Dictionary of Civil Engineering-Jean-Paul Kurtz 2004-09-14 I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

How to Repair Your Scooter-James Manning Michels 2012-07-14 DIVGas prices go up and down, but mostly up, and that trend is likely to continue for the foreseeable future. Because of this, people are increasingly turning to motor scooters. In addition to being entertaining to ride and providing extreme mobility, scooters often travel up to 100 miles for each gallon of gasoline burned. How to Repair Your Scooter is divided into chapters according to the scooter's various mechanical systems. For example, brakes, suspension, intake, exhaust, etc. each have their own chapter. Each chapter begins with a simple explanation of how the subsystem works and what its strengths and weaknesses are. The chapter then takes the reader through a series of common maintenance and repair projects, each illustrated with step-by-step sequential photography with captions. Content covers two- and four-stroke scooters and is relevant for machines from all markets. /div

Geography of the Gaze-Renzo Dubbini 2002-04-15 Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the “view,” explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes; how the “picturesque” system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, Geography of the Gaze will interest everyone from scientists to artists.

The New Kinship-Naomi R. Cahn 2013-01-07 No federal law in the United States requires that egg or sperm donors or recipients exchange any information with the offspring that result from the donation. Donors typically enter into contracts with fertility clinics or sperm banks which promise them anonymity. The parents may know the donor’s hair color, height, IQ, college, and profession; they may even have heard the donor’s voice. But they don’t know the donor’s name, medical history, or other information that might play a key role in a child’s development. And, until recently, donor-conceived offspring typically didn’t know that one of their biological parents was a donor. But the secrecy surrounding the use of donor eggs and sperm is changing. And as it does, increasing numbers of parents and donor-conceived offspring are searching for others who share the same biological heritage. When donors, recipients, and “donor kids” find each other, they create new forms of families that exist outside of the law. The New Kinship details how families are made and how bonds are created between families in the brave new world of reproductive technology. Naomi Cahn, a nationally-recognized expert on reproductive technology and the law, shows how these new kinship bonds dramatically exemplify the ongoing cultural change in how we think about family. The issues Cahn explores in this book will resonate with anyone—and everyone—who has struggled with questions of how to define themselves in connection with their own biological, legal, or social families.

Amazed and Confused-Heather Zempel 2014-03-11 Most people have prayed for something or someone in earnest, seeking God’s will, only to be left confused by God’s response. Sometimes we ask, “Why would a good God allow bad things to happen to good people?” In Amazed and Confused, Heather Zempel tackles this question head-on by exploring the book of Habakkuk. When the prophet Habakkuk prayed that God would bring change to the backsliding nation of Israel, this issue came to the forefront. Habakkuk begged God for revival and that He would turn the hearts of faithless people back to Him. God’s answer to Habakkuk was, “Take a look at the nations and watch what happens! You will be shocked and amazed” (1:5, The Voice). The vision God gave Habakkuk was one of warfare and exile. How do you respond when God answers your prayers in a way that seems out of line with his character and promises? Amazed and Confused proceeds systematically through the book of Habakkuk, exploring the prophet’s prayer, God’s response, and the prophet’s journey from confusion to worship. This interactive Bible study is the perfect choice for those who are hurting and confused about God’s responses to their prayers. Features include: Helpful guidance on a question without an easy answer Practical tools for studying the Minor Prophets Easy-to-understand, accessible language

Bells of Shangri-La-Parimal Bhattacharya 2019-02-10 A brilliant work which perfectly captures the thrill and intrigue of espionage and adventure in the high Himalaya. Almost all of the Himalaya had been mapped by the time the Great Game—in which the British and Russian Empires fought for control of Central and Southern Asia—reached its zenith in the latter half of the 19th century. Only Tibet remained unknown and unexplored, zealously guarded and closed off to everyone. Britain sent a number of spies into this forbidden land, disguised as pilgrims and wanderers, outfitted with secret survey equipment and not much else. These intrepid explorers were tasked with collecting topographical knowledge, and information about the culture and customs of Tibet. Among the many who were sent was Kinthup, a tailor who went as a monk's companion to confirm that the Tsangpo and the Brahmaputra were the same river. In an arduous mission that lasted four years, Kinthup had many adventures—he was even sold as a slave by the monk—before he returned, having succeeded, only to find that the officers who had sent him, and the family he left behind, were all dead. Sarat Chandra Das, a schoolmaster, also went on a clandestine mission. He came back in two years, having compiled extensive data and carrying a trove of ancient manuscripts and documents. He went on to become a renowned Tibetologist and Buddhist scholar. All the people who had helped and hosted him in Tibet were either imprisoned or put to death. Bells of Shangri-La brings to vivid life the journeys and adventures of Kinthup, Sarat Chandra Das and others, including Eric Bailey, an officer who was part of the British invasion of Tibet in 1903, and who later followed in Kinthup's footsteps to the Tsangpo. Weaving biography with precise historical knowledge, and the memories of his own treks over some of the trails covered by these travellers, Parimal Bhattacharya writes in the great tradition of Peter Hopkirk and Peter Matthiessen to create a sparkling, unprecedented work of non-fiction.
