The speech was prepared as the presidential address for the annual conference of a Hindu reformist group Jat-Pat Todak Mandal, on the ill effects of caste in Hindu society. Castes of Mind-Nicholas B. Dirks 2011-10-09 When thinking of India, it is hard not to think of caste. In academic and common parlance alike, caste has become a central symbol for India, marking it as fundamentally different from other places while expressing its essence. Nicholas Dirks argues that caste is, in fact, neither an unchanged survival of ancient India nor a single system that reflects a core cultural value. Rather than a basic expression of Indian tradition, caste is a modern phenomenon--the product of a concrete historical encounter between India and British colonial rule. Dirks does not contend that caste was invented by the British. But under British domination caste did become a single term capable of naming and above all subsuming India's diverse forms of social identity and organization. Dirks traces the career of caste from the medieval kingdoms of southern India to the textual traces of early colonial archives; from the commentaries of an eighteenth-century Jesuit to the enumerative obsessions of the late-nineteenth-century census; from the ethnographic writings of colonial administrators to those of twentieth-century Indian scholars seeking to rescue ethnography from its colonial legacy. The book also surveys the rise of caste politics in the twentieth century, focusing in particular on the emergence of caste-based movements that have threatened nationalist consensus. Castes of Mind is an ambitious book, written by an accomplished scholar with a rare mastery of centuries of Indian history and anthropology. It uses the idea of caste as the basis for a magisterial history of modern India. And in making a powerful case that the colonial past continues to haunt the Indian present, it makes an important contribution to current postcolonial theory and scholarship on contemporary Indian politics.

Ants Among Elephants-Sujatha Gidla 2017-07-18 A Wall Street Journal Top 10 Nonfiction Book of 2017 A Publishers Weekly Best Book of 2017 A Shelf Awareness Best Book of 2017 "Ants Among Elephants is an arresting, affecting and ultimately enlightening memoir. It is quite possibly the most striking work of non-fiction set in India since Behind the Beautiful Forevers by Katherine Boo, and heralds the arrival of a formidable new writer." —The Economist The stunning true story of an untouchable family who become teachers, and one, a poet and revolutionary Like one in six people in India, Sujatha Gidla was born an untouchable. While most untouchables are illiterate, her family was educated by Canadian missionaries in the 1930s, making it possible for Gidla to attend elite schools and move to America at the age of twenty-six. It was only then that she saw how extraordinary—and yet how typical—her family history truly was. Her mother, Manjula, and uncles Satyam and Carey were born in the last days of British colonial rule. They grew up in a world marked by poverty and injustice, but also full of possibility. In the slums where they lived, everyone had a political side, and rallies, agitations, and arrests were commonplace. The Independence movement promised freedom. Yet for untouchables and other poor and working people, little changed. Satyam, the eldest, switched

allegiance to the Communist Party. Gidla recounts his incredible transformation from student and labor organizer to famous poet and founder of a left-wing guerrilla movement. And Gidla charts her mother's battles with caste and women's oppression. Page by page, Gidla takes us into a complicated, close-knit family as they desperately strive for a decent life and a more just society. A moving portrait of love, hardship, and struggle, *Ants Among Elephants* is also that rare thing: a personal history of modern India told from the bottom up.

The Persistence of Caste-Anand Teltumbde 2010 While the caste system has been formally abolished under the Indian constitution, according to official statistics, every 18 minutes a crime is committed in India on a member of the dalit caste. This book explodes the myth that caste is a feudal relic, and argues that it has been well assimilated by both capitalist India and globalising India.

Western Foundations of the Caste System-Martin F rek 2017-07-07 This book argues that the dominant descriptions of the 'caste system' are rooted in the Western Christian experience of India. Thus, caste studies tell us more about the West than about India. It further demonstrates the imperative to move beyond this scholarship in order to generate descriptions of Indian social reality. The dominant descriptions of the 'caste system' that we have today are results of originally Christian themes and questions. The authors of this collection show how this hypothesis can be applied beyond South Asia to the diasporic cultures that have made a home in Western countries, and how the inheritance of caste studies as structured by European scholarship impacts on our understanding of contemporary India and the Indians of the diaspora. This collection will be of interest to scholars and students of caste studies, India studies, religion in South Asia, postcolonial studies, history, anthropology and sociology.

