Running Group Visits in Your Practice-Edward B. Noffsinger 2009-07-21 A Fateful Meeting A year and a half ago, I was sitting at a conference listening to Ed Noffsinger speak, and suddenly had the most profound “Aha” moment of my professional career. Here was someone presenting a practical and tested solution to some of the most challenging problems currently plaguing the US healthcare system, problems such as poor access to primary and specialty care; the uncontrollable and rising costs of healthcare; our nation’s relatively poor quality outcomes; and finally, the sense of frustration, disempowerment, loneliness, and disenfranchisement that patients and their families too often experience. Dr. Noffsinger’s solution seemed deceptively simple—shared medical appointments (SMAs) that afford the highest quality healthcare to be delivered in the highest quality care experience—a group setting. Experience collected over a decade and involving more than 100,000 patient visits throughout the United States, Canada, and parts of Europe has demonstrated that SMAs, when used in primary care as well as in the medical and surgical subspecialties, lead to increased access to care, enhanced quality of care, and improved patient satisfaction. For physicians, the efficiency gains and team support from their participation in SMAs translate into much needed relief and improved career satisfaction.

Give Yourself the Answers Instead of Asking Questions-Eric Dlugokinski 2009-09-01 Go one day without asking a question and your life may change forever. This is the challenge that Dr. Eric Dlugokinski suggests in Give Yourself the Answers Instead of Asking Questions. Although it is a popular notion that questions are an essential and integral part of rich and sensitive communication, Dlugokinski illustrates how there are often inappropriate or 'deadly' questions that disrupt healthy relating. Those 'deadly' questions occur when the speaker asks someone a question that they themselves need to answer. 'Deadly' questions can bring chaos to parenting, deferred development for children, lack of intimacy to personal relationships, limited efficiency and productivity in the work setting, and limitations in the ability for self-direction and the direction of others. Through case examples Dlugokinski illustrates how readers can acquire greater personal understanding and acceptance, a key to communicating more effectively and intimately with others. As readers Give Themselves the Answers Instead of Asking Questions, they learn to value the unique person they are, live proactively, and improve their relationships with others.

The Eight Answers for Happiness-Hooseo B. Park 2014-12-20 Although everybody in the world is singing about love, dream, money, and happiness, ironically, not many people know what these things really are. I became an artist for my dream, which was to do something for the environment, and I came to New York City for the dream. But ironically, I realized that I didn't even know what the environment really was before I came to New York City. I have done a nonprofit sign campaign for the environment in Times Square in the fall of 2011 and spring of 2014. I saw and met many people who were from all over the world. The people and New York City have given me some answers in life. To do something for the environment, I have also picked up a lot of cigarette butts that no one really cared about on the streets of New York City. Then I put the thrown cigarette butts into many different glass jars. I have slowly realized that the most important thing for the environment was happiness--because happiness is the primary reason for all lives. There are many different reasons for each of our lives, but all the reasons lean to one point. That is happiness. And unhappiness is the third pollution source that makes people careless with everything. No one can well take care of other things if the person's level of happiness is too low. We have to be happy first no matter what. To be happy, we need to know what happiness really is, as well as the other very important things in life. These eight things are the answers that I've learned from my life and from New York City.

Shouting Won't Help-Katherine Bouton 2013-02-19 For twenty-two years, Katherine Bouton had a secret that grew harder to keep every day. An editor at The New York Times, at daily editorial meetings she couldn't hear what her colleagues were saying. She had gone profoundly deaf in her left ear; her right was getting worse. As she once put it, she was "the kind of person who might have used an ear trumpet in the nineteenth century." Audiologists agree that we're experiencing a national epidemic of hearing impairment. At present, 50 million Americans suffer some degree of hearing loss—17 percent of the population. And hearing loss is not exclusively a product of growing old. The usual onset is between the ages of nineteen and forty-four, and in many cases the cause is unknown. Shouting Won't Help is a deftly written, deeply felt look at a widespread and misunderstood phenomenon. In the style of Jerome Groopman and Atul Gawande, and using her experience as a guide, Bouton examines the problem personally, psychologically, and physiologically. She speaks with doctors, audiologists, and neurobiologists, and with a variety of people afflicted with midlife hearing loss, braiding their stories with her own to illuminate the startling effects of the condition. The result is a surprisingly engaging account of what it's like to live with an invisible disability—and a robust prescription for our nation's increasing problem with deafness. The Philosophy of Language-H. Paul Grice 1990 What is meaning? What is the relationship between language and the world? How is linguistic communication possible? This comprehensive anthology contains thirty-seven of the most important articles in the philosophy of language, including both classic articles by such philosophers as Gottlob Frege, Bertrand Russell, J.L. Austin, W.V. Quine, and P.F. Strawson and recent work by Saul Kripke, David Kaplan, Donald Davidson, David Lewis, John Searle, and Noam Chomsky. The Second Edition includes six new selections by Russell, Searle, H.P. Grice, Robert Stalnaker, Hilary Putnam, and Chomsky. Clearly structured in a way that both students and teachers will find appealing, the new edition is divided into seven sections that cover all of the central issues in the philosophy of language: Truth and Meaning, Speech Acts, Reference and Descriptions, Names and Demonstratives, Propositional Attitudes, Metaphor, and The Nature of Language. The articles included represent a range of different approaches to the philosophy of language and many build upon or discuss previous articles. Expanded introductions to each section provide the background necessary for understanding the philosophical issues and the connections between the articles. A bibliography of suggested further reading is included at the end of each section. Reorganized and consolidated for easier accessibility, and with new material throughout, The Philosophy of Language, Second Edition, is an essential text for courses in the philosophy of language, linguistic studies, semantics, and rhetoric.
