Nemeton-Alessandro Manzo 2015-11-27T00:00:00+01:00
Gli sport del coraggio si distinguono dalle altre discipline per la loro capacità di generare un'accresciuta percezione della realtà e di se stessi: lo sport è un luogo dell'anima che può essere un ponte verso la propria dimensione più profonda e vera. Per questo motivo gli sport del coraggio sono stati associati simbolicamente agli antichi Nemeton, i luoghi delle foreste dove le antiche popolazioni pensavano di ritrovare energie per accrescere la propria forza interiore e affrontare le sfide di tutti i giorni. Sono attività che hanno caratteristiche uniche e favorevoli a una più alta visione dell'attività agonistica e possono essere riconosciuti da tre elementi fondanti:
- L'attitudine allo sviluppo di una continua competizione con se stessi
- La forte connotazione simbolica
- L'etica e miglioramento della vita quotidiana anche non sportiva
La pratica costante di tali discipline è un terreno fertile per una consapevole e volontaria attività di superamento dei propri piccoli o grandi limiti, sia dal punto di vista fisico/corporeo che mentale. Il testo guida i lettori a raggiungere l'ideale della corretta azione sportiva e mostra il cammino per rendere unica tale esperienza con benefici anche per la propria vita quotidiana, lavorativa e familiare. Un intero capitolo è dedicato inoltre al training autogeno per gli sport del coraggio con esempi di tecniche applicative particolarmente efficaci per le discipline trattate, con utili consigli legati anche all'alimentazione e ad alcuni aspetti terapeutici delle discipline del coraggio.

Max: Best Friend. Hero. Marine.-Jennifer Li Shotz 2015-06-09
Now a major motion picture, this movie novelization tells the story of a canine hero. When Justin's older brother, Kyle, is killed in Afghanistan, Justin can't believe that his brother is really gone. Except there's one thing that Kyle left behind.... Max is a highly trained military canine who has always protected his fellow soldiers. But when he loses his handler and best friend, Kyle, Max is traumatized and unable to remain in the service. He is sent home to America, where the only human he connects with is Justin, and he is soon adopted by Kyle's family, essentially saving his life. At first Justin has no interest in taking care of his late brother's troubled dog. However, the two learn to trust each other, which helps the four-legged veteran become his heroic self once more. As the pair start to unravel the mystery of what really happened to Kyle, they find more excitement—and danger—than they bargained for. But they might also find an unlikely new best friend—in each other. Don't miss the top-rated and multi-month-bestselling tale of Max, dog hero.
Forster-Malcolm Bradbury 1966
Manslaughter, blackmail, violent sex, sudden death: out of materials which might have served a lesser author as the basis for mere melodrama, E. M. Forster created literary vehicles which convey the reader with near-celestial ease to psychological realms as diverse as the London drawing-room and the Indian cave of revelation. The essays collected here range from early commentaries introducing Forster to an American audience, to more recent essays illuminating the subtlety and resourcefulness of his fictional method, the acute modernity of his moral and intellectual concerns. Disputing a long-held view that Forster is intellectually a Victorian, in bondage to the liberal pieties he portrayed so well, these critics point to his capacity for rigorous self-scrutiny and detached observation of those very institutions and ideas so often associated with him. As they reveal new facets of Forster's accomplishment, these essays indicate why the twentieth century now recognizes him as one of its major literary figures. -- From publisher's description.

Play Hive Like a Champion: Strategy, Tactics and Commentary-Randy Ingersoll
The Master of Go-Yasunari Kawabata 2013-02-13
Go is a game of strategy in which two players attempt to surround each other's black or white stones. Simple in its fundamentals, infinitely complex in its execution, Go is an essential expression of the Japanese spirit. And in his fictional chronicle of a match played between a revered and heretofore invincible Master and a younger, more modern challenger, Yasunari Kawabata captured the moment in which the immutable traditions of imperial Japan met the onslaught of the twentieth century. The competition between the Master of Go and his opponent, Otaké, is waged over several months and layered in ceremony. But beneath the game's decorum lie tensions that consume not only the players themselves but their families and retainers—tensions that turn this particular contest into a duel that can only end in death. Luminous in its detail, both suspenseful and serene, The Master of Go is an elegy for an entire society, written with the poetic economy and psychological acumen that brought Kawabata the Nobel Prize for Literature. Translated from the Japanese by Edward G. Seidensticker
Sociable Cities-Peter Hall 1999-01-12
Sociable Cities is published to coincide with the centenary of the publication of Ebenezer Howard's revolutionary Garden Cities of Tomorrow. Howard's book would prove to be the most influential work on city planning in the 20th Century. The book provided the template for some thirty new towns in the United Kingdom - and countless others across the rest of the world - helped to establish the Town and Country Planning Association and ultimately led to an Act of Parliament which established how the building of our cities would be governed. At its heart, Garden Cities argues for a return to civilised and sustainable urban communities. Sociable Cities assesses how Howard's work has faced up to the concerns of the 20th Century. Rarely have these concerns - the development of brown and green field sites, public versus private transport, the political will behind sustainability, public access to the countryside, and the quality of life in and the future of our cities - been so pressing. Finally, in analysing future trends, Peter Hall and Colin Ward take Howard's Garden Cities into the 21st Century. This landmark book will be of interest to all who are concerned for the future of our cities and the future of our countryside.

