Listening-Jonathan Cott 2020-04-21 A wide-ranging collection of interviews and profiles from twenty years of Jonathan Cott's remarkable writings "All I really need to do is simply ask a question," Jonathan Cott occasionally reminds himself. "And then listen." It sounds simple, but in fact few have taken the art of asking questions to such heights—and depths—as Jonathan Cott, whom Jan Morris called "an incomparable interviewer," one whose skill, according to the great interviewer and oral historian Studs Terkel, "is artless yet impassioned and knowing." Collected here are twenty-two of Cott's most illuminating interviews that encourage readers to listen to film directors and musicians, actors and writers, scientists and visionaries. These conversations affirm the indispensable and transformative powers of the imagination and offer us new ways to view these lives and their worlds. What is it like to be Bob Dylan making a movie? Carl Sagan taking on the cosmos? Oliver Sacks doctoring the soul? John Lennon, on December 5, 1980? Elizabeth Taylor, ever? From Chinua Achebe to Dr. Seuss (Theodor Geisel), Federico Fellini to Werner Herzog, and Oriana Fallaci to Studs Terkel, Listening takes readers on a journey to discover not ways of life but ways to life. Within these pages, Cott proves himself to be, in the words of Brain Pickings's Maria Popova, "an interlocutor extraordinaire," drawing candid insights and profound observations from these inspired and inspiring individuals.

Mathematical Lives-CLAUDIO BARTOCCI 2010-10-01 Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the

twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between 'soul and precision.'

Code Quality focuses on non-functional properties, demonstrating how to meet such critical requirements as reliability, security, portability, and maintainability, as well as efficiency in time and space. Spinellis draws on hundreds of examples from open source projects--such as the Apache web and application servers, the BSD Unix systems, and the HSQLDB Java database--to illustrate concepts and techniques that every professional software developer will be able to appreciate and apply immediately. U2 and Philosophy-Mark A. Wrathall 2012-03-30 Is it possible to be a committed Christian and a rock superstar? Can political activists make good music? Do hugely successful rock bands really care about AIDS and poverty in Africa, or is it just another image-enhancing schtick? U2 and Philosophy ponders these and other seeming dichotomies in the career of the Irish supergroup. For over two decades, U2 has been one of the biggest acts in rock music. They've produced over a dozen platinum and multiplatinum records and won 15 Grammy Awards. Critics everywhere have praised the band's thoughtful, complex lyrics and the artistry of their music. At the same time, Bono, the group's lead singer, has dedicated himself to political and social causes, blurring the line between rock star and respected statesman. Offering fresh insight into the band's music and activism, these thought-provoking essays allows fans to discover philosophy through the eyes of U2, and rediscover U2 through the eyes of philosophers.

Zamba-Ralph Helfer 2009-10-13 When Ralph Helfer, now one of Hollywood's top animal behaviorists, first began working, he was shocked by the cruelty that was accepted practice in the field. He firmly believed in "affection training" -- that love, not fear, should be the basis of any animal's development, even when dealing with the most dangerous of creatures. Then Zamba came into his life -- an adorable four-month-old lion cub that went on to prove Helfer's theories resoundingly correct. Over the next eighteen years, Zamba would thrive and grow, and go on to star in numerous motion pictures and television shows -- all the while developing a deep and powerful bond of love and affection with the man who raised him. By turns astonishing, hilarious, and poignant, Zamba is not only the unforgettable story of the relationship that Helfer would come to consider one of the most important in his life but also that of the amazing career and adventures of the greatest lion in the world.

Asian Firms-Frank B. Tipton 2008-01-01 This book appeals to a wide range of readers who might be interested in the historical development of Asian economies, evolutionary trajectories of Asian firms, institutional change and dynamics in Asia and management and organization of Asian firms. For readers

