Gestational Diabetes During and After Pregnancy-Catherine Kim 2010-09-16 Gestational Diabetes Mellitus is becoming an increasingly prevalent disease as obesity and other chronic diseases are on the rise. It requires careful and informed clinical management as the care received during pregnancy affects not only perinatal health but the risk of developing type 2 diabetes even decades into the future, in both the mother and the child.From epidemiology and pathophysiology to diagnosis and management, covering recent breakthroughs in research and up-to-date developments in clinical practice, Gestational Diabetes During and After Pregnancy offers the reader a comprehensive and current look at Gestational Diabetes. Anyone involved in the research, public health or clinical aspects of Gestational Diabetes will find this volume a valuable aid in consolidating all recent developments regarding this disease. Obstetrics and Gynaecology-David M. Luesley 2010 This second edition of the innovative text, modelled on the current MRCOG curriculum, provides all the information that is required by the trainee and specialist during training and when preparing for the MRCOG examination. This book is divided into three Parts - General, Obstetrics and Gynaecology. Sub-sections within these major areas are broadly based upon the elements of the curriculum that are highlighted within the RCOG trainee logbook. To ensure consistency of approach throughout the book, all elements within each Part have been written to a template structure, adherence to which has been strictly enforced by the expert editorial team. Each element opens with an introductory section of 'MRCOG standards', highlighting the 'Theoretical knowledge' and 'Practical skills' relevant to the discussion that follows. Within the discussion, clear sub-divisions of the text under standardized headings ensure ease of reference. Each element concludes with a brief list of key references as an aid to further study. Throughout the clinical elements of the text the supporting evidence for efficacy of the interventions described has been presented according to the guidelines of the RCOG. Recommendations for medical, surgical, psychological and complementary treatment and diagnostic tests are all subject to this appraisal, a feature unique among obstetrics and gynaecology textbooks at this level. This textbook has established itself as an indispensable guide to the speciality for all trainee obstetricians and gynaecologists in preparation for the MRCOG examination and beyond. WHO Recommendations for Prevention and Treatment of Maternal Peripartum Infections-World Health Organization 2016-02-12 The goal of the present guideline is to consolidate guidance for effective interventions that are needed to reduce the global burden of maternal infections and its complications around the time of childbirth. This forms part of WHO's efforts towards improving the quality of care for leading causes of maternal death especially those clustered around the time of childbirth in the post-MDG era. Specifically it presents evidence-based recommendations on interventions for preventing and treating genital tract infections during labour childbirth or puerperium with the aim of improving outcomes for both mothers and newborns. The primary audience for this guideline is health professionals who are responsible for developing national and local health protocols and policies as well as managers of maternal and child health programmes and policy-makers in all settings. The guideline will also be useful to those directly providing care to pregnant women including obstetricians midwives nurses and general practitioners. The information in this guideline will be useful for developing job aids and tools for both pre- and inservice training of health workers to enhance their delivery of care to prevent and treat maternal peripartum infections. Heart Disease and Pregnancy-Philip J. Steer 2016-02-29 A comprehensive and authoritative text covering maternity and cardiac care in all causes of heart disease - congenital and acquired. Getting Health Reform Right-Marc Roberts 2008-04-23 This book provides a multi-disciplinary framework for developing and analyzing health sector reforms, based on the authors' extensive international experience. It offers practical guidance - useful to policymakers, consultants, academics, and students alike - and stresses the need to take account of each country's economic, administrative, and political circumstances. The authors explain how to design effective government interventions in five areas - financing, payment, organization, regulation, and behavior - to improve the performance and equity of health systems around the world. Pharmaceutical Reform-Marc J. Roberts 2011-09-21 This book applies an established analytical framework for health sector reform (Getting Health Reform Right, Oxford, 2004) to the performance problems of the pharmaceutical sector. The book is divided into three sections. The first section presents the basic ideas for analysis. It begins by insisting that reform start with a clear understanding of the performance deficiencies of the current system. Like all priority setting in the public sector, this 'definition of the problem' involves both ethical choices and political processes. Early chapters explain the foundations of these ideas and apply them to the pharmaceutical sector. The relationship of ultimate outcomes (like health status or risk protection) to classic health systems concepts like efficiency, access and quality is also explored. The last chapter in the first part