State of the World 2008-The Worldwatch Institute 2015-03-19 Environmental issues were once regarded as irrelevant to economic activity, but today they are dramatically rewriting the rules for business, investors, and consumers. Around the world, innovative responses to climate change and other environmental problems are affecting more than \$100 billion in annual capital flows as pioneering entrepreneurs, organizations, and governments take steps to create the Earth's first "sustainable" global economy.

Multivariate Statistics:-Wolfgang Härdle 2007-07-27 The authors have cleverly used exercises and their solutions to explore the concepts of multivariate data analysis. Broken down into three sections, this book has been structured to allow students in economics and finance to work their way through a well formulated exploration of this core topic. The first part of this book is devoted to graphical techniques. The second deals with multivariate random variables and presents the derivation of estimators and tests for various practical situations. The final section contains a wide variety of exercises in applied multivariate data analysis.

Edgar and Lucy-Victor Lodato 2017-03-07 How do you love the son you never expected to have? How do you love the mother who can't let you in? Edgar & Lucy An unlikely love story. "I love this book. Profoundly spiritual and hilariously specific...an unusual and intimate epic that manages to capture the wonder and terror of both child and parenthood with an uncanny clarity." - Lena Dunham, bestselling author of Not That Kind of Girl "This tale gradually exerts a fiendish grip on the reader" - Helen Simonson, author of Major Pettigrew's Last Stand "Took my breath away." — Sophie McManus, author of The Unfortunates "A quirky coming-of-age novel that deepens into something dark and strange without losing its heart or its sense of wonder." - Tom Perrotta, bestselling author of The Leftovers "Victor Lodato may be our bard of the sadness, humor, and confusion of loss. He senses the absurdities and elation of mourning and childhood with a capacious precision that brings to mind J.D. Salinger, Lorrie Moore, Karen Russell, even James Joyce. Edgar and Lucy will make you feel things you haven't felt in ages." - Daniel Torday, author of The Last Flight of Poxl West

River of Contrasts-Margie Crisp 2012-04-10 Writer and artist Margie Crisp has traveled the length of Texas' Colorado River, which rises in Dawson County, south of Lubbock, and flows 860 miles southeast across the state to its mouth on the Gulf of Mexico at Matagorda Bay. Echoing the truth of Heraclitus's ancient dictum, the river's character changes dramatically from its dusty headwaters on the High Plains to its meandering presence on the coastal prairie. The Colorado is the longest river with both its source and its mouth in Texas, and its water, from beginning to end, provides for the state's agricultural, municipal, and recreational needs. As Crisp notes, the Colorado River is perhaps most frequently associated with its middle reaches in the Hill Country, where it has been dammed to create the six reservoirs known as the Highland Lakes. Following Crisp as she explores the river, sometimes with her fisherman husband, readers meet the river's denizens—animal, plant, and human—and learn something about the natural history, the politics, and those who influence the fate of the river and the water it carries. Those who live intimately with the natural landscape inevitably formulate emotional responses to their surroundings, and the people living on or near the Colorado River are no exception. Crisp's own loving tribute to the river and its inhabitants is enhanced by the exquisite art she has created for this book. Her photographs and maps round out the useful and beautiful accompaniments to this thoughtful portrait of one of Texas' most beloved rivers. Building a Vibrant Community: How Citizen-Powered Change Is Reshaping America-Quint Studer 2018-04-10 Every community wants to become a great place to live and work. The why is no mystery: We want to create a place our children and grandchildren will want to be. We also know the what: We need to attract investments, provide good jobs, and create lively downtowns where citizens will want to work, live, shop and play. What s usually missing is the how.

In Building a Vibrant Community, Quint Studer addresses all three aspects, but mainly focuses on the last one. How can your community get from where it is now to where it wants to be?

