The Derivative Action in Asia-Dan W. Puchniak 2012-06-28 This in-depth comparative examination of the derivative action in Asia provides a framework for analysing its function, history and practical application and examines in detail how derivative actions law works in practice in seven important Asian jurisdictions (China, Hong Kong, India, Japan, Korea, Taiwan and Singapore). These case studies allow an evaluation of a number of the leading Western comparative corporate law and governance theories which have come to define the field over the last decade. By debunking some of these critically important theories, this book lays the foundation for an accurate understanding of the derivative action in Asia and a re-examination of the regulation of the derivative action around the world.

Corporate Governance in Asia-Bruce Aronson 2019-01-17 Provides a comparative overview of corporate governance frameworks and practices in major Asian countries.

A Case for Shareholders' Fiduciary Duties in Common Law Asia-Ernest Lim 2019-07-31 Reconceptualises the general meeting, controlling shareholders and institutional investors as fiduciaries in four leading common law Asian jurisdictions.

Legal Innovations in Asia-John O. Haley 2014-10-31 Expert scholars from around the world offer a history of law in the region while also providing a wider context for present-day Asian law. The contributors share insightful perspectives on comparative law, the role of courts, legal transplants, intelle

Independent Directors in Asia-Dan W. Puchniak 2017-11-02 The rise of the independent director in Asia is an issue of global consequence that has been largely overlooked until recently. Less than two decades ago, independent directors were oddities in Asia's boardrooms. Today, they are ubiquitous. Independent Directors in Asia undertakes the first detailed analysis of this phenomenon. It provides in-depth historical, contextual and comparative perspectives on the law and practice of independent directors in seven core Asian jurisdictions (China, Hong Kong, India, Japan, Singapore, South Korea, Taiwan) and Australia. These case studies reveal the varieties of independent directors in Asia, none of which conform to its original American concept. The authors develop a taxonomy of these varieties, which provides a powerful analytical tool for more accurately understanding and effectively researching independent directors in Asia. This new approach challenges foundational aspects of comparative corporate governance practice and suggests a new path for comparative corporate governance scholarship and reform.

Business Leaders and Leadership in Asia-Ying Zhu 2017-10-02 The quality of its business leadership is a key issue for the future development of Asia's economies. Although Asia's economies have grown spectacularly in recent decades, they are currently facing increasing challenges. This book explores the current state of business leaders and leadership in Asia. It demonstrates that there is no single model of Asian business leadership, and that Western models often do not fit easily alongside Asian cultural values. It discusses how relatively developed Asian economies - Japan, Korea, Taiwan and Singapore, and former socialist economies - China and Vietnam - all have different types of business leadership challenges at present. The book concludes by assessing how business leadership in Asia is likely to develop in future.

Managing Financial and Corporate Distress-Charles Adams 2010-12-01 A World Bank, International Monetary Fund, and Brookings Institution publication More than three years have elapsed since the East Asian financial crisis erupted, threatening economic and financial stability in the region and beyond. Although many of the region's economies have since staged a remarkable turnaround, much additional restructuring and reform is needed. Managing Financial and Corporate Distress: Lessons from Asia, stands out from other works on the East Asian crisis by moving beyond macroeconomic assessments to offer an institutional treatment of the microeconomic aspects of the corporate and bank restructuring. Contributors draw on their practical, hands-on expertise in various aspects of finance to provide complementary perspectives on how best to set in place strong and responsive institutions that might be able to resolve and avoid future crises in other emerging markets.

Global Securities Litigation and Enforcement-Pierre-Henri Conac 2018-11-30 Global Securities Litigation and Enforcement provides a clear and exhaustive description of the national regime for the enforcement of securities legislation in cases of misrepresentation on financial markets. It covers 29 jurisdictions worldwide, some of them are important although their law is not well known. It will be an invaluable resource for academics and students of securities litigation, as well as for lawyers, policy-makers and regulators. The book also provides a comprehensive contribution debate on whether public or private enforcement is preferable in terms of development of securities markets. It will appeal to those interested in the legal origins theory and in comparative securities law, and shows that the classification of jurisdictions within legal families does not explain the differences in legal regimes. While US securities law often serves as a model for international convergence, some of its elements, such as securities class actions, have not been adopted worldwide.

