Pucker Free Seams-Prabir Jana & Y P Garg 2020-06-01 Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be "...Puckering in armhole, ...Puckering in neckline binding, ...control Puckering in bottom hem..." the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled? While there are numerous leaflets, documents and articles available on pucker, we have found that the majority of them lay great stress on "inherent pucker" (only material parameters). In this booklet have tried to include process parameters as well as sewing of lightweight fabrics. All said and done, the problem is so intricately interdependent that exhaustive compilation is well nigh impossible. We are sure this booklet will help manufacturers to understand the rationale behind this publication and we will consider our effort successful if enthusiastic readers regularly inform us about newer methods to tackle the problem. The Big Questions-Lou Marinoff 2009-09-07 Professor Lou Marinoff's first book drew on the wisdom of the great philosophers to solve our everyday problems, launching a movement that restored philosophy to what it once was: useful in all walks of life. Now, in The Big Questions, he takes the concept to the next level, applying centuries of philosophy and great literature to answer central questions of modern existence. Urging us not to accept victimhood as the by-product of modern life, Professor Marinoff uses specific case studies from his counseling practice to show how wisdom from the great thinkers can help us define our own philosophy, and thereby reclaim our sense of well-being. He asks and answers questions that go to the heart of the human condition: How do we know what is right? How can we cope with change? Why can't we all get along? And, most centrally, how can we use the centuries of wisdom that have come before us to help us answer these questions and feel at ease in the world? Accessible, entertaining, and profoundly useful, The Big Questions mixes wisdom from the great thinkers with specific case studies to illuminate how a shift in perspective can truly be life changing. Lou Marinoff is the author of the international hit Plato, Not Prozac!, which has been published in twenty languages. A professor of philosophy at the City College of New York, Marinoff is also the founding president of the American Philosophical Practitioners Association. Praise for Plato, Not Prozac: 'What exactly is philosophical practice?' Marinoff calls it 'therapy for the sane.' In a nutshell, it's using the 2,500-year-old tradition of philosophy to solve everyday problems, like work, relationship and family issues. It's a return to what philosophy was meant to be - a guideline for a way of life.'-Salon.Com 'Plato, Not Prozac! looks to become the bible of the "philosophical counseling" movement.' -Philadelphia Inquirer Magazine 'The ancient think

Women Navigating Globalization-Jana Everett 2013-11-14 This up-to-date text offers a clear and cogent introduction to women in development. Exploring the global structures and processes that impede or support the empowerment of women, Jana Everett and Sue Ellen M. Charlton use a feminist lens to understand contemporary gender roles. Without such a lens, they argue, our understanding of globalization and development is incomplete, resulting in flawed policies that fail to improve the lives of millions of people around the globe. After a set of introductory chapters that conceptually frame the issues, the authors then investigate women's struggles within and against globalization and development through powerful case studies of sex trafficking, water, work, and health. These chapters, by using specific examples, develop the concepts of structure and agency, levels of analysis, and feminist approaches as tools to help students understand the complexities of development and alternative strategies. Through rich interdisciplinary analysis, Everett and Charlton explore the individual and collective strategies women have used to improve their lives under globalization and weigh how effective they have been. Their book will be an essential resource in women's studies, political science, political economy, anthropology, sociology, and development studies.

Automated Web Site Evaluation-M.Y. Ivory 2003-10-31 Among all information systems that are nowadays available, web sites are definitely the ones having the widest potential audience and the most significant impact on the everyday life of people. Web sites contribute largely to the information society: they provide visitors with a large array of services and information and allow them to perform various tasks without prior assumptions about their computer literacy. Web sites are assumed to be accessible and usable to the widest possible audience. Consequently, usability has been recognized as a critical success factor for web sites of every kind. Beyond this universal recognition, usability still remains a notion that is hard to grasp. Summative evaluation methods have been introduced to identify potential usability problems to assess the quality of web sites. However, summative evaluation remains limited in impact as it does not necessarily deliver constructive comments to web site designers and developers on how to solve the usability problems. Formative evaluation methods have been introduced to address this issue. Evaluation remains a process that is hard to drive and perform, while its potential impact is probably maximal for the benefit of the final user. This complexity is exacerbated when web sites are very large, potentially up to several hundreds of thousands of pages, thus leading to a situation where eval uating the web site is almost impossible to conduct manually. Therefore, many attempts have been made to support evaluation with: • Models that capture some characteristics of the web site of interest. Drops and Bubbles in Interfacial Research-D. Mobius 1997-12-09 The shape of drops and bubbles is the centre of interest for many interfacial scientists. This book describes the most recent accomplishments to make use of drops and bubbles in fundamental research and application. After a general introduction into the mechanics of liquid menisci, chapters are dedicated to methods based on drops or bubbles. The chapters about the three main drop experiments provide the theoretical basis, a description of experimental set-ups, specific advantages and disadvantages, correction and calibration problems, experimental examples and their interpretation: pendent and sessile drop, drop volume, and spinning drop technique. The chapter about capillary pressure methods summarises different techniques and gives examples of applications, for instance measurements under microgravity. The maximum bubble pressure technique as a particular capillary pressure method is described, with emphasis on the most recent developments which made this technique applicable to extremely short adsorption times, down to the range of milliseconds and less. Problems connected with aerodynamics and hydrodynamics are discussed and used to show the limits of this widely used standard method. The oscillating bubble technique provides information not available by other techniques, for example about the dilational rheology of adsorption layers and relaxation processes at the interface. The description of rising bubbles in surfactant solutions will contain the hydrodynamic basis as well as the theoretical description of the effect of interfacial layers on the movement of bubbles. Besides the theoretical basis experimental data, such as water purification, flotation processes etc. and the relevance for practical applications will be presented. The chapter about lung alveols demonstrates how important bubbles built by biological membranes are in everyday life. The relevance for medicine and biology as well as model studies is discussed. An important example for the application of drops is metallurgy, where the surface tension of metals and alloys is an important parameter for many applications. The chapters on drop shape analysis by using fibre technique and on force measurements between emulsion droplets are of much practical relevance. Lists of references and symbols are given separately at the end of each chapter while a common subject index is given at the end of the book.

