Computer Vision-Richard Szeliski 2010-09-30 Computer Vision: Algorithms and Applications explores the variety of techniques commonly used to analyze and interpret images. It also describes challenging real-

world applications where vision is being successfully used, both for specialized applications such as medical imaging, and for fun, consumer-level tasks such as image editing and stitching, which students can apply to their own personal photos and videos. More than just a source of “recipes,” this exceptionally authoritative and comprehensive textbook/reference also takes a scientific approach to basic vision problems, formulating physical models of the imaging process before inverting them to produce descriptions of a scene. These problems are also analyzed using statistical models and solved using rigorous engineering techniques. Topics and features: structured to support active curricula and project-oriented courses, with tips in the Introduction for using the book in a variety of customized courses; presents exercises at the end of each chapter with a heavy emphasis on testing algorithms and containing numerous suggestions for small mid-term projects; provides additional material and more detailed mathematical topics in the Appendices, which cover linear algebra, numerical techniques, and Bayesian estimation theory; suggests additional reading at the end of each chapter, including the latest research in each sub-field, in addition to a full Bibliography at the end of the book; supplies supplementary course material for students at the associated website, <http://szeliski.org/Book/>. Suitable for an upper-level undergraduate or graduate-level course in computer science or engineering, this textbook focuses on basic techniques that work under real-world conditions and encourages students to push their creative boundaries. Its design and exposition also make it eminently suitable as a unique reference to the fundamental techniques and current research literature in computer vision.

Differential Calculus and Sage-William Granville 2009-08-19 This text covers the differential calculus, including properties of the derivative and applications. Particular emphasis is on geometric applications. There is a large selection of exercises (most with answers) and most claims are provided with a complete proof.

Philo's Portrayal of Moses in the Context of Ancient Judaism-Louis H. Feldman 2008-01-17 Philo's Portrayal of Moses in the Context of Ancient Judaism presents the most comprehensive study of Philo's De Vita Mosis that exists in any language. Feldman, well known for his work on Josephus and ancient Judaism, here paves new ground using rabbinic material with philological precision to illuminate important parallels and differences between Philo's writing on Moses and rabbinic literature. One way in which Hellenistic culture marginalized Judaism was by exposing the apparent defects in Moses' life and character. Philo's De Vita Mosis is a counterattack to these charges and is a vital piece of his attempt to reconcile Judaism and Hellenism. Feldman rigorously examines the text and shows how Philo presents a narrative of Moses's life similar to that of a mythical divine and heroic figure, glorifying his birth, education, and virtues. Feldman demonstrates that Philo is careful to explain in a scientific way those portions of the Bible, particularly miracles, that appear incredible to his skeptical Hellenistic readers. Through Feldman's careful analysis, Moses emerges as unique among ancient lawgivers. Philo's Portrayal of Moses in the Context of Ancient Judaism mirrors the organization of Philo's biography of Moses, which is in two books, the first, in the style of Plutarch, proceeding chronologically, and the second, in the style of Suetonius, arranged topically. Following an introductory chapter, Feldman's study discusses the life of Moses chronologically in the second chapter and examines his virtues topically in the third. Feldman compares the particular features of Philo's portrait of Moses with the way in which Moses is viewed both

by Jewish sources in antiquity (including Pseudo-Philo; Josephus; Graeco-Jewish historians, poets, and philosophers; and in the Apocrypha, Pseudepigrapha, Samaritan tradition, Dead Sea Scrolls, and rabbinic tradition) and by non-Jewish sources, notably the Greek and Roman writers who mention him.

Freedom in an Outhouse-Julie Mouzakis 2012-01-26 Freedom in an Outhouse is a compilation of poetry written over a 10 year span. The variety is an example of the dynamics and growth of the human spirit. There are flowing strands of words within these pages that almost everyone can relate to. My wish for the reader is that their minds are open to entertaining the notion of full on mind expansion. A poem may seem literal, but mine, rarely (if ever) are. I am in touch with my muse and we work together in a fluid synchronicity.

Student-centered Classroom Assessment-Richard J. Stiggins 1997 The book elucidates the fundamental importance of high-quality assessment to student academic well-being and promotes the development of student self-assessment as a critically important life skill. Provides a clear, common sense description of all assessment methods (selected response, essay, performance, and personal communication) and how to align them with relevant achievement targets (knowledge, reasoning, skills, products, and dispositions). Easy-to-read and free of technical jargon, this book focuses squarely on what teachers need to know in order to make assessment work in classrooms.

