better teach about sustainability issues in a university context. It contains a set of papers presented at a Symposium with the same title, held at Manchester Metropolitan University (UK) in March 2017. The event was attended by a number of institutions of higher education active in this field. It involved researchers in the field of sustainable development in the widest sense, from business and economics, to arts and fashion, administration, environment, languages and media studies. Sustainability is seldom systematically embedded in the curriculum at higher education institutions. Yet, proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening. The aims of this book are: (i) to provide teaching staff at universities active and/or interested in teaching sustainable development themes with an opportunity to document and disseminate their works (i.e. curriculum innovation, empirical work, activities, case studies practical projects); (ii) to promote information, ideas and experiences acquired in the execution of teaching courses, especially successful initiatives and good practice; (iii) to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching. Last but not least, a further aim of this book, prepared by the Inter-University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), is to catalyse a debate on the need to promote sustainable development teaching today.

The Marwaris-Thomas A Timberg 2015-05-22 In the nineteenth century, a tiny community from the deserts of Rajasthan spread out to every corner of India. The Marwaris controlled much of the country's inland trade by the time of the First World War. They then turned their hand to industry and, by the 1970s, owned most of India's private industrial assets. Today, Marwari businessmen account for a quarter of the Indian names on the Forbes billionaires list.// What makes the Marwaris so successful? Is it their indomitable enterprise, or their incredible appetite for risk? In this new book, Thomas Timberg shows how the Marwaris rely on a centuries-old system for conserving and growing capital which has stood them in good stead, alongside a strong sense of business ethics which has earned them respect.// Family businesses in general and the Marwaris in particular might have a vital role to play in shaping India's economic future.

Social Mobility In Kerala-Filippo Osella 2000-12-20 The Izhavas are an ex-untouchable community in the southern Indian state of Kerala. Politically and economically weak, stigmatised as 'toddy tappers' and 'devil dancers', and considered unapproachable by clean caste Hindus, a century ago Izhavas were associated with other manual-labouring untouchable castes. In recent decades they have sought to improve their position by accumulating economic, symbolic and cultural capital through employment, religion, politics, migration, marriage, education and have tried to assert their right to mobility, often in the face of opposition from their high status Christian and Nayar neighbours. This study examines how Izhavas, through repudiation of their nineteenth-century identity and search for mobility, have come into complex relationships with modernity, colonialism and globalisation. Filippo Osella and Caroline Osella highlight the complexities and contradictions of modern identity, both locally and globally. The authors' approach builds upon and goes beyond a south Asian focus, showing how the Izhavas represent the rise of formerly stigmatised groups who remain at the same time trapped by stereotype and material disadvantage. Absolute mobility, they argue, has not led to relative mobility within a society which remains stratified and prone to new forms of social exclusion. Reading to Learn in the Content Areas-Judy S. The Hemlock Cup-Bettany Hughes 2011-01-25 We think the way we do because Socrates thought the way he did. His aphorism 'The unexamined life is not worth living' may have originated twenty-five centuries ago, but it is a founding principle of modern life. For seventy years Socrates was a vigorous citizen of Golden Age Athens, philosophising in the squares and public arenas rather than in the courts of kings, before his beloved city turned on him, condemning him to death by poison. Socrates lived in and contributed to a city that nurtured key ingredients of contemporary civilisation - democracy, liberty, science, drama, rational thought - yet, as he wrote almost nothing down, he himself is an enigmatic figure. In *The Hemlock Cup*, acclaimed historian Bettany Hughes gives Socrates the biography he deserves, painstakingly piecing together Socrates' life and using fresh evidence to get closer to the man who asked 'how should we live?' - a question as relevant now as it has ever been.

A History of the Modern Middle East-Betty S. Anderson 2016-04-20 A History of the Modern Middle East offers a comprehensive assessment of the region, stretching from the fourteenth century and the founding of the Ottoman and Safavid empires through to the present-day protests and upheavals. The textbook focuses on Turkey, Iran, and the Arab countries of the Middle East, as well as areas often left out of Middle East history—such as the Balkans and the changing roles that Western forces have played in the region for centuries—to discuss the larger contexts and influences on the region's cultural and political development. Enriched by the perspectives of workers and professionals; urban merchants and provincial notables; slaves, students, women, and peasants, as well as political leaders, the book maps the complex social interrelationships and provides a pivotal understanding of the shifting shapes of governance and trajectories of social change in the Middle East. Extensively illustrated with drawings, photographs, and maps, this text skillfully integrates a diverse range of actors and influences to construct a narrative that is at once sophisticated and lucid. A History of the Modern Middle East highlights the region's complexity and variation, countering easy assumptions about the Middle East, those who governed, and those they governed—the rulers, rebels, and rogues who shaped a region.

Plato's Laws-Gregory Recco 2013-02-18 Readers of Plato have often neglected the Laws because of its length and density. In this set of interpretive essays, notable scholars of the Laws from the fields of classics, history, philosophy, and political science offer a collective close reading of the dialogue "book by book" and reflect on the work as a whole. In their introduction, editors Gregory Recco and Eric Sanday explore the connections among the essays and the dramatic and productive exchanges between the contributors. This volume fills a major gap in studies on Plato's dialogues by addressing the cultural and historical context of the Laws and highlighting their importance to contemporary scholarship.