The Cultivated Wilderness-Paul Shephard 1997-01-22
Paul Shephard's previous book, What is Architecture?, was about making real, material things in the world—landscapes, buildings, and machines. The Cultivated Wilderness is about those landscapes, and about the strategies that govern what we've done in shaping them.In the author's words, this book is about "seeing things that are too big to see." His emphasis on strategy makes landscape fundamental—he says that every architectural move is set in a landscape. Norman England, for example, was constructed as a network of strong points, in a strategy of occupation. The eighteenth-century grid cities of the New World reflect a strategy of reason. Our current strategy is the economic exploitation of the Earth, an intricately woven blanket of commerce that covers up a multitude of other possibilities, many other ways to treat the surface of the globe—some of which are the landscapes revealed in this book.In a series of first-person narratives, reminiscent of his last book, the author pairs six landscapes, in order of descending scale from global to local, from the seven wonders of the ancient world to the condensed destruction of World War I's Western Front. In an engaging style, Shephard takes the reader on an odyssey through these landscapes, meeting people and seeing places. He states that now, at the end of a century in which the appropriate landscape was sought but never found, the strategy of turning the land to profit is under review—and offers this book as his contribution to that review. Medjugorje-Mart Bax 1995
Medjugorje, fifteen years ago an out-of-the-way peasant village in Bosnia Hercegovina, is today a Marian devotion centre of global repute. Based on some ten years of fieldwork in the region, the author gives a detailed account of that transformation process, in which religion, politics and violence are closely intertwined. Adopting a long-term historical approach the description also open up surprisingly new perspectives on today's problems and atrocities in Bosnia Hercegovina.

Strontium Dog-Lawrence Whitaker 2009-10-01
Earth, the late 22nd century. Following the atomic war of 2150, Britain has been devastated by nuclear holocaust. The survivors rebuilt their lives, but many were warped by the mutating effects of Strontium 90 fallout. Unable to live or work amongst the 'norms', mutants were forced to grow up in ghettos and take the only job open to them - bounty hunting. These Search/Destroy Agents hunt the criminals too dangerous for the Galactic Crime Commission. One such Strontium Dog is Johnny Alpha, whose eyes emit piercing Alpha rays and enable him to see through solid objects - and into men's minds. Using the Traveller core rules, Strontium Dog allows players to take the part of mutant bounty hunters, combing the galaxy for their prey - dead or alive!
Cultivating the Soul-Luigi Zoja 2005
In Cultivating the Soul Luigi Zoja argues that the soul's 'cultivation' underpins all cultural phenomena. The author examines the mythopoetic function in human beings by locating Psychoanalysis within the history of the Western world and firmly rooting it in the classical tradition. When, for example, Zoja links psychoanalytic narration with the epic-tragic narration in Greek civilization, he is establishing a remarkable kind of continuity, one which transcends centuries of economic, political and social change to insist on the timeless human need to tell a life story with passion in order to make sense of it. Zoja's masterful knowledge of the classical world is here used dialectically, to understand and explicate our modern-day predicaments. Whether employing classical notions, like hubris, (to analyze the modern phenomenon of arrogant acquisitiveness), or deploying a contemporary perspective on antiquity (to examine, for instance Homer's own technique of "mass communication"), Zoja's words fall like a sword cutting through to the core of what he sees as the inertia of much contemporary thinking. The author explores what he sees as the failure in the formation of a contemporary European identity. Lacking formative myths, with psyches mutilated by the failure of the mythopoetic function, today's citizens are left with little other than an economic reality called "Europe" to orient them. It is in such a context that Zoja claims a crucial role for Psychoanalysis in elucidating cultural, social and political phenomena. Eighteen essays grapple with thinkers from Plato to Hillman, Bloch to Ortega, Michelangelo to Rilke, and Nietzsche to Freud and Jung.