This Was Never About Basketball-Craig Leener 2017-05-12 In this coming-of-age novel, seventeen-year-old high school basketball star Ezekiel "Zeke" Archer has it all: a sweet jump shot, a full-ride scholarship to a Midwestern basketball powerhouse, and the brightest future. But when Zeke's temper gets the better of him in the city championship, he is expelled from school, has to forfeit his scholarship, and is left to ponder his once-hopeful future... While finishing his final high school days in the California educational system's version of purgatory, Zeke makes a stunning discovery. With the help of a young autistic classmate Zeke befriends, he learns that the mysterious 7th Dimension, which brought basketball to Earth more than a century ago, has decided to take the game away for good -- all because of the ugly event Zeke set into motion in his final game! As he embarks on the ultimate cross-country road trip to save basketball, Zeke must confront his unsettled past -- including a father he's not heard from in years and a brother fighting in a war half a world away -- in order to set his life on the right path and rescue the game he loves.

MARE-WINT-Wiesław Ostachowicz 2016-08-30 This book provides a holistic, interdisciplinary overview of offshore wind energy, and is a must-read for advanced researchers. Topics, from the design and analysis of future turbines, to the decommissioning of wind farms, are covered. The scope of the work ranges from analytical, numerical and experimental advancements in structural and fluid mechanics, to novel developments in risk, safety & reliability engineering for offshore wind. The core objective of the current work is to make offshore wind energy more competitive, by improving the reliability, and operations and maintenance (O&M) strategies of wind turbines. The research was carried out under the auspices of the EU-funded project, MARE-WINT. The project provided a unique opportunity for a group of researchers to work closely together, undergo multidisciplinary doctoral training, and conduct research in the area of offshore wind energy generation. Contributions from expert, external authors are also included, and the complete work seeks to bridge the gap between research and a rapidly-evolving industry.

Society, Schools and Progress in the U.S.A-Edmund J. King 2014-05-16 Society, Schools and Progress in the U.S.A is one of a mutually supporting series of books on Society, Schools and Progress in a number of important countries or regions. The books in the series are arranged in a fairly uniform pattern. They all begin with the historical and institutional background. They then go on to describe administration, the school system, family influences, and background social forces in much the same order of progression. The series is intended to serve students of sociology, government and politics, as well as education. This book deals with the specific case of the United States of America. It considers the American contribution to world-wide expectations. It examines how the American debate is no longer about the neighborhood school—it is about the American nation's identity and purpose, about efficiency in the least reorganized yet biggest industry. It analyzes the various aspects of American schools, school practices, students, teachers, teaching, and learning. It discusses how the American public school ideal has prevailed to be an inspiration and conceptual model for mankind.

Sustainable Fossil Fuels-Mark Jaccard 2006-01-16 More and more people believe we must quickly wean ourselves from fossil fuels - oil, natural gas and coal - to save the planet from environmental catastrophe, wars and economic collapse. In this 2006 book, Professor Jaccard argues that this view is misguided. We have the technological capability to use fossil fuels without emitting climate-threatening greenhouse gases or other pollutants. The transition from conventional oil and gas to their unconventional sources including coal for producing electricity, hydrogen and cleaner-burning fuels will decrease energy dependence on politically unstable regions. In addition, our vast fossil fuel resources will be the cheapest source of clean energy for the next century and perhaps longer, which is critical for the economic and social development of the world's poorer countries. By buying time for increasing energy efficiency, developing renewable energy technologies and making nuclear power more attractive, fossil fuels will play a key role in humanity's quest for a sustainable energy system.