Drug Discovery and Evaluation: Methods in Clinical Pharmacology-H.Gerhard Vogel 2010-12-15 Drug Discovery and Evaluation has become a more and more difficult, expensive and time-consuming process. The effect of a new compound has to be detected by in vitro and in vivo methods of pharmacology. The activity spectrum and the potency compared to existing drugs have to be determined. As these processes can be divided up stepwise we have designed a book series "Drug Discovery and Evaluation" in the form of a recommendation document. The methods to detect drug targets are described in the first volume of this series "Pharmacological Assays" comprising classical methods as well as new technologies. Before going to man, the most suitable compound has to be selected by pharmacokinetic studies and experiments in toxicology. These preclinical methods are described in the second volume „Safety and Pharmacokinetic Assays". Only then are first studies in human beings allowed. Special rules are established for Phase I studies. Clinical pharmacokinetics are performed in parallel with human studies on tolerability and therapeutic effects. Special studies according to various populations and different therapeutic indications are necessary. These items are covered in the third volume: „Methods in Clinical Pharmacology".

Reinventing Depression-Christopher M. Callahan 2005 By tracing the history of depression in primary care over the past half century in the US and UK, this book opens a pathway for future improvements in the treatment of depressed patients. The authors argue for a public health perspective that will place more emphasis on the roles of society and culture in causing depression and will help close the gap between primary care practice and psychiatric knowledge. The Ironic Defense of Socrates-David M. Leibowitz 2010-07-12 This book offers a controversial interpretation of Plato's Apology of Socrates. By paying unusually close attention to what Socrates indicates about the meaning and extent of his irony, David Leibowitz arrives at unconventional conclusions about Socrates' teaching on virtue, politics, and the gods; the significance of his famous turn from natural philosophy to political philosophy; and the purpose of his insolent 'defense speech'. Leibowitz shows that Socrates is not just a colorful and quirky figure from the distant past but an unrivaled guide to the good life - the thoughtful life - who is as relevant today as in ancient Athens. On the basis of his unconventional understanding of the dialogue as a whole, and of the Delphic oracle story in particular, Leibowitz shows that the Apology is the key to the Platonic corpus, indicating how many of the disparate themes and

apparently contradictory conclusions of the other dialogues fit together.

R. D. Burman -The Man, The Music-Balaji Vittal 2012-07-21 To a nation fed on classical music, the advent of Rahul Dev Burman with his repertoire of Western beats was a godsend. RD revolutionized Hindi film music in the 1970s, and with his emphasis on rhythm and beats, this Pied Piper of Hindi film music had young India swinging to his tunes. At the same time, this genius proved his many detractors who criticized him for corrupting popular taste wrong by composing some of the most influential raga-based songs in Hindi cinema and showing an immense comfort with all kinds of music, including Indian folk. RD: The Man, The Music looks at the phenomenon called R.D. Burman and how he changed the way Indians perceived Hindi film music. Through anecdotes and trivia that went into the making of Pancham's music - the many innovations he introduced, like mixed rhythm patterns, piquant chords and sound mixing - and through interactions with the musicians who were part of RD's team, the authors create a fascinating portrait of a man who, through his music, continues to thrive, even fifteen years after his death.

Tech and the City-Maria Teresa Cometto 2013 Over 1,000 New York-based technology startups are currently hiring. This may come as a surprise to many who thought of New York as the capital of traditional industries such as financial services, media, advertising and fashion, but not necessarily as a high-tech hub. Yet, it is true: over the past several years the level of startup activity in the city of New York has increased at an exponential rate, reaching and surpassing Boston in number of tech companies formed and money invested. It is good news for the Bloomberg administration that has made the creation of a high-tech industry a strategic priority after the financial collapse of 2008. It is also good news for the many investors in the city (both "angels" and venture capitalists) who have seen the number of opportunities created increase at a fast rate. And it is good news for the entrepreneurs who can finally benefit from a working ecosystem and from an influx of capital not seen since the internet bubble of the late '90s. "Tech and the City" is the first book telling the story of how and why this is happening: from the birth of Silicon Alley in the '90s to today's level of activity and important milestones, such as the building of the Cornell NYC Tech campus. Based on over 50 interviews with entrepreneurs, angel investors, venture capitalists, university professors, members of the Bloomberg administration and other stakeholders, this book's objective is to inform and inspire the current generation of entrepreneurs. Fred Wilson, the best known venture capitalists in New York and one of the most important in the US, wrote in his foreword: "I hope this book will be an inspiration to New Yorkers to embrace the technology revolution that has taken hold in our city. I also hope it will be an inspiration to other cities, countries, and cultures who may have missed out on the initial wave of the technology revolution." "Tech and the City" takes us on a historical and geographical tour of New York, while addressing the hot themes for entrepreneurs and investors. It is also a guide to help navigate the NYC community: how to network and become part of the community; what to read to understand and keep informed; where to raise capital; what help is available for any professional, entrepreneur, student, researcher seeking to settle in the city. And this is just the basis for an ongoing conversation, which we hope will continue on our blog, <http://www.tech-and-the-city.com> The authors, Alessandro Piol and Maria Teresa Cometto, know the story and the industry well. Alessandro has been a New Yorker for 35 years and a venture capitalist for 20, during which he has seen firsthand the evolution of the New York entrepreneurial ecosystem. He has a deep knowledge of the tech industry and a passionate involvement in the NYC community, where he invests in, and mentors, a number of young entrepreneurs. Maria Teresa Cometto is a journalist and award-winning author based in New York since 2000, covering business and high-tech for the largest Italian daily, Corriere della Sera, and for other important publications.
