Egg Consumption and Human Health- 2018-01-11 The purpose of this Special Issue, "Egg Consumption and Human Health," is two-fold: 1) to address the lack of effect of eggs in increasing heart disease risk (this discussion will be based on what is known from epidemiological analysis and clinical interventions) and 2) to focus on the role of eggs in protecting against chronic disease. Eggs are more than just a cholesterol-containing food. They possess numerous nutritional benefits. This Special Issue will discuss eggs as a source of high-quality protein for individuals across the life spectrum, as a substantial source of choline (a known neurotransmitter involved in cognitive function), and as a source of highly bioavailable lutein and zeaxanthin (two carotenoids well-recognized for their major role in protecting against age-related macular degeneration and cataracts, as well as for their antioxidant and anti-inflammatory properties). Finally, the potential of incorporating eggs for weight loss interventions, due to their low glycemic index and their satiety effects, will also be discussed.

African Landscapes-Michael Bollig 2009-06-12 Landscape studies provide a crucial perspective into the interaction between humans and their environment, shedding insight on social, cultural, and economic topics. The research explores both the way that natural processes have affected the development of culture and society, as well as the ways that natural landscapes themselves are the product of historical and cultural processes. Most previous studies of the landscape selectively focused on either the natural sciences or the social sciences, but the research presented in African Landscapes bridges that gap. This work is unique in its interdisciplinary scope. Over the past twelve years, the contributors to this volume have participated in the collaborative research center ACACIA (Arid Climate Adaptation and Cultural Innovation in Africa), which deals with the relationship between cultural processes and ecological dynamics in Africa's arid areas. The case studies presented here come from mainly Sahara/Sahel and southwestern Africa, and are all linked to broader discussions on the concept of landscape, and themes of cultural, anthropological, geographical, botanical, sociological, and archaeological interest. The contributions in this work are enhanced by full color photographs that put the discussion in context visually.
