Powers of Exclusion-Derek Hall 2011 Questions of who can access land and who is excluded from it underlie many recent social and political conflicts in Southeast Asia. Powers of Exclusion examines the key processes through which shifts in land relations are taking place, notably state land allocation and provision of property rights, the dramatic expansion of areas zoned for conservation, booms in the production of export-oriented crops, the conversion of farmland to post-agrarian uses, "intimate" exclusions involving kin and co-villagers, and mobilizations around land framed in terms of identity and belonging. In case studies drawn from seven countries, the authors find that four "powers of exclusion"--regulation, the market, force and legitimization--have combined to shape land relations in new and often surprising ways. Land debates are often presented as a conflict between market-oriented land use with full private property rights on the one side, and equitable access, production for subsistence, and respect for custom on the other. The authors step back from these debates to point out that any productive use of land requires the exclusion of some potential users, and that most projects for transforming land relations are thus accompanied by painful dilemmas. Rather than counterposing "exclusion" to "inclusion," the book argues that attention must be paid to who is excluded, how, why, and with what consequences. Powers of Exclusion is a path-breaking book that draws on insights from multiple disciplines to map out the new contours of struggles for land in Southeast Asia. The volume provides a framework for analyzing the dilemmas of land relations across the Global South and beyond.

Kastom, property and ideology-Siobhan McDonnell 2017-03-22 The relationship between customary land tenure and 'modern' forms of landed property has been a major political issue in the 'Spearhead' states of Melanesia since the late colonial period, and is even more pressing today, as the region is subject to its own version of what is described in the international literature as a new 'land rush' or 'land grab' in developing countries. This volume aims to test the application of one particular theoretical framework to the Melanesian version of this phenomenon, which is the framework put forward by Derek Hall, Philip Hirsch and Tania Murray Li in their 2011 book, Powers of Exclusion: Land Dilemmas in Southeast Asia. Since that framework emerged from studies of the agrarian transition in Southeast Asia, the key question addressed in this volume is whether 'land transformations' in Melanesia are proceeding in a similar direction, or whether they take a somewhat different form because of the particular nature of Melanesian political economies or social institutions. The contributors to this volume all deal with this question from the point of view of their own direct engagement with different aspects of the land policy process in particular countries. Aside from discussion of the agrarian transition in Melanesia, particular attention is also paid to the growing problem of land access in urban areas and the gendered nature of landed property relations in this region.

Land's End-Tania Murray Li 2014-08-13 Drawing on two decades of ethnographic research in Sulawesi, Indonesia, Tania Murray Li offers an intimate account of the emergence of capitalist relations among indigenous highlanders who privatized their common land to plant a boom crop, cacao. Spurred by the hope of ending their poverty and isolation, some prospered, while others lost their land and struggled to sustain their families. Yet the winners and losers in this transition were not strangers—they were kin and neighbors. Li's richly peopled account takes the reader into the highlanders' world, exploring the dilemmas they faced as sharp inequalities emerged among them. The book challenges complacent, modernization narratives promoted by development agencies that assume inefficient farmers who lose out in the shift to high-value export crops can find jobs elsewhere. Decades of uneven and often jobless growth in Indonesia meant that for newly landless highlanders, land's end was a dead end. The book also has implications for social movement activists, who seldom attend to instances where enclosure is initiated by farmers rather than coerced by the state or agribusiness corporations. Li's attention to the historical, cultural, and ecological dimensions of this conjuncture demonstrates the power of the ethnographic method and its relevance to theory and practice today.

The Land of Open Graves-Jason De Leon 2015-10-23 In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time—the human consequences of US immigration policy. The Land of Open Graves reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of "Prevention through Deterrence," the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. The Land of Open Graves will spark debate and controversy.

Violent Neoliberalism-S. Springer 2015-03-18 Violent Neoliberalism explores the complex unfolding relationship between neoliberalism and violence. Employing a series of theoretical dialogues on development, discourse and dispossession Cambodia, this study sheds significant empirical light on the vicious implications of free market ideology and practice.

Liquid Power-Erik Swyngedouw 2015-05-01 An examination of the central role of water politics and engineering in Spain's modernization, illustrating water's part in forging, maintaining, and transforming social power.

