Many of the homes come with money-saving and environmentally sound features such as solar panels and water heaters, wood stoves, ceiling fans, airlock entries, wind power alternatives, and natural gas heaters.

Pastplay-Kevin Kee 2014-03-10 A collection of scholars and teachers of history unpack how computing technologies are transforming the ways that we learn, communicate, and teach.

Computational Systems Pharmacology and Toxicology-Rudy J Richardson 2017-03-03 The network approaches of systems pharmacology and toxicology serve as early predictors of the most relevant screening approach to pursue both in drug discovery and development and ecotoxicological assessments. Computational approaches have the potential to improve toxicological experimental design, enable more rapid drug efficacy and safety testing and also reduce the number of animals used in experimentation. Rapid advances in availability of computing technology hold tremendous promise for advancing applied and basic science and increasing the efficiency of risk assessment. This book provides an understanding of the basic principles of computational toxicology and the current methods of predictive toxicology using chemical structures, toxicity-related databases, in silico chemical-protein docking, and biological pathway tools. The book begins with an introduction to systems pharmacology and toxicology and computational tools followed by a section exploring modelling adverse outcomes and events. The second part of the book covers the discovery of protein targets and the characterisation of toxicant-protein interactions. Final chapters include case studies and additionally discuss interactions between phytochemicals and Western therapeutics. This book will be useful

for scientists involved in environmental research and risk assessment. It will be a valuable resource for postgraduate students and researchers wishing to learn about key methods used in studying biological targets both from a toxicity and pharmacological activity standpoint.

New Possibilities for the Past-Penney Clark 2011-08-22  
The place of history education in schools has sparked heated debate in Canada. Is history dead? Who killed it? Should history be put in the service of nation? Can any history be truly inclusive? This volume advances the debate by shifting the focus from what should be included in history education to how we should think about and teach the past. In this book historians and educators discuss the state of history education research and its implications for classrooms, museums, virtual environments, and public institutional settings. They develop a comprehensive research agenda both to help students learn about the past and to understand how we construct history from its infinite possibilities.

Reinforced Concrete Design-Prab Bhatt 2006-05-02  
Setting out design theory for concrete elements and structures and illustrating the practical applications of the theory, the third edition of this popular textbook has been extensively rewritten and expanded to conform to the latest versions of BS8110 and EC2. It includes more than sixty clearly worked out design examples and over 600

diagrams, plans and charts as well as giving the background to the British Standard and Eurocode to explain the 'why' as well as the 'how' and highlighting the differences between the codes. New chapters on prestressed concrete and water retaining structures are included and the most commonly encountered design problems in structural concrete are covered. Invaluable for students on civil engineering degree courses; explaining the principles of element design and the procedures for the design of concrete buildings, its breadth and depth of coverage also make it a useful reference tool for practising engineers.

Reinforced Concrete-B.S. Choo 2018-10-08 This new edition of a highly practical text gives a detailed presentation of the design of common reinforced concrete structures to limit state theory in accordance with BS 8110.

Prestressed Concrete Design to Eurocodes-Prab Bhatt 2012-05-23 Ordinary concrete is strong in compression but weak in tension. Even reinforced concrete, where steel bars are used to take up the tension that the concrete cannot resist, is prone to cracking and corrosion under low loads. Prestressed concrete is highly resistant to stress, and is used as a building material for bridges, tanks, shell roofs, floors, buildings, containment vessels for nuclear power plants and offshore oil platforms. With a wide range of benefits such as crack control, low rates of corrosion, thinner slabs, fewer joints and increased span length; prestressed concrete is a stronger, safer, more economical and more sustainable building material. The introduction of the Eurocodes has necessitated a new approach to the design of prestressed concrete structures and this book provides a comprehensive practical guide for professionals through each stage of the design process. Each chapter focuses on a specific aspect of design Fully consistent with Eurocode 2, and the associated parts of Eurocodes 1 and 8 Examples of challenges often encountered in professional practice worked through in full Detailed coverage of post-tensioned structures Extensive coverage of design of flat slabs using the finite element method Examples of pre-tensioned and post-tensioned bridge design An introduction to earthquake resistant design using EC 8 Examining the design of whole structures as well as the design of sections through many fully worked numerical examples which allow the reader to follow

each step of the design calculations, this book will be of great interest to practising engineers who need to become more familiar with the use of the Eurocodes for the design of prestressed concrete structures. It will also be of value to university students with an interest in the practical design of whole structures.

