Rhythms of Learning-Rudolf Steiner 1998 Key lectures on children and education have been thoughtfully

chosen from the vast amount of material by Steiner and presented in a context that makes them approachable and accessible. In his many discussions and lectures, Steiner shared his vision of an education that considers the spirit, soul, and physiology in children as they grow.

Understanding Waldorf Education-Jack Petrash 2010-03 Written by a teacher with more than 25 years of experience, this book offers a jargon-free view of Waldorf education and its philosophy of the importance of a three-dimensional education. Through learning experiences that involve all of the senses, children use a variety of intelligences to develop thought, feeling, and intentional, purposeful activity. Whether you're Waldorf parent or teacher, or you just want to learn more about these innovative educational concepts, this book contains important ideas on learning that you can apply today.

Rhythm & Waldorf Homeschool Planning-Melisa Nielsen 2017-03-12 Compiling this book made me smile. It is full of several years of parenting. As I edited this together, I relived some of the years when my children were younger. The wisdom I share here is real. It is palpable. Breathe it in. Take what resonates and set aside the rest to ponder. I hope this volume gives you tools and peace as you walk this journey. I have written to you, the mom in the trenches from experience in my own trenches. These are moments to savor and moments to learn and grow from. This mom thing isn't easy but it is worth it.

Heaven on Earth-Sharifa Oppenheimer 2006-08 As we see a shift of old forms that were once the foundations of our daily lives, parents--who must prepare the next generation to meet the changing world--have more questions today than ever before. Although our cultural values and family structures may change, it is the atmosphere in the home that continues to form the foundation of a child's life. In Heaven

on Earth, parent and educator Sharifa Oppenheimer reveals how parents can make the home environment warm, lively, loving, and consistent with their highest ideals. Heaven on Earth balances a theoretical understanding of child development with practical ideas, resources, and tips that can transform family life. Readers will learn how to create the regular life rhythms needed to establish a foundation for learning; how to design indoor play environments that allow children the broadest development of skills; and how to create outdoor play spaces that encourage vigorous movement and a wide sensory palette. Through art, storytelling, and the festival celebrations, this book is an invaluable guide to building a "family culture" based on the guiding principle of love--a culture that supports children and encourages the free development of each unique soul. Sharifa Oppenheimer offers a gift from the heart. Heaven on Earth is a practical, inspiring resource that brings the author's informed, intuitive understanding of young children into the heart of the home. "Sharifa Oppenheimer has given the world a great gift in the pages of this book. The important child-development information is exquisitely combined with the best 'How-to's' I have seen in any book for parents. Her book, is a ready guide that insures joyful, enthusiastic children who learn easily and contribute to their families and society for a lifetime. I have delighted in every page and feel this is absolutely A must read for parents, grandparents, teachers, and perhaps everyone who will ever touch the life of a child." --Carla Hannaford, Ph.D., biologist and international educational consultant to 32 countries and author of Smart Moves: Why Learning Is Not All in Your Head and Awakening the Child Heart, Handbook for Global Parenting "This delightful book will be a wonderful resource for parents. They will certainly appreciate its warm, friendly, personal, and reassuring tone. I would have loved such a book when I was a young mother! For those whose children already attend Waldorf programs, it provides a helpful resource for creating a bridge between home and kindergarten. For others, this lovely book offers wonderful glimpses into the wise and nurturing practices of Waldorf early childhood education. In a world where childhood is increasingly 'media'ted and 'adult'erated, this book offers much-needed support for the protection of childhood. " --Susan Howard, chairperson, Waldorf Early Childhood Association of

North America and coordinator, International Association for Steiner/Waldorf Early Childhood Education "Being a parent is a challenging assignment, but with the help of Sharifa Oppenheimer's book, Heaven on Earth, our work immediately becomes easier. This book is both heartfelt and practical. It offers sound parenting principles with down-to-earth examples of how to raise children with both insight and grace." -- Jack Petrash, director, Nova Institute, and author, Navigating the Terrain of Childhood: A Guidebook for Meaningful Parenting and Heartfelt Discipline

Faculty Meetings with Rudolf Steiner-Rudolf Steiner 1998-09-01 The Waldorf School movement has its roots in the chaotic period following the First World War. Struggling to create the first school, Rudolf Steiner worked on every detail. Lesson plans, religious education, school hours, course resources, administration, finance, child study; no aspect of school life was beyond his attention. Guiding the faculty and demonstrating a phenomenal range of knowledge, Steiner moved toward his goal of creating a vehicle for social transformation. These two volumes span the years 1919 to 1924 and cover, meeting by meeting, the development of the first Waldorf School. Here is Rudolf Steiner, not through the written word or lectures but in transcribed interaction that details the creation process. Participating in a work in progress, Steiner deals with an amazing array of problems, frustrations, successes and failures. His sleeves rolled up and his sight on a vision that he made a reality, Rudolf Steiner lays the foundations of Waldorf Education. This detailed look, behind the scenes, will interest not only teachers, but also parents and students: anyone who wants to know how a successful worldwide school movement arose.