The Anatomy of Corporate Law-Reinier Kraakman 2009-07-23 This is the long-awaited second edition of this highly regarded comparative overview of corporate law. This edition has been comprehensively updated to reflect profound changes in corporate law. It now includes consideration of additional matters such as the highly topical issue of enforcement in corporate law, and explores the continued convergence of corporate law across jurisdictions. The authors start from the premise that corporate (or company) law across jurisdictions addresses the same three basic agency problems: (1) the opportunism of managers vis-à-vis shareholders; (2) the opportunism of controlling shareholders vis-à-vis minority shareholders; and (3) the opportunism of shareholders as a class vis-à-vis other corporate constituencies, such as corporate creditors and employees. Every jurisdiction must address these problems in a variety of contexts, framed by the corporation's internal dynamics and its interactions with the product, labor, capital, and takeover markets. The authors' central claim, however, is that corporate (or company) forms are fundamentally similar and that, to a surprising degree, jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues. This book explains in detail how (and why) the principal European jurisdictions, Japan, and the United States sometimes select identical legal strategies to address a given corporate law problem, and sometimes make divergent choices. After an introductory discussion of agency issues and legal strategies, the book addresses the basic governance structure of the corporation, including the powers of the board of directors and the shareholders meeting. It proceeds to creditor protection measures, related-party transactions, and fundamental corporate actions such as mergers and charter amendments. Finally, it concludes with an examination of friendly acquisitions, hostile takeovers, and the regulation of the capital markets.

India and Nuclear Asia-Yogesh Joshi 2018-11-01 India's nuclear profile, doctrine, and practices have evolved rapidly since the country's nuclear breakout in 1998. However, the outside world's understanding of India's doctrinal debates, forward-looking strategy, and technical developments are still two decades behind the present. India and Nuclear Asia will fill that gap in our knowledge by focusing on the post-1998 evolution of Indian nuclear thought, its arsenal, the triangular rivalry with Pakistan and China, and New Delhi's nonproliferation policy approaches. Yogesh Joshi and Frank O'Donnell show how India's nuclear trajectory has evolved in response to domestic, regional, and global drivers. The authors argue that emerging trends in all three states are elevating risks of regional inadvertent and accidental escalation. These include the forthcoming launch of naval nuclear forces within an environment of contested maritime boundaries; the growing employment of dual-use delivery vehicles; and the emerging preferences of all three states to employ missiles early in a conflict. These dangers are amplified by the near-absence of substantive nuclear dialogue between these states, and the growing ambiguity of regional strategic intentions. Based on primary-source research and interviews, this book will be important reading for scholars and students of nuclear deterrence and India's international relations, as well as for military, defense contractor, and policy audiences both within and outside South Asia.

Saving Lives, Buying Time-Institute of Medicine 2004-10-09 For more than 50 years, low-cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections. Today, however, these drugs no longer work against the deadliest form of malaria that exists throughout the world. Malaria deaths in sub-Saharan Africa are currently just over one million per year are rising because of increased resistance to the old, inexpensive drugs. Although effective new drugs called artemisinins are available, they are unaffordable for the majority of the affected population, even at a cost of one dollar per course. Saving Lives, Buying Time: Economics of Malaria Drugs in an Age of Resistance examines the history of malaria treatments, provides an overview of the current drug crisis, and offers recommendations on maximizing access to and effectiveness of antimalarial drugs. The book finds that most people in endemic

countries will not have access to currently effective combination treatments, which should include an artemisinin, without financing from the global community. Without funding for effective treatment, malaria mortality could double over the next 10 to 20 years and transmission will intensify.

Pinocchio, the Tale of a Puppet-Carlo Collodi 2011-02 Pinocchio, The Tale of a Puppet follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the log shouts out, "Don't strike me too hard!" Frightened by the talking log, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy. Pinocchio, The Tale of a Puppet is a novel for children by Carlo Collodi is about the mischievous adventures of Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinocchio. It includes 40 illustrations.

