MCAT Chemistry and Physics-Bryan Schnedeker 2016-09-01 Get the most realistic practice available for the MCAT's Chemical and Physical Foundations of Biological Systems section. Next Step's Strategy and Practice books give you a focused review of several different approaches to MCAT problems, and then offer the single most important resource an MCAT student needs: full timed section practice. Test your skills by completing practice sections and then build upon them with the most thorough explanations available in any MCAT prep book. Unlike most other books (that simply give you an answer key and maybe a short description of the right answer), all of Next Step's Strategy and Practice books show you how to do a thorough breakdown of the passage itself and then follow that up with a careful analysis of the question and every answer choice. Those who purchase a Next Step book also get free access to our online MCAT diagnostic test. MCAT Preparation Guide-Miriam S. Willey 2015-01-13 Competition for admission to American medical schools has always been intense. Now, with more than 40,000 pre-med students applying for the few available slots each year, scoring well on the Medical College Admission Test (MCAT) is more critical than ever. The MCAT Preparation Guide offers students a systematic, sensible way to improve MCAT test scores. It recognizes their need to understand not only the subject areas covered but also the way the MCAT is structured and what test scorers look for. Extensively field tested at the University of Chicago, Tulane University, Howard University, and the University of Kentucky, this Guide has already helped hundreds of students to boost their MCAT scores significantly. With this edition, the Guide becomes available nationwide for the first time. One excellent feature is the chapter on preparing writing samples, a section of the MCAT often omitted or slighted in other guides. Here is a step-by step process for attacking writing sample prompts to produce superior essays. Higher Education and National Affairs- 1978 Complete CurveSetter MCAT Lecture Series Notes-Alexander Aabedi 2018-07-12 A compilation of all the lecture slide notes from the CurveSetter MCAT Prep Lecture Series. The CurveSetter Self-Paced MCAT Prep Course is an online course which provides students with all of the content that they will need to know for the MCAT, as well as arming them with an arsenal of test-taking strategies, study tips, and advice. The course was created by three current medical students, all of whom scored in the 100th percentile for new MCAT, and have extensive experience tutoring and advising pre-medical students. Like many students, we were fed up with the currently available options for MCAT prep. CurveSetter's Self-Paced course was created in response to these frustrations, in hopes of offering students a more affordable and high-quality option for MCAT prep. The Self-Paced Course was created from the ground up for the new MCAT, using the official AAMC content guide as a framework and informed by our extensive experience with the test. The course is comprised of 64 high-yield content lectures covering all subject areas (general chemistry, organic chemistry, physics, biology, biochemistry, psychology, and sociology), as well as detailed passage breakdowns and tips for the CARS section. Each lecture has detailed accompanying notes for students to study and review the material. We have also included a series of strategy lectures, in which we teach students how to tackle this test and how to optimize their studying. Having studied this material, taken the test, and then taught it to our own students, we know how to deliver the content in a way that is digestible, targeted to how the MCAT will test it, and provides students with a strong conceptual understanding of the material. This solid foundation in the content is absolutely necessary to be able to approach passages with confidence, link facets of the passages back to your content knowledge, and then tackle the questions. Our course is extremely high-yield and does not overload students with unnecessary information, which can be extremely detrimental is it overwhelms the individual and makes it difficult to prioritize the necessary concepts. A Complete Preparation for the MCAT.: Knowledge & comprehension of science-James L. Flowers 1988 New MCAT 45 2007-Kaplan 2006 -Complete test information and essential test-taking strategies-Concrete advice about reading and handling the most difficult physical science, biological science, and verbal reasoning passages.-High-level, challenging practice sets -- ""the toughest questions"" -- for each section of the MCAT-Writing sample advice, benchmark essay examples, and scoring guidelines How to Get Into Medical School-Raakhi Mohan 2007 Get in! Thirty-nine thousand students applied to medical schools in 2006, but only 17,000 matriculated-that translates to a 44% success rate! The strategies in this book are designed to help you make sure you are among the accepted applicants. This advice is the culmination of our years of experience in admissions consulting, and our insight from our personal experience of the admissions process. We know there isn't a good source of information for how to really put together a great personal statement, or a 'sales pitch' for admissions interviews, so we developed step-by-step guides to help students navigate this intensive year-long journey. Multivariable Calculus, Linear Algebra, and Differential Equations-Stanley I. Grossman 2014-05-10 Multivariable Calculus, Linear Algebra, and Differential Equations, Second Edition contains a comprehensive coverage of the study of advanced calculus, linear algebra, and differential equations for sophomore college students. The text includes a large number of examples, exercises, cases, and applications for students to learn calculus well. Also included is the history and development of calculus. The book is divided into five parts. The first part includes multivariable calculus material. The second part is an introduction to linear algebra. The third part of the book combines techniques from calculus and linear algebra and contains discussions of some of the most elegant results in calculus including Taylor's theorem in "n" variables, the multivariable mean value theorem, and the implicit function theorem. The fourth section contains detailed discussions of first-order and linear second-order equations. Also included are optional discussions of electric circuits and vibratory motion. The final section discusses Taylor's theorem, sequences, and series. The book is intended for sophomore college students of advanced calculus.
