Pack of Two-Caroline Knapp 2010-08-10 At the age of 36, Caroline Knapp, author of the acclaimed bestseller *Drinking: A Love Story*, found herself confronted with a monumental task: redefining her world. She had faced the loss of both her parents, given up a twenty-year relationship with alcohol, and, as she writes, "I was

wandering around in a haze of uncertainty, blinking up at the biggest questions: Who am I without parents and without alcohol? How to form attachments, and where to find comfort, in the face of such daunting vulnerability?" An answer materialized in the most unlikely form: that of a dog. Eighteen months to the day after she quit drinking, Knapp stumbled upon an eight-week-old puppy at a local animal shelter, took her home, and named her Lucille. Now two years old, Lucille has become a central force in Knapp's life: "In her," she writes, "I have found solace, joy, a bridge to the world." Caroline Knapp has been celebrated as much for her fresh insight into emotional and psychological issues as she has been for her gifts as a writer. In *Pack of Two*, she brings the same perception and talent to bear on the rich, complicated terrain of human-animal relationships. In addition to mining her own experience with Lucille, Knapp speaks to a wide variety of dog people--from animal behaviorists and psychologists to other owners whose dogs have deeply affected their lives--about this emotionally complex, sometimes daunting, often profoundly healing alliance. Throughout, she explores the shift in canine roles from working partners to intimate companions and looks, too, at how this new kinship, this wordless bond, becomes a template for what we most desire ourselves. From the Trade Paperback edition.

IR Playbook-Nicole A. Keefe 2018-03-14 This textbook offers a comprehensive guide to interventional radiology (IR) for medical

students, residents, nurse practitioners, physician assistants, and fellows. IR is constantly evolving to meet the growing demands of patient care by applying cutting-edge technology to minimally invasive image-guided procedures. A dynamic specialty, interventional radiology has gained significant traction and interest in recent years, with combined IR/DR residencies rising to meet the increasing demand. This book addresses this growing need for a reference in IR, allowing students to gain a solid foundation to prepare them for their careers. The book is divided into two main sections, with many images and key point boxes throughout that offer high-yield pearls along with the specific How To's necessary for practice. The first section is designed to give readers an introduction to IR, including radiation safety, commonly used devices, patient care, and anatomy. The second portion divides into sections covering major body areas, diseases, conditions, and interventions. These chapters cover procedures including pathophysiology, indications for treatment, as well as alternative treatments before delving into interventional therapy. IR Playbook gives medical students, residents, and trainees a full perspective of interventional radiology.

Rare Metal Technology 2020-Gisele Azimi 2020-01-20 This collection presents papers from a symposium on extraction of rare metals as well as rare extraction processing techniques used in metal production. Rare metals include strategic metals that are in increasing demand and subject to supply risks. Metals represented include neodymium, dysprosium, scandium and others; platinum group metals including platinum, palladium, iridium, and others; battery related metals including lithium, cobalt, nickel, and aluminum; electronics-related materials including copper and gold; and refractory metals including titanium, niobium, zirconium, and hafnium. Other critical materials such as gallium, germanium, indium and silicon are also included. Papers cover various processing techniques, including but not limited to hydrometallurgy (solvent extraction, ion exchange, precipitation, and crystallization), electrometallurgy (electrorefining and electrowinning), pyrometallurgy, and aerometallurgy (supercritical fluid extraction). Contributions are focused on primary production as well as secondary production through urban mining and recycling to enable

a circular economy. A useful resource for all involved in commodity metal production, irrespective of the major metal Provides knowledge of cross-application among industries Extraction and processing of rare metals that are the main building block of many emerging critical technologies have been receiving significant attention in recent years. The technologies that rely on critical metals are prominent worldwide, and finding a way to extract and supply them effectively is highly desirable and beneficial.

Clifford Algebras and Their Applications in Mathematical Physics-J.S.R. Chisholm 2012-12-06 William Kingdon Clifford published the paper defining his "geometric algebras" in 1878, the year before his death. Clifford algebra is a generalisation to n-dimensional space of quaternions, which Hamilton used to represent scalars and vectors in real three-space: it is also a development of Grassmann's algebra, incorporating in the fundamental relations inner products defined in terms of the metric of the space. It is a strange fact that the Gibbs Heaviside vector techniques came to dominate in scientific and technical literature, while quaternions and Clifford algebras, the true associative algebras of inner-product spaces, were regarded for nearly a century simply as interesting mathematical curiosities. During this period, Pauli, Dirac and Majorana used the algebras which bear their names to describe properties of elementary particles, their spin in particular. It seems likely that none of these eminent mathematical physicists realised that they were using Clifford algebras. A few research workers such as Fueter realised the power of this algebraic scheme, but the subject only began to be appreciated more widely after the publication of Chevalley's book, 'The Algebraic Theory of Spinors' in 1954, and of Marcel Riesz' Maryland Lectures in 1959. Some of the contributors to this volume

Georges Deschamps, Erik Folke Bolinder, Albert Crumeyrolle and David Hestenes were working in this field around that time, and in their turn have persuaded others of the importance of the subject. Lungs-Duncan Macmillan 2019-03-15 The world is getting hotter, there's unrest overseas—the seas themselves aren't very calm—and one couple is thinking about having a child. Lungs is a smart and funny drama that follows a couple through the surprising lifecycle of their relationship, as they grapple with questions of family and change, hope, betrayal, happenstance, and the terrible pain that you can only cause the people you love.