The Psychosocial Implications of Disney Movies-Lauren Dundes 2019-07-11 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

The Death of Democracy-Benjamin Carter Hett 2018-04-03 A riveting account of how the Nazi Party came to power and how the failures of the Weimar Republic and the shortsightedness of German politicians allowed it to happen. Why did democracy fall apart so quickly and completely in Germany in the 1930s? How did a democratic government allow Adolf Hitler to seize power? In The Death of Democracy, Benjamin Carter Hett answers these questions, and the story he tells has disturbing resonances for our own time. To say that Hitler was elected is too simple. He would never have come to power if Germany's leading politicians had not responded to a spate of populist insurgencies by trying to co-opt him, a strategy that backed them into a corner from which the only way out was to bring the Nazis in. Hett lays bare the misguided confidence of conservative politicians who believed that Hitler and his followers would willingly support them, not recognizing that their efforts to use the Nazis actually played into Hitler's hands. They had willingly given him the tools to turn Germany into a vicious dictatorship. Benjamin Carter Hett is a leading scholar of twentieth-century Germany and a gifted storyteller whose portraits of these feckless politicians show how fragile democracy can be when those in power do not respect it. He offers a powerful lesson for today, when democracy once again finds itself embattled and the siren song of strongmen sounds ever louder.

States and Social Revolutions-Theda Skocpol 2015-09-29 State structures, international forces, and class relations: Theda Skocpol shows how all three combine to explain the origins and accomplishments of social-revolutionary transformations. Social revolutions have been rare but undeniably of enormous importance in modern world history. States and Social Revolutions provides a new frame of reference for analyzing the causes, the conflicts, and the outcomes of such revolutions. It develops a rigorous, comparative historical analysis of three major cases: the French Revolution of 1787 through the early 1800s, the Russian Revolution of 1917 through the 1930s, and the Chinese Revolution of 1911 through the 1960s. Believing that existing theories of revolution, both Marxist and non-Marxist, are inadequate to explain the actual historical patterns of revolutions, Skocpol urges us to adopt fresh perspectives. Above all, she maintains that states conceived as administrative and coercive organizations potentially autonomous from class controls and interests must be made central to explanations of revolutions.

Model Rules of Professional Conduct-American Bar Association. House of Delegates 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

World Social Report 2020-Department of Economic and Social Affairs 2020-02-14 This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

The Will to Improve-Tania Murray Li 2007-04-25 The Will to Improve is a remarkable account of development in action. Focusing on attempts to improve landscapes and livelihoods in Indonesia, Tania Murray Li carefully exposes the practices that enable experts to diagnose problems and devise interventions, and the agency of people whose conduct is targeted for reform. Deftly integrating theory, ethnography, and history, she illuminates the work of colonial officials and missionaries; specialists in agriculture, hygiene, and credit; and political activists with their own schemes for guiding villagers toward better ways of life. She examines donor-funded initiatives that seek to integrate conservation with development through the participation of communities, and a one-billion-dollar program designed by the World Bank to optimize the social capital of villagers, inculcate new habits of competition and choice, and remake society from the bottom up. Demonstrating that the "will to improve" has a long and troubled history, Li identifies enduring continuities from the colonial period to the present. She explores the tools experts have used to set the conditions for reform—tools that combine the reshaping of desires with applications of force. Attending in detail to the highlands of Sulawesi, she shows how a series of interventions entangled with one another and tracks their results, ranging from wealth to famine, from compliance to political mobilization, and from new solidarities to oppositional identities and violent attack. The Will to Improve is an engaging read—conceptually innovative, empirically rich, and alive with the actions and reflections of the targets of improvement, people with their own critical analyses of the problems that beset them.

Intimate Exclusion-Martin Schoenhals 2003 Intimate Exclusion presents a novel and fascinating cultural case study that reconsiders perceptions of race and caste, ethnicity, and nationalism. It richly documents the society of the Nuosu, subsistence agriculturalists living in the high mountains of southwest China, and compares Nuosu society to race and caste in the U.S., India, and apartheid South Africa, to provide a thought-provoking new perspective on the nature and causes of race and racism.