Transforming Corporate Governance in East Asia-Curtis Milhaupt 2008-08-18 Over the past ten years, the corporate governance environment in East Asia has undergone a significant transformation. The Asian Financial crisis, together with Japan's long economic malaise, undermined confidence in the corporate structures, governance practices, and regulatory oversight of firms in the region. Since that time, each of the countries in the region has been a hotbed of legislative, judicial, and market activity in the realm of corporate governance. This book takes stock of the most important recent corporate governance changes in the region and the challenges still to be overcome. The contributors pursue this objective, not by describing laundry lists of legal reforms and problems, but by focused in-depth legal analysis on specific issues facing the separate systems in the wake of - sometimes in spite of - the voluminous reforms and market changes of the past decade. Written by the leading corporate law scholars and policy advisors in East Asia and some of the most renowned scholars of comparative corporate governance in the United States, the papers are methodologically united in their careful attention to the impact, and limitations, of legal reforms on corporate governance in East Asia today.

Asia Before Europe-K. N. Chaudhuri 1990 This book explores the dynamic interaction between economic life, society and civilisation in the regions around and beyond the Indian Ocean during the period from the rise of Islam to 1750. Within a distinctive theory of comparative history, Professor Chaudhuri analyses how the identity of different Asian civilisations was established. He examines the structural features of food habits, clothing, architectural styles and housing; the different modes of economic production; and the role of crop raising, pastoral nomadism, and industrial activities for the main regions of the Indian Ocean. In an original and perceptive conclusion, the author demonstrates how Indian Ocean societies were united or separated from one another by a conscious cultural and linguistic identity. However, there was a deeper structure of unities created by a common ecology, technology, technology of economic production, traditions of government, theory of political obligations and rights, and a shared historical experience. His theory enables the author to show that the real Indian Ocean was an area that extended historically from the Red Sea and the Persian Gulf to the sea which lies beyond Japan.

Herbal and Traditional Medicine-Lester Packer 2004-08-30 Responding to the increased popularity of herbal medicines and other forms of complementary or alternative medicine in countries around the world, this reference reviews and evaluates various safety, toxicity, and quality-control issues related to the use of traditional and herbal products for health maintenance and disease prevention and treatment. With over 3,550 current references, the book highlights the role of herbal medicine in national health care while providing case studies of widely used herbal remedies and their effects on human health and wellness and the need for the design and performance of methodologically sound clinical trials for the plethora of herbal medicines.

Innovative Buddhist Women-Karma Lekshe Tsomo 2013-09-05 Combines the voices of scholars and practitioners in analysing Buddhist women's history. 26 articles document the lives of women who have set in motion changes within Buddhist societies, with analyses of issues such as gender, ethnicity, authority, and class that affect the lives of women in traditional Buddhist cultures and, increasingly, the west.

Mapping Out the Research-policy Matrix-Germán Solinís 2011 Social science research provides not only abstract, conceptual knowledge about society but also concrete, instrumental knowledge. It enables us to take action to recompose the world we live in. However, this book rejects narrow and simplistic conceptions of research use and its impact on policy-making, to embrace a more complex approach to seeing and dealing with social science. In the paradigm of "evidence-based policy", "evidence" is understood in its broad sense as information that helps form policies. Nonetheless, within current practices and discourse, it is not clear what "information" is, what is really meant by "evidence", and how it can be obtained objectively. The book draws on papers presented at the International Forum on the Social Science-Policy Nexus, where experts examined current practices and problems in areas such as social policy, migration, urban policies and globalisation. The Forum set a precedent in terms of dialogue between researchers and policy-makers. The authors contribute to enriching and elucidating the most common conceptualisations of the research-policy nexus. They represent a rich diversity of views, although most agree that an effective strategy to enhance social science-policy linkages should be underpinned by a theoretical and methodological framework that takes into account the interplay of different social actors.

Handbook of ICC Arbitration-Thomas H. Webster 2014 Handbook of ICC Arbitration provides expert analysis of the whole process of using and adhering to the ICC Arbitration Rules. It examines close up the diverse issues that can occur during an arbitration and hosts essential information related to arbitration on an international level with reference to published and unpublished awards and procedural orders, as well as to many decisions of national courts.

