Programming the Universe-Seth Lloyd 2006-03-14 Is the universe actually a giant quantum computer? According to Seth Lloyd, the answer is yes. All interactions between particles in the universe, Lloyd explains, convey not only energy but also information—in other words, particles not only collide, they compute. What is the entire universe computing, ultimately? "Its own dynamical evolution," he says. "As the computation proceeds, reality unfolds." Programming the Universe, a wonderfully accessible book, presents an original and compelling vision of reality, revealing our world in an entirely new light. From the Trade Paperback edition.

Make Your Own Damn Movie!-Lloyd Kaufman 2007-04-01 Lloyd Kaufman, the writer/producer/director of such cult-classic films as The Toxic Avenger, Class of Nuke 'Em High, and Tromeo and Juliet, offers a guide to movie-making unlike any other available anywhere. In 25 years, Kaufman, along with partner Michael Herz, has built Troma Studios up from a company struggling to find its voice in a field crowded with competitors to its current—and legendary—status as a lone survivor, a bastion of true cinematic independence, and the world's greatest collection of camp on film. As entertaining and funny as it is informative and insightful, Make Your Own Damn Movie! places Kaufman's radically low-budget, independent-studio style of filmmaking directly in the reader's hands. Thus we learn how to: develop and write a knock-out screenplay; raise funding; find locations and cast actors; hire a crew; obtain equipment, permits, and music rights (all for little or no money); make incredible special effects for \$0.79 each; charm, schmooze, and network while on the film-festival circuit; and, finally, make a bad actor act so bad it's actually good. From scriptwriting and directing to financing and marketing, this book is brimming with utterly off-the-wall, decidedly maverick, yet consistently proven advice on how to fully develop one's idea for an independent film.

Stamped from the Beginning-Ibram X. Kendi 2016-04-12 The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, Stamped from the Beginning offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

Dragon Chaser-Mark Lloyd 2013-06-17 When nineteen-year-old Mark Lloyd entered the US Army in Seattle, Washington, in 1968, he thought he was invulnerable. His induction that year marked the beginning of a long career in public service. In Dragon Chaser, he recounts his journey—entering the army, earning a green beret, serving in Vietnam, working as a police officer on the streets of south central Los Angeles, and joining the DEA. In this memoir, Lloyd tells how he became an undercover narcotics agent and served in the world's illegal drug hot spots—chasing the dragon of illicit heroin in Los Angeles, Guam, and Thailand. Dragon Chaser narrates how he led teams of DEA agents raiding jungle cocaine laboratories and ambushing clandestine airstrips in Peru, how he helped solve DEA's worst case of corruption in Los Angeles, and how he managed some of DEA's foreign operations while assigned to DEA headquarters. The stories include Lloyd's deployment on a special mission to war-scarred Bosnia, and how he successfully handled a difficult narcotics case involving a DEA employee falsely imprisoned by the recalcitrant Pakistani government. A remarkable memoir of a baby boomer's adventures in public service, Dragon Chaser recounts Lloyd's participation and observations in some of America's actions, both major and minor, throughout the last four decades.

