Quantum Cryptography and the Future of Cyber Security-Chaubey, Nirbhay Kumar 2020-01-03 The shortcomings of modern cryptography and its weaknesses against computers that are becoming more powerful necessitate serious consideration of more robust security options. Quantum cryptography is sound, and its practical implementations are becoming more mature. Many applications can use quantum cryptography as a backbone, including key distribution, secure direct communications, large prime factorization, e-commerce, e-governance, quantum internet, and more. For this reason, quantum cryptography is gaining interest and importance among computer and security professionals. Quantum Cryptography and the Future of Cyber Security is an essential scholarly resource that provides the latest research and advancements in cryptography and cyber security through quantum applications. Highlighting a wide range of topics such as e-commerce, machine learning, and privacy, this book is ideal for security analysts, systems engineers, software security engineers, data scientists, vulnerability analysts, professionals, academicians, researchers, security professionals, policymakers, and students.

India Transformed-Rakesh Mohan 2018-09-25 In this commemorative volume, India’s top business leaders and economic luminaries come together to provide a balanced picture of the consequences of the country’s economic reforms, which were initiated in 1991. What were the reforms? What were they intended for? How have they affected the overall functioning of the economy? With contributions from Mukesh Ambani, Narayana Murthy, Sunil Mittal, Kiran Mazumdar-Shaw, Shivshankar Menon, Montek Singh Ahluwalia, T.N. Ninan, Sanjya Baru, Naushad Forbes, Omkar Goswami and R. Gopalakrishnan, India Transformed delves deep into the life of an economically liberalized India through the eyes of the people who helped transform it.

Anusual: Memoir of a Girl Who Came Back from the Dead-Anu Aggarwal 2015-07-18 Anusual is the story of Anu Aggarwal, the dusky Delhi girl who went to Bombay and became an international model, and then a star with her very first Bollywood movie, Aashiqui, only to chuck it all up and join a yogashram.Coming back to Bombay, she was involved in a horrifying car crash that put her in a coma for twenty-nine days. Miraculously, the girl who broke into a million pieces recovered, and put the pieces of her life back together, first taking sanyas and then returning to Bombay to teach yoga. This fascinating story of a woman’s self-discovery, a near-death experience and amazing recovery is told in a straight-from-theheart, unbuttoned style, including details of the men in her life, from millionaire jet-setters to superyogis. In the end, as she says, love is all there is.

Advances in Structural Engineering-Vasant Matsagar 2014-12-12 The book presents research papers presented by academicians, researchers, and practicing structural engineers from India and abroad in the recently held Structural Engineering Convention (SEC) 2014 at Indian Institute of Technology Delhi during 22 – 24 December 2014. The book is divided into three volumes and encompasses multidisciplinary areas within structural engineering, such as earthquake engineering and structural dynamics, structural mechanics, finite element methods, structural vibration control, advanced cementitious and composite materials, bridge engineering, and soil-structure interaction. Advances in Structural Engineering is a useful reference material for structural engineering fraternity including undergraduate and postgraduate students, academicians, researchers and practicing engineers.

Quantitative Aptitude for Competitive Examinations-

Rekha-Yasser Usman 2016 RekhaÕs sexual openness raised eyebrows and rattled people. Bollywood wasn’t ready for such an irrepressible woman, and tried to suppress her. This book tells the truth about her relationship with the reigning superstar of the time, her many other lovers, and the shocking suicide of her husband Pediatric Palliative Care: Global Perspectives-Caprice Knapp 2012-01-03 The first of its kind, this book describes pediatric palliative care in more than 23 countries. Each region in the world is covered and countries included are both resource poor and rich. Authors are multidisciplinary and regarded nationally and internationally in their field. Clinicians, advocates, policymakers, funders, and researchers will learn how programs were developed and implemented in each country. Authors describe children for whom pediatric palliative care is needed and provided for in their country. When applicable, a brief history of pediatric palliative care is included noting especially policy changes and legislative acts. For example, the chapter on Poland describes how pediatric palliative care grew from the Catholic church into a national movement spearheaded by several health care workers. The Pole national spirit that brought them through a change in political regime has also been a driving force in the pediatric palliative care movement. The chapter on South Africa, for example, illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality. These are just a few examples of the inspiring stories that are included in this book. Readers from countries who wish to start a pediatric palliative care program, or advance an existing program, will learn valuable lessons from others who have faced similar barriers. Introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement.