Introduction to Modern Economic Growth-Daron Acemoglu 2008-12-15 Introduction to Modern Economic Growth is a groundbreaking text from one of today's leading economists. Daron Acemoglu gives graduate students not only the tools to analyze growth and related macroeconomic problems, but also the broad perspective needed to apply those tools to the big-picture questions of growth and divergence. And he introduces the economic and mathematical foundations of modern growth theory and macroeconomics in a rigorous but easy to follow manner. After covering the necessary background on dynamic general equilibrium and dynamic optimization, the book presents the basic workhorse models of growth and takes students to the frontier areas of growth theory, including models of human capital, endogenous technological change, technology transfer, international trade, economic development, and political economy. The book integrates these theories with data and shows how theoretical approaches can lead to better perspectives on the fundamental causes of economic growth and the wealth of nations. Innovative and authoritative, this book is likely to shape how economic growth is taught and learned for years to come. Introduces all the foundations for understanding economic growth and dynamic macroeconomic analysis Focuses on the big-picture questions of economic growth Provides mathematical foundations Presents dynamic general equilibrium Covers models such as basic Solow, neoclassical growth, and overlapping generations, as well as models of endogenous technology and international linkages Addresses frontier research areas such as international linkages, international trade, political economy, and economic development and structural change An accompanying Student Solutions Manual containing the answers to selected exercises is available (978-0-691-14163-3/\$24.95). Asia Business Law Review- 2001

Asian Corporate Governance-Toru Yoshikawa 2018-03-22 This Element aims to achieve three objectives. First, it explores some key institutional characteristics of several Asian economies that are relevant to corporate governance practices. Second, it reviews corporate governance codes or rules in those economies and examines levels of requirements in terms of formal rules. Third, this Element looks at recent trends related to corporate governance such as executive compensation and a proportion of independent directors on boards of large listed firms.

Causation and Counterfactuals-John David Collins 2004 A collection of important recent work on the counterfactual analysis of causation.

Murambi-Boubacar Boris Diop 2006 A novel about the 1994 slaughter of nearly a million Rwandans.

Liability of Corporate Groups and Networks-Christian A. Witting 2018-01-11 What happens when a corporate subsidiary or network company is unable to pay personal injury victims in full? This book sets out to tackle the 'insolvent entity problem', especially as it arises in cases of mass wrongdoing such as those involving asbestos exposure and defective pharmaceuticals. After discussing the nature of corporate groups and networks from the perspectives of business history, organisation studies, and social theory, the book assesses a range of rules and proposed rules for extending liability for personal injuries beyond insolvent entities. New proposals are put for an exception to the rule of limited liability and for the development of a flexible new tort based on conspiracy that encompasses not only control-based relationships but also horizontal coordination between companies. The book concludes with a general discussion of lessons learned from debates about extended liability and provides guidelines for the development of new liability rules.

The Restoration of Borobudur-Unesco 2005 This publication traces the history and restoration of Chandi Borobudur, a Buddhist temple built over 1,000 years ago on the island of Java, Indonesia which was successfully restored during 1973-1983 and listed as a World Heritage Site in 1991. It covers the various aspects of the process, including the long and painstaking task of logging the position of the stones, the studies that revealed the underlying sources of decay, and the important archaeological finds that provided clues to the temple's spiritual past; and includes many of the original drawings and photographs taken from the restoration project archives.

Principles of the Law of Restitution in Singapore-Hang Wu Tang 2019 "The law of restitution is a major branch of private law which is not well understood. This

is the first book dedicated to the law of restitution in Singapore providing an analysis of the principles of the law of restitution with reference to two distinct parts, namely, unjust enrichment and restitution for wrongs. The prevention of unjust enrichment as an independent legal principle, capable of founding causes of action, gained currency as an independent branch of the common law in Singapore only in the 1990s. This book introduces readers to the central concepts and controversies in the law of restitution, focusing on unjust enrichment and restitution for wrongs as organising themes. Leading decisions in Singapore and other Commonwealth jurisdictions are used to explain the fundamental concepts in the law of restitution" -- Back cover.

