Macintosh II Repair and Upgrade Secrets-Larry Pina 1991 Covers safety rules, tools, equipment, and techniques for upgrading a Macintosh II, and includes color test pattern generator software on disk

TV Repair for Beginners-Homer L. Davidson 1998 With a minimum of technical jargon, this best-selling guide shows and tells you how to troubleshoot and repair the most common TV problemsÑand avoid expensive repair bills! Even if your previous technical experience is limited to clicking the remote, this book can show you how to pinpoint your TV's problem and fix itÑusing just a few basic tools. This revised edition features a wealth of timely and practical new material on upgrades, too. You get information on universal remote transmitters, stereo TV, digital controls, new color circuits and picture tube sizes, and installing digital satellite receivers. A new "Symptoms and Causes" chapter makes troubleshooting quicker and easier than ever.

Has many applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes

From Betamax to Blockbuster-Joshua M. Greenberg 2004 The consumer videocassette recorder (VCR) was first introduced in the United States as a timeshifting device for recording and playing back broadcast television, but within a decade this use was overshadowed by the wildly popular rental and sale of motion pictures on video. This dissertation charts the invention and establishment of this alternate technological frame, describing how a technology that was originally intended as a peripheral to broadcast television was reconstructed as a "movie machine." The argument has two main thrusts: first, that because the information being mediated by a communication technology is an integral part of its technological frame, this new understanding of the VCR required the production of new knowledge not just about the nature of the machine but also about the movies that it played; and second, that this new knowledge was mainly produced not by the manufacturers of movies and VCRs nor by their end-users, but rather by the mediators who occupied the space between them. As retailers, distributors, clerks and other mediators built

consumption junction between Hollywood studios, hardware manufacturers and consumers, they quite literally built a new cultural institution, the "video store," that was a physical manifestation of their new technological frame for the VCR.