How to Start a Home-based Fashion Design Business-Angela Wolf 2012-12-04 This book will be a priceless resource for those considering adventuring into the fashion industry, yet not knowing how or where to start. Comprised of detailed information, How to Start a Home-based Fashion Design Business will be a guide for the aspiring designer to plan and execute a successful home based business. This material will not only provide a fashion realm, but will show how to create additional revenue streams in the sewing field. This book will be the "one stop shop" for the small designer.

Reinforced Concrete Design to Eurocodes-Prab Bhatt 2014-02-28 This fourth edition of a bestselling textbook has been extensively rewritten and expanded in line with the current Eurocodes. It presents the principles of the design of concrete elements and of complete structures, with practical illustrations of the theory. It explains the background to the Eurocode rules and goes beyond the core topics to cover the design of foundations, retaining walls, and water retaining structures. The text includes more than sixty worked out design examples and more than six hundred diagrams, plans, and charts. It suitable for civil engineering courses and is a useful reference for practicing engineers.

M Kelly 2013-04-12 Although many humanities scholars have been talking and writing about the transition to the digital age for more than a decade, only in the last

few years have we seen a convergence of the factors that make this transition possible: the spread of sufficient infrastructure on campuses, the creation of truly massive databases of humanities content, and a generation of students that has never known a world without easy Internet access. Teaching History in the Digital Age serves as a guide for practitioners on how to fruitfully employ the transformative changes of digital media in the research, writing, and teaching of history. T. Mills Kelly synthesizes more than two decades of research in digital history, offering practical advice on how to make best use of the results of this synthesis in the classroom and new ways of thinking about pedagogy in the digital humanities.

Benign by Design-Paul T. Anastas 1994 Describes the current status and potential of synthetic chemistry designed to use and to generate fewer hazardous substances. Examines new techniques for carrying out transformations in environmentally benign solvent systems. Presents research results on the replacement of hazardous feedstocks with biologically derived, innocuous feedstocks; of hazardous reagents with visible light; and of phosgene, benzene, and halogens in a variety of industrially important reactions. Provides examples of how alternative synthetic design for pollution prevention has been made commercially viable. Describes how to conduct a source-reduction assessment and analyzes computer-assisted synthetic design.

But when an unexpected tragedy strikes, the four lives are irreparably torn apart. Flung into a Fitzgeraldian world of sex, crime and collusion, Karan learns that what the heart sees the mind's eye may never behold. Siddharth Dhanvant Shanghvi's The Lost Flamingoes of Bombay is a razor sharp chronicle of four friends caught in modern India 's tidal wave of uneven prosperity and political failure. It's also a profoundly moving meditation on love's betrayal and the redemptive

powers of friendship.

How Not to Be a Dick-Meghan Doherty 2019-08-01 On the one hand, nobody wants to be a dick. On the other hand, dicks are everywhere! They cut in line, talk behind our backs, recline into our seats, and even have the power to morph into trolls online. Their powers are impressive, but with a little foresight and thoughtfulness, we can take a stand against dickishness today. How Not to Be a Dick is packed with honest and straightforward advice, but it also includes playful illustrations showing two well-meaning (but not always well behaved) young people as they confront moments of potential dickishness in their everyday lives. Sometimes they falter, sometimes they triumph, but they always seek to find a better way. And with their help, you can too.