Things I Like Doing-Alisha Lawson 2013-04-01 This book is for children who like to take part in the activities described in this book.

Compressed Image File Formats-John Miano 1999 Since not all graphic formats are of equal complexity, author John Miano does not simply choose a number of file formats and devote a chapter to each one. Instead, he offers additional coverage for the more complex image file formats like PNG (a new standard) and JPEG, while providing all information necessary to use the simpler file formats. While including the well-documented BMP, XBM, and GIF formats for completeness, along with some of their less-covered

features, this book gives the most space to the more intricate PNG and JPEG, from basic concepts to creating and reading actual files. Among its highlights, this book covers: -- JPEG Huffman coding, including decoding sequential mode JPEG images and creating sequential JPEG files-- Optimizing the DCT- - Portable Network Graphics format (PNG), including decompressing PNG image data and creating PNG files-- Windows BMP, XBM, and GIF

Homeless Heritage-Rachael Kiddey 2017-10-12 Homeless Heritage describes the process of using archaeological methodologies to collaboratively document how contemporary homeless people use and experience the city. Drawing on fieldwork undertaken in Bristol and York, the book first describes the way in which archaeological methods and theory have come to be usefully applied to the contemporary world, before exploring the historical development of the concept of homelessness. Working with homeless people, the author undertook surveys and two excavations of contemporary homeless sites, and the team co-curated two public heritage exhibitions - with surprising results. Complementing a growing body of literature that details how collaborative and participatory heritage projects can give voice to marginalised groups, Homeless Heritage details what it means to be homeless in the twenty first century.

The Complete Learning Center Book-Rebecca T. Isbell 1995 An illustrated guide for 32 different Early Childhood Learning Centers.

The World's Best Boyfriend-Durjoy Datta 2015-04-24 Hate, is a four letter word. So is love. And sometimes, people can't tell the difference... Dhurv and Aranya spend a good part of their lives trying to figure out why they want to destroy each other, why they hurt each other so deeply. And, why they can't stay away from each other. The answer is just as difficult each time because all they've wanted is to do the worst, most miserable things to one another. Yet there is something that tells them: THIS IS NOT IT. If you want to know the answer to it all, read the book.

Teaching History-Hilary Bourdillon 2013-10-31 Against a background of controversy surrounding the teaching of history, this reader gathers the current thoughts of the leading practitioners. The development

of school history up to the national curriculum and beyond is traced, and the main issues concerning history teachers today are examined. These issues include access to history, the definition of 'British' history in a multicultural society, gender and the place of history with the humanities. Progression and attainment are discussed as is the development of pupil's historical understanding, and practical approaches to teaching history to 11-18 level pupils are explored.

Fundamental Of Research Methodology And Statistics-Yogesh Kumar Singh 2006-01-01 The book approaches research from a perspective different from that taken in other educational research textbooks. The goal is to show educators that the application of research principles can make them more effective in their job of promoting learning. The basic point is that we do not have to stop teaching to do research; research is something we can do while teaching and if we do good research, we will do better teaching. This book includes most of the topics treated in traditional educational research books, but in a different order and with a different emphasis. The important content cons.

Pretext for Mass Murder-John Roosa 2006-08-03 In the early morning hours of October 1, 1965, a group calling itself the September 30th Movement kidnapped and executed six generals of the Indonesian army, including its highest commander. The group claimed that it was attempting to preempt a coup, but it was quickly defeated as the senior surviving general, Haji Mohammad Suharto, drove the movement's partisans out of Jakarta. Riding the crest of mass violence, Suharto blamed the Communist Party of Indonesia for masterminding the movement and used the emergency as a pretext for gradually eroding President Sukarno's powers and installing himself as a ruler. Imprisoning and killing hundreds of thousands of alleged communists over the next year, Suharto remade the events of October 1, 1965 into the central event of modern Indonesian history and the cornerstone of his thirty-two-year dictatorship. Despite its importance as a trigger for one of the twentieth century's worst cases of mass violence, the September 30th Movement has remained shrouded in uncertainty. Who actually masterminded it? What did they hope to achieve? Why did they fail so miserably? And what was the movement's connection to

international Cold War politics? In *Pretext for Mass Murder*, John Roosa draws on a wealth of new primary source material to suggest a solution to the mystery behind the movement and the enabling myth of Suharto's repressive regime. His book is a remarkable feat of historical investigation. Finalist, Social Sciences Book Award, the International Convention of Asian Scholars