is devoted to 'diagnosis'â€ explaining how to move from the definition of a problem to an understanding of how the functioning of the system produces the undesirable outcomes in question. The second part of the book devotes one chapter to each of five 'control knobs': finance, payment, organization, regulation and persuasion. These are sets of potential interventions that governments can use to improve pharmaceutical sector performance. Each chapter presents basic concepts and discusses examples of reform options. Throughout we provide 'conditional guidance'â€ avoiding the approach of a 'one size fits all' model of 'best practices' in these five arenas for reform. Instead we stress the need for local knowledge of political systems, administrative capacities, community values and market conditions in order to design pharmaceutical sector policies appropriate to a countryâ€™s particular circumstances. The last part of the book is a set of teaching cases. Each is preceded by questions and is followed by a brief note on the lessons to be learned. The goal is to help readers develop the skills they need to deal effectively with pharmaceutical sector reform problems in their own countries. The Bart's Endocrine Protocols-Peter J. Trainer 1995 A practical guide for the physician to use on ward rounds. This text advises which endocrine tests to request and the order in which to carry them out for a range of clinical problems. Data sheets, investigation protocol sheets and tables of normal ranges are included. Diabetes and Pregnancy-Lois Jovanovic 1986 The Management of Labour-Arulkumaran 2004 The Management Of Labour Is An Important Part Of Obstetric Practice For The Obstetrician And Midwife Alike. Although Labour Events Are Typically Not Complicated, Many Women Develop Problems Resulting In Maternal, Fetal Or Neonatal Morbidity And Mortality. Hypoxia, Trauma And Infection Are Inherent Risks. This Multi-Author Volume Draws On The Work Of Specialists Who Are Internationally Recognised And Have Contributed Extensively To Studies In Intrapartum And Post-Partum Management Including Key Areas Such As Intrapartum Fetal Monitoring, Prolonged Pregnancies, Preterm Births And Neonatal Resuscitation. Manual of Childhood Infections-Mike Sharland 2011-04-07 Endorsed by the RCPCH and ESPID, and packed with helpful tips and practical guidance, The Blue Book is an easy to use, easily-accessible, but fully comprehensive and evidence-based reference guide, helping busy paediatricians recognise, investigate and manage both common and rare infectious diseases in children and babies. HbA1c in Diabetes-Stephen Gough 2010-03-16 Adapting to the IFCC system of reporting HbA1c poses achallenge to generations of health professionals who have learntthe percentage system related to the major clinical trials, in type1 and type 2 diabetes, the DCCT and UKPDS. This handy paperbackilluminate the transition path. Using real-life case studies to illustrate actual clinicalsituations, the book shows you how to use mmol/mol units in dailypractice. Each case study shows the old percentage units alongside the IFCC units for quick comparison. Produced in association withDiabetes UK, this pocketbook helps you work with confidence in theIFCC system. The Thalassemia Syndromes-David J. Weatherall 2008-04-30 In the new edition of this successful and authoritative book, the thalassaemias are reviewed in detail with respect to their clinical features, cellular pathology, molecular genetics, prevention and treatment. It is aimed at specialists in haematology in the laboratory or clinical setting, particularly in areas where thalassaemia is common either in the native population or in immigrant communities. The fourth edition has been both updated and re-organized. Three new chapters have been added on the link between alpha-thalassaemia and mental retardation, on avoidance and population control and on global epidemiology. Considerable emphasis is placed on molecular pathology reflecting the huge burst of information to have come out of this field in the last few years. Polycystic Ovary Syndrome-Gabor T. Kovacs 2007-02-22 Polycystic ovary syndrome (PCOS) is one of the most common reproductive health problems of women. Despite this, its effective treatment remains a significant challenge to the medical profession. This second edition (published 2007) of a highly successful and well-reviewed book is a thorough update on the syndrome, its aetiology, pathology, impact on infertility, and effective medical management. Every chapter has been extensively referenced and completely revised and updated. New chapters cover: hyperinsulinemic insulin resistance; new treatments including in-vitro maturation; paediatric origins, including the Barker Hypothesis; adrenocortical dysfunction; polycystic ovary syndrome in non-western societies; surgical treatment of obesity associated with polycystic ovaries, and treatment with vitamins and minerals. The book is a reference text for all clinicians with an interest in reproductive endocrinology, including gynaecologists, IVF specialists and obstetricians. Reproductive Endocrinology for the MRCOG and Beyond-Adam Balen 2007-05 This book provides comprehensive information on reproductive endocrinology for MRCOG candidates. Epilepsy and Pregnancy-Torbjörn Tomson 1997 Epilepsy in pregnancy poses a serious threat to the mother and to her developing child. Even in previously well-controlled epilepsy, physiological changes in the mother during pregnancy and also during labour and delivery can alter the pharmacokinetic drug (AED) therapy causing increased seizure