Billionaire Wilderness-Justin Farrell 2021-03-02 "Billionaire Wilderness offers an unprecedented look inside the world of the ultra-wealthy and their relationship to the natural world, showing how the ultra-rich use nature to resolve key predicaments in their lives. Justin Farrell immerses himself in Teton County, Wyoming—both the richest county in the United States and the county with the nation's highest level of income inequality—to investigate interconnected questions about money, nature, and community in the twenty-first century. Farrell draws on three years of in-depth interviews with "ordinary" millionaires and the world's wealthiest billionaires, four years of in-person observation in the community, and original quantitative data to provide comprehensive and unique analytical insight on the ultra-wealthy. He also interviewed low-income workers who could speak to their experiences as employees for and members of the community with these wealthy people. He finds that the wealthy leverage nature to climb even higher on the socioeconomic ladder, and they use their engagement with nature and rural people as a way of creating more virtuous and deserving versions of themselves. Billionaire Wilderness demonstrates that our contemporary understanding of the relationship between the ultra-wealthy and the environment is empirically shallow, and our reliance on reports of national economic trends distances us from the real experiences of these people and their local communities"--

Managing Conflict of Interest in the Public Sector A Toolkit-OECD 2005-08-30 This Toolkit provides non-technical, practical help to enable officials to recognise conflict of interest situations and help them to ensure that integrity and reputation are not compromised.

The Mekong: A Socio-legal Approach to River Basin Development-Ben Boer 2015-12-22 An international river basin is an ecological system, an economic thoroughfare, a geographical area, a font of life and livelihoods, a geopolitical network and, often, a cultural icon. It is also a socio-legal phenomenon. This book is the first detailed study of an international river basin from a socio-legal perspective. The Mekong River Basin, which sustains approximately 70 million people across Cambodia, China, Laos, Myanmar, Thailand and Vietnam, provides a prime example of the socio-legal complexities of governing a transboundary river and its tributaries. The book applies its socio-legal analysis to bring a fresh approach to understanding conflicts surrounding water governance in the Mekong River Basin. The authors describe the wide range of uses being made of legal doctrine and legal argument in ongoing disputes surrounding hydropower development in the Basin, putting to rest lingering caricatures of a single, 'ASEAN' way of navigating conflict. They call into question some of the common assumptions concerning the relationship between law and development. The book also sheds light on important questions concerning the global hybridization or crossover of public and private power and its ramifications for water governance. With current debates and looming conflicts over water governance globally, and over shared rivers in particular, these issues could not be more pressing.

Poverty and Conservation-R. J. Fisher 2005 Despite endorsements of the concept of sustainable development and the linking of sustainable development with the Millennium Development Goals, progress towards the eradication of poverty has been disappointing. The underlying principles of sustainable development need to be more critically and actively applied to both poverty reduction and biodiversity conservation. While recognizing the need for better integration of poverty reduction and conservation objectives by both developmental and conservation agencies, particular attention is paid to the reasons why conservation should do better in contributing to long-term sustainable development and more immediately to poverty reduction.

Large-Scale Land Acquisitions-Christophe Gironde 2015-10-01 Large-scale land acquisitions, or 'land grabbing', has become a key research topic among scholars interested in agrarian change, development, and the environment. The term 'land acquisitions' refers to a highly contested process in terms of governance and impacts on livelihoods and human rights. Focusing on South-East Asia, this book presents a series of thematic papers and detailed case studies to put this phenomenon into specific historical and institutional contexts.

The Paradox of Power-David C. Gompert 'This book confronts the paradox that as power grows, so can vulnerability. The basic reason for this is that the same factors that produce modern power –technological advancement and economic integration – also increase exposure to risk. The book suggests a way to mitigate U.S. and Chinese strategic vulnerabilities to each other. It is written from an American perspective, with U.S. interests foremost in mind. It 's core idea is that mutual strategic vulnerability calls for mutual strategic restraint. Testimonials: In an era where the development of new technologies threatens to outstrip strategic doctrine, David Gompert and Phil Saunders offer a searching mediation on issues at the forefront of security. Policymakers on both sides of the Pacific will find much to consider iin this timely and important book" –Henry Kissinger "In this book, David Gompert and Phil Saunders make an important contribution to American strategic thinking and to the future of U.S.-China relations. Grounded in the international experience in nuclear deterrence yet fresh and novel, their recommendations for mutual strategic restraint in space and cyber relationships between the two countries are deep and compelling. Gompert and Saunders take a new look and come up with a practical way forward in areas that are difficult, important, sensationalized and little understood. Both interested citizens and government specialists and policymakers will benefit from their work." –ADM Dennis Blair, USN (Ret.) former Director of National Intelligence and commander, U.S. Pacific Command The Dilemmas of Engagement-Jenny Stewart 2009-06-01 ` Consultation¿ has become something of a mantra in contemporary governance. Governments well understand that policy occurs in a highly contestable environment in which there are multiple, and often competing interests. They well recognise the political imperative to `engage¿ stakeholders in order to manage potential conflict and, hopefully, obtain acceptance for their policies and programs. As a result, politicians and public officials frequently emphasise the need for consultation as an essential element of the deliberative processes underpinning the development of policy or the implementation of programs and services. But, moving beyond the rhetoric of consultation and engagement, how well is it done? In this monograph, Professor Jenny Stewart maps out the principal approaches used by governments to consult with and engage affected communities of interest. Stewart critically assesses the available literature and draws directly upon the experiences of political actors, bureaucrats and community sector organisations in order to identify the `good, bad, and the ugly¿ of engagement. Through a judicious use of selected case studies, Stewart distils the essential dilemmas and contradictions inherent in many consultation strategies and highlights their relative strengths and weaknesses. This monograph is a probing and dispassionate analysis of the rationales, methodologies and outcomes of consultation and engagement. It is not intended to be a `cookbook¿ or a `how to¿ manual for those consulting or the consulted. Nevertheless, there is much here for the policy practitioner, the researcher and members of those `communities of interest¿ who might, one day, find themselves the target of engagement.