One of the most complete monographs of the artist to date, this volume depicts the career of Roy Lichtenstein, one of the finest American pop artists of his era. Augmented Urban Spaces-Fiorella De Cindio 2016-04-08
There have been numerous possible scenarios depicted on the impact of the internet on urban spaces. Considering ubiquitous/pervasive computing, mobile, wireless connectivity and the acceptance of the Internet as a non-extraordinary part of our everyday lives mean that physical urban space is augmented, and digital in itself. This poses new problems as well as opportunities to those who have to deal with it. This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place. It considers this from three main perspectives: the implications for the public sphere and urban public or semi-public spaces; the implications for community regeneration and empowerment; and the dilemmas and challenges which the augmentation of space implies for urbanists. Grounded with international real-life case studies, this is an up-to-date, interdisciplinary and holistic overview of the relationships between cities, communities and high technologies.
Research Synergies in Social Professions-Maria Michailidis 2008
The Art of the City-Raffaele Milani 2017-12-12
In The Art of the City Raffaele Milani reflects on the ways in which inhabitants of the cityscape have interacted on a spiritual, psychological, and philosophical level with the architecture that surrounds them. Working with the premise that the city has a "soul," which is externalized in the physical structures of its urban space, Milani expresses alarm in the face of sprawling megacities that typify the postmodern age and endanger the survival of cities' distinctiveness. While he laments that the nature surrounding cities is disappearing under concrete, his concern is counterbalanced by the realization that there are ongoing projects of urban reclamation, renewal, and reutilization aimed at preserving an ancient, almost mystical rapport between the citizen and the lived space. Milani illustrates his argument by citing the works of modern architects including Emilio Ambasz, Massimiliano Fuksas, Frank Gehry, Rem Koolhaas, Kisho Kurokawa, Daniel Libeskind, and Renzo Piano. Rather than a history of architecture, The Art of the City is a compelling and timely reflection on the important challenge of insuring the continued liveability and aesthetic valorization of public spaces.

Spondulix-Paul Di Filippo 2014-04-01
The author with "a humanity worthy of Dickens or Hardy" delivers a novel of alternative currency and the price of wealth (Publishers Weekly). You can try to escape from the mundane, or with the help of Paul Di Filippo, you can take a brief, meaningful break from it. In the vein of George Saunders or Michael Chabon, Di Filippo uses the tools of science fiction and the surreal to take a deep, richly felt look at humanity. His brand of funny, quirky, thoughtful, fast-moving, heart-warming, brain-bending stories exist across the entire spectrum of the fantastic from hard science fiction to satire to fantasy and on to horror, delivering a riotously entertaining string of modern fables and stories from tomorrow, now and anytime. After you read Paul Di Filippo, you'll no longer see everyday life quite the same. For most people, as they say, money makes the world go 'round. For Rory Honeyman, it's a different story. Having inadvertently and, almost without noticing, invented a new form of cash cow, money makes Rory's world go strangely pear-shaped and out-of-control. He has an endless supply of blank checks that never bounce but he's being guided by an albino, hustled by a saline-snotting sandwich-obsessed gourmet, manipulated by a devious banker and befuddled and bemused by a never-ending assortment of attractive and baffling women. And, for reasons unknown and unknowable, after racing from the Great Plains to Mexico City to Canada to Europe, he's stuck in Hoboken and there appears to be no way out. Originally published: 2004
Men Against Fire-S.L.A. "Slam" Marshall 2019-12-06
Men Against Fire, first published in 1947 (and updated in 1961), is an in-depth analysis of military leadership and infantry tactics, with numerous recommendations to improve the effectiveness of ground troops in combat situations. The psychology of combat (e.g., chapters "Why Men Fight" and "Men Under Fire") is also examined by Marshall, himself a veteran of World War I and a combat historian during World War II. S.L.A. "Slam" Marshall was a veteran of World War I and a combat historian during World War II. He startled the military and civilian world in 1947 by announcing that, in an average infantry company, no more than one in four soldiers actually fired their weapons while in contact with the enemy. His contention was based on interviews he conducted immediately after combat in both the European and Pacific theaters of World War II.