The Material Culture of German Texans-Kenneth Hafertepe 2016-06-21 Winner, 2019 San Antonio Conservation Society Foundation Book Award, sponsored by the San Antonio Conservation Society Foundation German immigrants of the nineteenth century left a distinctive mark on the lifestyles and vernacular architecture of Texas. In this first comprehensive survey of the art and artifacts of German Texans, Kenneth Hafertepe explores how their material culture was influenced by their European roots, how it was adapted to everyday life in Texas, and how it changed over time—at different rates in different communities. The Material Culture of German Texans is about the struggle to become American while maintaining a distinctive cultural identity drawn from German heritage. Including materials from rural, small town, and urban settings, this masterful study covers pioneer generations in East Texas and the Hill Country, but also follows the story into the Victorian era and the early twentieth century. Houses and their furnishings, churches and cemeteries, breweries and businesses, and paintings and engravings fill the pages of this thorough, informative, and richly illustrated volume. Recent decades have seen a sharp increase of the study of vernacular architecture (which can range from traditional building to ethnic expressions to landscape ensembles) and an intensified study of American furniture and other decorative arts. Incorporating these vernacular and decorative arts methods and building on the works of cultural geographers, curators, and historians, The Material Culture of German Texans offers a definitive contribution that will inform visitors to the region as well as those who study its history and culture.

The Ketogenic Kitchen-Domini Kemp 2016-08-29 Cancer survivors Domini Kemp and Patricia Daly offer the first comprehensive ketogenic cookbook based on the most exciting new research on nutritional approaches to the prevention and management of cancer. For decades, the ketogenic diet which shifts the body's metabolism from burning glucose to burning fat, lowering blood sugar and insulin and resulting in a metabolic state known as ketosis has been used to successfully manage pediatric epilepsy. More recently, it has been used by the Paleo community as a weight loss strategy. Now emerging research suggests that a ketogenic diet, in conjunction with conventional treatments, also offers new hope for those coping with cancer and other serious disease. With endorsements from leading researchers and oncologists such as Dr. Thomas Seyfried (Cancer as a Metabolic Disease), The Ketogenic Kitchen offers more than 250 recipes, as well as meal plans and comprehensive scientific information about the benefits of a ketogenic diet, with sensible advice to help readers through periods of illness, recovery, and treatment. This North American paperback edition has been updated to include U.S. customary units of measure appearing side-by-side with metric measures. "

Warriors Remembered-Albert J. Nahas 2010-11 Warriors Remembered is one veteran's journey to capture the recognition that proudly stands throughout our country for veterans of the Vietnam War. The emotion of these memorials is evident in every story. The memorials are as much for the living as the dead. They reveal the spirit of those who survived and offer comfort for families affected by the war. They helped to heal a nation torn by a most divisive war. The book can be a travel guide for your own journey to see these compelling memorials. For those who love a veteran, it is a catalyst to connect and open a conversation about past service still wrapped in silence. For veterans, it is an overdue Welcome Home!

Bearwalker Alibi-Jake Doherty 2014-05-26 Does evil have rights? Can an old Ojibwa myth be accepted as a defense in a murder trial on Ontario's Manitoulin Island? Dead is a sleazy young German man who came to Manitoulin to distribute Ecstasy to Great Lakes cities in the U.S. He fled Germany and his ties to Biker and Drug cultures rather than testify in a gang trial in Dresden. Interpol wants him. He lives with his uncle who is building a pow-wow hotel on the island for German wannabe Indians. The only witness is Dr. Mary Fraser, Canada's ranking expert on native symbols and an Ojibwa herself. She bloodied her hands when she failed to stop the murder. Drawn back to Manitoulin to

recover her childhood identity, she ends up in a forensic psych hospital, unable to recall who's responsible. Her live-in-lover, Fergus Fitzgerald, an aging draft dodger from Boston, would rather drink good scotch than get involved but in the end seeks his own redemption. He uses his reporter instincts to flush out the real killer. His real adversary is a holier-than-thou Crown Attorney who thinks Mary herself is possessed. Tying all this together is the ancient Bearwalker myth of a large black bear, believed by some Ojibwa to be capable of taking on human form and uttering lethal curses.

