DIY String Art-Jesse Dresbach 2016-06-14 This isn't your summer camp string art! String art is making a comeback with seemingly endless new designs, and author Jesse Dresbach's modern, more flexible approach lets you methodically string away to your heart's content. This book is full of patterns--simple to more intricate designs--that help you quickly get to the fun part of the craft--the stringing! Jesse walks you through his tool room, and even includes tips on cutting and preparing the right size boards. He shares how to structure the nails using paper patterns and details several stringing techniques. DIY String Art includes simple geometrics, nature-inspired motifs worked on tree slices, zodiac signs, and even patterns for negative space string art where you fill in the entire board everywhere but inside the chosen motif. These are cool, urban designs, some with random string work, some with faceted sections and still others with specific string paths to achieve more uniform results, and they look amazing no matter where you hang them. Jesse's double-wrap technique lets you add pronounced details and even create a string frame-

Modern Macrame-Emily Katz 2018-05-15 The ultimate guide to creating and styling modern macramé

projects in the home from top creative tastemaker and sought-after macramé artist Emily Katz. Macramé--the fine art of knotting--is an age-old craft that's undergoing a contemporary renaissance. At the heart of this resurgence is Emily Katz, a lifestyle icon and artist who teaches sold out macramé workshops around the world and creates swoon-worthy aspirational interiors with her custom hand-knotted pieces. Modern Macramé is a stylish, contemporary guide to the traditional art and craft of macramé, including 33 projects, from driftwood wall art and bohemian light fixtures to macramé rugs and headboards. The projects are showcased in easy to follow and photogenic project layouts, guiding both the novice and the more experienced crafter in a highly achievable way. Included with every project are thoughtful lifestyle tips showing how macramé can provide the perfect finishing touch for the modern, well-designed home--whether it's a hundred-year-old farmhouse, a sophisticated loft, or a cozy but stylish rental.

String Art Magic-Rain Blanken-Turner 2018-06 Geometric string art is created by winding colorful thread around nail heads to develop wonderfully detailed and complex fractal designs. However, without the proper numbered point patterns, it can be almost impossible to recreate. No longer thanks to String Art Magic. With 20 fun and simple projects, author Rain Blanken brings back the art of geometric dreamscapes crafted in string, nails, and parabolic curves. String Art Magic is not only replete with expert tips and how-to technique, it's a treasure trove of difficult-to-find step-by-step geometric string art patterns. With Blanken's engaging style and easy-to-follow guidance, any crafter can learn the secrets to creating intricate geometric string art while discovering how easy it is to follow these patterns. An expert string artist who discovered the craft as a child, Blanken presents patterns of increasing difficulty to help crafters obtain an understanding of how the geometry behind each design works. By the end of String Art Magic, crafters new to the world of string art will have not only completed some amazing and beautiful art to proudly display, but will also be able to customize designs to create their very own string art patterns.

Programming Challenges-Steven S Skiena 2006-04-18 There are many distinct pleasures associated with computer programming. Craftsmanship has its quiet rewards, the satisfaction that comes from building a useful object and making it work. Excitement arrives with the flash of insight that cracks a previously intractable problem. The spiritual quest for elegance can turn the hacker into an artist.

There are pleasures in parsimony, in squeezing the last drop of performance out of clever algorithms and tight coding. The games, puzzles, and challenges of problems from international programming competitions are a great way to experience these pleasures while improving your algorithmic and coding skills. This book contains over 100 problems that have appeared in previous programming contests, along with discussions of the theory and ideas necessary to tackle them. Instant online grading for all of these problems is available from two WWW robot judging sites. Combining this book with a judge gives an exciting new way to challenge and improve your programming skills. This book can be used for self-study, for teaching innovative courses in algorithms and programming, and in training for international competition. To the Reader

The problems in this book have been selected from over 1,000 programming problems at the Universidad de Valladolid online judge, available at <http://online-judge.uva.es>. The judge has ruled on well over one million submissions from 27,000 registered users around the world to date. We have taken only the best of the best, the most fun, exciting, and interesting problems available.

STEAM Lab for Kids-Liz Lee Heinecke 2018-05-08 STEAM Lab for Kids is an art-forward doorway to science, math, technology, and engineering through 52 family-friendly experiments and activities. While many aspiring artists don't necessarily identify with STEM subjects, and many young inventors don't see the need for art, one is essential to the other. Revealing this connection and encouraging kids to explore it fills hungry minds with tools essential to problem solving and creative thinking. Each of the projects in this book is designed to demonstrate that the deeper you look into art, the more engineering and math you'll find. "The STEAM Behind the Fun" sections throughout explain the science behind the art. Learn about: angular momentum by making tie-dyed fidget spinners. electrical conductors by making graphite circuits. kinetic energy by making a rubber band shooter. symmetry by making fruit and veggie stamps. much more! From graphite circuit comic books to edible stained glass, young engineers and artists alike will find inspiration aplenty. The popular Lab for Kids series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, clay, geology, math, and even how to create your own circus—all authored by established experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill

levels. Gain firsthand knowledge on your favorite topic with Lab for Kids.