Work and Play in Early Childhood-Freya Jaffke 1996 Rhythm and repetition, together with example and

imitation, are pillars on which early learning is based. Freya Jaffke applies these simple principles in practical and sensible ways. She describes children's play in a Steiner-Waldorf kindergarten setting, and provides tried and tested advice on this important stage of development. This book includes sections on Planning the day; Festivals; Rhythms; Materials; Educating the Will; Imagination; Spontaneous and Planned Play; Example and imitation of adults; Stages of development; From crawling to contrariness; Work and play; Craft and handicraft; Creating a protective environment; Hyperactive and inactive children.

Thy Will Be Done-Roberto Trostli 2017-08-15 In Waldorf schools around the world, teachers gather in a collegiate way to discuss the school and the children entrusted to them, seeking to ground the school as a place of both material and spiritual education. These circles are called the 'College of Teachers', and are places where teachers work actively, collaboratively and meditatively on finding the best approach for each child. This important book describes the practices and task of the College of Teachers with clarity and insight, shedding light on this unique aspect of Waldorf education.

The Foundations of Human Experience-Rudolf Steiner 1996 Formerly entitled The Study of Man this lecture course, newly translated for this series, contains some of the most remarkable and significant lectures ever given by Rudolf Steiner.

Holistic Education and Embodied Learning-John P. Miller 2017-03-01 Learning often begins with an experience in the body. Our body can tighten or feel expansive depending on different learning contexts. This experience of learning in the body is crucial to holistic education. This book explores embodied learning from several perspectives. This first section explores how psychology can inform us about embodied learning; for example, the work of Carl Jung and Wilhelm Reich devoted much of their thinking to how energy manifests itself in the body. Meditation and movement are also examined as ways of embodied learning; for example, Dalcroze, a form of movement education, is presented within the context

of whole person education. The book also presents schools where embodied learning is nurtured. Waldorf education is discussed as well as a public school in Toronto where the body is central to holistic education. The book also presents visions of embodied learning. John Miller presents a holistic vision of teacher education and Tobin Hart, who has written extensively in this field, writes about the embodied mind. Embodied learning is an emerging area of inquiry in holistic education and this book presents a variety of perspectives and practices that should be helpful to both scholars and practitioners.

Practical Advice to Teachers-Rudolf Steiner 2000-06-01 How do Waldorf teachers put their educational ideals into practice in the classroom? How does a teacher connect geography and art and language in a way that enlivens the souls of children? What does a child's respect for the teacher mean for later life? These are only a few practical aspects of this initial course for Waldorf teachers. During an intensive two weeks, Rudolf Steiner gave three simultaneous educational courses to those who would be the first teachers of the original Waldorf school. One course provided the foundational ideas behind Waldorf education (The Foundations of Human Experience); another provided a forum for questions and lively discussions on specific issues in the classroom (Discussions with Teachers). In this course, Steiner takes the middle-path by integrating theory and practice. Here Steiner spoke of new ways to teach reading, writing, geography, geometry, language, and much more. His approach is tailored to the spiritual and physical needs of the children themselves, not to an arbitrary curriculum based solely on external results. At a time when public education is in a state of crisis, this book describes how children around the world are being guided into adulthood with a fuller sense of themselves and with a creative approach to life and the world around them.

Waldorf Parenting Handbook-Lois Cusick 1984 The author put her experiences together with those of Waldorf school teachers and schools, as well as anthroposophic doctors and psychiatrists. Although each Waldorf school teacher and school is different from every other in numerous ways, this guide offers an impressionistic collage that provides food for thought for all parents of existing and prospective Waldorf

students.

The stories also have the potential for nurturing positive values.

The Education of the Child-Rudolf Steiner 1996-05-01 As early as 1884, while tutoring a boy with special needs, Steiner began a lifelong interest in applying spiritual knowledge to the practical aspects of life. Steiner originally published the essay at the core of this book in 1907. It represents his earliest ideas on education, in which he lays out the soul spiritual processes of human development, describing the need to understand how the being of a child develops through successive births, beginning with the physical body's entry into earthly life, and culminating in the emergence of the I-being with adulthood. Also included here are several early lectures on education (1906 1911). Contents: The Education of the Child in the Light of Spiritual Science, essay Teaching from a Foundation of Spiritual Insight, Berlin, May 14, 1906 Education in the Light of Spiritual Science, Cologne, December 1, 1906 Education and Spiritual Science, Berlin, January 24, 1907 Interests, Talent, and Educating Children, Nuremberg, November 14, 1910 Interests, Talent, and Education, Berlin, January 12, 1911 "

Pedagogies of the Imagination-Timothy Leonard 2008-06-11 I have long admired the mythopoetic tradition in curriculum studies. That admiration followed from my experience as a high-school teacher of English in a wealthy suburb of New York City at the end of the 1960s. A “dream” job—I taught four classes of 15-20 students during a nine-period day—in a “dream” suburb (where I could afford to reside only by taking a room in a retired teacher’s house), many of these often Ivy-League-bound students had everything but meaningful lives. This middle-class, Midwestern young teacher was flabbergasted. In one sense, my academic life has been devoted to understanding that searing experience. Matters of meaning seemed paramount in the curriculum field to which Paul Klohr introduced me at Ohio State. Klohr assigned me the work of curriculum theorists such as James B. Macdonald. Like Timothy Leonard (who also studied with Klohr at Ohio State) and Peter Willis, Macdonald (1995) understood that school reform was part of a broader cultural and political crisis in which meaning is but one casualty. In the mythopoetic tradition in curriculum studies, scholars labor to understand this crisis and the conditions for the reconstruction of

me- ing in our time, in our schools.