The Foundations of Anglo-American Corporate Fiduciary Law-David Kershaw 2018-06-30 This book explores the foundations and evolution of modern corporate fiduciary law in the United States and the United Kingdom. Today US and UK fiduciary law provide very different approaches to the regulation of directorial behaviour. However, as the book shows, the law in both jurisdictions borrowed from the same sources in eighteenth- and nineteenth-century English fiduciary and commercial law. The book identifies the shared legal foundations and authorities and explores the drivers of corporate fiduciary law's contemporary divergence. In so doing it challenges the prevailing accounts of corporate legal change and stability in the US and the UK.

Solar Detoxification-Unesco 2003 Solar detoxification, an innovative process of water treatment using solar technology, is ready for practical application after a decade of research and development. This is of great significance as 70 per cent of the world's population currently lives within the 'sun belt', where sustainable solar technologies are feasible--a proportion due to increase in the future. Divided into two parts, the first part addresses the theory and fundamentals of water decontamination using solar energy. This prepares the reader for the second part of the book, which addresses practical applications and engineering processes. Although the book targets university students and post graduates it can also be read by any professional or technician as all subjects are treated in depth, with scientific rigor, but are also attractively presented with a profusion of pictures and graphics. No specific previous knowledge is necessary.

Dear Chairman-Jeff Gramm 2016-02-23 A sharp and illuminating history of one of capitalism's longest running tensions--the conflicts of interest among public company directors, managers, and shareholders--told through entertaining case studies and original letters from some of our most legendary and controversial investors and activists. Recent disputes between shareholders and major corporations, including Apple and DuPont, have made headlines. But the struggle between management and those who own stock has been going on for nearly a century. Mixing never-before-published and rare, original letters from Wall Street icons--including Benjamin Graham, Warren Buffett, Ross Perot, Carl Icahn, and Daniel Loeb--with masterful scholarship and professional insight, Dear Chairman traces the rise in shareholder activism from the 1920s to today, and provides an invaluable and unprecedented perspective on what it means to be a public company, including how they work and who is really in control. Jeff Gramm analyzes different eras and pivotal boardroom battles from the last century to understand the factors that have caused shareholders and management to collide. Throughout, he uses the letters to show how investors interact with directors and managers, how they think about their target companies, and how they plan to profit. Each is a fascinating example of capitalism at work told through the voices of its most colorful, influential participants. A hedge fund manager and an adjunct professor at Columbia Business School, Gramm has spent as much time evaluating CEOs and directors as he has trying to understand and value businesses. He has seen public companies that are poorly run, and some that willfully disenfranchise their shareholders. While he pays tribute to the ingenuity of public company investors, Gramm also exposes examples of shareholder activism at its very worst, when hedge funds engineer stealthy land-grabs at the expense of a company's long term prospects. Ultimately, he provides a thorough, much-needed understanding of the public company/shareholder relationship for investors, managers, and everyone concerned with the future of capitalism.

California Official Reports- 2006

Edible Insects-Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Power, Networks and Violent Conflict in Central Asia-Idil Tunçer-Kılavuz 2014-06-27 When the five Central Asian republics gained independence from the Soviet Union in 1991, expectations of violent conflict were widespread. Indeed, the country of Tajikistan suffered a five-year civil war from 1992 to 1997. The factors that the literature on civil wars in general and on the Tajikistan civil war in particular cites as the causes of war were also present in Uzbekistan - but this country had a peaceful transition. Examining this empirical puzzle by isolating the crucial factors that caused war to break out in Tajikistan but not Uzbekistan, this book applies a powerful comparative approach to the broader question of why civil wars occur. Based on fieldwork in both countries, it challenges many common explanations of civil war both generally and in Tajikistan in particular. This includes highlighting the importance of elites' power perceptions, which have their origins in the interaction of structural-, process-, and network-related variables. Without examining these interactions, macro-structural explanations alone cannot explain the occurrence of civil war in one country and its absence in another. Applying the insights of bargaining theories of war from the literature on international relations to the civil war in Tajikistan, this book will be of interest to students of violent conflict, civil wars, Central Asia and Asian Politics.