Meticulously researched and well written. It will make you think hard about the judgements you make. An essential read for our times.’ Kavita Puri, BBC Journalist and author For the first time, behavioural and data scientist, activist and writer Dr Pragya Agarwal unravels the way our implicit or ‘unintentional’ biases affect the way we communicate and perceive the world, how they affect our decision-making, and how they reinforce and perpetuate systemic and structural inequalities. Sway is a thoroughly researched and comprehensive look at unconscious bias and how it impacts day-to-day life, from job interviews to romantic relationships to saving for retirement. It covers a huge number of sensitive topics - sexism, racism, ageism, homophobia, colourism - with tact, and combines statistics with stories to paint a fuller picture and enhance understanding. Throughout, Pragma clearly delineates theories with a solid grounding in science, answering questions such as: do our roots for prejudice lie in our evolutionary past? What happens in our brains when we are biased? How has bias affected technology? If we don’t know about it, are we really responsible for it? At a time when partisan political ideologies are taking centre stage, and we struggle to make sense of who we are and who we want to be, it is crucial that we understand why we act the way we do. This book will enable us to open our eyes to our own biases in a scientific and non-judgmental way.

Rokda-Nikhil Inamdar 2014-10-20 Baniya—a derivative of the Sanskrit word Vanij, is a term synonymous with India’s trader class. Over the decades, these capitalists spread their footprint across vast sectors of the economy from steel and mining to telecom and retail. And now even e-tail. Nikhil Inamdar’s Rokda features the stories of a few pioneering men from this mercantile community—Radheshyam Agarwal and Radheshyam Goenka, founders of the cosmetic major Emami; Rohit Bansal, co-founder of Snapdeal; Neeraj Gupta, founder of Meru Cabs; and V.K. Bansal, a humble mathematician tutor whose genius spawned a massive coaching industry in Kota—amongst others. Through the triumphs and tribulations of these men in the epoch marking India’s entire post independence struggle with entrepreneurship—from the License Raj to the opening up of the floodgates in 1991, and the dawn of the digital era—Rokda seeks to uncover the indomitable spirit of the Baniya.

The Hungry Tide-Amitav Ghosh 2014-03-04 The Hungry Tide is a very contemporary story of adventure and unlikely love, identity, and history, set in one of the most fascinating regions on the earth. Off the easternmost coast of India, in the Bay of Bengal, lies the immense labyrinth of tiny islands known as the Sundarbans. For settlers here, life is extremely precarious. Attacks by deadly tigers are common. Unrest and eviction are constant threats. Without warning, at any time, tidal floods rise and surge over the land, leaving devastation in their wake. In this place of vengeful beauty, the lives of three people from different worlds collide. Piya Roy is a young marine biologist, of Indian descent but stubbornly American, in search of a rare, endangered river dolphin. Her journey begins with a disaster, when she is thrown from a boat into crocodile-infested waters. Rescue comes in the form of a young, illiterate fisherman, Fokir. Although they have no language between them, Piya and Fokir are powerfully drawn to each other, sharing an uncanny instinct for the ways of the sea. Piya engages Fokir to help with her research and finds a translator in Kanai Dutt, a businessman from Delhi whose idealistic aunt and uncle are longtime settlers in the Sundarbans. As the three of them launch into the elaborate backwaters, they are drawn unawares into the hidden undercurrents of this isolated world, where political turmoil exacts a personal toll that is every bit as powerful as the ravaging tide. Already an international success, The Hungry Tide is a prophetic novel of remarkable insight, beauty, and humanity.

Saying No to Juggad-T N Hari 2019-10-07 Saying No to Juggaad is a riveting account of how the start-up ecosystem in India evolved rapidly in the last 10 years. Ushering in a new turn in the country’s economy that shook up existing ways of doing business, start-ups brought together investors and a rare breed of entrepreneurs to create a set of unicorn focused, for the first time, on solving the country’s problems. The book busts some of the common myths around e-commerce businesses and describes the evolution of grocery as the mother of all categories in this sector. It also is the story of how start-ups go through different distinct stages as they evolve and mature. The courage needed to hold your ground when the world seems to have a contrarian view, the relentless focus on customer centrlicity and the emphasis on foundation-building are illustrated through lucid and stirring stories. Entertaining and anecdotal, the book is not a panegyric about the founders or the company but is the story of real people and a real company with real flaws but also several great ideas and moments. Saying No to Juggaad vividly captures the vision, culture and commitment to values which has made Bigbasket one of India’s most successful start-ups.

