East Asian Labor and Employment Law-Ronald C. Brown 2012-03-05 This book deals with international labor and employment law in the East Asia Region (EA), particularly dealing with China, South Korea and Japan. It explores and explains the effects of globalization and discusses the role played by international labor law as it affects lawyers, business, labor, labor unions and human resource management, and the labor issues that can arise in dealing in EA trade and investment. The text, and the readings (from area experts), are organized and written to provide the reader with, first, a broad understanding and insight into the global dimensions of the fast-emerging area of labor and employment issues (e.g., global legal standards and their interplay with domestic and foreign laws); and second, to show how these laws and approaches play out in specific EA countries (comparing global approaches with the specific laws of each country on four common agenda items: regulatory administration, workers' rights, trade unions and dispute resolution).

Macroeconomics for Managers-Michael K. Evans 2003-11-07 This text offers business school students an

excellent practical explanation of the short-term linkages in the macroeconomic arena. While the underlying theoretical constructs are not ignored, emphasis is placed on the empirical underpinnings and managerial implications of macroeconomics. The text begins by introducing key concepts such as the GDP, National and Personal Income, and the various measures of inflation and unemployment. Building on this foundation it then analyzes the following aspects of macroeconomics: aggregate supply and demand, international financial markets, cyclical fluctuations, policy analysis, and forecasting. Engages the reader with detailed case studies and "Manager's Briefcase" discussions. Focuses on the short-term linkages in macroeconomics. Uses an empirically oriented approach, while also explaining underlying theoretical constructs. Includes chapter summaries, key concepts, and practice questions. Complex Lexical Units-Barbara Schlücker 2019-01-14 Both compounds and multi-word expressions are complex lexical units, made up of at least two constituents. The most basic difference is that the former are morphological objects and the latter result from syntactic processes. However, the exact demarcation between compounds and multi-word expressions differs greatly from language to language and is often a matter of debate in and across languages. Similarly debated is whether and how these two different kinds of units complement or compete with each other. The volume presents an overview of compounds and multi-word expressions in a variety of European languages. Central questions that are discussed for each language concern the formal distinction between compounds and multi-word expressions, their formation and their status in lexicon and grammar. The volume contains chapters on German, English, Dutch, French, Italian, Spanish, Greek, Russian, Polish, Finnish, and Hungarian as well as a contrastive overview with a focus on German. It brings together insights from word-formation theory, phraseology and theory of grammar and aims to contribute to the understanding of the lexicon, both from a language-specific and

cross-linguistic perspective.

First Impressions-Marilyn Sachs 2015-03-31 " I read on. And then it happens. On page 89. Mary is humiliated, and I know I have to step in. There she is, in an ill-fitting, wine-colored gown that doesn't do anything for her mousy complexion, gathering up her music, when I pass by, and spill my glass of punch right on her dress. I turn, and there is Kevin, dressed in a scarlet coat and all the rest of the uniform of a British Soldier, circa 1811. 'What are you doing here?' I ask. 'Well, this is the part I'm up to in the book.'" The smart middle child in a blue-collar family identifies with Mary, the middle child in Jane Austen's *Pride and Prejudice*. When Alice enters Mary's world and makes changes in both their lives, she learns that first impressions aren't always right.

Super Graphic-Tim Leong 2013-09-24 The comic book universe is adventurous, mystifying, and filled with heroes, villains, and cosplaying Comic-Con attendees. This book by one of *Wired* magazine's art directors

traverses the graphic world through a collection of pie charts, bar graphs, timelines, scatter plots, and more. Super Graphic offers readers a unique look at the intricate and sometimes contradictory storylines that weave their way through comic books, and shares advice for navigating the pages of some of the most popular, longest-running, and best-loved comics and graphic novels out there. From a colorful breakdown of the DC Comics reader demographic to a witty Venn diagram of superhero comic tropes and a Chris Ware sadness scale, this book charts the most arbitrary and monumental characters, moments, and equipment of the wide world of comics. Plus, this is the fixed format version, which includes high-resolution images.

Characteristics of Successful U.S. Military Interventions-Jennifer Kavanagh 2019-06-15 Using an original data set of 145 ground, air, and naval interventions from 1898 through 2016, this report identifies those factors that have made U.S. military interventions more or less successful at achieving their political objectives. The factors that influence success vary depending on the type of objective being pursued, highlighting the need for careful analysis and resourcing decisions before policymakers initiate military interventions.