Sinophone Studies-Shu-mei Shih 2013-01-15 This definitive anthology casts Sinophone studies as the study of Sinitic-language cultures born of colonial and postcolonial influences. Essays by such authors as Rey Chow, Ha Jin, Leo Ou-fan Lee, Ien Ang, Wei-ming Tu, and David Wang address debates concerning the nature of Chineseness while introducing readers to essential readings in Tibetan, Malaysian, Taiwanese, French, Caribbean, and American Sinophone literatures. By placing Sinophone cultures at the crossroads of multiple empires, this anthology richly demonstrates the transformative power of multiculturalism and multilingualism, and by examining the place-based cultural and social practices of Sinitic-language communities in their historical contexts beyond "China proper," it effectively refutes the diasporic framework. It is an invaluable companion for courses in Asian, postcolonial, empire, and ethnic studies, as well as world and comparative literature.

Overcoming Agricultural and Food Crises in Ethiopia-Getachew Diriba 2018-03-08 Overcoming Agricultural and Food Crises in Ethiopia is a sobering presentation of the crises of smallholder agriculture, food and nutrition, the environment and the impending threats to the survival and well-being of millions of Ethiopians and the nation. The combination of the obsolete systems on the one hand, with a growing young population, sustained decline of agricultural land per capita, unstructured urbanization and absence of rural industrialization on the other, presents a grim prospect for the contemporary Ethiopian state builders. The book seeks to call on political leaders, policymakers, scholars, business people, religious and moral authorities, farmers, and the general public to urgently mobilize bold vision and action to redress the crises. About the Author: Getachew Diriba was born and raised in rural Ethiopia like most of his contemporaries. He graduated from Haramaya College of Agriculture, attended a post-graduate program at the University of Dortmund, Germany, and obtained a Doctoral degree in agricultural economics from the School of Development Studies of the University of East Anglia, the United Kingdom. He worked as extension program officer and Project Manager of the Kobo Alamata Agricultural Development Project in Northeastern Ethiopia; Program Manager for CARE Ethiopia; Regional Adviser for Southern and Eastern Africa for CARE International. He also worked for the United Nations World Food Program in Vulnerability Analysis and Mapping for the Southern, the Great Lakes, and the Central Africa Regions; Head of Program in the Republic of the Sudan, Regional Program Adviser for the Middle East and Central Europe, Director of the Partnerships and Capacity Development Service at Headquarters, Country Director and Representative in the Republic of Liberia, and Country Director and Representative in the People's Republic of China, in which he established the China Center of Excellence for WFP. He retired from WFP in early 2017.

Land-Derek Hall 2013-04-03 Land is one of the world's most emotionally resonant resources, and control over it is fundamental to almost all human activity. From the local level to the global, we are often in conflict over the ground beneath our feet. But because human relationships to land are so complex, it can be difficult to think them through in a unified way. This path-breaking book aims to change that by combining insights from multiple disciplines to develop a framework for understanding the geopolitics of land today. Struggles over land, argues Derek Hall, relate to three basic principles: its role as territory, its status as property, and the ways in which its use is regulated. This timely introduction explores key dimensions of these themes, including inter-state wars over territory, the efforts of non-governmental organizations to protect property rights and environments in the global South, and the 'land grabs' attempted by contemporary corporations and governments. Drawing on a wide range of cases and examples - from the Afghanistan-Pakistan border to the Canadian Arctic, China's urban fringe to rural Honduras - the book provides new ways of thinking about the political dynamics of land in the 21st century. This richly detailed and authoritative guide will be of interest to students across the social sciences, as well as anyone interested in current affairs and contemporary geopolitics.