The Spiritual Imperative-Lawrence H. Taub 2011-05 Copernicus and Galileo's sun-centered model of the solar system gave us our view of space. Newton and Einstein's mechanical and electromagnetic models of the universe gave us our view of nature. Can the human condition be captured with a similarly universal model? Author Lawrence H. Taub believes so, and he develops three of them age, sex, and caste to reveal the deeper currents of history. The models presented in *The Spiritual Imperative* clarify the past, explain the present, and help anticipate the future. Taub uses these models to make insightful forecasts of future discontinuities that answer the major questions facing us today. Some of his predictions include: a regional political-economic block formed in the Far East and what this will mean to the world an alliance between the U.S. and Russia and how this will develop Israeli-Palestinian peace leading to a Pan-Semitic Union that will make the Middle East one of two main world centers of economic, political, and spiritual power in the mid-twenty-first century the replacement of technology with religion and spirituality as the main growth market in the twenty-first century *The Spiritual Imperative* provides insight into where human civilization has been and where it's going.

Japan's Invisible Race-Hiroshi Wagatsuma 2021-01-08 Modern Japanese share a myth to the effect that they harbor in their midst an inferior race less "human" than the stock that fathered their nation as a whole. These pariahs, numbering more than two million, are segregated by caste just as firmly as the Negro is in the United States. The present volume, to which several Japanese and American social scientists have contributed, offers an interdisciplinary description and analysis of this strangely persistent phenomenon, inherited from feudal times. Its main thesis is that caste and racism are derivatives of identical psychological processes in human personality, however differently structure they may be in social institutions. It finds that what it terms status anxiety, related to defensively held social values, leads to a need to segregate disparaged parts of the population on grounds of innate inferiority. Until the time of their official emancipation in 1871, the so-called eta were distinguished visibly by their special garb. Today few clues to their identity are visible; yet, they remain a distinguishable, segregated segment of the population and bear inwardly, in a psychological sense, the stigma resulting from generations of oppression. This volume traces the story of the outcasts in complete detail--their origin, their stormy post-emancipation history, and their present leftist political significance. Large populations of outcasts live in urban ghettos within the major cities of south-central Japan. In some of these metropolitan centers they comprise up to 5 percent of the population but contribute 60 to 65 percent of unemployment and relief roles. They have periodic trouble with the police; they manifest a delinquency rate more than three times that of the ordinary population; their children do poorly in school; they are subject to various forms of job discrimination; and few marriages are successfully consummated across the caste barrier. Some try to escape their past identity by becoming prostitutes or by entering the underworld. Those who survive discrimination to achieve status in society either live in fear of exposure [if they are "passing"] or overtly maintain their identity in proud isolation. Some who live in rural communities have achieved equal economic status with their neighbors but not full social acceptance. In their theoretical closing discussion the authors offer a challenging critique of Marxian class theory in introducing the concept of "expressive" exploitation--that is, the psychological use of a subordinate group as a repository of what is disavowed by the values of a culture in a caste society--as distinct in form and function from the "instrumental" economic or political exploitation of subjected minorities in class societies. The Truth About Us-Sanjay Chakravorty 2019-05-07 `India?has an information space packed with numerous sources and agents ? from politicians and activists to profiteers and extortionists ? all competing for attention and legitimacy in a growing information market? Whom does one believe?? The political manipulation and simplification of information about a dizzyingly complex society have fashioned certain `truths? about India. These truths have resulted in the creation of major religious and caste identities, which have been the defining features of the country?s politics and history for over 200 years. An unsparing study of how this situation has come about, The Truth about Us explores answers to crucial questions: Is India a homogenous Hindu nation sprinkled with minorities, or a pluralistic, heterogeneous one? Is our knowledge of the inequalities in our society founded on facts or perceptions? What are the real origin stories of India?s social categories, and how are they being constructed and challenged today? At a time when India is in the throes of an existential debate, convulsed by contesting claims over identity and history, Hindutva and Dalit consciousness, nationalism and freedom of speech, and the rights and realities of minorities, this deeply provocative book is urgent reading for every thinking Indian.