The Hermetic Tradition-Julius Evola 2018-07-13
This important survey of alchemical symbols and doctrines sets forth the mysterious worldview and teachings of the practitioners of the "royal art." One of the leading exponents of the Hermetic tradition, Julius Evola demonstrates the singularity of subject matter that lies behind the words of all adepts in all ages, showing how alchemy—often misunderstood as primitive chemistry or a mere template for the Jungian process of "individuation"—is nothing less than a universal secret science of human and natural transformation. First published in 1931 in Italian. This is the first English translation. Draws from a host of sources in the Western esoteric tradition—works on therapy, magic, and gnosticism from neoplatonic, Arab, and medieval sources.

The Psychology of Counter-Terrorism-Andrew Silke 2010-10-26
This edited book explores how psychology can be used to improve our understanding of terrorism and counterterrorism. This work firstly aims to provide balanced and objective insight into the psychology of terrorists; what their motivations are, what keeps them involved in terrorist groups, and what eventually forces most to end their active involvement in terrorism. Secondly, the contributors focus on the challenging issue of how to respond to terrorism. These chapters provide information for those concerned with short-term tactical problems (e.g. interviewing), as well as those looking towards the more long-term strategic questions of bringing an entire terrorist campaign to an end. Ultimately, the individuals involved in terrorism require a more complex response from society than simply a quest for their apprehension. Believing inaccurate and misleading characterizations leads inevitably to damaging policies and deficient outcomes and campaigns of violence are needlessly prolonged. It is from this perspective that the concern arises with how researchers - and the policy makers guided by them - perceive the psychology of terrorists and of terrorism. This innovative book will be of great interest to students of terrorism and counter-terrorism, security studies, psychology and politics, as well as security professionals and military colleges.

Roy Lichtenstein-Roy Lichtenstein 2010
One of the most complete monographs of the artist to date, this volume depicts the career of Roy Lichtenstein, one of the finest American pop artists of his era. Roy Lichtenstein (1923-1997) was the master of the stereotype, and the most sophisticated of the major pop artists. An emblematic protagonist of the New York art scene of the second half of twentieth century, he became a legend in his prolific lifetime. Even now, thirteen years after his death, his works and lexicon of symbols, subjects and themes continue to intrigue the art world. Published on the occasion of the major exhibition at the Milan Triennial, this monograph covers the entire artistic development of Roy Lichtenstein, through more than 250 paintings and sculptural works, a rich photographic section including unpublished material, and critical text. The reproductions of Lichtenstein's work are large-format, in full color. The insightful quotes and most of the references to his personal life serve to explain how his art evolved or how he came to be in a particular place in the world. This deluxe edition (large square format with padded cover) offers a dynamic and provocative look at the works of Lichtenstein through a powerful combination of text and visual elements. It will appeal to Lichtenstein fans, critics, dealers, and anyone interested in contemporary art.

Augmented Urban Spaces-Fiorella De Cindio 2016-04-08
There have been numerous possible scenarios depicted on the impact of the internet on urban spaces. Considering ubiquitous/pervasive computing, mobile, wireless connectivity and the acceptance of the Internet as a non-extraordinary part of our everyday lives mean that physical urban space is augmented, and digital in itself. This poses new problems as well as opportunities to those who have to deal with it. This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place. It considers this from three main perspectives: the implications for the public sphere and urban public or semi-public spaces; the implications for community regeneration and empowerment; and the dilemmas and challenges which the augmentation of space implies for urbanists. Grounded with international real-life case studies, this is an up-to-date, interdisciplinary and holistic overview of the relationships between cities, communities and high technologies.

The Art of the City-Raffaele Milani 2017-12-12
In The Art of the City Raffaele Milani reflects on the ways in which inhabitants of the cityscape have interacted on a spiritual, psychological, and philosophical level with the architecture that surrounds them. Working with the premise that the city has a "soul," which is externalized in the physical structures of its urban space, Milani expresses alarm in the face of sprawling megacities that typify the postmodern age and endanger the survival of cities' distinctiveness. While he laments that the nature surrounding cities is disappearing under concrete, his concern is counterbalanced by the realization that there are ongoing projects of urban reclamation, renewal, and reutilization aimed at preserving an ancient, almost mystical rapport between the citizen and the lived space. Milani illustrates his argument by citing the works of modern architects including Emilio Ambasz, Massimiliano Fuksas, Frank Gehry, Rem Koolhaas, Kisho Kurokawa, Daniel Libeskind, and Renzo Piano. Rather than a history of architecture, The Art of the City is a compelling and timely reflection on the important challenge of insuring the continued liveability and aesthetic valorization of public spaces.

