Complex Interpersonal Conflict Behaviour-Evert Van der Vliert 2013-05-24 This book is about reactions to interpersonal conflict such as avoiding, negotiating, and fighting. It breaks away from the prevailing assumption that conflict behaviours are mutually isolated reactions having mutually isolated effects. Instead, reactions are viewed as components of complex conflict behaviour that influence each other's impact on the substantive and relational outcomes. The simultaneous and sequential occurrence of, for example, problem solving and fighting should therefore be studied together and not separately. The author presents a ladder of stepwise increases in theoretical quality, and designs the sequence of chapters in such a way that the theoretical value increases step by step. The lower steps lead to the description of behavioural components and to a model of integrative and distributive dimensions. The upper steps lead to the dimensions of dual concern for one's own and the other's goals and to complexity explanations in terms of the novel paradigm of conglomerated conflict behaviour. The chapters are summarised into thirty-four interrelated propositions. Six empirical studies demonstrate the validity of crucial propositions at each level of the theoretical framework. This monograph primarily reaches out to an academic readership. However, due to its clear structure, its comprehensive propositions, its frequent use of figures, and its glossary, the book will also provide an invaluable resource for any student and practitioner interested in conflict management and negotiation.

South African Human Resource Management-Barney Erasmus 2008 Book & CD. This fourth edition makes it clear that all who are interested in the sustainability of South Africa -- and Africa -- must put human resource management (HRM) at the very core of the management of organisations generally. The content is aligned to outcomes that are geared towards analytical and critical thinking about the theory and practice of HRM in South Africa. The African context is addressed, and ample information about HRM aspects 'elsewhere in Africa' is provided. This edition breaks away even further from the traditional structure of so many standard HRM textbooks. It challenges a broadening of the 'agenda' and scope of HRM work: HRM is not only about managing employees, but also about managing the work and the people who do the work of and in organisations. This may involve alternative ways of getting the work of organisations done superiorly. This book will help you to apply HRM effectively to achieve its ultimate aim, namely to add value to people, to organisations and to society. This comprehensive book is organised around themes such as: Developing an appreciation for the context of HRM in South Africa; Strategising, designing and planning as preparatory HRM work; Sourcing work talent; Facing the countrys people empowerment challenge; Meeting the reward and care challenge; Handling labour and employee relations challenges; Championing change and transformation; Managing HRM-related information, including HRM and sustainability reporting. Based on most recent theoretical developments, the emphasis is on the practical applications. Samples of relevant documents are included, and an accompanying CD contains a wealth of relevant resources as well as a continuing, integrating case study that serves as a basis for these applications, and individual and group activities. As a package, South African Human Resource Management will be extremely valuable to both current and aspirant managers, and human resource practitioners.