A Feast of Vultures: The Hidden Business of Democracy in India-Josy Joseph 2016-07-10 ‘Every day, millions of people - the rich, the poor and the many foreign visitors - are hunting for ways to get their business done in modern India. If they search in the right places and offer the appropriate price, there is always a facilitator who can get the job done. This book is a sneak preview of those searches, the middlemen who do the jobs, and the many opportunities that the fast-growing economy offers.’ Josy Joseph draws upon two decades as an investigative journalist to expose a problem so pervasive that we do not have the words to speak of it. The story is big; that of treacherous business rivalries, of how some industrial houses practically own the country, of the shadowy men who run the nation’s politics. The story is small: a village needs a road and a hospital, a graveyard needs a wall, people need toilets. A Feast of Vultures is an unprecedented, multiple-level inquiry into modern India, and the picture it reveals is both explosive and frightening. Within these covers is unimpeachable evidence against some of the country’s biggest business houses and political figures, and the reopening of major scandals that have shaped its political narratives. Through hard-nosed investigations and the meticulous gathering of documentary evidence, Joseph clinically examines and irrefutably documents the non-reportable. It is a troubling narrative, but also a call to action and a cry for change. A tour de force through the wildly beating heart of post-socialist India, the book is a must-read for anyone interested in understanding the large, unwieldy truth about this nation.

Sense and Solidarity-Jean Drèze 2019-02-14 This is an open access title available under the terms of a CC BY-NC-ND 4.0 licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Jean Drèze has a rare and distinctive understanding of the Indian economy and its relationship with the rural life of ordinary people. He has travelled widely in rural India and done fieldwork of a kind that few economists have attempted. In Sense and Solidarity Drèze offers unique insight on issues of hunger, inequality, conflict, and the evolution of social policy in India over roughly the past two decades. Historic legislations and initiatives of the period, relating for instance to the right to food and the right to work, are all scrutinised and explained, as are the fierce debates that often accompanied them. ‘Jholawala’ has become a disparaging term for activists in the Indian business media. This book affirms the learning value of collective action combined with sound economic analysis. In his detailed introduction, the author argues for an approach to development economics where research and action are complementary and interconnected.Sense and Solidarity spans the gamut of critical social policies, from education and health to poverty, nutrition, child care, corruption, employment, and social security. There are also less predictable topics such as the caste system, corporate power, nuclear disarmament, the Gujarat model, the Kashmir conflict, and universal basic income. Sense and Solidarity enlarges the boundaries of social development towards a broad concern with the sort of society we want to create. Transforming Learning with Meaningful Technologies-Maren Scheffel 2019-10-17 This book constitutes the proceedings of the 14th European Conference on Technology Enhanced Learning, EC-TEL 2019, held in Delft, The Netherlands, in September 2019. The 41 research papers and 50 demo and poster papers presented in this volume were carefully reviewed and selected from 149 submissions. The contributions reflect the debate around the role of and challenges for cutting-edge 21st century meaningful technologies and advances such as artificial intelligence and robots, augmented reality and ubiquitous computing technologies and at the same time connecting them to different pedagogical approaches, types of learning settings, and application domains that can benefit from such technologies.