Refiguring Women, Colonialism, and Modernity in Burma-Chie Ikeya 2011-01-31 Refiguring Women, Colonialism, and Modernity in Burma presents the first study of one of the most prevalent and critical topics of public discourse in colonial Burma: the woman of the *khit kala*—"the woman of the times"—who burst onto the covers and pages of novels, newspapers, and advertisements in the 1920s. Educated and politicized, earner and consumer, "Burmese" and "Westernized," she embodied the possibilities and challenges of the modern era, as well as the hopes and fears it evoked. In Refiguring Women, Chie Ikeya interrogates what these shifting and competing images of the feminine reveal about the experience of modernity in colonial Burma. She marshals a wide range of hitherto unexamined Burmese language sources to analyze both the discursive figurations of the woman of the *khit kala* and the choices and actions of actual women who—whether pursuing higher education, becoming political, or adopting new clothes and hairstyles—unsettled existing norms and contributed to making the woman of the *khit kala* the privileged idiom for debating colonialism, modernization, and nationalism. The first book-length social history of Burma to utilize gender as a category of sustained analysis, Refiguring Women challenges the reigning nationalist and anticolonial historical narratives of a conceptually and institutionally monolithic colonial modernity that made inevitable the rise of ethnonationalism and xenophobia in Burma. The study demonstrates the irreducible heterogeneity of the colonial encounter and draws attention to the conjoined development of cosmopolitanism and nationalism. Ikeya illuminates the important roles that Burmese men and women played as cultural brokers and agents of modernity. She shows how their complex engagements with social reform, feminism, anticolonialism, media, and consumerism rearticulated the boundaries of belonging and foreignness in religious, racial, and ethnic terms. Refiguring Women adds significantly to examinations of gender and race relations, modernization, and nationalism in colonized regions. It will be of interest to a broad audience—not least those working in the fields of Southeast Asian studies, colonial and postcolonial studies, cultural studies, and women's and gender studies.

Institutions and Democracy in Africa-Nic Cheeseman 2018-02-22 Historically, African political institutions such as constitutions, legislatures and judiciaries have been seen as weak and vulnerable to manipulation, leading some to claim that the continent is 'institutionless'. However, recent developments including the consolidation of presidential term limits in a number of countries demonstrate that this depiction is no longer tenable. By drawing attention to how institutions can shape the practice of politics, this book demonstrates that electoral commissions, economic regulations and systems of land tenure are vital to our understanding of contemporary Africa. A series of cutting-edge contributions from leading scholars explain how the rules of the game shape political developments across the continent, from Kenya to Nigeria and from Benin to South Africa. In chapters that cover bureaucracies, constitutions, elections, political parties, the police and more, the authors argue that a new research agenda is required if we are to better understand the process of democratisation.

Hillbilly Elegy-J. D. Vance 2018-05-01 THE #1 NEW YORK TIMES BESTSELLER IS NOW A MAJOR-MOTION PICTURE DIRECTED BY RON HOWARD AND STARRING AMY ADAMS, GLENN CLOSE, AND GABRIEL BASSO "You will not read a more important book about America this year."—The Economist "A riveting book."—The Wall Street Journal "Essential reading."—David Brooks, New York Times Hillbilly Elegy is a passionate and personal analysis of a culture in crisis—that of white working-class Americans. The disintegration of this group, a process that has been slowly occurring now for more than forty years, has been reported with growing frequency and alarm, but has never before been written about as searingly from the inside. J. D. Vance tells the true story of what a social, regional, and class decline feels like when you were born with it hung around your neck. The Vance family story begins hopefully in postwar America. J. D.'s grandparents were "dirt poor and in love," and moved north from Kentucky's Appalachia region to Ohio in the hopes of escaping the dreadful poverty around them. They raised a middle-class family, and eventually one of their grandchildren would graduate from Yale Law School, a conventional marker of success in achieving generational upward mobility. But as the family saga of Hillbilly Elegy plays out, we learn that J.D.'s grandparents, aunt, uncle, sister, and, most of all, his mother struggled profoundly with the demands of their new middle-class life, never fully escaping the legacy of abuse, alcoholism, poverty, and trauma so characteristic of their part of America. With piercing honesty, Vance shows how he himself still carries around the demons of his chaotic family history. A deeply moving memoir, with its share of humor and vividly colorful figures, Hillbilly Elegy is the story of how upward mobility really feels. And it is an urgent and troubling meditation on the loss of the American dream for a large segment of this country.