Writing History in the Digital Age-Jack Dougherty 2013-10-28 Writing History in the Digital Age began as a “what-if” experiment by posing a question: How have Internet technologies influenced how historians think, teach, author, and publish? To illustrate their answer, the contributors agreed to share the stages of their book-in-progress as it was constructed on the public web. To facilitate this innovative volume, editors Jack Dougherty and Kristen Nawrotzki designed a born-digital, open-access, and open peer review process to capture commentary from appointed experts and general readers. A customized WordPress plug-in allowed audiences to add page- and paragraph-level comments to the manuscript, transforming it into a socially networked text. The initial six-week proposal phase generated over 250 comments, and the subsequent eight-week public review of full drafts drew 942 additional comments from readers across different parts of the globe. The finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) if and how digital and emergent technologies have changed the historical profession.

Management Skills for Everyday Life-Paula J. Caproni 2012 For undergraduate and graduate level Management Skills, and Organizational Behavior courses, as well as for Executive Education for beginning through mid-level managers and professionals. This text's engaging and practical, yet research-based style is designed to help students achieve the success they desire. As with the first edition, this second edition is based on the compelling assumptions that (1) IQ is not a big predictor of success and (2) the most successful people work smarter, not only harder, than less successful people. Students appreciate this book not only because it is written in an engaging and practical style, but because it provides them with many tools that will help them work smarter immediately, as well as in the long term. Instructors appreciate this book because it effectively translates solid research into concepts and tools that students find interesting and immediately useful.

Hacking the Academy-Daniel J Cohen 2013-05-13 On May 21, 2010, Daniel J. Cohen and Tom Scheinfeldt posted the following provocative questions online: "Can an algorithm edit a journal? Can a library exist without books? Can students build and manage their own learning management platforms? Can a conference be held without a program? Can Twitter replace a scholarly society?" As recently as the mid-2000s, questions like these would have been unthinkable. But today serious scholars are asking whether the institutions of the academy as they have existed for decades, even centuries, aren't becoming obsolete. Every aspect of scholarly infrastructure is being questioned, and even more importantly, being hacked. Sympathetic scholars of traditionally disparate disciplines are canceling their association memberships and building their own networks on Facebook and Twitter. Journals are being compiled automatically from self-published blog posts. Newly minted PhDs are forgoing the tenure track for alternative academic careers that blur the lines between research, teaching, and service. Graduate students are looking beyond the categories of the traditional CV and building expansive professional identities and popular followings through social media. Educational technologists are "punking" established technology vendors by rolling out their own open source infrastructure. Here, in Hacking the Academy, Daniel J. Cohen and Tom Scheinfeldt have gathered a sampling of the answers to their initial questions from scores of engaged academics who care deeply about higher education. These are the responses from a wide array of scholars, presenting their thoughts and approaches with a vibrant intensity, as they explore and contribute to ongoing efforts to rebuild scholarly infrastructure for

*A Soprano on Her Head*-Eloise Ristad 1982 Eloise Ristad deals here with complex problems which torment and cripple so many of our most creative and talented people, and she does so with compassion, wisdom, and wit. The problem of stage fright, for instance, is a suffering of epidemic proportions in our society, and involves modalities of thought and projections that rob spontaneity and enthusiasm in artistic performance. Those interested in creative education have long felt that an entirely new, holistic and nurturing process of allowing individuals to discover and express themselves is needed if our educational system is to avoid the neuroses and creative blocks of the past generation. This book illuminates through its conversational style the destructive inhibitions, fears, and guilt experienced by all of us as we fail to break through to creativity. This story is told to me day after day in conservatories and college campuses around the world. Indeed I felt at times that she was telling of my own most petty and debilitating fears. But what is important, *A Soprano on Her Head* supplies answers and methods for overcoming these universal psychological blocks--methods that have not only been proven in her own studio, but which trace back through history to the oldest and wisest systems of understanding the integration of mind and body. The work bears scrutiny both scientifically and holistically. - Foreword.

Citizen Coke: The Making of Coca-Cola Capitalism-Bartow J. Elmore 2014-11-03 "Citizen Coke demonstrate[s] a complete lack of understanding about . . . the Coca-Cola system—past and present."