Information and Communication Technology for Intelligent Systems-Suresh Chandra Satapathy 2018-12-30 The book gathers papers addressing state-of-the-art research in all areas of Information and Communication Technologies and their applications in intelligent computing, cloud storage, data mining and software analysis. It presents the outcomes of the third International Conference on Information and Communication Technology for Intelligent Systems, which was held on April 6-7, 2018, in Ahmedabad, India. Divided into two volumes, the book discusses the fundamentals of various data analytics and algorithms, making it a valuable resource for researchers’ future studies. Michael Curtiz-Alan K. Rode 2017-10-16 Academy Award–winning director Michael Curtiz (1886–1962) – whose best-known films include Casablanca (1942), Yankee Doodle Dandy (1942), Mildred Pierce (1945) and White Christmas (1954) – was in many ways the anti-auteur. During his unprecedented twenty-seven year tenure at Warner Bros., he directed swashbuckling adventures, westerns, musicals, romances, historical dramas, horror films, tearjerkers, melodramas, comedies, and film noir masterpieces. The director’s staggering output of 180 films surpasses that of the legendary John Ford and exceeds the combined total of films directed by George Cukor, Victor Fleming, and Howard Hawks. In the first biography of this colorful, instinctual artist, Alan K. Rode illuminates the life and work of one of the film industry’s most complex figures. He begins by exploring the director’s early life and career in his native Hungary, revealing how Curtiz shaped the earliest days of silent cinema in Europe as he acted in, produced, and directed scores of films before immigrating to the United States in 1926. In Hollywood, Curtiz earned a reputation for his explosive tantrums, his difficulty communicating in English, and his disregard for the well-being of others. However, few directors elicited more memorable portrayals from their casts, and ten different actors delivered Oscar-nominated performances under his direction. In addition to his study of the director’s remarkable legacy, Rode investigates Curtiz’s dramatic personal life, discussing his enduring creative partnership with his wife, screenwriter Bess Meredyth, as well as his numerous affairs and children born of his extramarital relationships. This meticulously researched biography provides a nuanced understanding of one of the most talented filmmakers of Hollywood’s golden age.

Experiments in Plant Hybridisation-Gregor Mendel 2008-11-01 Experiments which in previous years were made with ornamental plants have already afforded evidence that the hybrids, as a rule, are not exactly intermediate between the parental species. With some of the more striking characters, those, for instance, which relate to the form and size of the leaves, the pubescence of the several parts, etc., the intermediate, indeed, is nearly always to be seen; in other cases, however, one of the two parental characters is so preponderant that it is difficult, or quite impossible, to detect the other in the hybrid. from 4. The Forms of the Hybrid One of the most influential and important scientific works ever written, the 1865 paper Experiments in Plant Hybridisation was all but ignored in its day, and its author, Austrian priest and scientist GREGOR JOHANN MENDEL (18221884), died before seeing the dramatic long-term impact of his work, which was rediscovered at the turn of the 20th century and is now considered foundational to modern genetics. A simple, eloquent description of his 18561863 study of the inheritance of traits in pea plantsMendel analyzed 29,000 of themthis is essential reading for biology students and readers of science history. Cosimo presents this compact edition from the 1909 translation by British geneticist WILLIAM BATESON (18611926).

Contemporary Computing-Sanjay Ranka 2009-08-19 This book constitutes the refereed papers of the 2nd International Conference on Contemporary Computing, which was held in Noida (New Delhi), India, in August 2009. The 61 revised full papers presented were carefully reviewed and selected from 213 submissions and focus on topics that are of contemporary interest to computer and computational scientists and engineers. The papers are organized in topical sections on Algorithms, Applications, Bioinformatics, and Systems.

The Burning Forest-Nandini Sundar 2019-04-09 The war between Maoists and the state in the heart of India The Burning Forest is an empathetic, moving account of what drives indigenous peasants to support armed struggle despite severe state repression, including lives lost, homes and communities destroyed. Over the past decade, the heavily forested,mineral-rich region of Bastar in central India has emerged as one of the most militarized sites in the country. The government calls the Maoist insurgency the "biggest security threat" to India. In 2005, a state-sponsored vigilante movement, the Salwa Judum, burnt hundreds of villages, driving their inhabitants into state-controlled camps, drawing on counterinsurgency techniques developed in Malaysia, Vietnam and elsewhere. Apart from rapes and killings, hundreds of 'surrendered' Maoist sympathisers were conscripted as auxiliaries. The conflict continues to this day, taking a toll on the lives of civilians, security forces and Maoist cadres. In 2007, Sundar and others took the Indian government to the Supreme Court over the human rights violations arising out ofthe conflict. In a landmark judgment, the Court in 2011 banned state supportfor vigilantism. The Burning Forest describes this brutal war in the heart of India, and what it tells us about the courts, media and politics of the country. The result is a granular and critical ethnography of Indian democracy over a decade.

Autonomous Horizons-Greg Zacharias 2019-04-05 Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.
