The History Of the Late Rebellion: With Original Papers, And The Characters Of the Principal Noblemen and Gentlemen (etc.)-Robert Patten 1717

Sadako and the Thousand Paper Cranes-Eleanor Coerr 2004

Hospitalized with the dreaded atom bomb disease, leukemia, a child in Hiroshima races against time to fold one thousand paper cranes.

to verify the legend that by doing so a sick person will become healthy.

Logico-Linguistic Papers-P F Strawson 2017-07-05 P.F. Strawson has been a major and influential spokesman for ordinary language philosophy throughout the late twentieth century, studying the relationship between common language and the language of formal logic. This reissue of his collection of early essays, Logico-Linguistic Papers, is published with a brand new introduction by Professor Strawson but, apart from minor corrections to the text, these classic essays remain original and intact. Logico-Linguistic Papers contains Strawson's major essay, 'On Referring', in which he disputed Bertrand Russell's theory of definite descriptions, distinguishing between referring to an entity and asserting its existence. The book contains twelve essays in all, grouped by subject matter. The first five are concerned with the topic of singular reference and predication and the last three are all responses to J.L. Austin's treatment of the topic of truth. Strawson disputes the correspondence theory of truth, maintaining that facts are what statements (when true) state. The remaining papers deal with meaning, speech acts, logical truth and Chomsky's views on syntax.

Oeuvres Scientifiques / Collected Papers-André Weil 2009-01-30 André Weil's mathematical work has deeply influenced the mathematics of the twentieth century. Part of a three-volume set, this work collects his papers in chronological order and includes lengthy commentaries on many of the articles written by Weil himself.

Ponkapog Papers-Thomas Bailey Aldrich 2019-09-25 Reproduction of the original: Ponkapog Papers by Thomas Bailey Aldrich Accounts and Papers of the House of Commons-Great Britain. Parliament. House of Commons 1826

Documents concerning the life and character of Emanuel Swedenborg ... Collected by Dr. J. F. I. Tafel ... And edited in English by ... J. H. Smithson ... Enlarged edition-Johann Friedrich Immanuel TAFEL 1855

Parliamentary Papers-Great Britain. Parliament. House of Commons 1908

A Selection of Early Statistical Papers-

Essential Papers on Borderline Disorders-Michael H. Stone

1986-02-01 In 1910, New York City was bursting at the seams as more and more people crowded into a limited supply of housing in the tenement districts of Manhattan and the older areas of Brooklyn. With no outlet for its exploding population, and the burgeoning social problems created by the overwhelming congestion, New York faced a serious crisis which city and state leaders addressed with dramatic measures. In March 1913, public officials and officers of the two existing rapid transit networks shook hands to seal a deal for a greatly expanded subway system which would more than double the size of the two existing transit networks. At the time the largest and most expensive single municipal project ever attempted, the Dual System of Rapid Transit set the pattern of growth in New York City for decades to come, helped provide millions of families a better quality of life, and, in the words of Manhattan borough president George McAneny (1910-1913), "proved the city's physical salvation." It stands as that rare success story, an enormously complicated project undertaken against great odds which proved successful beyond all measure. Published in conjunction with the History of the City of New York Project.

Characters of Finite Groups. Part 1-IA. G. Berkovich E. M. Zhmud'
1997-12-02 This book discusses character theory and its applications to finite groups. The work places the subject within the reach of people with a relatively modest mathematical background. The necessary background exceeds the standard algebra course with respect only to finite groups. Starting with basic notions and theorems in character theory, the authors present a variety of results on the properties of complex-valued characters and applications to finite groups. The main themes are degrees and kernels of irreducible characters, the class number and the number of nonlinear irreducible characters, values of irreducible characters, characterizations and generalizations of Frobenius groups, and generalizations and applications of monomial groups. The presentation is detailed, and many proofs of known results are new. Most of the results in the book are presented in monograph form for the first time. Numerous exercises offer additional information on the topics and help readers to understand the main concepts and results.

Passionate Sage: The Character and Legacy of John Adams-Joseph J. Ellis 2011-02-14 "Impassioned and erudite....A captivating portrait of this Massachusetts native as a wonderfully contrary genius possessed of an uncommon moral intelligence and farsighted political wisdom." —Michiko Kakutani, New York Times A fresh look at this astute, likably quirky statesman, by the author of the Pulitzer Award-winning *Founding Brothers* and the National Book Award winning *American Sphinx*. "The most lovable and most laughable, the warmest and possibly the wisest of the founding fathers, John Adams knew himself as few men do and preserved his knowledge in a voluminous correspondence that still vibrates. Ellis has used it with great skill and perception not only to bring us the man, warts and all, but more importantly to reveal his extraordinary insights into the problems confronting the founders that resonate today in the republic they created." —Edmund S. Morgan, Sterling Professor of History Emeritus, Yale University

Suggestions to Authors of Papers Submitted for Publication by the United States Geological Survey with Directions to Typewriter Operators-Geological Survey (U.S.) 1916

