The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. A Source Book in Classical Analysis-Garrett Birkhoff 1973 An understanding of the developments in classical analysis during the nineteenth century is vital to a full appreciation of the history of twentieth-century mathematical thought. It was during the nineteenth century that the diverse mathematical formulae of the eighteenth century were systematized and the properties of functions of real and complex variables clearly distinguished; and it was then that the calculus matured into the rigorous discipline of today, becoming in the process a dominant influence on mathematics and mathematical physics. This Source Book, a sequel to D. J. Struik's Source Book in Mathematics, 1200-1800, draws together more than eighty selections from the writings of the most influential mathematicians of the period. Thirteen chapters, each with an introduction by the editor, highlight the major developments in mathematical thinking over the century. All material is in English, and great care has been taken to maintain a high standard of accuracy both in translation and in transcription. Of particular value to historians and philosophers of science, the Source Book should serve as a vital reference to anyone seeking to understand the roots of twentieth-century mathematical thought.

Two-Buck Chuck & The Marlboro Man-Frank Bergon 2019-03-06 Frank Bergon's astonishing portrayals of people in California's San Joaquin Valley reveal a country where the culture of a vanishing West lives on in many twenty-first-century Westerners, despite the radical technological transformations around them. All are immigrants, migrants, their children, or their grandchildren whose lives intertwine with the author's, including several races and ethnicities: Chicanos, Mexicans, African Americans, Italians, Asians, Native Americans, Scots-Irish descendants of Steinbeck's Okies, and Basques of the author's own heritage. Bergon presents a powerful array of rural and small-town Westerners who often see themselves as part of a region and a way of life most Americans aren't aware of or don't understand, their voices unheard, their stories untold. In these essays, Westerners from the diverse heritage of the San Joaquin Valley include California's legendary Fred Franzia, the maker of the world's best-selling Charles Shaw wines dubbed "Two-Buck Chuck," and Darrell Winfield, a Dust Bowl migrant and lifelong working cowboy who for more than thirty years reigned as the iconic Marlboro Man. Their voices help us understand the complexities of today's rural West, where Old West values intersect with New West realities. This is the West (and America today)—a region in conflict with itself.
