Quartet for the End of Time: A Novel-Johanna Skibsrud 2014-10-06 A "cinematic . . . page-turner and a compassionate analysis of faith, memory, responsibility, and consequence."—Molly Antopol, Fiction Writers Review Inspired by and structured around the chamber piece of the same title by the French composer Olivier Messiaen, Quartet for the End of Time is a mesmerizing story of four lives irrevocably linked in a single act of betrayal. The novel takes us on an unforgettable journey beginning during the 1930s Bonus Army riots, when World War I veteran Arthur Sinclair is falsely accused of conspiracy and then disappears. His absence will haunt his son, Douglas, as well as Alden and Sutton Kelly, the children of a powerful U.S. congressman, as they experience—each in different ways—the dynamic political social changes that took place leading up to and during World War II. From the New Deal projects through which Douglas, newly fatherless, makes his living to Sutton's work as a journalist, to Alden's life as a code breaker and a spy, each character is haunted by the past and is searching for love, hope, and redemption in a world torn apart by chaos and war. Through the lives of these characters, as well as those of their lovers, friends, and enemies, the novel transports us from the Siberian Expedition of World War I to the underground world of a Soviet spy in the 1920s and 1930s, to the occultist circle of P. D. Ouspensky and London during the Blitz, to the German prison camp where Messiaen originally composed and performed his famous Quartet for the End of Time. At every turn, this rich and ambitious novel tells some of the less well-known stories of twentieth-century history with epic scope and astonishing power, revealing at every turn the ways in which history and memory tend to follow us, and in which absence has a palpable presence.

Schneider Trophy Aircraft 1913-1931-Derek N. James 2015-03-14 At the end of 1912 Jacques Schneider announced his intention of presenting an annual trophy for an international seaplane contest. There were only twelve Schneider contests but they were major international events with the major rivals being Britain and Italy, followed by France and the US. Biplane seaplanes and flying-boats predominated the early contests and some very advanced twin-float biplanes were among the winners as late as 1925. However, it was the monoplane which was to become the symbol of Schneider Trophy, with Supermarine and Macchi designs reaching the peak of racing seaplane performance. The final winning combination of Supermarine airframe and Rolls-Royce engine was to make a vital contribution to Britain's defence in 1940 in the form of the Rolls-Royce powered Hurricane and Spitfire. This book records the contests and, in considerable detail, the design, development and achievements of the participating aircraft; those which failed to take part; and the projects, some of which embodied very advanced ideas even if they were proved to be unrealistic.

1 Peter (New Testament Guides)-David G. Horrell 2008-03-13 This volume offers a concise and accessible introduction to 1 Peter, especially aimed at undergraduate-level students. It provides information on the likely historical and social setting of this letter, on its literary form and theological content, and on issues involved in its interpretation. In particular, this volume suggests that 1 Peter is an important text not least for the ways in which it both reflects and constructs early Christian identity, in its relationships with Judaism and the Roman Empire. Although 1 Peter remains neglected compared with the canonical gospels and the major Pauline letters, Horrell argues that the letter deserves much more attention for the pivotal contribution it makes to the development of early Christianity and for the ways in which it reveals this development in progress.

Manual Handling in Health and Social Care-Michael Mandelstam 2002-02-15 A practical understanding of the law is essential for all those involved in the manual handling of adults and children (as patients, clients or pupils), whether in 'hands-on', managing, commissioning or advisory roles. To this end, Manual Handling in Health and Social Care presents an accessible overview of manual handling legislation, legal case law, national guidance, policy and practice. Applicable primarily to England, Scotland and Wales, it covers both employee safety under the Manual Handling Operations Regulations and wider health and safety at work legislation, and also patient and client entitlement under community care, NHS and human rights legislation. A stand-alone overview of manual handling law and practice is followed by more in-depth material, in A-Z format and fully cross-referenced, which allows the reader to look up issues for quick access to further information. In particular, it contains an extensive collection of case law relevant to health and social care and digested in summary form. Topics include rehabilitation, risk assessment, care plans, equipment provision, documentation of decisions and cumulative strain injury. Addressing the tensions sometimes existing between the health and safety of employees, the needs and wishes of service users and limited resources, this book provides professionals, managers, front-line staff and legal advisers with an understanding of law as a useful and practical tool to assist in solutions to manual handling problems.

Handbook on the Economics of Discrimination-William M. Rodgers 2009-01-01 The papers contained in the first part of the book are particularly valuable as a primer for researchers interested in economic discrimination. On this basis alone this book is recommended for researchers seeking an overview of current techniques for assessing economic discrimination. . . The final section nicely highlights both the importance in understanding the interaction of policy and economic discrimination, and the difficulties in isolating policy effects. Education Economics Editor Rodgers has compiled a very useful book that

summarizes the current state of the literature on economic discrimination. . . This reviewer learned something new and interesting in every chapter and particularly appreciated the clear survey of the age discrimination literature. . . This book will be of value to academics and to those in the legal arena. Highly recommended. J.P. Jacobsen, Choice Discrimination's dynamic nature means that no single theory, method, data or study should be relied upon to assess its magnitude, causes, or remedies. Despite some gains in our understanding, these remain active areas of debate among researchers, practitioners and policymakers. The specially commissioned papers in this volume, all by distinguished contributors, present the full range of issues related to this complex and challenging problem. Part 1 explores innovations in methods and data collection that help to provide richer descriptions of inequality. Part 2 reviews empirical evidence on discrimination that people with disabilities, older workers and gay, lesbian and bisexual individuals face. Although discrimination among these groups is not new, this Handbook shows that economists are beginning to more fully document their experiences. Part 3 presents a balanced discussion of anti-discrimination policies and the impact of affirmative action. The methods and data chapters are particularly designed to encourage researchers to utilize the new approaches and develop new data sources. Accessible and comprehensive, the Handbook is the seminal reference on the economics of discrimination for academic and professional economists, graduate students, advanced undergraduates, practitioners, policymakers, and funders of social science research.

A Heart on Fire-Charles J. Chaput 2012-03-27 "A genuinely Catholic life should feed the soul as well as the mind; should offer a vision of men and women made whole by the love of God, the knowledge of creation, and the reality of things unseen; should enable us to see the beauty of the world in the light of eternity; and should help us recapture the nobility of the human story and the dignity of the human person. This is the kind of witness that sets fire to the human heart." —Archbishop Charles J. Chaput In this eBook original, Charles J. Chaput, the Archbishop of Philadelphia, offers a powerful manifesto on the need for Americans to protect religious freedom. As he notes, principles that Americans find self-evident—the dignity of the human person, the sanctity of conscience, the separation of political and sacred authority, the distinction between secular and religious law, the idea of a civil society pre-existing and distinct from the state—are not widely shared elsewhere in the world, and in recent years seem to be in jeopardy on our own shores. Archbishop Chaput offers a call to action for leadership both here and abroad to challenge this damaging trend. By thoughtfully interpreting and applying Catholic values to this confusing moment in history, he provides hope for an American audience hungry for courage and counsel.
