Elder Law in Maryland-Jason A. Frank 2020-11-20 Encompasses Uniform Federal Law and the Unique Aspects of Maryland Law Even more than most areas of the law, elder law tends to be state specific. In Maryland, long-term medical care regulations, health care decision making, and guardianship are just a few of the areas in which state law cannot be subsumed in general statements of majority rules or hornbook law. Yet, at the same time, uniform federal law governs Social Security issues and various consumer protection statutes and housing assistance programs. Elder Law in Maryland provides guidance to both applicable federal law and the unique aspects of Maryland elder law. Practical, Comprehensive Guidance for the Maryland Practitioner In a single, concise volume, Elder Law in Maryland accurately renders elder law as it currently exists in Maryland. It addresses the nexus between senior citizens and the law at those points most relevant to the legal practitioner specifically and to those serving seniors generally. Using this book as a guide, you can feel confident that you are considering all the options when planning for medical, financial, and quality of life decisions. In keeping with its practical focus, Elder Law in Maryland contains forms and documents conforming to Maryland law, texts of landmark cases, and checklists of essential elements for both office and courtroom. Assisted Living-Sheryl Zimmerman 2003-06-10 With the number of elderly persons needing long-term care expected to double to 14 million over the next two decades, assisted living has become the popular choice for housing or care. Assisted living represents a promising model of long-term care that blurs the sharp distinction between nursing homes and community-based care and reduces the gap between receiving long-term care in one's own home and in an "institution." Assisted Living: Needs, Practices, and Policies in Residential Care for the Elderly examines the evolving field of residential care and focuses on national issues of regulation, reimbursement, and staffing. The book is based on a four-state study of assisted living facilities and describes the facilities, the persons residing in them and their needs, and how the services vary by facility. Because one-third to two-thirds of residents in assisted living facilities have cognitive impairment, special attention is devoted to dementia care. The book also focuses on how today's long-term health care environment evolved, and it examines the future direction and implications of assisted living. Assisted Living: Needs, Practices, and Policies in Residential Care for the Elderly brings together a group of nationally recognized experts to help define the types of residential care that should be encouraged and sets guidelines for selecting an appropriate type of facility. -- Susan Daggett