frequency. Managing Obstetric Emergencies and Trauma-Charles Cox 2003-01-01 Selected Practice Recommendations for Contraceptive Use-World Health Organization. Reproductive Health and Research 2005 This document is one of two evidence-based cornerstones of the World Health Organization's (WHO) new initiative to develop and implement evidence-based guidelines for family planning. The first cornerstone, the Medical eligibility criteria for contraceptive use (third edition) published in 2004, provides guidance for who can use contraceptive methods safely. This document, the Selected practice recommendations for contraceptive use (second edition), provides guidance for how to use contraceptive methods safely and effectively once they are deemed to be medically appropriate. The recommendations contained in this document are the product of a process that culminated in an expert Working Group meeting held at the World Health Organization, Geneva, 13-16 April 2004. Handbook of Obstetric Medicine, Fourth Edition-Catherine Nelson-Piercy 2010-09-10 The management of the pregnant woman with a medical problem presents the clinician with particular problems. An understanding of how a medical disease affects pregnancy and how any pre-existing medical condition is affected by pregnancy is required. In addition the clinician must take into account the second patient - the fetus - and be aware of how drug therapy and management strategies may influence fetal well-being. With tables, bullet points and boxes of key points, this text deals with the most common and serious medical conditions encountered in pregnancy, with a chapter for each system including heart disease, hypertension, thromboembolism, diabetes, skin problems, and gastrointestinal disease. With substantially updated chapters, this text is mainly in handy note form and concentrates on the differential diagnosis of common symptoms, signs and biochemical abnormalities encountered in pregnancy. Obstetric Medicine-Catherine Nelson-Piercy 2007-05-26 Recognition of the importance of maternal medicine is now reflected in the content of the MRCOG exam, core training and higher training in both obstetrics and medicine. This book approaches obstetric medicine from the point of view of real patients and clinical scenarios as well as model answers to exam questions. The book will be invaluable for trainees and consultants who want to 'test themselves'. When to Suspect Child Maltreatment- 2009 This guidance provides a summary of the clinical features associated with maltreatment (alerting features) that may be observed when a child presents to healthcare professionals. Its purpose is to raise awareness and help healthcare professionals who are not specialists in child protection to identify children who may be being maltreated. It does not give healthcare professionals recommendations on how to diagnose, confirm or disprove child maltreatment. Children may present with both physical and psychological symptoms and signs that constitute alerting features of one or more types of maltreatment, and maltreatment may be observed in parent- or carer-child interactions. Biostatistics-Wayne W. Daniel 2018-11-13 The ability to analyze and interpret enormous amounts of data has become a prerequisite for success in allied healthcare and the health sciences. Now in its 11th edition, Biostatistics: A Foundation for Analysis in the Health Sciences continues to offer in-depth guidance toward biostatistical concepts, techniques, and practical applications in the modern healthcare setting. Comprehensive in scope yet detailed in coverage, this text helps students understand—and appropriately use—probability distributions, sampling distributions, estimation, hypothesis testing, variance analysis, regression, correlation analysis, and other statistical tools fundamental to the science and practice of medicine. Clearly-defined pedagogical tools help students stay up-to-date on new material, and an emphasis on statistical software allows faster, more accurate calculation while putting the focus on the underlying concepts rather than the math. Students develop highly relevant skills in inferential and differential statistical techniques, equipping them with the ability to organize, summarize, and interpret large bodies of data. Suitable for both graduate and advanced undergraduate coursework, this text retains the rigor required for use as a professional reference. Handbook of Clinical Laboratory Testing During Pregnancy-Ann M. Gronowski 2004-05-06 Practicing specialists in pathology, laboratory medicine, and obstetrics comprehensively summarize the latest scientific findings and their experiences in the use and interpretation of laboratory testing in patients who are pregnant or experiencing recurrent pregnancy loss. Topics of interest include the effects of normal physiological changes on test results, test selection for diagnosis, changes in reference ranges, monitoring the pregnant patient, new technologies, and the limitations of laboratory testing. The authors not only clearly explain currently used test methods and technologies for the nontechnical reader, but also provide comprehensive details for laboratory professionals. The comprehensive appendix that compiles published normal reference ranges by first, second, and third trimester constitutes an excellent resource for professionals caring for pregnant women. A Practical Approach to Pharmaceutical Policy-Andreas Seiter 2010-06-17 This book offers policy makers a hands-on approach, tested in the World Bank's field work in many countries, for developing policies