Dialogues of Love-Leone Ebreo 2009-05-09 First published in Rome in 1535, Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguelde Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'On the Origin of Love' - that take place over a period of three subsequent days. They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover and teacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and

drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides an invaluable resource for today's readers.

Habitat Threshold-Craig Santos Perez 2020 "Native Pacific Islander writer Craig Santos Perez has crafted a timely collection of eco-poetry comprised of free verse, prose, haiku, sonnets, satire, and a form he calls "recycling." Habitat Threshold begins with the birth and growth of the author's daughter and captures her childlike awe at the wondrous planet. As the book progresses, however, Perez confronts the impacts of environmental injustice, global capitalism, toxic waste, animal extinctions, water struggles, human violence, mass migration, and climate change. Throughout, Perez mourns lost habitats and species and faces his fears about the world his daughter will inherit. Yet this work does not end at the threshold of elegy; instead, the poet envisions a sustainable future in which our ethics are shaped by the indigenous belief that the earth is sacred and all beings are interconnected--a future in which we cultivate love and "carry each other towards the horizon of care."--

Disreputable Bodies-Sergius Koderá 2010 "Through a close reading of rarely studied materials, the author examines the contested position of the body in Renaissance philosophy, showing how abstract metaphysical ideas evolved in tandem with the creation of new metaphors that shaped the understanding of early modern political, cultural, and scientific practices. The result is a new approach to the issues that describes the function of new technologies (such as optics and distillation) and their interaction with popular creeds (such as witchcraft and folk medicine), as well as their relationship to the newly discovered ancient Greek and Roman texts that captured the attention of Renaissance intellectuals. The text also investigates, for the first time, how some philosophers forged their original syntheses from newly available and traditional materials. In so doing, these philosophers

contributed in unexpected ways to the formation of new cultural practices--practices that entailed largely unexplored conceptualisations of physical bodies but also linked inextricably to the formation of new and striking metaphors for the physical world."--Publisher.

True and False Reform in the Church-Yves Congar 2010-12-01 Archbishop Angelo Roncalli (later Pope John XXIII) read True and False Reform during his years as papal nuncio in France and asked, A reform of the church 'is such a thing really possible?' A decade later as pope, he opened the Second Vatican Council by describing its goals in terms that reflected Congar's description of authentic reform: reform that penetrates to the heart of doctrine as a message of salvation for the whole of humanity, that retrieves the meaning of prophecy in a living church, and that is deeply rooted in history rather than superficially related to the apostolic tradition. Pope John called the council not to reform heresy or to denounce errors but to update the church's capacity to explain itself to the world and to revitalize ecclesial life in all its unique local manifestations. Congar's masterpiece fills in the blanks of what we have been missing in our reception of the council and its call to "true reform." Yves Congar, OP, a French Dominican who died in 1995, was the most important ecclesialogist in modern times. His writings and his active participation in Vatican II had an immense influence upon the council documents. With a few other contemporaries, Congar pioneered a new style of theological research and writing that linked the great tradition of Scripture and the Fathers to contemporary pastoral questions with lucidity and passion. His key concerns were the unity of the church, lay apostolic life, and a revival of the church's theology of the Holy Spirit. He was named a cardinal by Pope John Paul II in recognition of his profound contributions to the Second Vatican Council. Pal Philibert OP, has

taught pastoral theology in the United States and abroad. He is a Dominican friar of the Southern Province. His translation of a collection of Congar's essays on the liturgy has recently been published by Liturgical Press under the title *At the Heart of Christian Worship*. His book *The Priesthood of the Faithful: Key to a living Church* (Liturgical Press, 2005) reflects the ecclesiology of Yves Congar and his Vision of the apostolic life of the faithful. "

