Concept Research in Food Product Design and Development-Howard R. Moskowitz 2008-02-28 Concepts are critical for the development and marketing of products and services. They constitute the blueprint for these products and services, albeit at the level of consumers rather than at the technical level. A good product concept can help make the product a success by guiding developers and advertising in the right direction. Yet, there is a dearth of both practical and scientific information about how to create and evaluate concepts. There has been little or no focus on establishing knowledge bases for concepts. Concept development is too often relegated to the so-called "fuzzy front end." Concept Research in Food Product Design and Development remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists. The book begins with simple principles of concepts, moves forward to methods for testing concepts, and then on to more substantive areas such as establishing validity, testing internationally and with children, creating databases, and selling in new methods for concept testing. The book combines a "how to" business book with a detailed treatment of the different facets of concept research. As such, the book represents a unique contribution to business applications in food, and consumer research methods. The book is positioned specifically for foods, to maintain a focus on a coherent set of topics. Concept Research in Food Product Design and Development appeals to a wide variety of audiences: R&D, marketing, sensory analysts, and universities alike. Corporate R&D professionals will learn how to create strong concepts. Marketers will recognize how concepts are at the heart of their business. Sensory analysts will find the book a natural extension of their interest in product features. University students will understand how concept research is a critical part of the "consumer-connection." Concept Research in Food Product Design and Development is the definitive, innovative text in describing how to create, analyze, and capitalize upon new product concepts.

The Practice of Contemplative Photography-Andy Karr 2011 This book teaches photographers how to connect fully with the visual richness present in their ordinary, daily experiences. According To The authors, photography is not purely a mechanical process. You need to know how to look, As well as where to point

the camera, and when to press the button. Then as you develop your ability to see, your appreciation and inspiration from the world around you become enhanced. Filled with practical exercises and techniques inspired by mindfulness meditation, this book teaches photographers how to "see what's in front of them". It offers a system of training and exercises that draw upon Buddhist concepts, As well as on insights of great photographic masters such as Alfred Stieglitz, Edward Weston, and Henri Cartier-Bresson. There is a series of visual exercises and assignments for working with texture, light, and colour, As well as for developing mindfulness, As a way of bringing the principles of contemplative photography into ordinary experience.

Volunteer Stream Monitoring- 1997

Broadband Reflectometry for Enhanced Diagnostics and Monitoring Applications-Andrea Cataldo 2011-03-31 This book is dedicated to the adoption of broadband microwave reflectometry (BMR)-based methods for diagnostics and monitoring applications. This electromagnetic technique has established as a powerful tool for monitoring purposes; in fact, it can balance several contrasting requirements, such as the versatility of the system, low implementation cost, real-time response, possibility of remote control, reliability, and adequate measurement accuracy. Starting from an extensive survey of the state of the art and from a clear and concise overview of the theoretical background, throughout the book, the different approaches of BMR are considered (i.e., time domain reflectometry - TDR, frequency domain reflectometry - FDR, and the TDR/FDR combined approach) and several applications are thoroughly investigated. The applications considered herein are very diverse from each other and cover different fields. In all the described procedures and methods, the ultimate goal is to endow them with a significant performance enhancement in terms of measurement accuracy, low cost, versatility, and practical implementation possibility, so as to unlock the strong potential of BMR.

winning author. Dr. Eldon Chance is a brilliant, lonely, forensic neuropsychologist with a long track record of getting involved with damaged, complicated women. While apartment hunting after separating from his wife, a series of bad decisions leads to Chance sleeping with a patient named Jaclyn Blackstone. Unfortunately her ex-husband is an Oakland homicide detective and the jealous type. Meanwhile, Dr. Chance meets a young man who goes by "D"; Chance believes he is a war-veteran, but he is in fact a deranged loner and self-styled Samurai skilled in the art of the blade. D is fascinated by Chance's tales of his tormented and increasingly dangerous affair with Jaclyn and advises him that her ex-husband will find a way to destroy Chance. As Detective Blackstone does indeed threaten the doctor, Chance and D plan a counter-strike. Meanwhile Chance continues his steamy affair with Jaclyn Blackstone (or is it one of her multiple personalities?) But the sexually voracious "Jackie Black" has a story that is far more complex and darker than he could have ever imagined ... Gritty, twisted, and impossible to put down, the surprises keep coming in Chance until the final page has been turned"--

Breakthrough Prayer-Jim Cymbala 2011-01-04 From the BookMeet three who discovered the power of "breakthrough prayer." "My husband and I had a dream of helping desperate young women. But no banker in his right mind would finance such a venture. So we prayed and God broke through every single obstacle we faced. That was just the beginning of the wonderful roller-coaster ride we call 'faith.'"—Grace (chapter 7) "Voices inside my head were constantly screaming at me. I became like an animal in the street, muttering or yelling out a stream of profanity as people passed by. One day I screamed out, Jesus, help me! O God, you're my only hope! That was the breakthrough prayer that saved my life."—Danny (chapter 2) "Talk about breakthrough prayer! I was buried under 110 stories of steel and concrete after the collapse of the World Trade Center Towers when God heard my cry for help."—Genelle (chapter 3)

Effortless Beauty-Julie DuBose 2013 With Effortless Beauty, Julie DuBose brings a new perspective to photography. She talks in an intimate way not just about how we express our experience with our camera, but about a whole new and fresh way to experience our visual world altogether. She guides us through the process of seeing without our usual habitual ways of experiencing what we see, so that we can have vivid, mind-stopping visual perceptions, and express those perceptions exactly as we see them. This book is a road map for taking a different kind of photograph, which might even lead to a different kind of living: direct living through direct seeing.