The Planetary Turn-Amy J. Elias 2015-04-30 A groundbreaking essay collection that pursues the rise of geoculture as an essential framework for arts criticism, The Planetary Turn shows how the planet—as a territory, a sociopolitical arena, a natural space of interaction for all earthly life, and an artistic theme—is increasingly the conceptual and political dimension in which twenty-first-century writers and artists picture themselves and their work. In an introduction that comprehensively defines the planetary model of art, culture, and cultural-aesthetic interpretation, the editors explain how the living planet is emerging as

distinct from older concepts of globalization, cosmopolitanism, and environmentalism and is becoming a new ground for exciting work in contemporary literature, visual and media arts, and social humanities. Written by internationally recognized scholars, the twelve essays that follow illustrate the unfolding of a new vision of potential planetary community that retools earlier models based on the nation-state or political “blocs” and reimagines cultural, political, aesthetic, and ethical relationships for the post-Cold War era.

Nuclear Disarmament and Non-Proliferation-Sverre Lodgaard 2010-10-18 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book examines the current debate on nuclear non-proliferation and disarmament, notably the international non-proliferation regime and how to implement its disarmament provisions. Discussing the requirements of a new international consensus on nuclear disarmament and non-proliferation, this book builds on the three pillars of the nuclear non-proliferation treaty (NPT): non-proliferation, disarmament and peaceful uses of nuclear energy. It reviews the impact of Cold War and post-Cold War policies on current disarmament initiatives and analyses contemporary proliferation problems: how to deal with the states that never joined the NPT (India, Pakistan and Israel); how states that have been moving toward nuclear weapons have been brought back to non-nuclear-weapon status; and, in particular, how to deal with Iran and North Korea. The analysis centres on the relationship between disarmament and non-proliferation in an increasingly multi-centric world involving China and India as well as the US, the European powers and Russia. It concludes with a description and discussion of three different worlds without nuclear weapons and their implications for nuclear disarmament policies. This book will be of great interest to all students of arms control, strategic studies, war and conflict studies, and IR/security studies in general Sverre Lodgaard is a Senior Research Fellow at the Norwegian Institute of International Affairs, Oslo

Human Trafficking-Louise Shelley 2010-07-29 This book examines all forms of human trafficking globally, revealing the operations of the trafficking business and the nature of the traffickers themselves. Using a historical and comparative perspective, it demonstrates that there is more than one business model of human trafficking and that there are enormous variations in human trafficking in different regions of the world. Drawing on a wide body of academic research - actual prosecuted cases, diverse reports and field work and interviews conducted by the author over the last sixteen years in Asia, Latin America, Africa, Europe and the former socialist countries - Louise Shelley concludes that human trafficking will grow in the twenty-first century as a result of economic and demographic inequalities in the world, the rise of conflicts and possibly global climate change. Coordinated efforts of government, civil society, the business community, multilateral organizations and the media are needed to stem its growth.

Racing the Beam-Nick Montfort 2009-01-09 A study of the relationship between platform and creative expression in the Atari VCS. The Atari Video Computer System dominated the home video game market so completely that "Atari" became the generic term for a video game console. The Atari VCS was affordable and offered the flexibility of changeable cartridges. Nearly a thousand of these were created, the most significant of which established new techniques, mechanics, and even entire genres. This book offers a detailed and accessible study of this influential video game console from both computational and cultural perspectives. Studies of digital media have rarely investigated platforms—the systems underlying computing. This book (the first in a series of Platform Studies) does so, developing a critical approach that

examines the relationship between platforms and creative expression. Nick Montfort and Ian Bogost discuss the Atari VCS itself and examine in detail six game cartridges: Combat, Adventure, Pac-Man, Yars' Revenge, Pitfall!, and Star Wars: The Empire Strikes Back. They describe the technical constraints and affordances of the system and track developments in programming, gameplay, interface, and aesthetics. Adventure, for example, was the first game to represent a virtual space larger than the screen (anticipating the boundless virtual spaces of such later games as World of Warcraft and Grand Theft Auto), by allowing the player to walk off one side into another space; and Star Wars: The Empire Strikes Back was an early instance of interaction between media properties and video games. Montfort and Bogost show that the Atari VCS—often considered merely a retro fetish object—is an essential part of the history of video games.