Aviation Law and Drones-David Hodgkinson 2018-05-16 The aviation industry is being transformed by the use of unmanned aerial vehicles, or drones - commercially, militarily, scientifically and recreationally. National regulations have generally failed to keep pace with the expansion of the fast-growing drone industry. Aviation Law and Drones: Unmanned Aircraft and the Future of Aviation traces the development of aviation laws and regulations, explains how aviation is regulated at an international and national level, considers the interrelationship between rapidly advancing technology and legislative attempts to keep pace, and reviews existing domestic and international drone laws and issues (including safety, security, privacy and airspace issues). Against this background, the book uniquely proposes a rationale for, and key provisions of, guiding principles for the regulation of drones internationally - provisions of which could also be implemented domestically. Finally, the book examines the changing shape of our increasingly busy skies - technology beyond drones and the regulation of that technology. The world is on the edge of major disruption in aviation - drones are just the beginning. Given the almost universal interest in drones, this book will be of interest to readers worldwide, from the academic sector and beyond.

The Supreme Wisdom of the Upaniṣads-Klaus G. Witz 1998 This book attempts to let the universal Upanisadic knowledge and experience of Divinity and reality emerge from the original texts and make it accessible to a broader western oriented audience. The book is in text commentary format and uses the method of p Enforcement of Corporate Governance in Asia- 2007 Over the past few years, most Asian jurisdictions have substantially revamped their laws, regulations and other corporate governance norms. However, enforcement remains a significant challenge and "an unfinished agenda". This publication offers a unique snapshot of how corporate governance is being enforced in Asia. It provides policy makers, judges, investors, board members and stakeholders with cases studies and analysis that illustrate how regulators deal with enforcement in practice.

Future Foods-Heimo Mikkola 2017-10-04 It is anticipated that by 2050 we will have nine billion people to feed-how can we manage? As scarcities of agricultural land, water, forest, fishery and biodiversity resources, as well as nutrients and nonrenewable energy are foreseen, insect rearing is one solution for food and feed security in the future. In this book, we have nine chapters ranging from mushroom, insect, and earthworm farming to smart packaging and 3D printing of future foods. However, because of their biological composition, several issues should be considered, such as microbial safety, toxicity, palatability, and the presence of inorganic compounds. Specific health implications ought to be kept in mind especially if mushrooms, earthworms, or insects are reared on waste products. Allergies induced through insects' ingestion also deserve attention. A possible HACCP plan has been described considering pre-requirements in insect production and transformation.

Shareholder Derivative Litigation-Ralph C. Ferrara 2013-08-28 Written for both the expert and the novice, this book not only reviews the legal framework for derivative actions but also provides a practical guide to the application of legal principles. Shareholder Derivative Litigation: Besieging the Board reviews each of the legal doctrines relevant to derivative actions, including the demand and standing requirements, potential board responses to demands, the use of special litigation committees, procedural issues in derivative litigation and the business judgment rule's application to derivative litigation. This comprehensive legal study features an up-to-date listing of state derivative action statutes and rules, plus analysis of other significant developments, such as the effect of the Dodd-Frank Wall Street Reform and Consumer Protection Act on shareholder derivative litigation and recent case law concerning the demand requirement and attorneys' fees. It also delivers a wealth of useful working tools, including an easy to follow flow chart, relevant code sections and model forms.

Dodd-Frank Wall Street Reform and Consumer Protection Act-

Diversity in Unity: Visions from Psychology and Behavioral Sciences-Amarina Ashar Ariyanto 2017-11-09 The book highlights both the challenges and opportunities in the field of psychology and behavioral sciences, with an emphasis on identifying practical implications for professionals, educators and administrators, and researchers in Asia and Pacific regions. Societies in the said regions have experienced massive changes to their social system, changes that are endured by societies worldwide, such as those related to globalization, new technologies, and new norms regarding respect for individual diversity and well-

being. Although the changes offer a wealth of new opportunities, they also act as potential sources of tension and apprehension. The book discusses the state-of-the-art topics, on critical issues, in various sub-fields of psychology and the behavioral sciences, such as Clinical Psychology, Child & Developmental Psychology, Industrial & Organizational Psychology, Experimental Psychology, Social Psychology, and Educational Psychology.