In the Hands of the People-William L. Dwyer 2004-08-01 In a passionate warning that is not only well-reasoned, as becomes a renowned former trial lawyer and present federal judge, but is also a compelling and entertaining read, William L. Dwyer defies those who would abolish our jury system and hand over its power to judges or to panels of "experts." He aims, by making his readers aware of what should be done, to help us save what he calls "America's most democratic institution." In an overview of litigation's universe, Dwyer goes back several centuries to describe the often terrifying ways our ancestors arrived at verdicts of guilt or innocence. Tracing the evolution of our present-day system, he gives us excerpts from the actual records of such trials as that of young William Penn, arrested for preaching Quaker beliefs in public; the Salem witch trials; and the landmark civil rights trial of 18th century newspaper publisher John Peter Zenger, whose attorney was the original "Philadelphia lawyer." Along with these famous courtroom episodes are many never before described in print, all of them infused with the drama that gives life to the law. Dwyer's language is clear and engaging - a pleasant surprise for readers apprehensive about legal gobbledegook. He has a store of courtroom "war stories," some inspiring, some alarming, many enlivened by gleams of the author's wry humor. Underlying that humor, however, is the judge's fear that the jury system is endangered by neglect and misunderstanding, and could be lost without the public being aware of what is happening. The book shows that despite much adverse publicity, the American jury still works capably, at times brilliantly, when given a fair chance by the legal professionals who run trials. Consequently, the author deals with what has gone wrong with American litigation, the controversy over the jury's competence and integrity, and trial and pretrial reforms that must be made to save trial by jury and reshape American litigation in the twenty-first century.

Impact 3:16-J. J. Hendrix 2013-08-01 The purpose of IMPACT 3:16 is to show that there are many fantastic verses that end with 3:16...not just one. When we understand that the Bible as a whole is God's inspired Word, we can see the true harmony of the Bible. This lectureship shows the power of just a few verses. If you study your Bible (regardless of the chapter and verse) and weigh the Scriptures fairly, you will grow in your relationship with God and have a better understanding of His will.

The Management of Health Care-William J. Abernathy 1974 The essential purpose of this book is to draw attention to the problems of managing the creation and use of technology in health care, whether that means a new blood pressure machine or a new way of doing something, whether directly involved in the medical treatment process, e.G., The nurse practitioner, or in the management of that process, e.G., A management information system. The first section deals with research and development. The second section deals with the problems of introducing and diffusing new technology in the health care system. The third deals with the impact and consequences of technology in health organization, and the final section with the problems of evaluation and values as these affect critical decision choices.

Classified Woman-Sibel Edmonds 2012 "In this startling new memoir, Sibel Edmonds--the most classified woman in U.S. history--takes us on a surreal journey that begins with the secretive FBI and down the dark halls of a feckless Congress to a stonewalling judiciary and finally, to the national security whistleblowers movements she spearheaded. Having lived under Middle East dictatorships, Edmonds knows firsthand what can happen when government is allowed to operate in secret. Hers is a sobering perspective that combines painful experience with a rallying cry for the public's right to know and to hold the lawbreakers accountable. With U.S. citizens increasingly stripped of their rights in a calibrated media blackout, Edmonds' story is a wake-up call for all Americans who, willingly or unwillingly, traded liberty for illusive security in the wake of 9/11."--P. The Landscape Management Handbook-William E. Knoop 1996

Federico Busonero: the Land That Remains-Federico Busonero 2016-04-01 Commissioned by UNESCO, Federico Busonero undertook three extensive journeys through the West Bank of the Occupied Palestinian Territory between 2008 and 2009. Using a traditional film camera and unmistakably, his heart, he created pictures that illustrate culturally important, rarely seen places in the topography of the Mashriq?the Arabic ?places of sunrise? to the east of the Nile?villages and cities with extraordinary heritage, pastoral rolling hills and ancient olive groves, fertile wadi ecologies, sacred desert cemeteries, and vanishing millennial archaeological sites. A critical yet neutral gaze sheds light on the impending loss of Palestine?s cultural legacy with images of today?s broken history being occupied forcefully by another?s reality, reflecting visions of hope sacrificed in the land that remains.