who are interested in specific Asian economies this book will also be useful because it provides a comparative perspective that examines different Asian economies and their forms in a single work. Henry Wai-chung Yeung, National University of Singapore Tipton provides a fresh approach to understand how Asian firms differ from their western counterparts. Paul Beamish, University of Western Ontario, Canada Frank Tipton's book is a comparative study of the management structures of Asian firms. As Asian economies continue to expand, the management of Asian firms becomes ever more important, whether they are suppliers, customers, partners, or rivals. As the author argues, Asian firms are very different from their Western counterparts, and these differences reflect the variations in national history and institutions within which they operate. Asian Firms compares Chinese, Japanese, Korean and Southeast Asian management structures and sets them in their historical and institutional context. Based on a wide range of interviews and material drawn from a variety of disciplines, the argument is framed by the sayings of the legendary strategist Sun Tzu and the renowned businessman Tao Zhu-gong. A series of case studies illustrate the strengths and weaknesses of the approaches of managers in each of the national traditions. Asian Firms asks in each case what Western managers can learn from Asian firms, and what Asian firms can learn from each other. With a multidisciplinary approach and emphasis on practical lessons and tools, the book will be of great use and interest for managers. It will also appeal to students and researchers of international business, postgraduate management students in courses with a comparative or Asian emphasis as well as academics and researchers of Asian studies.

Springwater Wedding-Linda Lael Miller 2001-09-07 Linda Lael Miller returns to an unforgettable Montana town for a very special occasion.... SPRINGWATER WEDDING Once a frontier stagecoach stop, tiny Springwater has grown and changed and entered the twenty-first century. Cattle rustlers may still be stirring up trouble, but now they're high-tech operators in a modern world. Where stagecoaches once rolled along muddy roads, the Internet is now the newest highway in town. But heartbreak is still heartbreak and love still love, and Springwater still boasts a rich legacy of joy, sorrow, and second chances -- as two childhood sweethearts discover when they rekindle a long-ago passion in the place they will always call home. Maggie McCaffrey left her fast-paced corporate job to take a chance on a more rewarding -- but riskier -- business venture: turning the dilapidated Springwater Station into a bed-and-breakfast. But Maggie didn't count on running straight into J.T. Wainwright, the hometown boy who stole her heart many years before. A tough former New York City cop, J.T. survived a grave gunshot wound and returned to Springwater to find a better way of life. Now, as deputy town marshal, he's facing off with modern-day cattle thieves who are plaguing local ranchers. Stronger than ever, J.T. seems ready for anything -- except, of course, Maggie. As Maggie's B&B begins to take root, a delightful new cast of Springwater locals passes through its doors. Maggie's parents, Kathleen and Reece, are finding that their forty-year marriage requires a little renegotiating now and then. Cindy, a teenage newlywed with a baby on the way, is learning about love and sacrifice for the first time. And town marshal Purvis

As always, Linda Lael Miller enchants readers with her portrayal of the complex tangle of life and love in a small town. The Color of Democracy in Women's Regional Writing-Jean Carol Griffith 2009-08-17 An exciting addition to the ongoing debate about the place of regionalism in American literary history. American regionalism has become a contested subject in literary studies alongside the ubiquitous triad of race, class, and gender. The Color of Democracy in Women's Regional Writing enters into the heart of an ongoing debate in the field about the significance of regional fiction at the end of the 19th century. Jean Griffith presents the innovative view that regional writing provided Edith Wharton, Ellen Glasgow, and Willa Cather with the means to explore social transformation in a form of fiction already closely associated with women readers and writers. Griffith provides new readings of texts by these authors; she places them alongside the works of their contemporaries, including William Faulkner and Langston Hughes, to show regionalism's responses to the debate over who was capable of democratic participation and reading regionalism's changing mediations between natives and strangers as reflections of the changing face of democracy. This insightful work enriches the current debate about whether regionalism critiques hierarchies or participates in nationalist and

racist agendas and will be of great interest to those invested in regional writing or the works of these significant authors.

A Re-Assessment of Aristotle's Economic Thought-Ricardo F. Crespo 2013-10-30 The world has seen several financial and economic crises in the past few years. Psychological, ethical and philosophical levels of causal analysis have been discussed, and in this context, an interest in classical thinkers has emerged. The work of Aristotle has influenced writers from Marx and Menger to Amartya Sen. This book introduces us to Aristotle's thought on 'the economic' and on its influences on economists. First, it focuses on Aristotle's ideas, situating Aristotle in his historical context, describing his positions on the economic and analysing what kind of reality the economic is, its relation with ethics and with politics. Then, it determines what kind of science is concerned with the economic. Later, it analyses related topics and shows the influence of Aristotle's ideas on contemporary economists. It concludes by highlighting the Aristotelian contributions to today's economy. This scholarly volume offers important new insights into the Aristotelian approach to the economy itself, as well as to the idea of economics as a science, bringing Aristotle's views to bear on the modern economy.