How Israelis and Palestinians Negotiate-Tamara Wittes Cofman 2005 Refreshing and revealing in equal measure, this innovative volume conducts a critical/self-critical exploration of the impact of culture on the ill-fated Oslo peace process. The authors negotiators and scholars alike demolish stereotypes as they construct an unusually subtle and sophisticated understanding of how culture influences negotiating styles. Culture, they argue, did not cause the Oslo breakdown but it did play an influential, intervening role at several levels: coloring the thinking of political leaders, shaping domestic politics on both sides, and affecting each side's evaluation of the other's beliefs and intentions. After an overview by William Dandt of the history of the Oslo process and the impact of international factors such as U.S. mediation, the volume presents a detailed analysis of first Palestinian, and then Israeli negotiating styles between 1993 and 2001. Omar Dajani, a former legal advisor to the Palestinian team, explains how elements of Palestinian identity and national development have hobbled the Palestinians' ability to negotiate effectively. Aharon Klieman, a distinguished Israeli analyst, traces a long-standing clash between diplomatic and security subcultures within the Israeli political elite and reveals how Israeli identity has helped create a negotiating style that opts for short-term gains while undermining the prospects for a lasting agreement. Drawing on these insights, Tamara Wittes concludes the volume by offering not only a fresh appreciation of culture's influence on interethnic negotiations but also lessons for future negotiators in the Israeli-Palestinian conflict. Read the review from Foreign Affairs."

Villa Victoria-Mario Luis Small 2009-05-08 For decades now, scholars and politicians alike have argued that the concentration of poverty in city housing projects would produce distrust, alienation, apathy, and social isolation--the disappearance of what sociologists call social capital. But relatively few have examined precisely how such poverty affects social capital or have considered for what reasons living in a poor neighborhood results in such undesirable effects. This book examines a neglected Puerto Rican enclave in Boston to consider the pros and cons of social scientific thinking about the true nature of ghettos in America. Mario Luis Small dismantles the theory that poor urban neighborhoods are inevitably deprived of social capital. He shows that the conditions specified in this theory are vaguely defined and variable among poor communities. According to Small, structural conditions such as unemployment or a failed system of familial relations must be acknowledged as affecting the urban poor, but individual motivations and the importance of timing must be considered as well. Brimming with fresh theoretical insights, Villa Victoria is an elegant work of sociology that will be essential to students of urban poverty.

Regional Action Plan for the Tobacco Free Initiative in the Western Pacific (2015-2019)-Who Regional Office For The Western Pacific 2015-12-17 The Western Pacific Region is home to 26% of the world's population but 36% of the world's tobacco users. Two people die per minute in the Region from tobacco-related diseases. Globally, tobacco stands to kill 1 billion lives in the 21st century--unless we act to curb the epidemic. To guide Member States in accelerating implementation of the WHO FCTC with support from WHO, the Regional Committee for the Western Pacific endorsed the Regional Action Plan for the Tobacco Free Initiative in the Western Pacific (2015-2019) at its sixty-fifth session in October 2014. Building on our experiences, the new regional action plan is structured around three pillars: strengthening sustainable institutional capacity; developing comprehensive legislation and regulation; and facilitating consistent enforcement through a whole-of-society approach. For each of these strategic outcomes, the regional action plan identifies clear objectives and critical steps to be taken by countries and WHO.

Fossils- Life in the Rocks-Peter T. Scott 2017-04 Fossils - Life in the RocksByDr. Peter ScottThis book introduces the science of Palaeontology with a review of how ancient lifeforms have been preserved by a variety of processes. It also looks at a the Binomial System of naming fossil specimen and at a modern system of classifying plant and animal fossils. Some common examples of plant and animal fossils are given in some detail with some reconstructions of the ancient lifeforms and how they related to modern species. The modern theory of evolution is examined showing how some species survived until the present day and why some species became extinct. The different periods of extinction, including the ice ages and other major extinctions are discussed and this is extended by looking at the evidence for the more recent changes in the Earth's climate, suggesting that many current species may disappear. The book is lavishly illustrated with many photographs and diagrams and two videos on collecting fossils and a representation of the Triassic Period are also given to supplement the text.