Game Programming Patterns-Robert Nystrom 2014-11-03 The biggest challenge facing many game programmers is completing their game. Most game projects fizzle out, overwhelmed by the complexity of their own code. Game Programming Patterns tackles that exact problem. Based on years of experience in shipped AAA titles, this book collects proven patterns to untangle and optimize your game, organized as independent recipes so you can pick just the patterns you need. You will learn how to write a robust game loop, how to organize your entities using components, and take advantage of the CPU's cache to improve your performance. You'll dive deep into how scripting engines encode behavior, how quadtrees and other spatial partitions optimize your engine, and how other classic design patterns can be used in games.

Macrame Pattern Book-Marchen Art Studio 2013-06-11 "Learn how to make over seventy macramê knots and small repeat patterns, then use them to create a wide range of projects. Each knot is shown in a close-up photograph with clear step-by-step diagrams showing how they are tied. Starting with the basics, the knots progress on to more complicated and complex designs, but as all are clearly diagramed it is very easy to follow along. This invaluable guidebook opens with a discussion of the different types of threads or cords available, shows a range of clasps and other findings, plus covers the types of beads to use. It also includes lots of tips and useful information like how to set up your work board, and other helpful lessons like how to keep track of the cord ends for less confusion. The thirty-three projects range from simple jewelry pieces like the classic friendship bracelet and watch straps to more complex ones like a variety of bags and baskets. Translated from the Japanese, Macramê pattern book is an outstanding resource for both new and more experienced "knotters.""

Islamic Geometric Design-Eric Broug 2013 Islamic geometric designs are admired worldwide for their beauty and marvellous intricacy, yet in truth they are seldom understood. Indeed, their complexity and artistry can seem almost beyond the powers of human ingenuity. In this handsomely illustrated volume, artist and teacher Eric Broug analyses and explains these complex designs in their historical and physical context. His own original drawings accompany magnificent photographs of mosques, madrasas, palaces and tombs from the Islamic world, ranging from North Africa to Iran and Uzbekistan, and from the 8th to the 19th centuries. Chapters are devoted to each of the main families of geometric design fourfold, fivefold and sixfold and to the complex combined patterns. Every design is carefully explained, and illustrated with a wealth of stunning photographs and clear, meticulously detailed drawings. Readers can follow the design processes by which these patterns were created and even learn to reproduce and invent geometric patterns for themselves, using exactly the same tools as the Islamic craftsmen of old: a ruler and a pair of compasses.

The Threads of Reading-Karen Tankersley 2003-11-03 How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

Making Mathematics with Needlework-sarah-marie belcastro 2007-12-12 Mathematical craftwork has become extremely popular, and mathematicians and crafters alike are fascinated by the relationship between their crafts. The focus of this book, written for mathematicians, needleworkers, and teachers of mathematics, is on the relationship between mathematics and the fiber arts (including knitting, crocheting, cross-stitch, and quilting). Each chapter starts with an overview of the mathematics and the needlework at a level understandable to both mathematicians and needleworkers, followed by more technical sections discussing the mathematics, how to introduce the mathematics in the classroom through needlework, and how to make the needlework project, including patterns and instructions. New Designs, New Projects for Embroidery on Paper-Erica Fortgens 2009 Combines instructions for the

latest designs with coverage of new materials, in an embroidery pattern-complemented guide that explains how to embellish cards based on florals, animal motifs, geometrical shapes, and other themes with a range of decorative notions. Original.

Knit the Sky-Lea Redmond 2015-09-05 "Different from any knitting book I've ever seen! Think of it as a journal of your life, not with pen and paper, but with knitting needles" (Lisa Congdon, author of Find Your Artistic Voice). Record the beauty, emotions, and experiences of everyday life—with your knitting needles! Author Lea Redmond offers thirty-two enchanting projects that will inspire you to create beautiful finished pieces full of personal meaning and memories. Stock up on shades of blue, gray, and white and knit one strip of a scarf each day for a year, using the color that matches the sky on that day. When you're done, you'll have a unique memento of your year better than anything you can keep in a scrapbook. Or when you're traveling, knit postcard-size swatches at each place you visit, using the colors you see around you. When the trip is over, piece the swatches together into a throw or scarf that will remind you of your journey every time you use it. Or knit a height-chart scarf for a beloved baby, starting with her length at birth, then add inches each year until you have the perfect gift for her eighteenth birthday. These are knitting projects like no other, resulting in one-of-a-kind heirlooms that tell a story only you can tell. Redmond provides instructions for all the stitches and techniques you need, as well as required patterns. "In this charming book, Lea Redmond puts her big heart into creative knitting projects. She reminds us that the sky's the limit—in knitting and in life." —Ann Hood, author of The Knitting Circle "Not your usual book about knitting . . . [It] aspires to turn on your creativity, to awaken the designer within you." —In Stitches