Confidence and Character-James A. Pingel II 2014-12-09 His birthday was once celebrated as a national holiday and his portrait once adorned the walls of almost every classroom in the United States. He was a victorious Revolutionary War general, a crucial influence in the creation of the Constitution, and the first President of the United States. Today, unfortunately, many only know America's first hero and the "Father of His Country" as a slaveholder with wooden teeth or as the somber-looking man on the one-dollar bill. To many, he remains a distant, mysterious, and unapproachable figure from a day long gone. The truth about George Washington, however, is much different. He was America's most successful, venerated, and indispensable founding father. So who was this man? What made him such a singularly successful leader? What lessons can be learned from his life? *Confidence and Character: The Religious Life of George Washington* examines religion's impact on the private and public man. Too often ignored, underemphasized, suppressed, or distorted, Washington's religious faith fundamentally inspired and nurtured his worldview, vocational performance, and leadership. This is the Washington we need to learn from

to know and learn from, even today.

Paper Towns-John Green 2013 Special edition slipcase edition of John Green's Paper Towns, with pop-up paper town. From the bestselling author of The Fault in our Stars. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

Working Papers Film & TV studies - WP 2011/1: Gay representation, queer resistance, and the small screen- 2011 Drawing on the fruitful insights of queer theory, this study departs from the notion that popular culture can function as articulations of resistance to the discourse of heteronormativity that is being reiterated and consolidated in popular culture products. In particular, this study focuses on the potential of gay representation (representations of those who are identified and/or self-identify as gay, lesbian or bisexual) in contemporary television fiction to resist heteronormative institutions, practices, norms and values.

The Collected Mathematical Papers of James Joseph Sylvester:- James Joseph Sylvester 2012-02-16 James Joseph Sylvester (1814-97) was an English mathematician who made key contributions to numerous areas of his field and was also of primary importance in the development of American mathematics, both as inaugural Professor of Mathematics at Johns Hopkins University and founder of the American Journal of Mathematics. Originally published in 1912, this book forms the fourth in four volumes of Sylvester's mathematical papers, covering the period from 1882 to 1897. Together these volumes provide a comprehensive resource that will be of value to anyone with an interest in Sylvester's theories and the history of mathematics.

1997-02-01 Escaping Eden brings together feminist biblical scholars to explore how aspects of social location such as gender, ethnicity, class, and religious background affect biblical interpretation. The volume combines feminist reading strategies with sustained methodological inquiry. Writing in a range of modes including historical and literary criticism, cultural studies, satirical fiction, and the personal essay, the contributors challenge the presumed objectivity of conventional biblical scholarship. Interrogating biblical authority, que(e)rying Jeremiah, exploring translation as a feminist act, and reclaiming texts as diverse as Genesis, Luke, and Philippians, Escaping Eden expands the usual boundaries of biblical academic discourse.

Robert Steinberg Collected Papers-Robert Steinberg 1997 This volume is a collection of papers by Robert Steinberg. It contains all of his published papers on group theory, including those on "special representations" (now called Steinberg representations), tensor products of representations, finite reflection groups, regular elements of algebraic groups, Galois cohomology, universal extensions, etc. At the end of the book, there is a section called "Comments on the Papers". The comments by Steinberg explain how ideas and results have evolved and been used since they first appeared.

Character, Liberty and Law-J.G. Murphy 1998-10-31 Jeffrie G. Murphy's third collection of essays further pursues the topics of punishment and retribution that were explored in his two previous collections: Retribution, Justice and Therapy and Retribution Reconsidered. Murphy now explores these topics in the light of reflections on issues that are normally associated with religion: forgiveness, mercy, and repentance. He also explores the general issue of theory and practice and discusses a variety of topics in applied ethics - e.g., freedom of artistic expression, the morality of gambling, and the value of forgiveness in psychological counseling. As always, his perspective may be described as Kantian; and, indeed, this collection contains the first extended piece of Kant scholarship that he has done in years: a long essay on Kant on theory and practice.

Connes-Chern Character for Manifolds with Boundary and Eta Cochains-Matthias Lesch 2012 "November 2012, volume 220, number (end of volume)."

Five Papers on Logic Algebra, and Number Theory-A.A. Zykov 1956-04-01

List of the writings of William Hazlitt and Leigh Hunt, chronologically arranged, with notes ... preceded by a review of, and extracts from Barry Cornwall's "Memorials of Charles Lamb" ... and a chronological list of the works of Charles Lamb-Alexander IRELAND 1868

Graphics Recognition: Algorithms and Systems-International Workshop on Graphics Recognition 1998-04-08 This book constitutes the strictly refereed post-workshop proceedings of the

Second International Workshop on Graphics Recognition, GREC'97, held in Nancy, France, in August 1997. The 34 thoroughly revised full papers presented were carefully selected for inclusion in the book on the basis of a second round of post-workshop reviewing. The book is divided into sections on vectorization and segmentation, symbol recognition, form processing, map processing, engineering drawings, applications and systems, performance evaluation, and a graphics recognition contest.