Metamorphoses of the Soul-Rudolf Steiner 2020-07-14 This vintage book contains a collection of fascinating lectures by Rudolf Steiner. They chiefly concern the goals of spiritual science and the concepts of truth, anger, and reverence. The lectures also deal with the exploration of the human condition, egoism, asceticism and illness, and Buddha and Christ. This volume is highly recommended for those with an interest in philosophy and the work of Rudolf Steiner. Rudolf Joseph Lorenz Steiner (1861-1925) was an Austrian author, philosopher and esotericist. The lectures include: "The Mission of Spiritual Science", "The Mission of Anger", "The Mission of Truth", "The Mission of Reverence", "Human Character", "Asceticism and Illness", "Human Egoism", "Buddha and Christ", and "Something about the Moon in the Light of Spiritual Science". Many vintage books such as this are increasingly scarce and expensive. We are republishing this volume now in an affordable, modern edition complete with a specially commissioned new introduction.

Rudolf Steiner in the Waldorf School-Rudolf Steiner 1996 Lectures and addresses, 1919-1924 (CW 298)

"Ultimately, isn't it a very holy and religious obligation to cultivate and educate the divine spiritual element that manifests anew in every human being who is born? Isn't this educational service a religious service in the highest sense of the word? Isn't it so that our holiest stirrings, which we dedicate to religious feeling, must all come together in our service at the altar when we attempt to cultivate the divine spiritual aspect of the human being, whose potentials are revealed in the growing child? Science that comes alive! Art that comes alive! Religion that comes alive! In the end, that's what education is." --Rudolf Steiner, Sept. 7, 1919 ∞ ∞ ∞ Sponsored by the industrialist Emil Molt and inspired by the philosopher Rudolf Steiner, the first Free Waldorf school opened in Stuttgart, Germany, on September 7, 1919. Since then, the Waldorf movement has become international with many hundreds of schools around the world. This book contains all of the more-or-less informal talks given by Steiner in the Stuttgart school from 1919 to 1924. Included are speeches given by him at various school assemblies, parents' evenings, and other meetings. Steiner spoke here with spontaneity, warmth, and enthusiasm. Readers will find a unique glimpse of the real Steiner and how he viewed the school and the educational philosophy he brought into being. German source: Rudolf Steiner in der Waldorfschule, Vorträge und Ansprachen, Stuttgart, 1919-1924 (GA 298).

Education for Adolescents-Rudolf Steiner 1996-09-01 In these eight talks on education for adolescent-aged young people, Steiner addressed the teachers of the first Waldorf school two years after it was first opened. A high school was needed, and Steiner wanted to provide a foundation for study and a guide for teachers already familiar with his approach to the human being, child development, and education based on spiritual science. Steiner's education affirms the being of every child within the world of spirit. This approach works within the context of the child's gradual entry into earthly life, aided by spiritual forces, and children's need for an education that cooperates with those forces. Some of Steiner's remarks may be

controversial, but unbiased study will lead to an appreciation of the profound thought and wisdom behind what is presented here.

Arts with the Brain in Mind-Eric Jensen 2001-05-01 Publisher description: This book presents the definitive case, based on what we know about the brain and learning, for making arts a core part of the basic curriculum and thoughtfully integrating them into every subject. Separate chapters address musical, visual, and kinesthetic arts in ways that reveal their influence on learning.

Education Towards Freedom-Frans Carlgren 2008 Education Towards Freedom was first published in 1976, and since then has sold over ten thousand copies in English. When it appeared, there were around 100 Steiner-Waldorf schools throughout the world; now there are almost 1000 schools worldwide, as well as many separate playgroups and kindergartens. During this time, Steiner-Waldorf education has become increasingly known in the mainstream, and increasingly valued for its alternative approaches to children's learning and development. The great breadth and richness of the approach is what has attracted so many parents to its schools and books like Education Towards Freedom have helped them make the informed choice to take a different route for their children. The book covers all aspects of Steiner-Waldorf education and divides it into the pre-school years, the first eight years (starting about age seven), and the last four years (from 14 to 18). There are also sections on the rhythm of the day, specific subjects, the use of textbooks, and school in the modern world.

Miseducation-David Elkind 2010-12-08 Designed to help parents avoid the miseducation of young children. Dr. Elkind shows us the very real difference between the mind of a pre-school child and that of a school age child.