America's Energy Future-National Research Council 2010-01-15 For multi-user PDF licensing, please contact customer service. Energy touches our lives in countless ways and its costs are felt when we fill up at the gas pump, pay our home heating bills, and keep businesses both large and small running. There are long-term costs as well: to the environment, as natural resources are depleted and pollution contributes to global climate change, and to national security and independence, as many of the world's current energy sources are increasingly concentrated in geopolitically unstable regions. The country's challenge is to develop an energy portfolio that addresses these concerns while still providing sufficient, affordable energy reserves for the nation. The United States has enormous resources to put behind solutions to this energy challenge; the dilemma is to identify which solutions are the right ones. Before deciding which energy technologies to develop, and on what timeline, we need to understand them better. America's Energy Future analyzes the potential of a wide range of technologies for generation, distribution, and conservation of energy. This book considers technologies to increase energy efficiency, coal-fired power generation, nuclear power, renewable energy, oil and natural gas, and alternative transportation fuels. It offers a detailed assessment of the associated impacts and projected costs of implementing each technology and categorizes them into three time frames for implementation.

Women & Power-Mary Beard 2017-11-02 An updated edition of the Sunday Times Bestseller Britain's best-known classicist Mary Beard, is also a committed and vocal feminist. With wry wit, she revisits the gender agenda and shows how history has treated powerful women. Her examples range from the classical world to the modern day, from Medusa and Athena to Theresa May and Hillary Clinton. Beard explores the cultural underpinnings of misogyny, considering the public voice of women, our cultural assumptions about women's relationship with power, and how powerful women resist being packaged into a male template. A year on since the advent of #metoo, Beard looks at how the discussions have moved on during this time, and how that intersects with issues of rape and consent, and the stories men tell themselves to support their actions. In trademark Beardian style, using examples ancient and modern, Beard argues, 'it's time for change - and now!' From the author of international bestseller SPQR: A History of Ancient Rome.

The Nicomachean Ethics-Aristotle 1996 This work contains Aristotle's views on what makes a good human life. It has served as an influence on the history of ideas and offers insights into the human condition.

The Decentralization of Forest Governance-Moira Moeliono 2012-05-31 'This book provides an excellent overview of more than a decade of transformation in a forest landscape where the interests of local people, extractive industries and globally important biodiversity are in conflict. The studies assembled here teach us that plans and strategies are fine but, in the real world of the forest frontier, conservation must be based upon negotiation, social learning and an ability to muddle through.' Jeffrey Sayer, senior scientific adviser, Forest Conservation Programme IUCN - International Union for of Nature The devolution of control over the world's forests from national or state and provincial level governments to local control is an ongoing global trend that deeply affects all aspects of forest management, conservation of biodiversity, control over resources, wealth distribution and livelihoods. This powerful new book from leading experts provides an in-depth account of how trends towards increased local governance are shifting control over natural resource management from the state to local societies, and the implications of this control for social justice and the environment. The book is based on ten years of work by a team of researchers in Malinau, Indonesian Borneo, one of the world's richest forest areas. The first part of the book sets the larger context of decentralization's impact on power struggles between the state and society. The authors then cover in detail how the devolution process has occurred in Malinau, the policy context, struggles and conflicts and how Malinau has organized itself. The third part of the book looks at the broader issues of property relations, conflict, local governance and political participation associated with decentralization in Malinau. Importantly, it draws out the salient points for other international contexts including the important determination that 'local political alliances', especially among ethnic minorities, are taking on greater prominence and creating new opportunities to influence forest policy in the world's richest forests from the ground up. This is top-level research for academics and professionals working on forestry, natural resource management, policy and resource economics worldwide. Published with CIFOR