Beato Angelico. Ediz. a colori-Renzo Villa 2018

Spondulix-Paul Di Filippo 2014-04-01
The author with "a humanity worthy of Dickens or Hardy" delivers a novel of alternative currency and the price of wealth (Publishers Weekly). You can try to escape from the mundane, or with the help of Paul Di Filippo, you can take a brief, meaningful break from it. In the vein of George Saunders or Michael Chabon, Di Filippo uses the tools of science fiction and the surreal to take a deep, richly felt look at humanity. His brand of funny, quirky, thoughtful, fast-moving, heart-warming, brain-bending stories exist across the entire spectrum of the fantastic from hard science fiction to satire to fantasy and on to horror, delivering a riotously entertaining string of modern fables and stories from tomorrow, now and anytime. After you read Paul Di Filippo, you'll no longer see everyday life quite the same. For most people, as they say, money makes the world go 'round. For Rory Honeyman, it's a different story. Having inadvertently and, almost without noticing, invented a new form of cash cow, money makes Rory's world go strangely pear-shaped and out-of-control. He has an endless supply of blank checks that never bounce but he's being guided by an albino, hustled by a saline-snotting sandwich-obsessed gourmet, manipulated by a devious banker and befuddled and bemused by a never-ending assortment of attractive and baffling women. And, for reasons unknown and unknowable, after racing from the Great Plains to Mexico City to Canada to Europe, he's stuck in Hoboken and there appears to be no way out. Originally published: 2004

Men Against Fire-S.L.A. "Slam" Marshall 2019-12-06
Men Against Fire, first published in 1947 (and updated in 1961), is an in-depth analysis of military leadership and infantry tactics, with numerous recommendations to improve the effectiveness of ground troops in combat situations. The psychology of combat (e.g., chapters "Why Men Fight" and "Men Under Fire") is also examined by Marshall, himself a veteran of World War I and a combat historian during World War II. S.L.A. "Slam" Marshall was a veteran of World War I and a combat historian during World War II. He startled the military and civilian world in 1947 by announcing that, in an average infantry company, no more than one in four soldiers actually fired their weapons while in contact with the enemy. His contention was based on interviews he conducted immediately after combat in both the European and Pacific theaters of World War II.

The Hermetic Tradition-Julius Evola 2018-07-13
This important survey of alchemical symbols and doctrines sets forth the mysterious worldview and teachings of the practitioners of the "royal art." One of the leading exponents of the Hermetic tradition, Julius Evola demonstrates the singularity of subject matter that lies behind the words of all adepts in all ages, showing how alchemy—often misunderstood as primitive chemistry or a mere template for the Jungian process of "individuation"—is nothing less than a universal secret science of human and natural transformation. First published in 1931 in Italian. This is the first English translation. Draws from a host of sources in the Western esoteric tradition—works on therapy, magic, and gnosticism from neoplatonic, Arab, and medieval sources.

The Psychology of Counter-Terrorism-Andrew Silke 2010-10-26
This edited book explores how psychology can be used to improve our understanding of terrorism and counterterrorism. This work firstly aims to provide balanced and objective insight into the psychology of terrorists; what their motivations are, what keeps them involved in terrorist groups, and what eventually forces most to end their active involvement in terrorism. Secondly, the contributors focus on the challenging issue of how to respond to terrorism. These chapters provide information for those concerned with short-term tactical problems (e.g. interviewing), as well as those looking towards the more long-term strategic questions of bringing an entire terrorist campaign to an end. Ultimately, the individuals involved in terrorism require a more complex response from society than simply a quest for their apprehension. Believing inaccurate and misleading characterizations leads inevitably to damaging policies and deficient outcomes and campaigns of violence are needlessly prolonged. It is from this perspective that the concern arises with how researchers - and the policy makers guided by them - perceive the psychology of terrorists and of terrorism. This innovative book will be of great interest to students of terrorism and counter-terrorism, security studies, psychology and politics, as well as security professionals and military colleges.