The Body in Early Modern Italy-Julia L. Hairston 2010-04 Human bodies have been represented and defined in various ways across different cultures and historical periods. As an object of interpretation and site of social interaction, the body has throughout history attracted more attention than perhaps any other element of human experience. The essays in this volume explore the manifestations of the body in Italian society from the fourteenth through the seventeenth centuries. Adopting a variety of interdisciplinary approaches, these fresh and thought-provoking essays offer original perspectives on corporeality as understood in the early modern literature, art, architecture, science, and politics of Italy. An impressively diverse group of contributors comment on a broad range and variety of conceptualizations of the body, creating a rich dialogue among scholars of early modern Italy. Yves Congar's Vision of the Church in a World of Unbelief-Gabriel Flynn 2017-03-02 Yves Congar (1904-1995) was one of the chief architects of a remarkable renewal in Roman Catholic ecclesiology in the twentieth century. His vision for ecclesial renewal led to a profound transformation of the Roman Catholic Church, its relationship with other churches and the world. This book considers the contribution made by Congar to that transformation. Situating Congar's ecclesiology in the context of his whole theology, the book presents for the first time a comprehensive study of two related aspects of Congar's thought - unbelief and the notion of 'total ecclesiology'. Dr Flynn shows how unbelief provides the common inspiration for Congar's thought on the Church and constitutes the *raison d'Êatre* for his entire programme of ecclesial reform at the Second Vatican Council. This study demonstrates how Congar's 'total ecclesiology' contributes to the restoration of unity and helps to redress unbelief. Congar's vision for the future and his programme for ecclesial renewal, centering on a church committed both to the preservation of its heritage and an openness to true reform, is shown to be still pertinent to the churches in the third millennium, a point accented by Pierre-Marie Gy, OP in his Preface to the work.

UNDERSTANDING HUMAN SEXUALITY-ESPHAN NG'ANG'A
2009-07-31 Though sexuality is an important subject matter that should be taught in homes and in the church, it has been neglected and treated as inconsequential. Young and old alike look at sex as a taboo. The church and the home should be the most appropriate forums where sexuality could be openly discussed, but to the contrary, the message we have received from the church and the home is that sex is unholy and shouldn't be discussed. These key institutions have little or nothing to discuss about sex. This is especially tragic because the believers who have faith in God, who created sex and established its proper parameters, should be able to

speaking more intelligibly and confidently about sex than anyone else. Yet the community of believers is silent in the public forum in matters relating to sexuality whether because of embarrassment, confusion, timidity or a sense that the subject of sex is either too personal or not sufficiently "spiritual" for church to address publicly. Mr. Ng'ang'a has addressed this subject openly and with ardent scriptural instruction. Understanding Human Sexuality is helpful to married couples and curious young people who have many questions about sex. It is also an instruction manual for parents in guiding their curious children on the subject.

Fundamentals of Digital Communication-Upamanyu Madhow
2008-03-06 This is a concise presentation of the concepts underlying the design of digital communication systems, without the detail that can overwhelm students. Many examples, from the basic to the cutting-edge, show how the theory is used in the design of modern systems and the relevance of this theory will motivate students. The theory is supported by practical algorithms so that the student can perform computations and simulations. Leading edge topics in coding and wireless communication make this an ideal text for students taking just one course on the subject. Fundamentals of Digital Communications has coverage of turbo and LDPC codes in sufficient detail and clarity to enable hands-on implementation and performance evaluation, as well as 'just enough' information theory to enable computation of performance benchmarks to compare them against. Other unique features include space-time communication and geometric insights into noncoherent communication and equalization.

Yves Congar's Theology of the Holy Spirit-Elizabeth Teresa Groppe 2004-01-15 The French Dominican theologian Yves Congar is recognized by many as the most important Roman Catholic ecclesiologist of the 20th century. He was the thinker behind some of the major decrees of the Second Vatican council. He was also a leader in the ecumenical movement in Europe throughout most of the century. Despite his importance, there are few books about Congar in English. Congar's pneumatology, argues Groppe, can enrich various ongoing theological discussions, including reflection as to whether the church should be hierarchical or a democracy, the development of "persons in communion" as a framework for contemporary theological anthropology and ecclesiology, and deliberations about the personhood of the Holy Spirit.

The Right to Privacy-Samuel D Warren 2020-04-09 That the individual shall have full protection in person and in property is a principle as old as the common law; but it has been found necessary from time to time to define anew the exact nature and extent of such protection. Political, social, and economic changes entail the recognition of new rights, and the common law, in its eternal youth, grows to meet the demands of society. Thus, in very early times, the law gave a remedy only for physical interference with life and property, for trespasses vi et armis. Then the "right to life" served only to protect the subject from battery in its various forms...