The Power Threat Meaning Framework-Lucy Johnstone 2020-11-20 This is an overview of The Power Threat Meaning Framework, which is a new perspective on why people sometimes experience a whole range of forms of distress, confusion, fear, despair, and troubled or troubling behaviour. It is an alternative to the more traditional models based on psychiatric diagnosis. It was co-produced with service users and applies not just to people who have been in contact with the mental health or criminal justice systems, but to all of us. The Framework summarises and integrates a great deal of evidence about the role of various kinds of power in people's lives; the kinds of threat that misuses of power pose to us; and the ways we have learned as human beings to respond to threat. In traditional mental health practice, these threat responses are sometimes called 'symptoms'. The Framework also looks at how we make sense of these difficult experiences, and how messages from wider society can increase our feelings of shame, self-blame, isolation, fear and guilt. This overview publication is structured as follows: Part 1: Summary of the PTM Framework, its core principles, purposes and scope. This brief summary orients the reader to the main features of the PTM Framework. Part 2: Summary of theory and research underpinning the PTM Framework. This briefly recaps some of the conclusions from the literature on the role of factors from various fields, including biological, psychological, social, political and cultural, in the origins and persistence of emotional distress and troubling behaviour. Part 3: The Power Threat Meaning Framework. This demonstrates how theory and research can be used to support a meta-approach, the Power Threat Meaning Framework. The relationship between the various elements of the PTM Framework is illustrated through the Foundational Power Threat Meaning Pattern. Part 4: Provisional General Patterns arising out of the Foundational Pattern. Some General Patterns that emerge from the Foundational Power Threat Meaning Pattern are outlined. These patterns can be used as a basis and resource for the co-construction of new personal and social narratives, as well as suggesting alternatives to diagnosis for service delivery/administrative/legal/service planning/research and related purposes. Part 5: Personal narratives within the Power Threat Meaning Framework. The role, purpose and possible formats of personal narratives within the PTM Framework are illustrated and discussed, along with options for non-medical language use.

The Noncommissioned Officer and Petty Officer-Martin E. Martin E. Dempsey 2015-03-18 A first of its kind, this book-of, by, and for the noncommissioned officer and petty officer-is a comprehensive explanation of the enlisted leader across the U.S. Armed Services. It complements The Armed Forces Officer, the latest edition of which was published by NDU Press in 2007, as well as the Services' NCO/PO manuals and handbooks. Written by a team of Active, Reserve, and retired senior enlisted leaders from all Service branches, this book defines and describes how NCOs/POs fit into an organization, centers them in the Profession of Arms, explains their dual roles of complementing the officer and enabling the force, and exposes their international engagement. As Chairman of the Joint Chiefs of Staff General Martin E. Dempsey writes in his foreword to the book, "We know noncommissioned officers and petty officers to have exceptional competence, professional character, and soldierly grit-they are exemplars of our Profession of Arms." Aspirational and fulfilling, this book helps prepare young men and women who strive to become NCOs/POs, re-inspires serving enlisted leaders, and stimulates reflection by those who have retired from or left active service. It also gives those who have never worn the uniform a better understanding of who these exceptional men and women are, and why they are properly known as the "Backbone of the Armed Forces."

Colonial Capitalism and the Dilemmas of Liberalism-Onur Ulas Ince 2018-03-16 By the mid-nineteenth century, Britain celebrated its possession of a unique "empire of liberty" that propagated the rule of private property, free trade, and free labor across the globe. The British also knew that their empire had been built by conquering overseas territories, trading slaves, and extorting tribute from other societies. Set in the context of the early-modern British Empire, Colonial Capitalism and the Dilemmas of Liberalism paints a striking picture of these tensions between the illiberal origins of capitalism and its liberal imaginations in metropolitan thought. Onur Ulas Ince combines an analysis of political economy and political theory to examine the impact of colonial economic relations on the development of liberal thought in Britain. He shows how a liberal self-image for the British Empire was constructed in the face of the systematic expropriation, exploitation, and servitude that built its transoceanic capitalist economy. The resilience of Britain's self-image was due in large part to the liberal intellectuals of empire, such as John Locke, Edmund Burke, and Edward Gibbon Wakefield, and their efforts to disavow the violent transformations that propelled British colonial capitalism. Ince forcefully demonstrates that liberalism as a language of politics was elaborated in and through the political economic debates around the contested meanings of private property, market exchange, and free labor. Weaving together intellectual history, critical theory, and colonial studies, this book is a bold attempt to reconceptualize the historical relationship between capitalism, liberalism, and empire in a way that continues to resonate with our present moment.
