Student's Guide to Writing Dissertations and Theses in Tourism Studies and Related Disciplines-Tim Coles 2013-05-02 Around the world every year very many students have to complete dissertations or theses as part of their undergraduate or masters studies in tourism and related subjects. Often this substantial piece of self-directed work is the culmination of their programmes. More than just a means to consolidate their final grades, it is also an exciting chance to research a

topic of their choosing and a potential gateway to more advanced study as well as job offers and future career paths. Yet for all these reasons, many students view the dissertation as a tricky challenge. This comprehensive book intends to take the stress and anxiety out of doing a dissertation in tourism studies and related disciplines. The process is examined from the germination of an idea to the submission and assessment of the final document. Written primarily for students conducting independent research for the first time, this book offers simple advice and a clear framework which students can adopt even in more advanced studies at masters and doctoral level. This book debunks popular myths, and aims to overcome common pitfalls. It focuses on the aims and objectives as the DNA of every dissertation. Rather than view it as a single, overwhelming project, the dissertation is presented as a series of more modest, manageable yet crucially inter-linked tasks that all students can successfully complete through careful preparation and effective time management. Dissertations are not to be underestimated and they demand great care and attention, but they can also be immensely rewarding and enriching experiences academically and personally. This 'jargon free' book is also written with overseas students specifically in mind, drawing directly on our overseas students' experiences. This valuable resource contains start of chapter learning objectives and end of chapter checklists, as well as numerous boxed case studies, to further help assist students through their dissertation.

The Forest Inventory and Analysis Database-Sharon W. Woudenberg 2012-10-19 This publication is based on previous documentation of the nationally standardized Forest Inventory and Analysis database (Hansen and others 1992; Woudenberg and Farrenkopf 1995; Miles and others 2001). Documentation of the structure of the Forest Inventory and Analysis database (FIADB) for Phase 2 data, as well as codes and definitions, is provided. Examples for producing population level estimates are also presented. This database provides a consistent framework for storing forest inventory data across all ownerships for the entire United States. Forest Inventory and Analysis (FIA) is a continuing endeavor mandated by Congress in the Forest and Rangeland Renewable Resources Planning Act of 1974 and the McSweeney-McNary Forest Research Act of 1928. FIA's primary objective is to determine the extent, condition, volume, growth, and depletion of timber on the Nation's forest land. Before 1999, all inventories were conducted on a periodic basis. The passage of the 1998 Farm Bill requires FIA to collect data annually on plots within each State. This kind of up-to-date information is essential to frame realistic forest policies and programs. USDA Forest Service regional research stations are responsible for conducting these inventories and publishing summary reports for individual States. In addition to published reports, the Forest Service provides data collected in each inventory to those interested in further analysis. This report describes a standard format in which data can be obtained. This standard format, referred to as the Forest Inventory and Analysis Database (FIADB) structure, was developed to provide users with as much data as possible in a consistent manner among States. A number of inventories conducted prior to the implementation of the annual inventory are available in the FIADB. However, various data attributes may be empty or the items may have been collected or computed differently. Annual inventories use a common plot design and common data collection procedures nationwide, resulting in greater consistency among FIA work units than earlier inventories. Data field definitions note inconsistencies caused by different sampling designs and processing methods.

Bob Shaw SF Gateway Omnibus-Bob Shaw 2013-08-15 From the vaults of The SF Gateway, the most comprehensive digital library of classic SFF titles ever assembled, comes an ideal introduction to the work of the award-winning Bob Shaw. Best known for his extraordinary novel of 'slow glass', Other Days, Other Eyes, Bob Shaw was a fan favourite at conventions for his hysterical 'serious scientific talks'. This omnibus contains three of his finest works: Orbitville, A Wreath of Stars and The Ragged Astronauts. Orbitville: Racing from the certain vengeance of Earth's tyrant ruler, space captain Vance Garamond flees the Solar System. And discovers the almost unimaginably vast spherical structure soon to become famous as 'Orbitville' - a new home for Earth's huddled masses. A Wreath of Stars: Thornton's Planet is an anti-neutrino planet detected on its approach to Earth. It can be seen only through the newly developed magniluct lenses and its arrival causes a wave of panic. When its course carries it past the earth, interest in Thornton's Planet wanes. But the visit of Thornton's Planet has had effects on Earth further-ranging than anyone could have imagined. The Ragged Astronauts: Land and Overland - twin worlds a few thousand miles apart.

On Land, humanity faces a threat to its very survival - an airborne species, the ptertha, has declared war on humankind, and is actively hunting for victims. The only hope lies in migration. Through space to Overland. By balloon.

Socialism and Superior Brains: The Political Thought of George Bernard Shaw-Gareth Griffith 2002-09-11 Available in paperback for the first time, Gareth Griffith's book provides a comprehensive critical account of the political ideas of one of the most influential commentators of the twentieth century. With close reference to a range of Shaw's texts, from the Fabian tracts to the plays, Gareth Griffith draws out the central theoretical messages of Shaw's engagement with politics. The first part of the book provides an intellectual biography, while at the same time analysing Shaw's key concerns in relation to his Fabianism, arguments for equality of income and ideas on democracy and education. Part Two looks at those areas which Shaw approached as long-standing historical problems or dramas requiring immediate thought or action; sexual equality, the Irish question, war, fascism and sovietism. The book is directed to the general reader as well as to specialists. It will be central reading for anyone seeking to understand Shaw's life, and literary and political writings, or the development of political thinking in this century, or the problems and potential inherent in socialism.