that improve access to safe, effective medicines in health systems of low- and middle-income economies. World Malaria Report 2015-World Health Organization 2016-01-30 The World Malaria Report 2015 assesses global malaria disease trends and changes in the coverage and financing of malaria control programs between 2000 and 2015. It also summarizes progress towards international targets, and provides regional and country profiles that summarize trends in each WHO region and each country with malaria. The report is produced with the help of WHO regional and country offices, ministries of health in endemic countries, and a broad range of other partners. The data presented are assembled from the 96 countries and territories with ongoing malaria transmission, and a further five countries that have recently eliminated malaria. Most data are those reported for 2014 and 2015, although in some cases projections have been made into 2015, to assess progress towards targets for 2015. Intrapartum Care-Thomas F. Baskett 2002 The Ventouse-James Alexander Chalmers 1971 Infertility in Practice-Adam Balen 2014-02-12 The field of infertility research and practice is one of continuous innovation and change, but alongside the increasing sophistication of assisted reproductive techniques there is as strong a need as ever for clinical experience and expertise and common practical sense to inform diagnosis and clinical decision making. Now in its fourth edition, Inf Antenatal Care Guidelines:Jhpiego 2020-05-20 Living in the Flow-Jeanine Sciacca 2019-01-16 Why are you here? What are you meant to do in this short span of human years on this planet? In Living in the Flow, author Jeanine Sciacca offers a guide to discovering your purpose and value in the world. She discusses how possessing a true sense of purpose is the centre of our existence. Until you discover and live your purpose, you meander through life searching for satisfaction and happiness. Happiness comes and goes, but purpose gives our lives meaning and direction. Jeanine Sciacca presents ideas and techniques to help you find yours. Filled with a mix of spiritual wisdom and her personal observations, Jeanine Sciacca shares how your life can have greater purpose by serving others. If your purpose doesn't relate to others and is only about serving your self-indulgent ambition, it is not your life purpose. Living your life purpose is adding value to others to make this world a better place. Rambles Among Words-William Swinton 1880 A Textbook of Radiology and Imaging-David Sutton 1980 ABC of Urology-Chris Dawson 2009-04-08 Urological problems encompass a wide range of both distressing and potentially life threatening conditions and the number of general practice presentations is growing rapidly due to the increasing age of the population. Both reliable and comprehensive, the second edition of the ABC of Urology provides a thoroughly updated and revised guide to the speciality which highlights the recent advances in this area. Concentrating specifically on the treatment and diagnosis of the most common conditions, the emphasis is on shared care, where the skills of the primary care team are used in conjunction with hospital referral. This concise, well-illustrated and highly practical text will provide the perfect reference for general practitioners and practice nurses, as well as junior doctors handling hospital referrals. Clinical Guidelines for Stroke Management 2010-National Stroke Foundation (Australia) 2010 "The Clinical Guidelines have been developed to provide a series of evidence-based recommendations related to stroke. Development of the guidelines has been undertaken by a multidisciplinary Expert Working Group (EWG) using methodology consistent with National Health and Medical Research Council (NHMRC) standards."--Publisher's homepage. Textbook of Cancer Epidemiology-Hans-Olov Adami 2018-01-09 "Comprehensive and comprehensible, but also encouraging -- informed by the hope and belief that informed its creation." -Cancer Amid sweeping advances in the science and treatment of cancer, the TEXTBOOK OF CANCER EPIDEMIOLOGY offers students and professionals a definitive, systematic resource for understanding the factors affecting all types of human cancer. This fully updated new edition offers an overview of epidemiology's key concepts and methods as they relate to cancer (including the emerging potential of biomarkers) as well as site-specific chapters on individual cancers' natural history, pathology, descriptive epidemiology, and etiology. Taken together, these chapters forge connections between established science and the ongoing evolution of this dynamic field. Crisply and concisely written by an assembly of internationally recognized researchers, the TEXTBOOK OF CANCER EPIDEMIOLOGY offers a superlative introduction to the subject's consensuses and controversies for those embarking on their careers and a ready reference for seasoned professionals. Therapeutic Energy Application in Urology-Christian Chaussey 2005 This well illustrated textbook assembles useful information for urologists anxious to update their knowledge. - European Urology Today March 2011 Different forms of energy, e.g. shock waves, high-intensity focussed ultrasound, radiofrequency, microwave, laser, cryotherapy and brachytherapy, are applied for minimal-invasive therapy in urology. The actual significance of these procedures were reviewed and discussed by experts within an consensus meeting. This book includes these reviews together with consensus standards concerning the therapeutic energy application. Antenatal Care- 2008