—Ted Ryan, the Coca-Cola Company How did Coca-Cola build a global empire by selling a low-price concoction of mostly sugar, water, and caffeine? The easy answer is advertising, but the real formula to Coke's success was its strategy, from the start, to offload costs and risks onto suppliers, franchisees, and the government. For most of its history the company owned no bottling plants, water sources, cane- or cornfields. A lean operation, it benefited from public goods like cheap municipal water and curbside recycling programs. Its huge appetite for ingredients gave it outsized influence on suppliers and congressional committees. This was Coca-Cola capitalism. In this new history Bartow J. Elmore explores Coke through its ingredients, showing how the company secured massive quantities of coca leaf, caffeine, sugar, and other inputs. Its growth was driven by shrewd leaders such as Asa Candler, who scaled an Atlanta soda-fountain operation into a national empire, and "boss" Robert Woodruff, who nurtured partnerships with companies like Hershey and Monsanto. These men, and the company they helped build, were seen as responsible citizens, bringing jobs and development to every corner of the globe. But as Elmore shows, Coke was usually getting the sweet end of the deal. It continues to do so. Alongside Coke's recent public investments in water purification infrastructure, especially in Africa, it has also built—less publicly—a rash of bottling plants in dangerously arid regions. Looking past its message of corporate citizenship, Elmore finds a strategy of relentless growth. The costs shed by Coke have fallen on the public at large. Its annual use of many billions of gallons of water has strained an increasingly scarce global resource. Its copious servings of high-fructose corn syrup have threatened public health. Citizen Coke became a giant in a world of abundance. In a world of scarcity it is a strain on resources and all who depend on them.

Fundamentals of Modern Real Property Law-Edward H. Rabin 1979  
The Truth Always Prevails-Sadrudin Hashwani 2014-08-15  
The memoir of one of Pakistan's most prominent businessmen in exile 'I reached to see not the beautiful hotel that we had so lovingly built, but a war zone. . . . We found bodies of our dear guests, colleagues, friends: faces I recognized, faces I had worked with and smiled at. The sight that stunned me was the crater—60 feet wide and 20 feet

deep. It had been created by over 1000 kg of RDX. The hotel had not been attacked, it had been brutalized. Dead bodies and dismembered limbs, little pools of blood—it was a massacre. I had thought of myself as a hardened man who had seen violence and gristly sights—but what I saw that day left me shaken.’ Truth Always Prevails is the memoir of one of Pakistan’s most prominent businessmen, Sadruddin Hashwani, chairman of the internationally renowned Hashoo Group. From sleeping in the back of trucks in the cold deserts of Balochistan to now owning a brand of luxury hotels as well as numerous other businesses, Sadruddin Hashwani has led a remarkable life. He has struggled against corrupt politicians and uncooperative government officials to build and sustain an extensive business empire. He has faced near-death experiences, most remarkably the 2008 bombing of his own hotel, the Marriott Islamabad, and has overcome seemingly insurmountable odds. Filled with fascinating anecdotes and telling sketches of prominent Pakistani personalities, his is an extraordinary story that will inspire and entertain readers.

Researching History Education-Linda S. Levstik 2018-02-06 "The authors' research is well known and among the most important American works being done on how children learn history. It is thus a great idea to gather this pivotal research in one place. The volume offers a new perspective through the authors' reflections on the research process. It is profound without pomposity, ideal for the intended audience; the tone is just right. There really isn't another book that does what this one does." Stephen J. Thornton, University of South Florida Researching History Education combines a selection of Linda Levstik's and Keith Barton's previous work on teaching and learning history with their reflections on the process of research. These studies address students' ideas about time, evidence, significance, and agency, as well as classroom contexts of history education and broader social influences on students' and teacher's thinking. These pieces—widely cited in history and social studies education and typically required reading for students in the area—were chosen to illustrate major themes in the authors' own work and trends in recent research on history education. In a series of new chapters written especially for this volume, the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume: theory, method, and context. Although research on children's and adolescents' historical understanding has been the most active area of scholarship in social studies in recent years, as yet there is little in-depth attention to