Feminism and the Politics of Travel After the Enlightenment-Yaël Rachel Schlick 2012-01 Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Advanced Multimedia and Ubiquitous Engineering-James J. (Jong Hyuk) Park 2016-08-29 This volume presents selected papers from prominent researchers participating in the 11th International Conference on Future Information Technology and the 10th International Conference on Multimedia and Ubiquitous Engineering, Beijing, China, April 20-22, 2016. These large international conferences provided an opportunity for academic and industry professionals to discuss recent progress in the fields of multimedia technology and ubiquitous engineering including new models and systems and novel applications associated with the utilization and acceptance of ubiquitous computing devices and systems. The contributions contained in this book also provide more information about digital and multimedia convergence, intelligent applications, embedded systems, mobile and wireless communications, bio-inspired computing, grid and cloud computing, the semantic web, user experience and HCI, security and trust computing. This book describes the state of the art in multimedia and ubiquitous engineering, and future IT models and their applications.

Jeep-Patrick R. Foster 2020-03-10 The definitive, fully illustrated celebration of an auto manufacturer that paved its own way by going off-road is now updated to celebrate Jeep's 80th anniversary. Few American vehicles, or vehicles made anywhere else in the world for that matter, are as universally iconic as the Jeep. From olive drab WWII military relics to the beloved Wrangler with its rear-mounted spare tire, open-air design, and telltale roll cage, the Jeep is a true classic. In Jeep: Eight Decades from Willys to Wrangler, automotive writer Patrick R. Foster chronicles Jeep

vehicle design and production from the beginning of World War II to present. Beginning with the Jeep as a crucial component of the American war fleet, Foster expertly recounts the corporate shifts, financial struggles and successes, close calls, and, above all, the enduring machines that have carried Jeep from the early 1940s to its triumphant role as a modern-day embodiment of American perseverance. More than 200 color and black-and-white historical photos and period advertisements complement his expertly written narrative of Jeep's entire history, now updated to include five years of new model editions and prototypes, its return to the pickup market, and recent stunning marketplace successes. The resulting book reminds us that sometimes the road less traveled was just waiting for the right truck.

Our Patchwork Nation-Dante Chinni 2011-10-04 A revolutionary new way to understand America's complex cultural and political landscape, with proof that local communities have a major impact on the nation's behavior-in the voting booth and beyond. In a climate of culture wars and tremendous economic uncertainty, the media have often reduced America to a simplistic schism between red states and blue states. In response to that oversimplification, journalist Dante Chinni teamed up with political geographer James Gimpel to launch the Patchwork Nation project, using on-the-ground reporting and statistical analysis to get past generalizations and probe American communities in depth. The result is Our Patchwork Nation, a refreshing, sometimes startling, look at how America's diversities often defy conventional wisdom. Looking at the data, they recognized that the country breaks into twelve distinct types of communities, and old categories like "soccer mom" and "working class" don't matter as much as we think. Instead, by examining Boom Towns, Evangelical Epicenters, Military Bastions, Service Worker Centers, Campus and Careers, Immigration Nation, Minority Central, Tractor Community, Mormon Outposts, Emptying Nests, Industrial Metropolises, and Monied Burbs, the authors demonstrate the subtle distinctions in how Americans vote, invest,

shop, and otherwise behave, reflect what they experience on their local streets and in their daily lives. Our Patchwork Nation is a brilliant new way to debate and examine the issues that matter most to our communities, and to our nation.

1989 "The complete technical manual and troubleshooting guide for motorhomes, travel trailers, fifth wheels, folding campers, truck campers, and vans"--Notes.

The Shadow Factory-Howard Brenton 2018-02-08 Autumn 1940.

The Battle of Britain rages. Southampton is home to our only hope of victory: the Spitfire. But, in one of many devastating raids on the town, the Luftwaffe destroy the Woolston Supermarine Spitfire factory. The Government requisitions local businesses to use as shadow factories - but meets resistance. Fred Dimmock won't give up his family laundry for anyone. As the Dimmocks, and other families, struggle to keep control of their lives and livelihoods, a story of chaos, courage and community spirit emerges. Telling the remarkable story of how a city triumphed over adversity, Howard Brenton's play The Shadow Factory opened Southampton's brand-new theatre, NST City, in 2018, directed by Nuffield Southampton Theatres' Director Samuel Hodges.
