With Hitler in the West-Heinrich Hoffmann 2015-04-30 In May 1940, the German Army swept over Europe, unleashing a campaign of battles of annihilation on a hitherto unheralded scale. France was quickly overcome and Holland, along with Belgium, fell in a matter of days. At the head of this vast operation was the Fu?hrer with his Supreme Command, and on hand to document the highlights of their inimitable campaign was Heinrich Hoffmann, Hitler's close friend and official photographer. This is an invaluable photographic record of the events of Spring 1940, originally published as Mit Hitler im Westen, which was regarded as Heinrich Hoffman's finest work. The striking images displayed within provide both an intimate view inside the life of the Fu?hrer, and present a chilling glimpse into one of history's most vicious campaigns, and darkest hours. An important historic work, With Hitler in the West provides a fascinating insight into the events of 1940, that shook the world.

Peripheral Nerve Lesions-M. Samii 2012-12-06 The introduction of the operating microscope as a surgical tool revolutionized the treatment of peripheral nerve lesions. A new era thus began in the early 1960s, which led to a substantial improvement in the management of nerve lesions. The results of nerve grafting techniques have demonstrated that, independent of the length of the defect, lesions can be successfully bridged. The free tissue transplants with microvascular anastomosis have also opened new, rewarding possibilities for peripheral nerve reconstruction procedures, facilitating the achievement not only of satisfactory anatomical but also of satisfactory functional results. In order to evaluate the state of the art and reflect retrospectively on 25 years of microneurosurgical treatment of peripheral nerves, numerous outstanding scientists and clinicosurgical physicians were invited to Hanover in order to exchange their viewpoints and experiences. An active und fruitful discussion resulted which dealt with the many aspects of anatomy, pathology, clinical and neuro physiology, diagnosis, and with the surgery and physiotherapy which constitute modern-day peripheral nerve lesion treatment. The exciting ongoing experimental and clinical activities have led us to support the wish and idea to publish the scientific exchange which took place during the Hanover symposium. I truly believe that the articles presented in this book cover so many interesting subjects concerned with peripheral nerve lesions that the book will serve the interested and dedicated physician involved with such cases as a reference work for the basics and also provide him with the therapeutic guidelines to assist him in his daily work.

Oily Hands and the Smell of Diesel: Tales of a Ford Dealer Engineer in the 1960s-David Harris 2017-09-29 1960 saw the dawn of an era of unprecedented innovation and development in farm machinery. It was a period of rapid technical advancement, that produced machines which are the mainstay of the current very buoyant vintage tractor restoration movement. At the start of the decade, spark-ignition Standard Fordson tractors still occasionally required repair; by the end of the decade, the Fordson Diesel Major had been replaced by the Ford 1000 series. The history of these iconic brands is well-known; Oily Hands and the Smell of Diesel gives an alternative view - the inside story of the agricultural machinery repair trade. First employed as an apprentice, then moving his way up to an engineer, David Harris gives an entertaining, informative and personal account of his time spent at a Ford main tractor dealership, working on Ford, Fordson, County, Roadless and Muirhill tractors, Chaseside loaders, Claas combines and New Holland and Jones balers amongst others. Including many historical photographs, David describes the technical challenges in detail, and tells of the ups and downs of life in the workshop and out in the field. This book will be a must-read for anyone who is or was involved in the machinery industry; anyone looking to restore or repair vintage agricultural machinery and anyone with a general interest in farming and machinery history.
