Handbook of Nursing Diagnosis-Lynda Juall Carpenito 1984 "The challenge that nurses face today is one of identifying specific nursing diagnoses for those people assigned to their care and of incorporating these diagnoses into a plan of care. This handbook is intended to help in this effort in two ways: by providing a quick reference to each diagnostic category in terms of its definition, etiological and contributing factors, and defining characteristics; and by identifying possible nursing diagnoses that could be associated with the major medical diagnoses."--Introduction.

Nursing Care Plans-Marilynn E. Doenges 2006 Extensively revised and updated throughout with the latest NANDA content, Nursing Care Plans Across the Life Span, 7th edition, also addresses the most recent advances in diagnostic testing and pharmacological therapies.

Manual of Nursing Diagnosis-Marjory Gordon 2000 Organized to meet the needs of both beginner and expert diagnosticians. This text contains all major Diagnoses listed by the North American Nursing Diagnosis Association (NANDA). These are standard diagnoses that are meant to create a standard plan of care for patients with any range of ailments. Sample admission assessment guides are included for the family, community, and individual (adults, infants, young children, and critical care clients). Also included are sections on how diagnoses can be used to guide questions and observations beyond the basic assessment and how to use diagnostic categories in other clinical activities.

Manual of Psychiatric Nursing Care Planning-Elizabeth M. Varcarois 2011 A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarois, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 Psychiatric Mental-Health Nursing: Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Nursing Care Plans for Home Health Care-Debra Collins, RN, RAC-CT 2015-01-01 2015 Third Edition. The ninety-five Home Health nursing care plans and plan of care forms in this book cover every nursing diagnosis and care plan problem that may be generated from the OASIS-C form for the nursing plan of care. Also includes Pain Care manual.Terminology is based on OASIS-C language and nursing diagnosis definitions and classifications as outlined by the North American Nursing Diagnosis Association (NANDA). The home health nursing care plan format follows the care plan standards from the American Nurses Association. The first section of the book covers regulations and standards for nursing care plans. Home Health Nursing care plan components, and Quality Measures and Outcome Measures. Because the terminology of the home health nursing care plan is based on OASIS-C language, it is very easy to see which care plans and plan of care forms are triggered by the OASIS-C entries. The home health nursing care plans can be used to supplement the nursing plan of care, and are also extremely useful for teaching patients and caregivers. All of the home health nursing care plans and nursing plan of care forms in the book are also on the CD. When the CD is placed in a computer, the care plans can be opened in a word processor. Entries can be added or deleted to individualize home health nursing care plans.

Nursing Diagnoses 2012-14-NANDA International 2014-02-05 A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care - and to more effectively meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I's Diagnosis Development Committee, with stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc. The 2012-2014 edition is arranged by concept according to Taxonomy II domains, i.e. Health promotion, Nutrition, Elimination and exchange, Activity/Rest, Perception/Cognition, Self-perception, Role relationships, Sexuality, Coping/ Stress tolerance, Life principles, Safety/protection, Comfort, and Growth/development. The 2012-2014 edition contains revised chapters on NANDA-I taxonomy, and slotting of diagnoses into NANDA & NNN taxonomies, diagnostic reasoning & conceptual clarity, and submission of new/revised diagnoses. New chapters are provided on the use of nursing diagnoses in education, clinical practice, electronic health records, nursing & health care administration, and research . A companion website hosts related resources. Key features 2012-2014 edition arranged by diagnostic concepts Core references and level of evidence for each diagnosis New chapters on appropriate use of nursing diagnoses in clinical practice, education, administration and electronic health record 16 new diagnoses 11 revised diagnoses Aimed at students, educators, clinicians, nurse administrators and informaticians Companion website available, including a video on assessment, clinical reasoning and diagnosis

Responding to Intimate Partner Violence and Sexual Violence Against Women-World Health Organization 2013 A health-care provider is likely to be the first professional contact for survivors of intimate partner violence or sexual assault. Evidence suggests that women who have been subjected to violence seek health care more often than non-abused women, even if they do not disclose the associated violence. They also identify health-care providers as the professionals they would most trust with disclosure of abuse. These guidelines are an unprecedented effort to equip healthcare providers with evidence-based guidance as to how to respond to intimate partner violence and sexual violence against women. They also provide advice for policy makers, encouraging better coordination and funding of services, and greater attention to responding to sexual violence and partner violence within training programmes for health care providers. The guidelines are based on systematic reviews of the evidence, and cover: 1. identification and clinical care for intimate partner violence 2. clinical care for sexual assault 3. training relating to intimate partner violence and sexual assault against women 4. policy and programmatic approaches to delivering services 5. mandatory reporting of intimate partner violence. The guidelines aim to raise awareness of violence against women among health-care providers and policy-makers, so that they better understand the need for an appropriate health-sector response. They provide standards that can form the basis for national guidelines, and for integrating these issues into health-care provider education.

Nursing Care Plans-Marilynn E. Doenges 1989 Completely rewritten and thoroughly updated, this reference provides a reliable guide for both students and nurses involved in constructing individualized patient care plans. Comprehensive guidelines for nursing care plans encompass total patient needs, including not only the physical aspect but also the cultural, sexual, nutritional, and psychosocial needs. Each major section presents a care plan for a particular body system; individualized care plans are presented for specific diseases within each system. Only NANDA diagnoses are included. This valuable book clearly delineates the documentation requirements of government regulations and third-party payers. While focusing primarily on adult medical-surgical problems, the authors also address the special needs of pediatric and geriatric patients.

Nursing Diagnosis Reference Manual-Sheila Sparks Ralph 2005 Nursing Diagnosis Reference Manual, Sixth Edition helps nursing students and practicing nurses prepare care plans accurately and efficiently for every NANDA-approved nursing diagnosis. The book features a life-cycle format, with sections on adult, adolescent, child, maternal-neonatal, and geriatric health. Sections on community-based health (care plans on home health, health promotion, and more) and psychiatric/mental health round out the volume. Each care plan includes clear-cut criteria for identifying the right nursing diagnosis, assessment guidelines, outcome statements, rationales with all interventions, and documentation guidelines.