Foreign Intervention in Africa After the Cold War-Elizabeth Schmidt 2018-10-22 In Foreign Intervention in Africa after the Cold War, Elizabeth Schmidt provides a new framework for thinking about foreign political and military intervention in Africa, its purposes, and its consequences into the modern era. The book is interdisciplinary in approach and intended for nonspecialists.

Victory Motorcycles 1998-2017-Michael Dapper 2018-04 With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, The Victory Motorcycle.

NASA's First 50 Years Historical Perspectives-Steven J. Dick 2010-08-20 Fifty years after the founding of NASA, from 28 to 29 October 2008, the NASA History Division convened a conference whose purpose was a scholarly analysis of NASA's first 50 years. Over two days at NASA Headquarters, historians and policy analysts discussed NASA's role in aeronautics, human spaceflight, exploration, space science, life science, and Earth science, as well as crosscutting themes ranging from space access to international relations in space and NASA's interaction with the public. The speakers were asked to keep in mind the following questions: What are the lessons learned from the first 50 years? What is NASA's role in American culture and in the history of exploration and discovery? What if there had never been a NASA? Based on the past, does NASA have a future? The results of those papers, elaborated and fully referenced, are found in this 50th anniversary volume. The reader will find here, instantiated in the complex institution that is NASA, echoes of perennial themes elaborated in an earlier volume, *Critical Issues in the History of Spaceflight*. The conference culminated a year of celebrations, beginning with an October 2007 conference celebrating the 50th anniversary of the Space Age and including a lecture series, future forums, publications, a large presence at the Smithsonian Folklife Festival, and numerous activities at NASA's 10 Centers and venues around the country. It took place as the Apollo 40th anniversaries began, ironically still the most famous of NASA's achievements, even in the era of the Space Shuttle, International Space Station (ISS), and spacecraft like the Mars Exploration Rovers (MERs) and the Hubble Space Telescope. And it took place as NASA found itself at a major crossroads, for the first time in three decades transitioning, under Administrator Michael Griffin, from the Space Shuttle to a new Ares launch vehicle and Orion crew vehicle capable of returning humans to the Moon and proceeding to Mars in a program known as Constellation. The Space Shuttle, NASA's launch system since 1981, was scheduled to wind down in 2010, freeing up

funds for the new Ares launch vehicle. But the latter, even if it moved forward at all deliberate speed, would not be ready until 2015, leaving the unsettling possibility that for at least five years the United States would be forced to use the Russian Soyuz launch vehicle and spacecraft as the sole access to the ISS in which the United States was the major partner. The presidential elections a week after the conference presaged an imminent presidential transition, from the Republican administration of George W. Bush to (as it turned out) the Democratic presidency of Barack Obama, with all the uncertainties that such transitions imply for government programs. The uncertainties for NASA were even greater, as Michael Griffin departed with the outgoing administration and as the world found itself in an unprecedented global economic downturn, with the benefits of national space programs questioned more than ever before. There was no doubt that 50 years of the Space Age had altered humanity in numerous ways ranging from applications satellites to philosophical world views. Throughout its 50 years, NASA has been fortunate to have a strong sense of history and a robust, independent, and objective history program to document its achievements and analyze its activities. Among its flagship publications are Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program, of which seven of eight projected volumes were completed at the time of the 50th anniversary. The reader can do no better than to turn to these volumes for an introduction to NASA history as seen through its primary documents. The list of NASA publications at the end of this volume is also a testimony to the tremendous amount of historical research that the NASA History Division has sponsored over the last 50 years, of which this is the latest volume.

License to Pawn-Rick Harrison 2011 "NON-FICTION -- Full of colorful characters and the fascinating wheeling and dealings of the pawn shop Rick Harrison owns and runs with his father and his son, UNTITLED is a tie-in to Pawn Stars, one of the most popular shows on all of cable. It will take readers behind the scenes of Harrison's family-run pawn shop and bring its lovable cast to vivid life on the page.

But it will also present Harrison's amazing personal story. While he registered a near-200 IQ at an early age, Rick developed a similarly uncanny ability to find ever-deepening trouble that nearly ruined his life. Yet the birth of his son and a reconnection with his father would bring Harrison peace at a time of desperation and, together, they would build the booming business where The Antiques Road Show meets American Chopper and millions of viewers--and potential readers--find they cannot get enough"--