Buffalo Nationalism-Kancha Ilaiah Shepherd 2019-01-25 'O Mother Lachumamma, your blouse is torn, Your hair is soiled, your sari in rags . . . Even in that condition what have you done? You planted saplings, walking backwards like a bull, In order to produce food from the mud.' Kancha Ilaiah Shepherd translates these words of the Telugu poet, singer, activist Gaddar to emphasize the productivity of the ordinary people, the Dalit-Bahujans of India, who receive so little in return. Arguing forcefully against spiritual fascism, which refuses equality or freedom to the majority, he commends the buffalo as a productive animal that epitomizes the qualities of the Dalit-Bahujans. This book contains a selection from Ilaiah Shepherd's columns in *The Hindu*, *Deccan Herald*, *Deccan Chronicle*, *Hindustan Times* among others, and journals such as *Mainstream* and *Economic and Political Weekly*. Of particular interest is the new Afterword that discusses his political and social programme for the Sudras of India, presenting his vision of a more just society.

Instructional Process and Concepts in Theory and Practice-Celal Akdeniz 2016-11-22 This book offers an accessible, practical and engaging guide that provides sample instructional activities supported by theoretical background information, with a focus on the nature of the instructional process in relation to several variables. It approaches instructional models, strategies, methods, techniques, tactics and planning from a new perspective and shares effective tips to help readers better understand the instructional process and its theoretical elements. The book addresses the following questions: What is the nature of the instructional process? What are the classifications of contemporary models and strategies developed within the instructional process? Which groups yield the most effective methods and

techniques, and how can they best be practically implemented? What are the instructional tactics teachers need to take into consideration, in which groups are they collected, and which tips can help us employ each tactic? Additionally, readers can adapt the book's ready-to-use sample activities to their own educational settings. Overall, this book offers an enlightening discussion on contemporary practices related to the teaching process, a broad and holistic theoretical framework, and an ideal reference source for all students and scholars who are interested in the educational sciences.

Dimensions of Thinking-Robert J. Marzano 1988 Organizing and clarifying research and theory from diverse sources, including philosophy and cognitive psychology, this book provides a framework intended to help educational practitioners (principals, supervisors, curriculum directors, and teachers) plan programs for incorporating the teaching of thinking throughout the regular curriculum. Chapter 1 discusses the need for a framework for teaching thinking and presents a historical perspective on the study of thinking. Chapters 2 through 6 discuss five dimensions of thinking: (1) metacognition; (2) critical and creative thinking; (3) thinking processes--such as concept formation, problem solving, and research; (4) core thinking skills--the "building blocks" of thinking--including focusing, information-gathering, organizing and generating skills; and (5) the relationship of content-area knowledge to thinking. The final chapter presents guidelines for using the framework. (A glossary of key terms and an outline of the book are appended, and thirteen pages of references are attached.) (ARH)

The Three-Box Solution-Vijay Govindarajan 2016-04-26 How to Innovate and Execute Leaders already know that innovation calls for a different set of activities, skills, methods, metrics, mind-sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the

leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls “the three boxes”:

- Box 1: The present—Manage the core business at peak profitability
- Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation
- Box 3: The future—Convert breakthrough ideas into new products and businesses

The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical dilemma of how to align an organization on the critical but competing demands of innovation.

Handbook of Moral and Character Education-Larry Nucci 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students. In fact, 80% of US states currently have mandates regarding character education. However, the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods. The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive, research-oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future. Now in its second edition, this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings, and much more.

Multimedia Learning-Richard E. Mayer 2009-01-19 Although verbal learning offers a powerful tool, Mayer explores ways of going beyond the purely verbal. Recent advances in graphics technology and information technology have prompted new efforts to understand the potential of multimedia learning as a means of promoting human understanding. In this second edition, Mayer includes double the number of experimental comparisons, 6 new principles - signalling, segmenting, pertaining, personalization, voice

and image principles. The 12 principles of multimedia instructional design have been reorganized into three sections - reducing extraneous processing, managing essential processing and fostering generative processing. Finally an indication of the maturity of the field is that the second edition highlights boundary conditions for each principle research-based constraints on when a principle is likely or not likely to apply. The boundary conditions are interpreted in terms of the cognitive theory of multimedia learning, and help to enrich theories of multimedia learning.
