XML Topic Maps-Jack Park 2003 XML Topic Maps is designed to be a "living document" for managing information across the Web's interconnected resources. The book begins with a broad introduction and a tutorial on topic maps and XTM technology. The focus then shifts to strategies for creating and deploying the technology. Throughout, the latest theoretical perspectives are offered, alongside discussions of the challenges developers will face as the Web continues to evolve. Looking forward, the book's concluding chapters provide a road map to the future of topic map technology and the Semantic Web in general.

Discovery-William J. Kelly 2003-07 The first in a series of two full-color worktexts for the developmental writing market, "Discovery" focuses on helping students build better sentence and paragraph writing skills. With its encouraging tone, careful explanations, and abundance of precisely sequenced and incrementally challenging exercise sets, "Discovery" enables students to view writing as a means of discovering more about themselves and their surroundings. The book starts with an overview of the writing process, and special attention is given to prewriting and the development of topic and supporting sentences. Parts 2 through 5 provide lucid and well-illustrated explanations of basic sentence elements, grammar, punctuation, and mechanics. Part 6 is a section of student and professional reading selections, which include an introduction on critical reading and comprehension and contain numerous writing exercises. An appendix provides practical advice for ESL writers studying English grammar and writing. For anyone interested in improving basic writing skills.

Computational Intelligence - Volume II-Hisao Ishibuchi 2015-12-30 Computational intelligence is a component of Encyclopedia of Technology, Information, and Systems Management Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Computational intelligence is a rapidly growing research field including a wide variety of problem-solving techniques inspired by nature. Traditionally computational intelligence consists of three major research areas: Neural Networks, Fuzzy Systems, and Evolutionary Computation. Neural networks are mathematical models inspired by brains. Neural networks have massively parallel network structures with many neurons and weighted connections. Whereas each neuron has a simple input-output relation, a neural network with many neurons can realize a highly non-linear complicated mapping. Connection weights between neurons can be adjusted in an automated manner by a learning algorithm to realize a non-linear mapping required in a particular application task. Fuzzy systems are mathematical models proposed to handle inherent fuzziness in natural language. For example, it is very difficult to mathematically define the meaning of "cold" in everyday conversations such as "It is cold today" and "Can I have cold water". The meaning of "cold" may be different in a different situation. Even in the same situation, a different person may have a different meaning. Fuzzy systems offer a mathematical mechanism to handle inherent fuzziness in natural language. As a result, fuzzy systems have been successfully applied to real-world problems by extracting linguistic knowledge from human experts in the form of fuzzy IF-THEN rules. Evolutionary computation includes various population-based search algorithms inspired by evolution in nature. Those algorithms usually have the following three mechanisms: fitness evaluation to measure the quality of each solution, selection to choose good solutions from the current population, and variation operators to generate offspring from parents. Evolutionary computation has high applicability to a wide range of optimization problems with different characteristics since it does not need any explicit mathematical formulations of objective functions. For example, simulation-based fitness evaluation is often used in evolutionary design. Subjective fitness evaluation by a human user is also often used in evolutionary art and music. These volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers.

The Reading Context-Dorothy U. Seyler 2003-07 The Reading Context provides extensive reading skills practice at a new value price of under $25. Designed for developmental reading courses (Grades 9⬚), The Reading Context emphasizes reading as a three—step "prepare — read —respond" process. The book starts where developing readers need to start: with an explanation of the context created by author, work, and reader. It also stresses the importance of thinking about who the writer is, what the author's purpose is, what kind of work students are about to read, and what they can expect to gain from it. Reading selections have been chosen to hold student interest while representing the kinds of material they will meet in college assignments —textbook material from business to psychology, from advertising to history, from health to education. Chapters are filled with short prose pieces for illustration and practice, and each chapter concludes with two or three longer reading selections. In each chapter, clear explanations of each reading skill are supported by numerous exercises.

Introduction to Research in Education-Donald Ary 2018-01-01 A classic in the field, INTRODUCTION TO METHODS IN EDUCATION, 10th Edition, helps students master the basic competencies necessary to understand and evaluate the research of others, and shows them how to plan and conduct original research. The text's strengths include a clear writing style, comprehensive topic coverage, well-chosen and effective examples that clarify complex concepts, and strong end-of-chapter exercises that expose students to intriguing research problems. This edition builds on the text's strengths of teaching students to become more competent consumers and producers of research, with expanded coverage of qualitative methods, action research, and indigenous research; and an up-to-date feature focusing on research issues in the public realm. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Methods of Teaching-Preston D. Feden 2003 METHODS OF TEACHING: APPLYING COGNITIVE SCIENCE TO PROMOTE STUDENT LEARNING helps prospective teachers learn how to apply recent findings by cognitive scientists to their classroom practices in order to promote true conceptual change among their students. The book focuses squarely on ways to bring about deep rather than surface learning to all students.The authors use and model many of the teaching strategies they present, focusing on major "core" concepts and utilizing a rich array of pedagogical features, to help prospective teachers build a deep understanding of how people learn and what strategies they can use as teachers to help their students achieve long-lasting comprehension.Throughout the text, the authors emphasize the need to change instruction in light of new findings from cognitive science. Planning for instruction, behavior management, and technology are integrated into each chapter.

