The Smart One-Ellen Meister 2009-10-13 Bev is the Smart One, who finally leaves her artistic ambitions in chalk dust (and her humor-impaired husband in the arms—and legs—of his nubile protégée) to become a schoolteacher. Clare is the Pretty One, who married well and seems to be living a designer version of the suburban dream. Joey is the Wild One, struggling to stay clean and sober now that she's used up her fifteen minutes of fame as a one-hit-wonder rock star. They love each other but mix like oil, water, and hundred-proof gin . . . a combination that threatens to combust over family tensions, suspected infidelities, a devastating accident, a stunning confession, and the sudden reappearance of their handsome, now all-grown-up former neighbor, Kenny Waxman, who's back in town making his mark as a TV comedy writer. It seems they'll never understand where their differences begin and their own destructive tendencies end. Then it happens: the sisters discover a decades-old body stuffed inside an industrial drum and begin a bold, heartbreaking, and sometimes hilarious journey that will either bring them together . . . or tear them apart for good.

The Cat Owner's Manual-David Brunner 2014-07-01 At Last! A Beginner's Guide to Feline Technology
Scratch marks on your furniture. Dead mice on your doorstep. Stray hairs all over your clothes. It's enough to make you cry out, "Why doesn't my cat have an owner's manual?" And now—finally!—she does. Through step-by-step instructions and helpful schematic diagrams, The Cat Owner's Manual explores hundreds of frequently asked questions: Which breeds interface best with dogs? How can I maintain a quality exterior finish? And why does my model always drink from the bathtub? Whatever your concerns, you'll find the answers here—courtesy of celebrated veterinarian Dr. David Brunner and acclaimed author Sam Stall. Together, they provide plenty of useful advice for both new and experienced cat owners.

The Rise and Fall of Modern American Conservatism-David Farber 2012-08-26 The Rise and Fall of Modern American Conservatism tells the gripping story of perhaps the most significant political force of our time through the lives and careers of six leading figures at the heart of the movement. David Farber traces the history of modern conservatism from its revolt against New Deal liberalism, to its breathtaking resurgence under Ronald Reagan, to its spectacular defeat with the election of Barack Obama. Farber

paints vivid portraits of Robert Taft, William F. Buckley Jr., Barry Goldwater, Phyllis Schlafly, Ronald Reagan, and George W. Bush. He shows how these outspoken, charismatic, and frequently controversial conservative leaders were united by a shared insistence on the primacy of social order, national security, and economic liberty. Farber demonstrates how they built a versatile movement capable of gaining and holding power, from Taft's opposition to the New Deal to Buckley's founding of the National Review as the intellectual standard-bearer of modern conservatism; from Goldwater's crusade against leftist politics and his failed 1964 bid for the presidency to Schlafly's rejection of feminism in favor of traditional gender roles and family values; and from Reagan's city upon a hill to conservatism's downfall with Bush's ambitious presidency. *The Rise and Fall of Modern American Conservatism* provides rare insight into how conservatives captured the American political imagination by claiming moral superiority, downplaying economic inequality, relishing bellicosity, and embracing nationalism. This concise and accessible history reveals how these conservative leaders discovered a winning formula that enabled them to forge a powerful and formidable political majority. Manufacturing Systems: Modelling, Management and Control 1997-International Federation of Automatic Control 1997-07-16 The IFAC TC on Manufacturing, Modelling, Management and Control (MIM) was

founded on the IFAC World Congress Sydney 1993. The goals of this workshop concerned the development, comparison and classification of formal models in the field of Computer Integrated Manufacturing Systems in a descriptive as well as prescriptive way. Computer Integrated Manufacturing Systems are able to integrate optimization methods, simulation models, procedures and knowledge-based tools. The target for the workshop activities were related to the specification of requirements for new models which are used in simulating and designing manufacturing management and control strategies, including discrete-event and continuous representations. Technical areas of interest, at the system level, included: tools for plant layout design, process planning, production planning and control. Technical areas of interest, at the component level, included: models for functional description of flexible manufacturing and assembly systems oriented to production activity control, process supervision and maintenance.