Narrative of the Life of Frederick Douglass, an American Slave-Frederick Douglass 1999-10-07 'I was born in Tuckahoe I have no accurate knowledge of my age, never having seen any authentic record containing it. By far the larger part of the slaves know as little of their ages as horses know of theirs, and it is the wish of most masters within my knowledge to keep their slaves thus ignorant.' Thus begins the autobiography of Frederick Douglass (1818-1895) who was born into slavery in Maryland and after his escape to Massachusetts in 1838 became an ardent abolitionist and campaigner for women's rights. His Narrative, which became an instant bestseller on publication in 1845, describes his life as a slave, the cruelty he suffered at the hands of his masters, his struggle to educate himself and his fight for freedom. Passionately written, often using striking biblical imagery, the Narrative came to assume epic proportions as a founding anti-slavery text in which Douglass carefully crafted both his life story and his persona. This new edition examines Douglass, the man and the myth, his complex relationship with women and the enduring power of his book. It includes extracts from Douglass's primary sources and examples of his writing on women's rights. Ghosts of the Tsunami-Richard Lloyd Parry 2017-10-24 Named one of the best books of 2017 by The Guardian, NPR, GQ, The Economist, Bookforum, Amazon, and Lit Hub The definitive account of what happened, why, and above all how it felt, when catastrophe hit Japan—by the Japan correspondent of The Times (London) and author of People Who Eat Darkness On March 11, 2011, a powerful earthquake sent a 120-foot-high tsunami smashing into the coast of northeast Japan. By the time the sea retreated, more than eighteen thousand people had been crushed, burned to death, or drowned. It was Japan's greatest single loss of life since the atomic bombing of Nagasaki. It set off a national crisis and the meltdown of a nuclear power plant. And even after the immediate emergency had abated, the trauma of the disaster continued to express itself in bizarre and mysterious ways. Richard Lloyd Parry, an award-winning foreign correspondent, lived through the earthquake in Tokyo and spent six years reporting from the disaster zone. There he encountered stories of ghosts and hauntings, and met a priest who exorcised the spirits of the dead. And he found himself drawn back again and again to a village that had suffered the greatest loss of all, a community tormented by unbearable mysteries of its own. What really happened to the local children as they waited in the schoolyard in the moments before the tsunami? Why did their teachers not evacuate them to safety? And why was the unbearable truth being so stubbornly covered up? Ghosts of the Tsunami is a soon-to-be classic intimate account of an epic tragedy, told through the accounts of those who lived through it. It tells the story of how a nation faced a catastrophe, and the struggle to find consolation in the ruins.

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition-American Psychiatric Association 2015-07-29 Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

The Oak Park Studio of Frank Lloyd Wright-Lisa D. Schrenk 2020-11-05 Between 1898 and 1909, Frank Lloyd Wright's residential studio in the idyllic Chicago suburb of Oak Park served as a nontraditional work setting as he matured into a leader in his field and formulated his iconic design ideology. Here, architecture historian Lisa D. Schrenk breaks the myth of Wright as the lone genius and reveals new insights into his early career. With a rich narrative voice and meticulous detail, Schrenk tracks the practice's evolution: addressing how the studio fit into the Chicago-area design scene; identifying the other architects working there and their contributions; and exploring how the suburban setting and the nearby presence of family influenced office life. Built as an addition to his 1889 shingle-style home, Wright's studio was a core site for the ideological development of the prairie house, one of the first truly American forms of residential architecture. Schrenk documents the educational atmosphere of Wright's office in the context of his developing design ideology, revealing three phases as he transitioned from colleague to leader. This heavily illustrated book includes a detailed discussion of the physical changes Wright made to the building and how they informed his architectural thinking and educational practices. Schrenk also addresses the later transformations of the building, including into an art center in the 1930s, its restoration in the 1970s and 80s, and its current use as a historic house museum. Based on significant archival research, including interviews with Wright's family and 180 images, The Oak Park Studio of Frank Lloyd Wright offers the first comprehensive look at the early independent office of one of the world's most influential architects.

WHO Laboratory Manual for the Examination of Human Semen and Sperm-Cervical Mucus Interaction-World Health Organisation 1999-05-13 This definitive and essential source of reference has been thoroughly up-dated and revised to meet the requirements of all laboratories involved in the analysis of human semen. The book sets out the fundamental laboratory techniques that should be employed in the diagnosis of male infertility. The text includes descriptions of how to construct a conventional semen profile and provides standardized protocols for performing several optional diagnostic procedures. Such techniques are essential in the evaluation of infertile couples and in assessing fertility in men whose sperm production is suppressed by potential anti-fertility compounds or by toxic agents: they are also of interest in forensic medicine and in connection with artificial insemination. Previous editions of this volume have established themselves as the gold standard in the area of fertility investigation and treatment: this new edition continues that tradition and will be the benchmark for setting more rigorous standards for future years.