Progressions with Readings-Barbara Fine Clouse 2004-02 "Progressions" helps readers learn the "characteristics" of effective sentences, paragraphs, and essays; "procedures" for producing this writing; and "applications" of this learning beyond the writing classroom. Geared toward improving basic writers' competence and confidence, "Progressions" provides abundant support for the reader by showing specifically what to do in every step of the writing process. Numerous exercises and activities (including collaborative activities), writing assignments, and suggested editing and revising strategies appear throughout the text. The book also offers instruction in reading and writing in response to reading.

Interactive Vocabulary-Roberta A. Bemis 2000-05 This first book in a new vocabulary series makes vocabulary fun and accessible by incorporating interactive exercises and high interest reading, with topics ranging from movies to books and from personalities to politics. The readings keep readers interested while showing how vocabulary is used in the context of a larger reading passage. An accompanying interactive CD-ROM features an audio component to aid in pronunciation and interactive exercises. Thematic readings open every chapter, making the material interesting and engaging. In addition, two of the chapters focus on word parts. For English majors and anyone interested in vocabulary.

Brand Risk-Mr David Abrahams 2012-09-28 Brand risk is often narrowly defined as risk to reputation. Yet risk and uncertainty are evident in many aspects of brand performance and marketing operations. Considered and responsible risk-taking is central to effective brand management. Risk literacy is the marketer's third necessary competence, alongside strategic insight and financial understanding. In Brand Risk, a practical and accessible book for those who hold responsibilities in marketing or risk management, David Abrahams brings together relevant risk thinking and a range of techniques for the evaluation of brand exposures and opportunities - whether in response to the ambitions of a key business project, new market conditions or shareholder concern. A balanced review of the subject is enriched by reference to topics of current interest and is supported by illustrative examples throughout. Presenting the essentials of brand management and risk management side-by-side, Brand Risk offers graduated and complementary approaches to brand risk assessment, from the intuitive to the data-driven.

Composing with Confidence-Alan Meyers 2005-03 This reader-friendly sixth edition of Composing with Confidence focuses on the writing of paragraphs and essays within the composing process. Readers are guided step by step through the process, but are provided with options in prewriting, discovery, outlining, and predicting. Each chapter in the unit on the rhetorical modes offers academic and professional model paragraphs and essays, along with a well-wrought paragraph assignment, an optional essay writing assignment, and at least five alternative assignments. A new chapter, Writing on the Job, offers instruction in and models of a job application letter, a risumi, and two memos. A repeated feature offers practice in summarizing, paraphrasing, quoting, and arranging material from outside sources. And two new features, Blueprints for Writing and Unit Summaries, offer quick visual summaries of the most important points of the chapter or unit. A full unit on sentence-level issues of grammar and mechanics offers instruction in only those skills that are needed to make writing clear and grammatically correct. Each chapter in the unit ends with two "Editing for Mastery" exercises. "Tips" boxes and "If Your First Language Is Not English" boxes also provide short, specific, and practical advice. The book retains its most popular feature: fast-paced, high-interest, continuous discourse materials that makes it fun to read and work with. For those interested in developing their writing skills at the paragraph to essay level.

Bridging the Gap-Brenda D. Smith 2008 "Written for the mid to high-level developmental reading course, "Bridging the Gap" by Brenda Smith continues to be the #1 textbook choice of developmental reading educators." "Bridging the Gap" was the first book to focus on how to read college textbooks. This theme has been broadened by linking textbook readings to recent news in the popular press and adding material on critical thinking and the Internet. A hallmark of the text, the end-of-chapter readings, represent the "bridges" of text-to-text, text-to-world, and text-to-self; and the varying reading levels to permit individualization of assignments to meet varying student needs. A variety of academic disciplines are represented throughout, including psychology, history, biology, business, allied health, and English literature.

Early Literacy in Preschool and Kindergarten-Janice J. Beaty 2007 For introductory courses in Early Childhood literacy. A well-known early childhood author joins with a literacy expert to offer a brand new approach to early literacy in preschool, leading into kindergarten reading. New research on how literacy emerges is put to use in chapters on setting up a literacy-friendly learning environment, music and art as natural languages, strengthening finger muscles for writing through 3-dimensional art, cooking, and woodworking, developing visual representational skills (a la Reggio Emilia), developing the important sense of story sequence through role-plays, story reenactments, and flannel board stories. Teachers are asked to make a paradigm shift in regard to their opinion of children's books as mere sources of entertainment. This text uses picture books as keys to unlocking an entire curriculum of literacy activities, with cultural book characters like real children, leading preschool and kindergarten listeners into learning centers filled with exciting literacy activities for them to pursue on their own. (teacher-oriented) are discussed along with suggestions on how and when to use each. A discussion of the new early childhood curriculum standards suggests ways to incorporate them in early childhood classrooms.

Psychological Testing-Robert J. Gregory 2004 "Describes and critiques the latest versions of the most widely used tests, examines the subtleties of the testing process, and explores the value-laden issues surrounding the wisdom of testing." - abstract.

The Circuit-Francisco Jiménez 1999-10-25 "'La frontera'...I heard it for the first time back in the late 1940s when Papa and Mama told me and Roberto, my older brother, that someday we would take a long trip north, cross la frontera, enter California, and leave our poverty behind." So begins this honest and powerful account of a family's journey to the fields of California -- to a life of constant moving, from strawberry fields to cotton fields, from tent cities to one-room shacks, from picking grapes to topping carrots and thinning lettuce. Seen through the eyes of a boy who longs for an education and the right to call one palce home, this is a story of survival, faith, and hope. It is a journey that will open readers' hearts and minds.
