UNCITRAL Secretariat Guide on the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958)-United Nations Commission on International Trade Law 2017-02-15 The New York Convention has served as the cornerstone of the international arbitration system since its signature in 1958 until the present day. The Guide on the New York Convention provides an insight on the application of the Convention by State courts. It was initiated in 2010 when UNCITRAL commissioned the assistance of Professors Gaillard and Bermann as part of its efforts to promote wider adherence to the text of the New York Convention as well as its uniform interpretation and effective implementation. The interpretation that derives from court decisions of diverse jurisdictions makes the Guide a unique tool to understand the New York Convention, an almost universally adopted text, and to monitor its application.

This guide is mainly designed for legal practitioners.

Guide on the Convention on the Recognition and Enforcement of Foreign Arbitral Awards-UNCITRAL Secretariat 2017-07-17 The Guide on the Convention on the Recognition and Enforcement of Foreign Arbitral Awards provides a detailed analysis of the judicial interpretation and application of the New York Convention by reference to case law from 45 Contracting States. The Guide, and the newyorkconvention1958.org website which supplements it, will become an essential tool that benefits all those involved in the interpretation and application of the New York Convention.

Global Status Report on Road Safety 2018-World Health Organization 2019-01-10 The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.
