Neurobiology of Chemical Communication-Carla Mucignat-Caretta 2014-02-14 Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species

and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

The Queen-Josh Levin 2019-05-21 Winner of the National Book Critics Circle Award in Biography In this critically acclaimed true crime tale of "welfare queen" Linda Taylor, a Slate editor reveals a "wild, only-in-America story" of political manipulation and murder (Attica Locke, Edgar Award-winning author). On the South Side of Chicago in 1974, Linda Taylor reported a phony burglary, concocting a lie about stolen furs and jewelry. The detective who checked it out soon discovered she was a welfare cheat who drove a Cadillac to collect ill-gotten government checks. And that was just the beginning: Taylor, it turned out, was also a kidnapper, and possibly a murderer. A desperately ill teacher, a combat-traumatized Marine, an elderly woman hungry for companionship -- after Taylor came into their lives, all three ended up dead under suspicious circumstances. But nobody -- not the journalists who touted her story, not the police, and not presidential candidate Ronald Reagan -- seemed to care about anything but her welfare thievery. Growing up in the Jim Crow South, Taylor was made an outcast because of the color of her skin. As she rose to infamy, the press and politicians manipulated her image to demonize poor black women. Part social history, part true-crime investigation, Josh Levin's mesmerizing book, the product of six years of reporting and research, is a fascinating account of American racism, and an exposé of the "welfare queen" myth, one that fueled political debates that reverberate to this day. The Queen tells, for the first time, the fascinating story of what was done to Linda Taylor, what she did to others, and what was done in her name. "In the finest tradition of investigative reporting, Josh Levin exposes how a story that once shaped the nation's conscience was clouded by racism and lies. As he stunningly reveals in this "invaluable work of nonfiction," the deeper truth, the messy truth, tells us something much larger about who we are (David Grann, #1 New York Times bestselling author of Killers of the Flower Moon).

On Chapel Sands-Laura Cumming 2019-07-04 **BBC RADIO 4 BOOK OF THE WEEK** 'A modern masterpiece' Guardian Uncovering the mystery of her mother's disappearance as a child: Laura Cumming, prize-winning author and art

critic, takes a closer look at her family story. In the autumn of 1929, a small child was kidnapped from a Lincolnshire beach. Five agonising days went by before she was found in a nearby village. The child remembered nothing of these events and nobody ever spoke of them at home. It was another fifty years before she even learned of the kidnap. The girl became an artist and had a daughter, art writer Laura Cumming. Cumming grew up enthralled by her mother's strange tales of life in a seaside hamlet of the 1930s, and of the secrets and lies perpetuated by a whole community. So many puzzles remained to be solved. Cumming began with a few criss-crossing lives in this fraction of English coast - the postman, the grocer, the elusive baker - but soon her search spread right out across the globe as she discovered just how many lives were affected by what happened that day on the beach - including her own. On Chapel Sands is a book of mystery and memoir. Two narratives run through it: the mother's childhood tale; and Cumming's own pursuit of the truth. Humble objects light up the story: a pie dish, a carved box, an old Vick's jar. Letters, tickets, recipe books, even the particular slant of a copperplate hand give vital clues. And pictures of all kinds, from paintings to photographs, open up like doors to the truth. Above all, Cumming discovers how to look more closely at the family album - with its curious gaps and missing persons - finding crucial answers, captured in plain sight at the click of a shutter. 'A moving, many-sided human story of great depth and tenderness, and a revelation of how art enriches life' Sunday Times

The Mapmaker's Wife-Robert Whitaker 2008-11-05 In the early years of the 18th century, a band of French scientists set off on a daring, decade-long expedition to South America in a race to measure the precise shape of the earth. Like Lewis and Clark's exploration of the American West, their incredible mission revealed the mysteries of a little-known continent to a world hungry for discovery. Scaling 16,000foot mountains in the Peruvian Andes, and braving jaguars, pumas, insects, and vampire bats in the jungle, the scientists barely completed their mission. One was murdered, another perished from fever, and a third-Jean Godin-nearly died of heartbreak. At the expedition's end, Jean and his Peruvian wife, Isabel Gramesón, became stranded at opposite ends of the Amazon, victims of a tangled web of international politics. Isabel's solo journey to reunite with Jean after their calamitous twenty-year separation was so dramatic that it left all of 18th-century Europe spellbound. Her survival-unprecedented in the annals of Amazon exploration-was a testament to human endurance, female resourcefulness, and the power of devotion.Drawing on the original writings of the French mapmakers, as well as his own experience retracing Isabel's journey, acclaimed writer Robert Whitaker weaves a riveting tale rich in adventure, intrigue, and scientific achievement. Never before told, The Mapmaker's Wife is an epic love story that unfolds against the backdrop of "the greatest expedition the world has ever known."
